In article <4m5u2p$bcg@cville-srv.wam.umd.edu> ham@w3eax.umd.edu (Scott Rosenfeld NF3I) writes:
>Discriminates against? Last I heard, a license was a PRIVILEGE,
>not a right. Like a driver's license. If you can't read well
>enough to read a road sign, you can't pass the test, ergo you
>won't be allowed to drive.

That's the *myth* the tribalist collectivist Statists would like you to swallow. It is false. As a member of the public, you have an ownership *right* in any public commons, like the airwaves or the public roadways. This right derives from the doctrine of the Common Heritage of Mankind, the doctrine on which commons regulation is based. The State can only place limits on your exercise of your ownership right to the extent necessary to preserve order and protect you or others from harm you might cause. This is the Social Contract between the government and the governed. The granting of special privilege is an illegitimate abuse of State power under the doctrines on which our Republic was founded.

And BTW, you don't have to be literate in order to pass a driver's license exam. That's why safety related road signs have distinctive colors and shapes, so that they can be interpreted without the need to read printed text. English doesn't even have to be your native language in order to get a driver's license. The exam questions will be interpreted for you if you cannot read them. The State is concerned with whether you know to stop when you see a red octagon, not with whether you can read the word STOP printed on it.

Hi Tom, what if you were required to pass a motorcycle riding test to get
a license to drive a car even though you never intended to ride a motorcycle?
Let's at least get the analogy correct.

> class.

Yeah and so? Just as a data point. I'm looking at getting a no-code tech
license. Of course, I have no interest what-so-ever in talking to anyone
over radio. I want to play with spread-spectrum and radio controlled
Airplanes, maybe with telemetry. Do you really want to force me to learn
code for this?

I'll say the same thing I said on the ham group. Why do you want to limit
your membership via a pointless skill? If you really want to do something
useful make the test a non-gimmee. Currently all the test answers are
published. If you want evidence of actual interest make someone work out
antenna specs. Make someone design a simple oscillator. Do something of
real world value, not some bogus, "Well when I did it" type of pointless
initiation. Get a grip. If morse is your hobby, and you want to reserve
parts of the spectrum for those that have demonstrated proficiency in
morse that is fine. Don't force someone who wants to set up a computer
repeater to learn a skill that is of absolutely no use to him. I get the
feeling that the "must learn code" group falls into two catagories: the
aforementionned "I did it so you should" and those that are afraid if
real testing is implemented they would fall on their faces.

>>...I also couldn't afford much of a "rig" ... a HTX-202...

The HTX-202 is a solid performer, David. Do not let anyone tell you differently.

>>...Can someone tell me how long a battery should last?

Everyone's experiences are different, of course. But 30 minutes is, indeed, too short for one of those batteries.

Have you "deep cycled" it? I mean, let it run ALL THE WAY DOWN - then charged it overnight? Did that change the batter life?

If you have a voltmeter, check the output of the wall charger. Maybe it is not up to par - although when they blow, they usually go completely dead.

If not, take it back to your local Radio Shack and obtain a replacement. They carry them as a stock item. If out of stock, have 'em pull one from another HTX-202 or HTX-404.

Your unit will also accept Icom CM-8 / BP-8 batteries! Periphex makes compatibles...so do other reputable companies. It is best to have an "intelligent" charger. But that adds another 90-100 bucks to your investment.

Please consider joining (a) your local Amateur Club and (b) the ARRL. Your local club will be invaluable to you - with assistance, guidance, and used equipment(!). ARRL Membership carries MANY benefits...one of which is an excellent insurance policy for your equipment.

Let us know how the battery situation goes, please!

Wonderful. How many thousands of scanners are there in SoCal? One wonders what impression these scanner folks have of amateur radio when they tune into your "...absolute toilet" of a repeater. Even the news media has scanners running day and night. Many off duty police officers and firemen are scanner buffs.

So much for the "Amateur's ability of creating good will..." (see Part 97)

Source record: 226563

The 146.00 signal is a design problem. Most all 2036s I've seen have it; however, with varying intensities.

I resolved (not solved!) mine by working with shielding and lead dress. Follow the manual precisely with the leads and be sure all the ground points are good, clean, and tight. Avoid the desire to "bond" everything together as ground loops can occur.

I don't use 146.00 (our local repeater's input is 146.01) out of courtesy to others. As for 146.52, it's as quiet as can be. One other signal appears at 144.00 which isn't a problem either.

It takes time but I think you can "fix" it. If the kit was assembled with less care than you would have done, it may be worth your time to clean up potential trouble spots.

I've been using mine since 1978 with only two "down times". The first was a burned-out panel lamp and the other was the 11-volt regulator. Since 1985, it has been on continuously in 1200-bps packet service and looks to be good for another XXXX years.

Good luck. I'd be interested in hearing how you make out.

>it's a Radio Shack, or do I have a bad battery?

Unless you're doing something to really consume the battery (like
running the radio with open squelch and the volume turned all the way
up) that you should be getting a lot more life out of the battery.
You might try putting alkalines in the dry battery pack and see how
long they last. I'd expect your radio should run for at least 8 (and
probably more) hours of listening on a set of those. That would help
establish that the radio's current consumption is about normal. It's
also possible that the circuitry in the radio that measures the
battery condition is in error. Try seeing how long it takes before
the RX audio becomes distorted. If it's shortly after the indicator
comes on, then the battery is probably shot - otherwise the radio's
sensing circuit is probably at fault.

Hope that helps!

73, Bob

depends on your talk to listen ratio, volume setting (having to have lots of audio drains the battery faster than low levels..), if the light is on, etc. can also be a sensitive low battery flag (set too high...)

Another "hero" with feet of clay....?

Krenkel did indeed great stuff in maintaining communications from the ice after their ship was trapped by the polar ice, crushed and sunk. However, it appears that politics were at work and if Stalin has been prepared to ask for USA help, the stranded party could have been rescued in a matter of days, rather than the nearly two months it took before the Russians could effect their own rescue.

His fame also rests on being one of the team of people at the North Pole (UPOL1) from 1937 and that wx reports from the station helped in the two Russian transpolar flights, also in 1937. These were the first ever transpolar flights and attracted great kudos for USSR.

These stories have now been "debunked"! There was _no_ Polar station and the transpolar flights, far from being non-stop, were an amazing deception. The Russian ANT-25 aircraft had nowhere near the required range so were shipped out to islands off Alaska (the Alexander Archipelago). A "set-piece" take off in Moscow, misleading radio

reports and then the "pre-shipped" AN-25 intercepting the path of the supposed non-stop flight and completing it, flying on to Vancouver, Oregon. (The first flight was to WA, the second to San Jacinto)

This is all brought to light in a book called "Russia's Shortcut To Fame" published in 1987.

Is there a list or FAQ of all ham related listservers? I'd be interested in any for the gear that I use. Right now I need some help with a JRC amplifier and I also have a general interest in keeping up with information on Icom all-mode sets and Sommer antennae.

Regards,

HAMFEST/COMPUTERFEST CALENDAR 1996 - NORTHERN ILLINOIS
last updated April 24, 1996 |

o Please report additions or changes to Bob Parnass,
AJ9S, office phone: (708)979-5414, electronic mail: |
parnass@bell-labs.com. Thanks to Dennis Dale and ARRL
for providing information.

MAY

May 5 (Sun), Sandwich, IL - DeKalb Hamfest. Sandwich Fair-
grounds, intersection of Suydam and Gletty Roads, just north
of Rt. 34. Admission $6 at gate, free parking. Talk-in on
146.73 MHz and 146.52 MHz.

May 11 (Sat) - Kankakee Area Radio Society, Peotone, IL.
Will County Fairgrounds, I-57 to exit 327 east. Admission
$5 at gate, free parking. Kids under 12 free. Info: Willis
Bowser, K9IFO, 1210 North Riverside Dr., Momence, IL 60954-
3452, tel. 815-472-2079

May 26 (Sun), Chicago, IL - Chicago ARC Hamfest. DeVry
Institute of Technology, 3300 N. Campbell. 8 AM - 3 PM,
setup at 6 AM. Admission $5 at door, free parking. Kids
under 12 free. Talk-in 147.255, 444.825. Info, call |
(312)545-3622 or (312)486-6823.

May 26 (Sun) - Computer Central, College of DuPage (see
notes at the end of this article).

JUNE

June 2 (Sun), Princeton, IL - Starved Rock RC. Bureau *
County Fairgrounds. Admission $5, free parking. Info: Deb-
bie Burton, N9DRU, 1153 Union St., Marseilles, IL 61341-
1710, tel. 815-795-2201 Usually an excellent hamfest, with
sellers from Illinois, Iowa, and Wisconsin.

June 9 (Sun), Granite City, IL - Egyptianfest '96, Egyptian |
Radio Club. Granite City campus of Belleville Area College, |
1/2 mile south of I-270 on Ill Hy 203 at Maryville Road. |
8:00am to 1:00pm CDT. Annual hamfest, computer fair and |
fleamarket. VE session, food and drink, indoor dealer / |
exhibitor area. Talk-in 146.79 MHz. Info: Egyptian Radio |

Club, P.O. box 562, Granite City, IL 62040, call Bill Dusen- |
bery N9OQK at (618) 398-1456. |

June 30 (Sun), Wheaton, IL - Six Meter Club of Chicago. |
DuPage County Fairgrounds. Gates open 6 AM. Admission $5
at gate. Talk-in on 146.97 MHz (107.2 PL) or 146.52 MHz. |
Tickets available from Mike Corbett, K9ENZ, 606 So. Fenton |
Ave, Romeoville IL 60446. 24 hour hotline for info= (708) |
442-4961. Good hamfest which moved from Santa Fe Speedway |
to Wheaton this year.

Jun 30 (Sun) - Computer Central, College of DuPage (see
notes at the end of this article).

JULY

Jul 13 (Sat), Oak Creek, WI - S. Milwaukee ARC Swapfest.
American Legion Post 434, Shepard Ave. Admission $5.
Talk-in 146.52 MHz. Info (414)762-3235.

Jul 14 (Sun), Sugar Grove, IL - Fox River Radio League.
Waubonsee Community College, Rt. 47 at Harter Rd. VEC test-
ing. Admission $5 at gate, free parking. Info: Diana
WD9API, (708)293-7485. Fair, small to mid-sized hamfest.

Jul 27 (Sat), Pecatonic, IL - Rockford ARA Hamfest. Winne-
bago County Fairgrounds. VEC testing at 1st Baptist Church,
7th & Washington. Admission $5. Kids 10 and under free.
Info, Marsha Plasters (815)399-9233 or Diana White
(815)645-8545.

Jul 28 (Sun) - Computer Central, College of DuPage (see
notes at the end of this article).

AUGUST

August 18 (Sun) - DuPage ARC, Stickney, IL. DuPage ARC Ham-
fest Computer Show. Hawthorne Race Course, 3500 S. Cicero
Ave. Air conditioned exhibit hall for dealers. Outdoor
fleamarket spaces free. 8AM - 2PM. 6 AM setup. Admission
$5. Kids under 12 free. Talk in 145.25 MHz. Info: Ed
Weinstein, WD9AYR, 7511 Walnut Ave., Woodridge, IL 60517.
tel: 708-985-9256.

August 25 (Sun), Woodstock, IL - Tri-County Radio Group.
McHenry County Fairgrounds, Rt. 47. Admission $5 at gate,
free parking. Kids under 12 free. Info (voice/fax)
(708)658-1678.

August 25 (Sun) - Vermilion County ARA, Danville, IL. Info:
Gary Denison, KA9SKS, 14704 East 2750 North Rd., Danville,
IL 61834-5610. tel: 217-759-7389.

August 28 - 30 - Antique Radio Club of Illinois, Elgin, IL. RadioFest96. Holiday Inn Holidome and Convention Center, 345 River Road, Elgin, IL 60123 Ph. (708)695-5000, (847)695-5000 After 01/20/96. Info: Jeff Aulik, 1708 Parkview Ave., Rockford, IL 61107 or Carolyn Knipfel, RR 3, 200 Langhorn, Morton, IL 61550.

SEPTEMBER

September 8 (Sun) - Bolingbrook ARS, Joliet, IL. Info: Ed Weinstein, WD9AYR, 7511 Walnut Ave., Woodridge, IL 60517, tel: 708-759-7005

September 13-15 (Fri, Sat, Sun) - Peoria, IL. ARRL National Convention. Info: Ron Morgan, KB9NW, PO Box 3508, Peoria, IL 61612-3508, tel: 309-694-2649

Sep 21 & 22 (Sat & Sun), Grayslake, IL - Chicago FM Club Radio Expo. Lake County Fairgrounds. Starts 6 AM. Buildings open 8 AM. VEC testing. Info, (708)457-0966. Usually one of the best hamfests in NE IL.

Sep 29 (Sun) - Computer Central, College of DuPage (see notes at the end of this article).

NOTES - Computer Central shows

Computer Central computer shows are held at the College of DuPAGE, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 708-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm.

Does anyone know what the reason for the petitions to either amend or whatever the VANITY callsign program are all about?
I read in 73 that a couple of individuals and groups have sent in petitions that caused the delay to the start. Whats the gripe? Anyone know?

Curious. Thanks

27. Matching Paint for Kenwood TS430

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-01 00:00:00 UTC
From: jdw@apian.att.com
Message-ID: <4m7k67$95g@nntpb.cb.att.com>
Source record: 226579

Hi,
I'm trying to locate a source for paint to refinish a Kenwood TS430.
I would like to repaint the clamshell housing, since it has some
ugly stains and rust marks on it. I know that I could get the color
custom mixed thru an auto supply store or professional paint shop, but
I thought that ready mixed paint might be available. Kenwood made a
very large number of amateur radios and the standard paint was
the same greenish-gray for all of them.

Thanks and 73, John - KF2XZ

>test of obscenity and pornography in this country.

Well, one of the fundamental concepts of gov't in this country is that
the people are protected in some ways from arbitrary imposition of
"community standards" - the bill of rights was appended to the
constitution to protect us all from the tyranny of the majority by
proscribing some oppressive practices no matter how many people want them.
So you aren't allowed to exclude from the community, or its activities,
those whose existence you don't want to explain to your children...
>
>Hams should define each other based on their common interest in radio
>communication - and leave the special interest groups out of it.
>
Indeed. Unfortunately there are lots of folks who will try to enforce
their idea of "community standards" by excluding those different from
themselves. So, since bigots choose exclusion they aren't in a good
position to complain of the result if they themselves are excluded...

Probably we should discontinue this topic here as it isn't really closely
related to ham radio in particular - maybe there was something to the
tradition of avoiding discussions of religion, politics, etc. on the air...

>would hope to be one of the first plaintiffs to sign on.

I think I'll try this for my driver's license test. "I refuse to take the test, you have to give me a license, IT'S NOT FAIR! DISCRIMINATION!"

Seems to me someone has missed the point of testing. The only persons this discrimnates against are those who can't pass the test. THAT'S THE POINT OF TESTING.

If you don't like it, change or eliminate the test. I think we can agree that elimnating it would be a bad idea.

[976]

Newsline report number 976 for release on Friday, April 26, 1996 to follow.

The following is a QST

From coast to coast, ham radio heros highlight this weeks Newsline report number 976 coming your way right now!

(*****
NORTH CAROLINA TORNADOES

Tornadoes and powerful thunderstorms pound the southeastern U.S., with amateur radio operators using their skills and resources to help warn of approaching danger. This time, it's the Raleigh, North Carolina suburb of Zebulon, hit head on by a series of twisters around dinner time April 15th. While there was heavy damage, amazingly only a few minor injuries were reported. And hams are getting part of the credit for that amazing outcome.
Gary Pearce, KN4AQ, is a member of the Wake Co. Amateur Radio Emergency Service. He says the Raleigh Skywarn Network first went in service around noon on the 15th with hams staying on the air for 13 hours straight. During that time, members of Raleigh's Skywarn storm spotter network had their hands full. Just before 6pm, a ham reported seeing rotation starting in a lowered cloud base. Moments later another report that a tornado is on the ground, just south of Zebulon. Nearby hams confirm the sighting. Seconds later, the National Weather Service issues a warning. But it's not over yet. During the next half hour, Pearce says hams reported several additional funnel clouds and tornadoes, following nearly the same path as the first.
The Raleigh Skywarn network's reputation is well known among local news organizations. Eyewitness reports of the tornadoes as they were being relayed via amateur radio were monitored and broadcast by Raleigh television stations that gave many people the time they needed to take cover.
In the aftermath of the tornadoes, hams again found their services needed. Pierce says telephone circuits in Zebulon were knocked out and cellular channels were overloaded. Emergency management officials asked for hams to help provide communications between the county's Emergency Operations Center and several sites in Zebulon.

The tornadoes that hit Zebulon seldom make the news, because no one was killed. But Gary Pearce says to look a little deeper and see WHY only a few minor injuries occurred when Zebulon got hit April 15th. The fact that the human toll wasn't higher that night is thanks in part to people like the hams serving their community in Raleigh, North Carolina.

(*****
13 YEAR OLD HERO

13 year old Vince Bernotas III, N2WXE, is a real life ham radio hero. Vince is an active member of the Burlington County New Jersey ARES / RACES. And on March 17th, he turned out to be in the right place at the right time. Just ask one of the participants in a 100 mile dirt bike race. Vince and his parents were among those helping provide communications for the 1996 Sandy Lane Motorcycle Enduro. This endurance race takes place in the most barren part of southern New Jersey.
When a rider hit a tree a mile from Vince's checkpoint, Vince assisted in locating the paralyzed accident victim. Upon learning that the rider might be suffering from a fractured back, Vince coordinated response of an ambulance and emergency vehicles, including a rescue helicopter.
Now if all this sounds routine, hold on a minute. It might have been routine, had there not been a catastrophic radio failure in both the ambulance and the state police car. Vince Bernotas saved the day by forwarding information about the patient's location and condition to net control Doug McCray, K2QWQ. McRay then relayed the information to rescue service dispatchers. As a result of Vince Bernotas' quick thinking, the injured rider is recovering.

(*****
RESCUE AT SEA

Another dramatic rescue involving ham radio took place the following day. That's when radio enthusiast Bob Karon, AA6RK, of Encino, California, was checking out repairs and modifications to his vintage Collins radio equipment. Around midnight, while working a Florida station, Karon heard a Canadian yacht sending a distress call. The Cambria had run aground and reported it was sinking in the Caribbean, 150 miles southwest of Jamaica. The signal was weak and fading. Still, the Cambria's skipper, Kenneth Cunningham, was able to tell Karon that the yacht was almost on its side with its mast and antenna nearly in the water.
Upon getting the vessel's location, Bob Karon called the U.S. Coast Guard. But the Cambria's weak signal was too weak for the Coast Guard to hear. Rescuers were able to contact a merchant vessel 25 miles away from the Cambria.
Bob Karon, who's a freelance musician, stayed on the air nearly 3 hours, serving as the only connection between the merchant ship and the Cambria. The merchant vessel finally arrived and sent a lifeboat to the Cambria, successfully rescuing all four crew members.
Karon has received special thanks for his efforts. Captain Robert C. Gravino is Chief of the U.S. Coast Guard's Search and Rescue Branch. He has cited Karon for his professional and humanitarian actions assisting

mariners in distress. Ham radio helped made it possible.

(*****
RFI DISAPPOINTMENT

A major disappointment to anyone hoping the FCC could help resolve interference problems involving televisions, radios and stereo systems. The Commission says it cannot help because the cause of the interference is the design or construction of the products. And that, the FCC says, is not a violation of any commission rules.
The Commission does say that its Compliance and Information Bureau will continue to take appropriate enforcement action where it has been determined that the interference is caused by violations of the Communications Act or FCC's rules or policies.
In the meantime, the Commission says that basic consumer information about interference solutions is now available on the Internet. Just check in to the FCC Compliance and Information Bureau's home page. The information is also available through the FCC's FAX on demand service. The number to call is 202, 418- 2830. You'll need to request document number 69-04.

(*****
DAYTON '96 CHANGES

Major changes are coming to the Dayton Hamvention in May. One of the biggest is that a number of forums and seminar sessions are moving off-site from the Hara Arena. Ken Allen, KB8KE, General Chairman of Hamvention '96 says there are good reasons for this:

"We have had a few difficulties with one of the forum rooms that we have been using in the past. A rather crowded room. It has been warm and uncomfortable and that has been with the weather that has been somewhat less warm than we would like. With the move to May and also trying to accommodate getting better facilities for some of the forums, we are in the process of moving a few of these forums to the nearby Meadowdale High School where they, over the last number of years have held the FCC testing and the alternate activities." KB8KE

One of the forums changing location is the Media Forum produced and hosted by Newsline. It is set for the Meadowdale High School Auditorium on Saturday, May 18th at 9:30 a.m. We'll have more information about the Hamvention next week.

(*****
NEW VA SM

Chris Wright, KD4TZN, of Rocky Mount, Virginia, has been appointed Virginia Section Manager by ARRL Field Services Manager Rick Palm, K1CE, has appointed Assistant Section Wright replaces Edward Dingler, N4KSO, of Chilhowie, Virginia, who resigned March 22 due to increased business commitments.

(*****
VANITY DELAY

You've been waiting for vanity call signs, and you still don't have one. So what's the holdup? Several petitions are still preventing the FCC from opening the first gate of the ham radio vanity call sign program.
One petition asks the Commission to again amend the vanity call sign rules. This time, the request is to permit survivors of Extra class licensees to get a late parent's call sign without having to upgrade, but only if the applicant has held an Advanced class license for at least 25 years and if the parent has been dead for more than two years.
The FCC has granted a reconsideration request from David Popkin, W2CC. Popkin is asking to limit relatives to obtaining the call sign of deceased relatives that were of the same or lower operator class held by the applicant.
Popkin now wants the FCC to fine tune the rule's wording. He wants the Commission to make it clear that if no call sign on an applicant's list of choices is available the FCC refund the fee. He also asks that the Commission not classify the original call sign vacated by the applicant as a vanity call sign requiring a fee for future renewals. Finally, Popkin asks that renewal applications be accepted on the license expiration date, not just prior to the date.
And the Hill Country Amateur Radio Club in Kerrville, Texas, has its own ideas on the vanity call sign program. The Club wants the Commission to allow club stations issued licenses after March 24th, 1995, to apply for the call signs of deceased members under Gate 1A. Their club's call sign, KC5OJZ, was issued May 5th, 1995.
Finally, there's the request by the Southern California Repeater and Remote Base Association. That group says that in the process of revising the vanity call sign rules, the FCC unintentionally introduced inequities. The Association cites the Commission's denial of an ARRL reconsideration request to limit an application for a vanity call sign to those available in the applicant's call sign district.
The Association wants the Commission to change the procedures for Gate 1 filings. Specifically, to allow for placing a deceased family members' higher grade call sign in reserve for two years to give an applicant time to upgrade. Concerns have been expressed that the Commission failed to provide a 2 year upgrade period as the vanity call sign program commences.

(*****
WARC 99

In international news, ARRL president Rod Stafford, KB6ZV, has appointed the members of a committee to advise the League's Board of Directors on policies for the 1999 World Radiocommunication Conference. The Board established the Committee during its 1996 annual meeting. The group's first task is to define the process by which membership input should be solicited and the opinions of the membership objectively determined. The Committee is expected to complete its work by mid December.

(*****
NEW GB2RS BROADCAST

The Radio Society of Great Britain reports that it initiated another new GB2RS news broadcast on Sunday, the 7th of April, covering the Telford area of the United Kingdom. The news reader is G3JKX, and the broadcast is at 12:00 hours UTC via the GB3TF 70 centimetre FM repeater on European ham radio repeater channel RB8.

(*****
KIDLINK

Also from the United Kingdoms, word that "Kidlink '96" takes place on Thursday, Friday and Saturday, the 2nd, 3rd and 4th of May. During Kidlink '96, schools across Great Britain are encouraged to put ham stations on the air so that youngsters, especially those between the ages of 10 and 15, can use amateur radio to communicate with their peers in this country and overseas.

SAREX

NASA Astronaut Shannon Lucid is making youngsters around the world very happy by talking to them from the Russian Mir space station by ham radio. Three young Indiana amateurs are among the first to talk to Lucid who is operating as R0MIR. The youngsters are identified as 11 year old Jessica Buszkiewicz, KB9KVQ, 13 year old Jimmy Buszkiewicz, KG9DL, and 15 year old Keith Price Jr, KB9MQA. Also on hand were their parents Jim Buszkiewicz, KF9EB, and Keith Price Sr, N9TJH. All are members of the Studebaker Hill Amateur Radio Club In New Carlisle, Indiana. The QSO took place on Saturday, March 30th during Mir's 7:36 AM eastern pass.

(*****
HAM ASTRONAUT TO VISIT CONNECTICUT SCHOOL

NASA Astronaut Ron Parise, WA4SIR, will put in a rare personal appearance May 16 at the Plymouth Center School in Plymouth, Connecticut. Parise flew aboard STS-67 last year and had a successful SAREX contact with students at the 600 student elementary school.
The visit by WA4SIR is a result of the efforts of Len Brown, KD1OY, who volunteers at the school. While recovering from a back injury that put him out of his regular line of work as a mechanic, he approached school administrators about Amateur Radio and the SAREX program. He brought an HF receiver along to monitor the WA3NAN SAREX broadcasts and was invited back several times.

(*****
TMRCC ALIVE

Southern California's recently formed Two Meter Repeater Coordinating Council says that its alive and well and has put out a four page newsletter that says so. According to the April issue of the TMRCC News the organization has heard from 110 out of 243 two meter repeaters known to be operating in the region. Of these, 92 responded in favor of recognizing TMRCC as the bona fide repeater coordinator while 14 indicated a preference for the long established Two Meter Area Spectrum Management Association. The other three who responded indicated that they were technically Northern

California repeaters with primary coordination from NARCC.
Steve Jensen, W6RHM, the interim president of The Two Meter Repeater Coordinating Council of Southern California admits that the results do not represent the majority of the 243 repeaters listed for the region in the latest ARRL Directory. He does say that the response does show a clear preference toward TMRCC among those who chose to vote.
The next TMRCC meeting is slated for Saturday, May the 11th in Los Angeles. This will be an election meeting with a talk in station guiding everyone in on 146.535 MHZ simplex. It will be interesting to see how many of the 92 repeaters backing TMRCC send delegates to the conclave.

(*****
ANTIQUE WWW

The Antique Wireless Association is now on the Internet. According to James Frederick, K2GBR, the AWA home page features a picture of the building housing both the Antique Wireless Association's, Radio Communication Museum and the Bloomfield, New York, Historical Society. Bruce Kelley, W2ICE, is the museum's curator. The museum is devoted to research, preservation and documentation of the history of wireless communication. A wide range of historical communication equipment is on display, much of it still in working order. Contact them directly for the Universal Resource Locator address.

(*****
DX

In DX, that was the real Martti Laine, OB2BH that you heard operating last week as VK9XM operations from the newly established Christmas Island Casino Resort. Martti led his family team of OH2BE and OH2KNB, to a well earned DX vacation over the Easter Holidays but ham radio was not forgotten during their stay. QSL is via JA1BK.
Also, a reminder that the dates for ARRL Field Day this year are June 22nd and the 23rd. Father's Day is a week earlier on Sunday, June 16th.

(*****
HAM IN NEED

A California ham is in need and a lot of his friends are pitching in to help.

Mark Hill, KC6UGU was recently diagnosed with having a tumor 1 inch by 2 inches on the left side of his brain and growing rapidly. Mark and his wife Peggy, KD6DLM have been very active in varying facets of amateur radio, but primarily in the mountain search and rescue arena, which of coarse falls under the purview of the San Diego County Sheriffs Department which the Radio Amateurs Civil Emergency Service RACES helps to support.
In mid January, Peggy noticed Mark began slurring words and was having trouble standing upright on skis. A sport that he loved. They immediately headed to the ER where a CAT scan reveled the disturbing news.
To help Mark, the San Diego Mountain Search and Rescue Team will be putting on a benefit on May 11th, 1996 at Romona Oaks Park in Romona,

California from 10am to 3pm. There will be demonstrations put on by the search and rescue team and representatives will be on hand from the sheriffs department, the Radio Amateurs Civil Emergency Service and also the sheriffs helicopter will be available for demonstrations.
If you would like to help Mark, please call the San Diego Mountain Search and Rescue Team at (619) 270-7047 for further information.

Newsline joins with the rest of the nations ham radio community in wishing Mark Hill, KC6UGU, a full and speedy recovery.

Steve Coletti
bigsteve@dorsai.dorsai.org

Amateur Radio Newsline is a weekly audio service produced by Newsline,
a service of the Westlink Radio Network. Editorial comment, news
items and all other business should be directed to Bill Pasternak,
WA6ITF, Newsline's Producer and Editor-In-Chief at any of the above
addresses.

The transcribed version is produced by Dale Cary, WD0AKO from
materials provided by Newsline. and is jointly distributed to online
services and bulletin board networks by Steve Coletti and Dale Cary.

All others are asked to not post Newsline to any BBS or network
without the permission of Steve Coletti. There have been distribution
problems with many of these networks recently and posting Newsline to
an echoed conference because you haven't seen it there doesn't mean it
hasn't already been seen elsewhere. Reposting causes wasted bandwidth
and additional telephone charges to be incoured by the sysops of these
volunteer networks.

The copyright owner of The Amateur Radio Newsline is Newsline.
Permission to reuse all or part of either this written, or the audio
form requires that the item be taken in it's entirety, not be subject
to any further editing or commentary, and that full credit is given to
Newsline as the source.
```

Permission is granted to all amateurs who want to transmit the audio version in it's entirety over nets or repeaters. The text version may be used for packet distribution as long as it is sent in its entirety and the BIN header is kept intact.

NOTICE: When Newsline is transmitted in it's full form over voice or digital forms of Amateur Radio, it is recommended that the closed circut advisory be deleted. Audio, Computer, and Packet retransmissions must be made without the editing or deleting of any other part of the Newsline content. Unauthorized additional commentary to the original message is also prohibited. To do so is a violation of copyright and subjects the initiator to legal action by Newsline.

Newsline may also be excerpted for code practice transmissions, and may be used as a reference source in bulletin board discussions under acceptable Fair Use practices.

Any other use is not allowed without the expressed permission of Newsline.

>healthy for the future of the service.

This is not consistent with the calculations that I did at the time.
(Yes, I took the entire question pool, and calculated the age of every
sample, producing histograms and averages.)

The average age was in the 40's, as I recall.

It is always interesting to compare your claims with scans of the
actual database.

>If there were still only 16,000 operators, there would have been
>no need to abandon AM,

Never mind the substantial s/n advantage relative to power, the
elimination of interference from carriers at greater distance than the
modulation could be copied, etc.

Sounds familiar... I had a similar problem along with a friend on
our Kenwood TM-733A radios. We were experimenting with the "clone"
function. We cloned a fully equipped TH-78A hand-held into the TM-733A.
It seemed to work, at least partially, although the "err" display
was there at the end of cloning. The obvious trouble is that the
TH-78A has more memory slots than the TM-733A, and the TM-733A has
some extra memory-based "program" memories.

Anyway, we soon had a TM-733A that refused to boot up. None of the
reset sequences we knew would help. We too decided to erase the memory
by removing the internal battery power, which was soldered in place.
We found that we could accomplish the task by disconnecting the small
ribbon cable that connected the front panel display to the main

board. It used a pressure-type connector that squeezes itself onto
the end of the ribbon. To blank the memory, we had to leave that
ribbon disconnected for about 15 minutes or more, to allow capacitors
to discharge.

By the way, the clone trick is still usable, but you should stop
it before it reaches the last of the memory locations. It is also
a good idea to do a "partial reset - both bands" by holding down the
VFO + Power On until you hear the beep, after you finish cloning.

I can get more info on this cloning trick if you need it.

37. Re: HTX-202

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-01 00:00:00 UTC
From: lisa.keeton@prostar.com
Message-ID: <0000121F000012E5@prostar.com>
Source record: 226589

Look what was just pitched into the Electronic Void:

DA>I'm a recently got my Tech. licence. I also couldn't afford much of a
DA>"rig". So I went out and bought the Radio Shack HTX-202. Can someone
DA>tell me how long a battery should last? I haven't been doing much more
DA>then listening and it seems the battery light goes on after about 30
DA>min.'s or less. It takes ten hours to charge. I think you should be able
DA>to use the battery longer. Is this normal with all HT's, is it beacuse
DA>it's a Radio Shack, or do I have a bad battery?

Congratulations, David! Not only for earning your ticket, but for
getting a rig that's actually a good buy. It's sturdy, works well,
and gets less intermod than most HT's. As for the NiCad pack, you
are right - you can use it longer, but ONLY if you have the
Power-Save feature enabled like it says in the manual. What, you
haven't read the manual yet? Say 3 Hail Marys and 3 Our Fathers
for pennance. ;) Then go to page 31.

I really like my HTX-202 and will probably wind up getting the
404 eventually. Like, when some money falls out of the sky into
my lap... <sigh> I average about 2-5 hours a day listening; make
1-4 contacts, each less than 10 min, a day (3 min during peak hours,
it's the rule of the repeater); and my NiCad pack lasts almost a
week. The alkaline pack lasts a few days longer. YMMV.

Hope this helps!

I've had similar results with the NiCd pack on my -202. The AA pack
performs superbly, but is quite a bit more expensive. I'm really not
sure how long it lasts, since I swap the batteries around between it and
my cd player a lot, but I can get a couple hours of cd's, and 2 full (
12 hour) days of portable scanning (in power save) with intermittent
high power contacts out of a set of AA's.

Has anyone had experience with the renewable alkaline? I tried
rechargable NiCd's in it.. they didn't work too well.. then again, they
didn't work well in anything I owned.

By your logic you would be against hams that have a common interesting
in certain religions. Suppose devotees of Jehovah's Witnesses formed a
ham club. Keeping in mind that influencing others to their beliefs is
a major function in this religion, would you object to the Jehovah's
Witnesses Amateur Radio Club?

Source record: 226592

That is a good place to start! You probably will have 20 % or so of the charge still in the battery when you decide to re-charge, so there is a point for saying that 2800/600 would be sufficient. However there are also leakage currents during charging that would tend to lengthen the necessary time. The most important point is do not float charge a lead/acid battery above 2.45v per cell, at room temperature. It accellerates positive grid corrosion and shortens useful life. At -40F 2.6 is acceptable and at 140F reduce overvoltage to 2.2v/cell

41. New Hudson Division Vice Director Appointed

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-01 00:00:00 UTC
From: "Stephan M. Anderman" <sanderman@delphi.com>
Message-ID: <xrGvIM3.sanderman@delphi.com>
Source record: 226593

NEW HUDSON VICE DIRECTOR APPOINTED

Dr. Richard A. Sandell, WK6R, of Scarsdale, New York, has been appointed Vice Director of the ARRL Hudson Division. He will fill out the unexpired term of Paul Vydareny, WB2VUK, who ascended to Division Director upon the election of Stephen Mendelsohn, WA2DHF, as the League's First Vice President earlier this year.
WK6R, who lived in Argentina, was first licensed in 1956 as LU4NMC. He moved to the United States in 1961. Sandell obtained his first U.S. ham license in 1976 and was active in ARES and RACES in Stockton, California. He was a director and officer of the Stockton Amateur Radio Club and President of the North Stockton Radio Relay Club. After moving to New York, he became Newsletter Editor and Vice President of the Latin American Radio Amateurs Club of New York City, as well as President of the Hispanic American Radio Experimenters Club (CHARE) of the Tri-State area.
Since 1984, he has been an active Volunteer Examiner. He has served as Executive Director of the Board of Inter-american Examiners and was an active member and Newsletter Editor of the Northern Berkshire Amateur Radio Club (NoBARC) of Pittsfield, Massachusetts.
Richard has also served in leadership positions with the Communications Club of New Rochelle, the Westchester Emergency Communications Association, the Westchester Amateur Radio Association, the Tri State Amateur Repeater Council, and remains active in ARES and RACES in Westchester County, New York. He has been a member of the ARRL since 1976 and a Life Member since 1984, having served as a Hudson Division Assistant Director since 1987 and as an Assistant Section Manager of Eastern New York since 1990.
Currently, Dr. Sandell is the President and CEO of Aura Technology Corporation, an international trade and consulting firm. In his consulting activities, he was an advisor to the National Security Council during Operations Desert Shield and Desert Storm during the Persian Gulf Crisis. He served in the United States Army and is a decorated Vietnam Veteran. He retired from the U.S. Army Reserve with the rank of Lt. Colonel.
Richard has a Ph.D. and an MBA from Columbia University and a J.D. and LL.M. from New York University, as well as a MS in Economics from San Marcos University, and a BS in Social Science and a Law degree from the University of Buenos Aires. He has also served as a senior member of the faculties of the State University of New Jersey, Mercy College of New York, University of the Pacific, Stanford, and San Francisco State University and as a visiting faculty member of Kings College in Cambridge, England, McGill University in Montreal, Marroquin in Guatemala, Catholic University in Chile, and the University of New Zealand in Auckland.
Dr. Sandell has authored many publications ranging from philosophical studies to textbooks and is fluent in five languages. He is married to the former Phyllis H. Levinson, KD2OG, and they have three daughters: Laurie

Alyssa, N2FSO; Karyn Joy, N2FSP; and Sylvie Jennine, N2FSQ. All are active ARRL members.

I shouldn't try to speak to Lambda's motives, having no first hand
experience, but I would think that they band together for the same
sort of reasons that black amateurs form their own clubs, IE there
is real discrimination against them at social gatherings dominated
by majority populations, and so they form their own clubs as a sort
of support network.

As has been evident here, there are those in amateur radio who
have a virulent hatred for minorities, whether that minority
status is based on race or sexual preference. Others are merely
uncomfortable in the presence of people different from themselves.
In either case, this makes being a minority member of a general
club uncomfortable for the minority in question, and naturally
leads to the banding together of the minority persons in their

own club structures where the discomfort level will be less.
Or to put it in simple terms, birds of a feather tend to flock
together.

Now *on the air*, unless the subject is brought up, no one will
know the minority status of an individual. No doubt many of those
who are most vehemently against gays (or blacks) have had QSOs
with them on the air never knowing that they were talking to
someone who was a member of their pet group to hate. Only if the
subject of race or sexual orientation were to come up in the
conversation would they have a clue that they weren't talking
to one of "their kind".

Now the subject of sexuality *does* commonly arise in amateur chats,
however. Hetrosexuals make frequent references to their XYLs and children.
Gays who mention their XOMs would immediately be tagged as different.
In face to face social settings, hams (mostly male) are known to engage
in locker room type talk, and again the gay would quickly stand out as
different (unless he were closeted and attempting to hide what he is).
The heterosexual stereotypes are so ingrained in our culture that we may
not normally be conscious of them, but they would appear blatant to someone
who is different.

Now I must admit that I often find myself uncomfortable around gays,
irrational though that feeling is. I know it is really my problem and
not theirs, but my discomfort can't help but show, and make the gay
person uncomfortable as well. So it is unlikely that we would want
to share a common social club. Therefore I see the formation of
something like Lambda as a natural response to the types of social
discomfort that would exist otherwise.

In a real sense, this is segregation, and some in the gay community
want to apply the lesson of the civil rights struggle and try to
break down the barriers. But racial segregation was de jure while
the social associations we're discussing are de facto. Just as
blacks, who are now accepted de jure, still persist in choosing
voluntarily to associate with their own groups, for example the
"historically black institution" which is nothing more than a
de facto segregated school, gays may prefer to associate with
their own fellows in de facto segregated social clubs.

Ah, finally upgraded I see.

For once, I must agree with something Jeff says. The majority of
HF operators are almost certainly grey muzzled. In 1990, the average
age of US amateurs was 59. Today it is 54, but I'd suggest that is
mostly due to the generally younger code test free Techs pulling down
the average, and that the average HF amateur is now even older than 59.
So it is not at all unexpected that one of the topics of conversation
would be health related.

At HF, the amateur population is almost certainly 25 to 30 years
older than the average age of the general population. This explains
a lot about the attitude differences between these members of the
"Old Guard" and members of the general population wishing to join
amateur radio, or who have already joined amateur radio through
the Tech route. The old HF operators are a generation out of step
with society. Their social mores were set in the post-WWII era and
not in the post-Vietnam era. (Whether that's good or bad is irrelevant,
the Grim Reaper will see to it that their views pass away before those
of the newer generations.)

>OK, here's today's quiz. What happens to the larger-value resistors when
>they're connected in series?
>
>Roy Lewallen, W7EL

They have a larger voltage drop across them than the smaller valued
resistors while having the same current flowing through them, thus
they get hotter than the smaller valued resistors. Which is of course
the exact opposite of what happens with paralleled resistors. They
have the same voltage across them, but the currents distribute in
inverse proportion to their resistances, so the smaller valued resistors
get the hottest. (Kirchhoff will not be denied.)

The moral of this story is to use combinations of *equal value* resistors
to get the desired composite resistance and power rating. That way power
loss is shared equally among the resistors, IE 4 paralleled 200 ohm 1/2 watt
resistors will have a composite resistance of 50 ohms and a power rating
of 2 watts.

There is a caveat at RF, however. The stray capacitances of paralleled
resistors will add, so the composite resistance may have more capacitance
than a single larger resistor. If you series the resistances, the amount
of capacitance may be less than that of one larger resistor. Stray
inductances are a whole other can of worms.

The moral of this story is that you have to be careful when combining
resistors at RF because you may have unintended side effects.

Ever hear of a VOM? While it is *convienent* to be able to read
color codes, it is not necessary in order to do construction. In
fact, with some of the far east resistors you'll often be reaching
for the VOM to figure out what value that fucia-puce-chartreuse
resistor *really* is anyway.

But assuming you just don't *want* to build anything, there are
a number of programs on oak.oakland.edu that make use of the
Soundblaster card in your PC to decode Morse or RTTY.

: prevent ground loops and improve the ground connection.
:
: 73 Tom
:

Ok, fine, but my house just isn't set up to do that. The power entry is on one side of the house (underground feed), and the shack is on the other side. Neither can be moved, and it is impractical to run the feed line an extra 100+ feet so that it goes through the house power feed point.

I understand that there should be a lightning protector thingy on the power to the rig, and that it is grounded to the window. The problem is what to do with the house safety ground. Do I attach it to the ground window as well? If so, it there would be 2 grounds, one on each side of the house. If not, either the rig wouldn't have a safety ground (bad idea), or the rig's safety ground would be connected to a different ground reference (the house's entry) than the antenna (the antenna window) (also a bad idea).

What to do?

I would be careful about generalizations like that Gary. Although I am in the "grey muzzled" group you refer to, I am sure as hell not part of the "old guard" as you put it. I belong to a large radio club here in Oregon that is comprised primarily of very active DXer's. They even have their own SIG (special interest group) outside the club's other activities. They are almost all in their 30's and 40's.

It would be irrelevant if it wasn't constantly shoved in our faces. If
sexual orientation is the basis for forming a SIG, and labeling it
'gay' serves _no_ other purpose, then why even form one? If sexual
orientation has no meaning in Amateur Radio as you say, then why even
start a 'gay' group? You contradicted yourself.

Bob, don't worry wether it's politicaly correct or not.
There is NO OTHER REASON for starting a 'gay' group other than
soliciting participation and membership from others of the same
orientation for purposes of a sexual nature. Otherwise, there would be
no need. Plain and simple.

I posted my grip in another thread, I'll keep this one short.

Definitely use the battery save feature on the HTX-202.
Put it on 1/16 of a second and your Nicad pack will last
at least 15 hours. I left mine on all night once in the
save mode and it was still alive in the morning. Also,
I don't believe the battery save mode works while you are
scanning. Stands to reason if you think about it.

55. Where to mount mobile antennas? There's no contest!

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-02 00:00:00 UTC
From: cshustak@chester.dddv.com
Message-ID: <4mb6t7$q3v@decius.ultra.net>
Source record: 226407

Back in 1988, I owned a Chevy Station wagon, and mounted three antennas
on the roof. Performance on 2 and 220 with 5/8 verticals was very nice
even taking into account New England's hilly terrain.

When I took delivery of a new Ford Taurus company car, I decided to drill
the antennas into the trunk lid. I figured that taking down the headliner in
a new car was too much trouble.

At the same time, I switched my usage to a local repeater, and due to the
signal strength of the new machine, I didn't notice any difference between the
roof and trunk antenna mounting locations.

Last year, I switched back to the repeater system 50 miles distant,
and noticed that signal strength levels were reduced by about 50%.
I figured it probably was my 15 year old radio, and had the unit aligned.
This did not solve the problem. I checked connectors, wires, and mounts
and everything looked normal.

Just for the heck of it, I slapped a mag mount on the roof of the car,
and screwed the 5/8 Larson onto the mount. I departed for my normal commute.

Voila. Signal strengths came up 50%, and most of the flutter disappeared
from the signal. Things were back to the good old days.

MORAL:

If you are considering glass, trunk, or other strange kinds of mounts, do
yourself a favor, and compare the same antenna to a center roof mount.
You might be surprised. Remember, RF is a terrible thing to waste!

> Patrick Cook,
> What is the problem that you have against LAMBDA joining the ARRL ???

If someone makes the assertion that the League
should withdraw LAMBDA's ARRL affiliation because
homosexuality does not provide sufficient basis on which to organize a ham club,
then should the league recognize clubs that bring together young people, women,
elderly people or even Mensans based on shared traits? Being an elderly person
has nothing to do with ham radio, so maybe we should rescind QCWA's affiliation?

Who cares anyway? As long as people are polite, considerate,
and competent ham operators, who cares if they are old or young, black or white,
gay or straight, male or female? Finding a ham band full of similar folks gets boring
rather quickly.

I prefer to worry about where to place the 5/8 wave antenna on the car, rather than
be concerned about the sexual orientation of the ham on the other end of the string.

Attributations clipped because they're totally irrelevant.

>>For once, I must agree with something [...] says. The majority of
>>HF operators are almost certainly grey muzzled. In 1990, the average

>I would be careful about generalizations like that [...]

Is there some reason why this discussion is being carried on without
hard data? Every US licensee's age is right there in plain sight on
his ticket. Get a copy of a Buckmaster or a QRZ Ham Radio CD, grind
the numbers, and present your results and interpretation OR admit
you're all talking through your hats. There are too many
theoreticians and nowhere near enough experimentalists in this group.
I'm strongly reminded of the Greek philosophers who speculated about
how many teeth women had but never considered just counting them.

empirically yours,

You can get "Metal Oxide FlameProof" 2W 2% resistors for about 75 cents in onsies at most commercial (ie TV Repair) electronics suppliers.

The metal oxide is used like carbon stuff to create a resistance (Ie bulk material, sintered, etc) and have the nice "non-inductive" properties as carbon composition. But beware, you can also get FlameProofs in metal film with the spiral trim.

I built a dummy load with 4 metal oxide flameproofs, and it was useful well into UHF. I think I could have gone even higher, but I left the leads long for dissipation.

NOTE: when combining resistors for power dissipation, LEAVE ROOM between the resistors. Dissipation is spec'ed with some lead left and free air flow around the resistor!

The reason that many people will burn out a paralell combination of small resistors is that the ones in the center of the pile get REAL hot! Carbon can also act as a semiconductor, and have a negative tempco. Thus, the hottest resistor gets extra current and quickly goes into thermal runaway. Metal and metal oxides have a positive tempco, and the "small" value will get larger when hotter.

Regards,
Ed

>I didn't expect they would lost connection !
> Can anyone help ? Are there special instructions required ?

KISS does not support AX.25. It is simply a channel management and
modem management protocol. When you put the TNC in KISS mode, you
have to do the layer 2 protocol (AX.25 link layer, slip, ppp, etc)
via software running on the host computer.

In other words, it is the AX.25 layer that supported the connected
mode link. When you go into KISS, you are no longer doing AX.25 in
the TNC so the link is lost.

Seeing how this discussion has taken a satirical bent, I set my
mind to view the discussion in a different light.

After a bit of thought, I concluded that Mr. Cook might have something here.

Most of the members of most of the ham clubs in the US are heterosexuals.
Based on Mr. Cook's analysis, it became obvious that heterosexuals are
planning something. Planning to take over the world. Maybe they're
trying to indoctrinate our children to adopt a whole host of perverse acts
that heterosexuals practice with each other.

It truly is sickening to think about. After all, I have children
to protect! I say that after we ban homosexuals from ham radio, we need to
immediately follow up this act by banning heterosexuals as well.

Sorry. I couldn't resist a bit of levity.

* = New data. T index may have changed.
^ = IPS predicted T index

The IPS Monthly T-index is derived from the observed monthly median values
of foF2 for each hour at up to 40 ionospheric stations worldwide.
These records become available from IPS stations in Australia very soon after
each month, but the majority are received up to one year later.
This means that the exact observed value of the monthly T-index is not
available until some months later.

The predicted smoothed monthly T-indices are computed by using a statistical
analysis of the observed monthly T-indices for all solar cycles since 1938.
The IPS T-indices may not be updated each month but only when sufficient new
data becomes available.

==========

2. FLARES AND SHORT-WAVE FADEOUTS
DATE CLASS M CLASS X FADEOUT POSSIBLE
FLARES FLARES ON DAYLIGHT CIRCUIT
22 Apr 1 0 0438-0448 UT

2.1 Comments on Solar Activity.

Solar activity was moderate on 22 April with a M3.6/SF
flare observed at 0446UT. The X-ray flare duration was

approximately 10 minutes and a minor short wave fadeout
was observed in the Australian region association
with this event. No significant flare activity was
observed on other days.

The monthly sunspot number for April of 5.1 was the second
lowest such value in the decline of this solar cycle. The
smoothed sunspot number for October 95 was 12.5, a value
which is comparable to that observed at the lowest point
of recent solar cycles.

==========

3. GEOMAGNETIC DISTURBANCES (for Learmonth, WA)

DATE COMMENTS
12 Apr 96: Unsettled to active
14 Apr 96: Unsettled to active
17 Apr 96: Unsettled to active
18 Apr 96: Unsettled to active
19 Apr 96: Active
20 Apr 96: Unsettled to active
21 Apr 96: Unsettled to active

Moderate geomganetic activity was observed during the intervals
12, 14 and 17-20 April. Geomagnetic activity is becoming harder
to forecast because 27 day recurrent patterns are becoming
weaker and are persisting for few rotations.

==========

4. IONOSPHERIC DISTURBANCES (for Australian Region)
08 Apr 96: Blanketing sporadic E observed 04-12UT, northern Australian
region.

16-19 Apr 96: Spread F observed during local night hours, northern
Australian region. Depressions of up to 40% observed
for southern Australian region.

21 Apr 96: General depression of 15-30% was observed for all Australian
stations during the period 00-09 UT. Spread F was observed
during local night southern Australian region.

22 Apr 96: Depressed 15-30% for the period 00-10 UT, and spread F observed
during local night for southern Australian region.

23 Apr 96: Depressed 15-30% for the period 00-09 UT, all stations.

26 Apr 96: Spread F observed during local night hours, northern
Australian region.

29 Apr 96: Depressed 10-30% 01-11UT, with sporadic E during local
night, northern Australian region. Spread F observed local night
Southern Australian region.

The most significant ionospheric disturbances for the month
were observed on 19 and 21 April.

You know, this is pretty bad. Where's your conscience? Can't you just imagine grandpa out there, with some 400 ohm wire, stringing up the dipole for the old 80 meter tube set, in the snow ? Us younger hams have something to learn from these old timers, be it discipline, or theory, or whatever. Seems to me that these Older guys have given much to the hobby, and to technology as a whole. Most of what we got was handed to us on a silver platter. There were also requirements for passing the tests from novice to general, I believe, within a year of getting the former, and there were no code practice tapes, no computers, etc. The only way to get real code practice was on air, and if you had questions for the other hams, you had to be able to get your rig on the air first. Heck, most of those guys had to build their radios from kits, or from scratch. In fact, there are still hams out there who cannot afford to buy a commercial rig, and still build HF rigs that talk to the world, out of tin cans, and scrounged up RS parts. How many guys do you know who can actually do that, and actually get a QSO ? Especially on morse code ? Nowadays, things are too easy for us spoon fed amateurs as it is, and preservation of the only thing that sets us apart from the telephone types is getting tossed by the wayside. The code is a good restriction, and one that we should keep, and not only for the value that it holds, but as a subtle reminder that the priviledges were actually earned, and possibly the only time honored tradition we amateurs have these days. I for one vote to keep the code, and it's restrictions, for no more than to prove a sense of dedication to the art and hobby that owes so much to these old timers. If they don't want to learn the code, let them use Inet instead.

SB QST ARL ARLB024
ARLB024 WK6R new vice director

ARRL President Rod Stafford, KB6ZV, has appointed Richard A.
Sandell, WK6R, of Scarsdale, New York, to be the new vice director
in the Hudson Division. He fills the seat left vacant when Stephen
Mendelsohn, WA2DHF, was elected first vice president and Paul
Vydareny, WB2VUK, succeeded him as division director earlier this
year. Richard will serve through the end of the current term,
January 1, 1997.

Richard is 58 years old and an ARRL life member and has served as
Hudson Division assistant director and Eastern New York section
manager. He is president and CEO of Aura Technology Corporation,
works as an international trade economist. His wife, Phyllis, is
KD2OG. The couple's three daughters, Alyssa, Karyn and Sylvie also
hold ham tickets.

You can write him at PO Box 1367, Scarsdale, NY 10583-9367.

Commercial Radio Exams at Hosstraders

** MROP, GROL, GMDSS, Radar and Telegraph exams in Rochester NH **

** Sat. May 11th 1996 **

** The GROL and GMDSS Question pools have been revised **

The MIT Radio Exam Team will hold exams for all classes
of commercial radio license at the Hosstraders Hamfest
in Rochester NH on Saturday May 11th at 1:30 PM.

We will conduct exams for the General Radiotelephone Operators
License, the Marine Radio Operators Permit, the Global Marine
Distress and Safety Systems Maintainer and Operator Licenses, the
Radar Endorsement and the Radiotelegraph operators Certificate.

Our next commercial exam session will be held at 7:30 PM on
Wednesday May 22nd in Cambridge MA at 77 Mass Ave in
MIT's Room 1-150.

A regular schedule of exams is planned for Cambridge MA on the
penultimate Wednesday evening of each month. For more
information call Nick at 617 253 3776 (9-5).

There is a $35 examination fee. Bring the ** original ** and a
copy of any commercial license or proof of passing certificates
you want to claim credit for. Also bring 2 forms of picture
ID, a black pen and a pencil. For the Telegraph exams bring 2
passport style photos in an envelope to attach to your
application.

Copies of the question pools are available from the
Government Printing office or from W5YI at 1 800 669 9594.
This is probably the best study guide available for the
GMDSS, Radar and Telegraph exams.

* A comprehensive text book by Fred Maia and Gordon West
covering the MROP and GROL exam material is now available at
Radio Shack. A newly revised version is available directly
from National Radio Examiners (1 800 669 9594)

** The GMDSS exams (el 7 and 9) and the GROL and MROP exams
(el 1 and 3) were revised effective at the beginning of 1996.
If you plan to take an exam for any of these licenses you should
be sure to have study materials produced after September 1995.

The General Radio Telephone Operators License is required to service transmitters in the aviation, maritime and international radio services. A Maritime Radio Operators Permit is required to operate radiotelephone stations aboard ships carrying passengers for hire and certain aviation and coast stations. Large ocean going ships will be required to carry two Global Maritime Distress and Safety Systems - operator licenses. A GMDSS Maintainer License is required to service GMDSS equipment. A Radiotelegraph Operators Certificate is required to be a radio officer aboard certain large ocean going ships.

Amateur Extra Class operators may be particularly interested in obtaining a commercial telegraph license as they will receive credit for the required class code exam. Bring your original amateur license and a copy to claim this credit.

The MIT Radio Exam Team operates under the auspices of the National Radio Examiners COLEM, part of the W5YI group.

SB QST ARL ARLB025
ARLB025 Question pool news

A seven-month-old problem that had threatened to disrupt the Amateur Radio volunteer examiner program has been resolved.

In September 1995, a newly formed corporation called NCVEC Inc attempted to exert control over the Question Pool Committee (QPC) that had been formed some years earlier by the organizations that have entered into agreements with the FCC to serve as Volunteer Examiner Coordinators (VECs). By unilateral action of the new corporation and contrary to the FCC rules that require all VECs to cooperate in the maintenance of question pools, ARRL Volunteer Examiner Department Manager Bart Jahnke, KB9NM, was dismissed from the committee. Efforts by the ARRL and the FCC to gain his reinstatement were not successful until early April.

Ever since the reinstatement, QPC members have been working in good faith to resolve issues concerning decisions taken by the QPC in the seven-month period during which it was operating contrary to the rules. Those issues have now been resolved to the satisfaction of all participants. Some revisions to the previously released syllabi for written examination elements 2 and 3A, for the Novice and Technician licenses, will be announced shortly.

''We are pleased to have this matter resolved,'' said ARRL Executive Vice President David Sumner, K1ZZ. ''The other members of the QPC appear to understand that the committee is not a creature of NCVEC Inc, and that no VEC can be excluded from committee participation. It still is not clear that NCVEC Inc, acknowledges these facts. However, that is no longer a matter of concern because the FCC has affirmed that it has no relationship with NCVEC Inc, but only with the individual VECs.''

Amateur Radio volunteers have been administering and coordinating
FCC examinations for more than 12 years. The ARRL/VEC coordinates
approximately two-thirds of the examinations.

To all radio amateurs

SB QST ARL ARLB026
ARLB026 Vanity call update

Vanity call sign filing Gate 1 opens May 31!

The vanity call sign program is almost here! The FCC has announced
that Gate 1 of the vanity call sign program opens May 31, and
eligible hams may file applications on or after that date.

Under Gate 1, you can file for a previously held individual or club
call sign or for a call sign formerly held by a deceased close
relative. Specific eligibility criteria are below. To request a
vanity call sign for your primary station, you must already hold an
unexpired amateur operator/primary station license. To obtain the
former call sign of a deceased close relative, your license must be
of the proper operator class. To request a vanity call sign for a
club station, you must also hold an unexpired club station license
listing you as the trustee. Vanity call sign applicants must use FCC
Form 610-V to file.

Applicants should refer to the licensee data base to make sure the
call sign they are requesting is not already assigned. A call sign
is normally assignable two years following license expiration,
surrender, revocation, set aside, cancellation, void ab initio, or
death of the grantee. FCC Fact Sheet PR5000 Number 206-V, Amateur
Station Vanity Call Sign System, has details. For explanations of
Groups A, B, C and D and the geographic Regions, see Fact Sheet
PR-5000 #206, Amateur Station Sequential Call Sign System.

Legibility is critical! If your application is not legible, you
could experience a delay in processing, lose the opportunity to
obtain a requested call sign or even obtain a call sign different
from what you want.

Gate 1 Eligibility Criteria
```

Request by Former Holder (Primary Station): For your primary station, you may request a call sign that was previously assigned to your primary, secondary, repeater, auxiliary link, control, or space station. You may request your former call sign even though it has been unassigned for less than two years. The two-year requirement does not apply to an otherwise eligible primary station if the call sign was previously assigned to a station of the requestor. You do not have to hold a class of operator license required for the Group (A, B, C, or D) for the call sign requested. A call sign request by a former holder may be from any group in the sequential system. Your mailing address does not have to be in the region designated in the sequential system for the call sign requested. A call sign requested by a former holder may be in any region.

Request by Close Relative of Former Holder Now Deceased (Primary Station): For your primary station, you may request a call sign that was previously assigned to the primary, secondary, repeater, auxiliary link, control, or space station of your now-deceased spouse, child, grandchild, stepchild, parent, grandparent, stepparent, brother, sister, stepbrother, stepsister, aunt, uncle, niece, nephew, or in-law. You may request the former call sign of a close relative now deceased even though it has been unassigned for less than two years. Upon the death of the holder, a call sign is assignable immediately to an otherwise eligible primary station of a close relative. You must be an Amateur Extra Class operator to request a Group A call sign. You must be at least an Advanced Class operator to request a Group B call sign. You must be at least a Technician Class operator to request a Group C call sign. You must be at least a Novice class operator to request a Group D call sign. Your mailing address does not have to be in the region designated in the sequential system for the call sign requested. A call sign requested by a close relative of former holder now deceased may be in any region.

Request by Former Holder (Club Station): For the club station for which you are the license trustee, you may request a call sign that was previously assigned to that station. You may request your club station's former call sign even though it has been unassigned for less than two years. The two-year requirement does not apply to an otherwise eligible club station if the call sign was previously assigned to the club station for which the requestor is the license trustee. You do not have to hold a class of operator license required for the Group (A, B, C, or D) for the call sign requested. A call sign request by former holder may be from any group in the sequential system. Your mailing address does not have to be in the region designated in the sequential system for the call sign requested. A call sign requested by a former holder may be in any region.

A $30.00 fee is required with your FCC Form 610-V application. Payment of fees may be by check (payable to "FCC"), bank draft, money order or credit card. If paying by credit card, you must also

complete and submit FCC Form 159 with your FCC Form 610-V. Do not send cash!

Send your application package to: Federal Communications Commission, Amateur Vanity Call Sign Request, PO Box 358924, Pittsburgh, PA 15251-5924. If you do not qualify under the above eligibility standards, your application will be dismissed.

The FCC says it will announce Gate 1A in a future notice. Under Gate 1A, club station trustees may file for the former primary station call sign of a person now deceased, provided the club held a club station license on March 24, 1995.

For more information about the vanity call sign program, call the FCC Consumer Assistance Branch, 800-322-1117.

Well, Drew, the die-hard CW operators in our radio club are all in
their 30's and 40's. You may have to wait longer than you thought.

Newsgroups: rec.radio.amateur.misc
Date: 30 Apr 1996 06:39:36 -0400

I really want to know WHY homosexuals feel the need to flaunt their aberration at the rest of us.......Can anyone enlighten me without getting too emotional about it. I'm really curious about this.

"Aberration" is a loaded word, but if you replace it with "sexuality", it's because heterosexuals have been flaunting their sexuality for years, and homosexuals weren't allowed to.

Amateur radio is supposedly based on equality and a certain amount of anonymity ...."From Champions to Newsboys", remember? I don't want to start a club of hetrosexual hams or any such nonsense.....I am interested in my fellow hams as kindred souls interested in radio communications, period! I have no interest in whether they are white, black, yellow, pink, what their ethnic background is, religious beliefs, sexual interests, etc. The fact that the person has a ham license (hopefully) is good enough for me and if they share some of my radio areas of interest so much the better. After all, its hard to be judgmental if all you hear from the other person is a bunch of dits and dahs!

But there are clubs for vhf/uhf operators, DXers, traffic handlers, African-Americans, Christians, women,and people who live in particular areas. Why not homosexuals?

So I guess I just don't understand WHY homosexual hams feel they should be treated any different than anybody else - and have their own special organization based on something that has NOTHING whatsoever to do with their common interest in amateur radio. I do not judge people for their sexual proclivities but I am really curious why this group in particular feels it necessary to do everything not as a person, but as a homosexual person and at the same time forcing it on the rest of us who may find the notion unpleasant. And, quite frankly, I find it offensive and I suspect many others do too.

I sincerely hope that someone can provide me with a rational answer that will make sense to me so I can try to understand it. I'm certainly ready to try.

However, for those who would get emotional on this hot issue, please be advised that I have donned my asbestos suit and am ready for all flamers (pun intended).

>no need. Plain and simple.

Your adherence to this belief in the face of the contrary material already
posted seems unreasonable. How could one be so certain about another person's
mind or thoughts - unless one is a telepath? Surely you aren't? Wow! why
would telepaths need radio? 8-)

Anyway, IMHO this newsgroup may not be the apropriate forum for the
discussion but it seems to me that misstatements should be challenged
where they are made - and your imputation of motive to others is at
least as offensive to me as the existence of gay and lesbian groups is
to you.

As you said:
>There is a difference between hatred and intolerance. What a person
>does behind closed doors is thier own business, but when it is out in
>the open, flaunted and shoved in our faces, and the faces of our
>children, we get sick of it REAL QUICK.

And you might realize that some others react to public defamation of
gays in the same way. And so, since neither of us has a superior right
to excluseve use of any public forum it appears that we will both be
sick of it until we can find a way to mutual respect and toleration.

To all radio amateurs

SB DX ARL ARLD022
ARLD022 DX news

This week's bulletin was made possible with info provided by Chris, G4BUE, Tedd, KB8NW, the OPDX Bulletin and Contest Corral from QST. Thanks to all.

CENTRAL AFRICA, TL. Eric, F5SEC, will be active as TL8ED until the end of May. Check between 1530 and 1700z on 20 meter SSB. He sometimes operates as late as 1930z. QSL via F5SEC.

CAYMAN ISLANDS, ZF. Mike, W5ZPA, will sign ZF2PA May 19 to 25. He will be on CW, RTTY and SSB. QSL via W5ZPA.

KERMADEC ISLANDS, ZL8. ZL8RI should be on the air from May 4 to 14. Chris, ZL2DX, one of the operators, has suggested the following frequencies. For CW try 5 or 20 kHz up from the bottom of the bands. RTTY will be on 7040, 14080 and 21080 kHz. Check 1830, 3775, 7065, 14195, 18120, 21295, 24940, 28395 and 28495 kHz.

MONACO, 3A. IK1QBT, IK1HLG and IK1CJO will sign 3A/home calls May 11, 12 and 13 on all bands with CW, RTTY and SSB. QSL via home calls.

TUNISIA, 3V. YT1AD will operate from club station 3V8BB May 23 to 30. QSL via home call.

CROATIA, 9A. Prefix hunters note that 9A0CW will be in the CQWW WPX CW Contest. QSL via 9A2AJ.

WESTERN MALAYSIA, 9M2. Between 1200 and 1700z listen for 9M2JJ on 40 meter CW, while 9M2IY and 9M2/G4JVG frequent 20 meter SSB. All are on the air almost daily.

EASTERN MALAYSIA, 9M8. Chang, 9M8FC, operates 20 and 30 meter CW between 1330 and 1830z. QSL via 1995 CBA.

CLIPPERTON ISLAND, FO. Jay, WA2FIJ, has started making plans for a March 1997 operation from Clipperton. He would like to establish a self-supporting flotilla to keep transportation costs down.

MINAMI TORISHIMA, JD1. JG8NQI/JD1 is on the air from Marcus Island. Try 30 meters between 1000z and 1330z, or 20 meter SSB or CW around 0745z. QSL via JA8CJY. JD1YBJ was on 21177 kHz around 0550z over the weekend.

JAN MAYEN, JX. LA7DFA is operating as JX7DFA and is on the island for a six month stay. He has been active on SSB and RTTY. QSL via LA7DFA.

MARION ISLAND, ZS8. Chris, ZS6RI, is enroute to Marion Island where he will be until June or July 1997. He plans to be active on CW, RTTY and SSB as ZS8IR.

THIS WEEKEND ON THE RADIO. The Connecticut, Massachusetts and Texas QSO Parties, Ten Ten International Net Spring CW, Danish SSTV, MARAC County Hunters CW and ARI International DX Contests are all this weekend. Take your pick.

The hysteria is not about being homosexual, the hysteria is about
groups that promote this lifestyle.

When clubs that promote Christianity, women and longevity are banned, maybe
we could consider banning Lambda.

Hi Tom, what if you were required to pass a motorcycle riding test to get
a license to drive a car even though you never intended to ride a motorcycle?
Let's at least get the analogy correct.

73, Cecil, KG7BK, OOTC (not speaking for my employer)

I think a more nearly correct analogy would be if people were required
to take a test on the use of horses as transportation to get a driving
license.

RAC 1996 BOARD MEETING IN OTTAWA

The Board of Directors of Radio Amateurs of Canada met in Ottawa on
April 19 and 20, 1996 for its 6th meeting.

Executive

RAC Midwest Director Dave Panting, VE4EF, was elected First
Vice-President of the RAC Executive by the Board of Directors. Former First
Vice-President, Tim Ellam, VE6SH, continues to serve as a Vice-President on
the Executive and has assumed the role of General Counsel.

His primary responsibility will be to look after the legal and
regulatory affairs of RAC and its associated companies and to provide
assistance to the President on special projects and other administrative
matters.

Rick Lord, P. Eng., VE4OV, of Winnipeg, was appointed to carry out Mr.
Panting's unexpired term as Midwest Director.

Delegation

RAC Vice-President of Government Affairs Jim Dean, VE3IQ, briefed the
Board on the work of the Amateur Delegation Working Group and progress toward

incorporation of a new arm's-length, not-for-profit organization, ARAS-SARA, to provide some services to Canadian Amateurs, now performed by Industry Canada.

Finances

RAC plans to operate on a budget of approximately $365,000 in each of 1996 and 1997. Treasurer Ken Pulfer, VE3PU, told the Board that RAC cannot continue to operate as an effective organization if the only significant source of revenues is membership fees from approximately 18% of Canadian Radio Amateurs.

Membership Drive

To this end, the Board approved expenditures to conduct a membership drive later this summer and early fall. Promotional material will be mailed to all Canadian licensees, encouraging them to join RAC or to renew their memberships. Advertisers will be invited to take advantage of this mass mailing to help underwrite the considerable cost of the venture.

Life Memberships

The Board agreed to promote life memberships in RAC at $1,000, including tax, an amount which may be paid quarterly over a period of two years.

New Section

The Board agreed to create a new RAC Section for Newfoundland and Labrador in an effort to address the unique and special needs and aspirations of this area. The Maritimes Section will serve the three Maritime provinces. A Newfoundland-Labrador Section Manager will be elected in the near future.

RAC News Bulletin

As of the end of June 1996, the monthly RAC news bulletin, distributed by regular mail, e-mail, packet, Usenet and the RAC Home Page, will no longer be monthly as a matter of course, but will be produced and distributed only when warranted by news developments.

Committees and Special Assignments

The wise use of available resources is a key element in the effective management of RAC. Recognizing this, the Board of Directors has embarked on a program to share leadership, policy and planning functions of RAC through a broadly defined committee structure. The benefits are twofold:

- to spread the management of RAC among all officials utilizing combined skills and experience to direct and control policies and procedures;

- to satisfy the legal requirement that Directors exercise "hands-on" management of the enterprise.

Alongside the existing Standing Committee on Administration and Finance (chaired by Bill Gillis, VE1WG), the Board has established Standing Committees

on Membership Services (chaired by Fergus Kyle, VE3LVO), Volunteer Resources (chaired by Ken Oelke, VE6AFO), and Publications Programs (chaired by Dennis Livesey, VE7DK).

RAC Board and Executive members also participate in the following Ad-Hoc and External Joint Committees: WRC-99 and the Future of Amateur Radio, Appointment of Executive Members, the Amateur Delegation Working Group, the Canadian Amateur Radio Advisory Board, and the Call Sign Working Group.

RAC volunteers also serve on various RAC, ARRL, IARU and Radio Advisory Board of Canada committees, assignments and liaison roles. Considering RAC's limited resources and acknowledging the increasing complexity of the job it undertakes, these moves are viewed as a positive step toward bringing about effective team management of RAC.

ANNUAL GENERAL MEETING

Approximately 35 people attended the RAC Annual General Meeting at the Howard Johnson Plaza Hotel in downtown Ottawa on Sunday, April 21. President Farrell Hopwood, VE7RD, briefed those in attendance on the Board meetings and the challenges facing Amateur Radio in Canada and the world.

The issue of the Morse Code requirement was raised and a straw poll indicated that four were in favour of retaining the requirement, while 10 would not object to its abandonment.

Minutes and Financial Statements

The Minutes of the 1996 Board Meeting and Annual General Meeting and the audited 1995 Financial Statements will appear soon in The Canadian Amateur.

The next RAC Board of Directors meeting will be held in Ottawa April 18-19, 1997. The 1997 Annual General Meeting will be held on April 20,1997.

SENIOR DISCOUNT FOR QST

Radio Amateurs of Canada have been advised that starting on April 1st, 1996, the discount given to seniors on their subscription to QST will be permanently discontinued.

PARTNERS IN RESPONSE '96

What do Amateur Radio, Police, Fire, Ambulance, Search & Rescue, Industry and Transit all have in common? They are all "Partners in Response" when a major emergency strikes a Community.

It is with great pleasure that the Partners in Response Organizing Committee invite the Amateur Radio Community to "Partners in Response '96" in London Ontario.

This emergency planning and response exposition started out in 1994 as the theme for a London Amateur Radio Club meeting. Since then, it has expanded to become a Community-wide event. Police, fire, ambulance, search & rescue, industry, and amateur radio will be participating. It is a great opportunity for amateurs to interface with emergency planning and response

organizations as well as other hams.

Last year's two day event attracted 41 agencies with 75 vehicles and/or displays. Over 80 invitations have been sent to participants for the 1996 edition. This year we again will be staging it over two days, Friday May 10 and Saturday May 11. The hours are from 10 am to 9 pm Friday and 10 am to 6 pm on Saturday. Join us for our official opening Friday at 7:30 pm. Our new location is one of London's busiest malls, Westmount Shopping Centre, so we are sure to have many thousands of visitors.

We are looking at a wider range of agencies this year. Plans call for a US Coast Guard HH-165 Dolphin Helicopter to arrive Friday morning and the possibility of one or two others during the event. And, you'll even see Amateur Radio in action with capabilities such as APRS, Amateur television, packet, and long range HF ... possibly even a special event callsign.

We are informed that our event will be one of the first in Canada to officially recognize "National Emergency Preparedness Week", May 5 to 11th. Emergency Measures Ontario and Emergency Preparedness Canada both will be participating.

It is a very worthwhile event for amateurs involved in Emergency Services. We hope that you will be able to join us.

For more information, check the Partners Web Page at:

http://hamster.business.uwo.ca/~dcolvin/partners/part96.html

RAC AND THE CANADIAN SPACE AGENCY

Radio Amateurs of Canada is pleased to announce the appointment of Remy Brodeur, VE2BRH as RAC Space Agency Representative. Remy is an engineer with Bell/Stentor on the Cirrus Project. As member of the Radio Amateurs du Quebec (RAQI) Board of Directors, M. Brodeur is active in RAQI liaison with the Canadian Space Agency. VE2BRH has been instrumental in helping Canadian Astronauts obtain Amateur Radio licenses. RAQI has assisted the Space Agency in setting up a VHF/UHF Amateur Radio station at St. Hubert, Quebec, and plan to install an HF station soon. The Agency uses two call signs, VE2CSA (English) and VE2ASC (French).

Canadian Astronaut Dr. Bob Thirsk (VE2CSA) is scheduled to fly aboard the Space Shuttle "Columbia" in June 1996. Pierre Roger, RAC Quebec Director and President of RAQI stated that "The Space Agency is anxious to participate in a Canadian SAREX (Shuttle Amateur Radio Experiment) and we are happy to be a part of this exciting program." RAC will keep Canadian amateurs abreast of happenings through TCA and news bulletins and "The Reading Room" on the RAC WWW Home Page at http://www.rac.ca/.

SEVERE WEATHER EVENT APRIL 20, 1996
by Terry Darling VE3CAB

On Saturday April 20th a CANWARN training session was held in Parry Sound, ON. It was very well attended with about 75 amateurs from the Collingwood, Barrie, Orillia, Manitoulin Island, Elliot Lake, Sudbury and Parry Sound areas in attendance.

Around 15:30 hours Greg, VE3PMO, Steve, VE3SDJ and I left Parry Sound and proceeded south down HWY 69 to the 400 extension and into the village of Craighurst where Steve had parked his car earlier that morning.

We got out for a stretch and I remarked to Greg that we better get out of there soon, as there was a very ominous looking storm brewing to the northwest and we would probably "outrun" it if we got southbound on the 400 right away. We departed Craighurst around 17:50 hrs.

I tuned the two metre rig to the VE3MTR repeater in Collingwood, and, to our amazement we observed that there was a CANWARN net up and running. A report of a funnel cloud had just been given!

Now, I must be completely honest here and tell you that my first reaction was to turn to Greg and remark "look at these guys, they just return from a CANWARN training session and everything that moves looks like a tornado!" Little did I know until later that I couldn't have been any further from the truth with my sarcastic remark !

Aubrey, VE3TUQ had reported the funnel cloud. He lives on the top of the Beaver Valley on the west side about 12 km south of Meaford. I realized that Aubrey had not been on the training course earlier in the day in Parry Sound but I knew he was a CANWARN trained spotter. In fact, ironically, Aubrey wanted to go to the course to be "refreshed" but gave up his spot so someone else from the club could be trained.

Now, knowing him personally for at least 20 years, he was completely beyond reproach. If Aubrey said he saw a funnel cloud that's exactly what he saw!

The funnel cloud that Aubrey had reported was later revealed to be the Williamsford-Walter's Falls tornado south and east of Owen Sound, and, coincidentally only 8 km to the west of my parents apple farm on Grey Rd. 4 west of HWY 26 near Thornbury.

At approx. 18:30 hours, Steve, VE3SDJ called us on the VE3MTR repeater and asked Greg to turn on his portable cellphone as he wanted to call us. A minute later Greg received a call from Steve reporting that he had heard reports on the OPP frequencies of a tornado that had caused severe damage in the Shelburne area. In addition, he also was hearing ambulances being dispatched to Shelburne and other immediate areas affected.

At this point in time we were just north of HWY 89. I needed fuel so I decided to pull off for fuel and "evaluate" the situation. After getting fuel, Greg thought it might be a good idea if I went in to use the pay phone and call the special "800" number to the severe weather desk at Environment

Canada in Toronto.

I called the desk, identified myself as a CANWARN trained spotter and gave them my name. I asked if they were aware of any tornados in the Shelburne area and told him of my source of information. He responded by saying yes, he had just got off the phone 30 seconds ago with an OPP officer.

I related to him that I thought we were in a almost "perfect" spotting position. We were on HWY 89, and, knowing that Shelburne was on HWY 89 west of our location. Tornados usually track from southwest to northeast; we were probably not in any danger ourselves as any sighting that we would likely see, if any, would probably occur to the north of our location.

I advised the severe weather meteorologist that we were going to proceed west toward Cookstown along HWY 89. He told us to keep him advised of anything we saw.

When Greg and I crested the hill on the east side of Cookstown, Greg spotted a wall cloud to the west and I stopped the van, jumped out and grabbed the video camera that I had been using earlier in the day to record the CANWARN training session in Parry Sound. The time was 19:02 hrs.

During our video taping we saw a funnel come out of the wall cloud and "snake" around. I believe, after analyzing the newspaper and news clips on television reports later, that the one we saw and taped was the "Violet Hill" tornado as the location matched both the time and the area the funnel cloud was located.

After analyzing the video in detail, I now believe that the first video we shot was the actual tornado, not just a funnel cloud, but due to our distance away from the object, and, the hill to the west of us, we could not see the ground or debris from the tornado.

Greg dialled the severe weather 800 number on his portable cellphone and handed it to me. I advised them as to what we were seeing and the location.

After a few minutes of taping the tornado, the funnel cloud went into the "rope" stage and then disappeared up into the wall cloud.

Greg and I decided to go west to a perfect vantage point on top of the highest hill around that was about 5 KM to the west, half way between Cookstown and Alliston on HWY 89.

When we reached the crest of the hill, we travelled north of HWY 89 on the 8th Concession of Essa Township and parked at a peak on the hill about 2 km north of HWY 89 that gave us a perfect clear view from the south-southwest completely around to the north and all the way around to the southeast, from about 220 to 145 degrees.

When we arrived, we could not see the funnel cloud anymore, the wall cloud was to the northwest of us only a few km away.

We observed the winds very strong at our back and shifting as the wall cloud moved north of us and finally into the Barrie area. We could see the

CKVR television tower strobe beacons from our vantage point so we had a great view of the track of the storm and were prepared to warn the Barrie CANWARN group which had assembled and were running a net on the VE3LSR repeater.

The storm tracked just to the north of our location and then on into the Barrie area.

The weather office called us on Greg's cell phone at approximately 19:30 hours and he apprised them of what we saw and our observations of the track of the storm and the winds we were experiencing.

Around 20:20 hrs we left the hill and proceeded back to Toronto listening to the local CANWARN Net on the VE3LSR repeater.

Hats off to the Barrie Amateur Radio Club and the Blue Mountain Amateur Radio Club for taking the initiative to start up, run, and maintain local CANWARN nets in their areas.

It is rather ironic that all the Toronto CANWARN controllers were either still up in Parry Sound or en route back to Toronto at the time of these severe weather incidents, and thus no CANWARN participation from VE3YZW at the Toronto weather office.

MARION ISLAND (ZS8) ACTIVE AGAIN

I will be accompanying the 53rd Marion Island Relief Expedition as Medical Officer. Marion Island is a small (290 km2) island approximately halfway between Cape Town and Antarctica. It must have one of the environments least interfered with by man. This island only has a population of about ten people, each of whom is there on a fourteen month contract. The team usually consists of a diesel generator mechanic, three meteorologists, a radio technician, and a medical officer. The other team members are made up of researchers who are interested in the wildlife (penguins, elephant seals, albatrosses and other bird life) or plants on the island.

On the amateur radio front, I will be active from the beginning of May 1996 until we leave the island in June or July 1997. I will NOT be using the usual ZS8MI callsign, but have been given a special unique callsign ***ZS8IR***. Marion Island is IOTA AF-021. The base camp's Gridsquare locator is KE83WC.

I will be QRV on all bands (160 to 6 meters) on SSB, CW and RTTY. At the moment the station will consist of an Icom IC-735, Yaesu FL-2100Z Amplifier, AEA PK-232 MBX multimode data controller (for RTTY). I will be using mostly wire antennas (rhombics & Vbeams) due to very strong winds (gusts of up to 200 km/h!!!) and lack of funds for beam antennas that will stand up to such winds.

All QSL requests to go via my manager, Chris R Burger ZS6EZ (ex ZS6BCR). I will be sending logs to him every two weeks.

I hope to be active during most large contests. I would like to thank the NCDXF who provided financial assistance for the amplifier and QSL cards.

Please E-mail any enquiries to me: cdebeer@cis.co.za
CHRIS DE BEER (ZS5IR / ZS6RI / ZS8IR)

FCC ALLOCATES NEW MEDICAL RF BANDS

The FCC has proposed the use of radio frequency based medical devices to use vacant television bands for data transmission. Medical telemetry devices, including hand held data collection terminals and test equipment, can now broadcast at up to 5 milliwatts in the 512 MHz to 566 MHz frequency band on frequencies not in use by the UHF television channels and in the 174MHz to 216 MHz band on frequencies not used by VHF channels. The proposal was made following a request by the Critical Care Telemetry Group (CCTG), a consortium of medical technology firms.

I will be visiting orlando for a two week period from may 17th. this will be my 6th visit to your state in the past 6 years. this year i have neglected to apply to the fcc for reciprocal licence so will not be doing any 'air time' on this visit. In the past I have used the repeaters in the melbourne area and had some good rag-chews whilst driving down us1. if any amateur in the above areas would like to get in touch with me I would be glad to meet up with you.. I think we will be staying in the Kissimmee area.

Ahem. We're all sure that it is of general interest to the amateur community in general. I really don't know, because about as far off topic we ever get on our local repeater is computer operating systems, as opposed to Ham Radio. Although some very friendly people get on there and chat on their way to work. They don't curse on amateur radio, which is forbidden by the regulations, and sound amateur practice. I don't know how pressed you are for rptr freqs in L.A., but here in Miami, we don't have any available pairs right now. I can only say this. If I wanted a pair in LA, I would have your privs cut off immediately, and snag your freqs for people who still respect the amateur mission. More than likely I would make every attempt to have your license pulled. Not to be too critical, but garbage like that doesn't belong on the air anywhere. If you really want to talk like that, then why not have your club meetings in the toilet at a gay bar, or something similar? Truth is, you should know better, and to be honest, I think you do, but after all, I'm in Miami, and you're in L.A. Gee, I hope I didn't give anyone out there any ideas. 73, and 88 for the other half, at least while we're on the subject of masturbation, and that other stuff, which I'm sure you get your fill of on your rptr.

At home, I use language that would make a drunken sailor blush. On the air, i never curse, and when and if I do, immediately apologize for it. I agree with you two, and believe that radio is no place for sex talk, or foul language. If the amateurs are offending you, then perhaps you should suggest that they tone it down. It is the rule of thumb, don't let anyone tell you it's any different. Since this is still a grey area, then the Hams in your area should be made aware that they are being offensive, and make a change. The exon debate raged on the Internet for about two weeks, and ever since, foul language has been the exception, and not the norm.

Hi Dave:

I have learned that the ARRL has moved all of its lists (such as W1AW bulletins) over to the Netcom listserv site, however I have yet to see my post sent to fieldorg-l go across the list.

Do either of you gentlemen (or anyone else for that matter) happen to know if the ARRL lists have been moved to another site?? If so, could someone please tell me where I can find the ARRL lists??

Many thanks in advance and 73's for now my friends!

There are many new and different, and exiting prospects for amateur radio,
and let's not forget the amateurs themselves are constantly striving for
the best technologies themselves. We're probably the largest single gene
pool of beta testers ever assembled at one place on the face of this
planet. It's not just off the shelf hams either. Because radio technology
was in development at the beginning, that is what most hams were doing,
back in the golden age of ham radio. Suffice it to say that many hams have
moved away from designing radios, to designing modems, and ancillary
systems, for what most people consider to be the next technological wave.
Many people are arguing for different modes of data on HF, and with good
reason. They intend to improve their spectrum, by utilizing the same
amount of BW to pass more information. SS is another good example of
modulated transmissions. And digital voice might be just around the
corner, considering the new wave of voice technology in computers. To be
frank, the only thing really holding us back at this point is regulations,
and just like any new technology, we must both prove ourselves worthy of
allocation, and improve ourselves by using methods that are practical and
non interfering. SO amateur radio has a new mission. The most important
point of radio still is self sufficient independant communications.
Incorporating these new technologies into platforms usable by us should be
the top priority.

Michael, it's my impression that Lambada is a social club, not a "special interest" lobbying group as you imply.

"Theme" ham clubs have been around for decades for Black, Jewish, handicapped, female & even Shriner hams: are you also upset by those clubs? A few years ago I read an account of the black ham club, OMIK: (I forget what the accronymn stands for), it was started a little after WWII by black hams who were repeatedly insulted and jammed on-the-air by white hams. After reading some of the insulting, crude comments on this ham newsgroup regarding gays, it seems obvious to me why gay hams would feel the need for their own radio club.

I'm a non-gay ham who's worked in the medical field for the past few years who has become acquainted with several gay co-workers, who almost routinely strike me as being hard-working, intelligent people, who are usually far more productive than the several violently bigoted people I've met who were always complaining about "fags and dikes".

That's funny. I have a friend who says the same thing. Claims he never had a social security number, claims he has never filed a tax return or paid any taxes at all, and feels that he is justified. Funny thing is, he just recently filed a suit against the US Govt for malpractice in the use of an experimental drug used in the treatment of epilepsy. Epilepsy he acquired after falling down at a student worksite and hitting his head while he was drunk. Seems he wanted the Govt to come up with a lump sum payment, so that he could just get on with his life, and not have to worry about answering to the Govt. who is currently paying him disability in monthly payments. Weird, someone who doesn't believe he owes the system anything, can swear in the same breath that the system owes him everything, and he should not have to be responsible to them in the least.

I believe it's still required by Pilots as well, for things like ADF and VOR beacons. And I'm not quite sure, but I think the military also requires morse for some of it's other skills, like night signalling of vessels. Pretty sure the Pilot requirement is the same as novice too, like 5 wpm. I think that includes ship's pilots too, but I'm not sure.

Gary posted what I feel is a very good answer to your questions. Let me add that it seems to me that the homosexual population is trying not to be treated any different than anybody else, but entirely to the contrary. As a group, they ask only to be treated the same as anybody else. Is this to much to ask?

One other point, in response to another posting on this topic. Homosexuality isn't a "lifestyle". It's a fundamental, built-in preference over which a person has no choice or control. Homosexuality is a "lifestyle" is sort of like calling left-handedness a "lifestyle" -- except that it would be much easier to change handedness than sexual orientation.

Hi all,
I am trying to have two modems talking to each other. Just then,
I have them talking with converse and transparent mode, but it didn't
working for KISS mode. In fact, they lost connection when I put them
into KISS mode.
I realise that I will no longer have AX.25 in KISS, but
I didn't expect they would lost connection !
Can anyone help ? Are there special instructions required ?

Your help will be very much appreciated. Thankyou.

Alex Lam

I WON'T defend ratshack, but I'd have to say repairs of
that nature would be a bit above the ordinary call to duty.
And if it were to take three hours, the cost of the labor
alone would probably make it an uneconomical proposition.

Alternately, what would be the cost of a replacement board?

Hi Cecil,

It appears to me that there are NO correct analogies. If the subject
can't be discussed on its own merits, maybe it doesn't have any. ;)

Regardless of whether the government owes your friend the money,
he's not wrong to accept it. A violation of rights only exists
when money that isn't due is taken without permission or through
the use of fraud or force. Unless there's more to this story than
I know, the only party who's done that is the government.

Hmmm, seems like your friend has developed the dependence I
mentioned earlier. Imagine that. ;)

Based on a recent post to this group, I cheerfully
sent in my $12 to the LWCA for a membership. I have
been informed by Bill Oliver, Chief Lowfer (_not_ loafer),
the the dues have been $18 (eighteen) since 1990.

So, in the spirit of helpful correction, I post this note
so no one else has to suffer the embarrassment of seeming to
be behind the times, certainly an image no _real_ ham would
wish to cultivate.

113. New Ham Laser Experimenter E-mail List

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-02 00:00:00 UTC
From: sjnoll@ix.netcom.com
Message-ID: <4m9bfv$5h9@dfw-ixnews3.ix.netcom.com>
Source record: 226476

An e-mail mailing list has been formed to serve Amateur Radio laser communicators and experimenters.

The current subscribers include Hams from Canada, the U.S., Sweden and Finland.

Topics discussed recently include retro-reflectors, detectors, lasers, communications range, and aiming techniques.

In case you are not familiar with e-mail mailing lists... When you join (or "subscribe" to) a list, any e-mail you send to the list is automatically sent to each member. You will receive all messages from the other members too. It's a great way for a special interest group to share ideas. You can just sit and "lurk" and monitor the questions and discussions if you like.

To subscribe to this list send an e-mail message to:
majordomo@berlioz.nsc.com

For the body of the message use:
subscribe laser youremailaddress

Then you send your messages to the group at the address:
laser@berlioz.nsc.com

To un-subscribe send a message to majordomo@berlioz.nsc.com with:
unsubscribe laser youremailaddress
in the message body.

Some years ago (perhaps 30 ?) I have join a community called radio
amateurs aka hams. Nobody could explain me what what this term of
"ham" stand for. In fact, I could never get a response. Another
mystery was "ham spirit". I have heard some explanations of this
term but all were different. In my opinion, "ham spirit" was a curious
mixture of tolerance, friendship and a total lake of hostility
against other people.

Now ham spirit seems to no more exist. It is probably evaporated.
No surprise with a spirit.

Larry,

Thanks for the reply and the offer. I downloaded HamCom and tried it last night with a demodulator a co-worker built for me. Didn't work. He didn't have the correct op-amp and used a substitute and I think that may be the problem. We're going to try again with the right op-amp and see what happens. I'll keep your note and maybe get back to you if we continue to have problems. Thanks again,

True, some ADF and VOR stations are still identified with CW, but
some are voice. The VOR at Atlantic City Internationl transmits the
ATIS information as it's ID code(in voice) I think that's kinda neat
All of this is really beside the point since VOR's and ADF's are ancient
technology (especially ADF's) and will soon be replaced by GPS and the
widespread ground augmentation system (if the FAA can find a contractor
who'll get it going and not "stall around").
As I recall, the FAA is talking about starting to remove VOR's from
service right after the turn of the century, a mear 4 years away.
Besides, the speed is so slow, you can use a chart to decode it (the CW)

PUBLIC NOTICE
FEDERAL COMMUNICATIONS COMMISSION
1919 M STREET NW
WASHINGTON DC 20554

News media information (202) 418-0500. Recorded listing of releases and texts (202) 418-2222.

May 1, 1996

AMATEUR STATION VANITY CALL SIGN SYSTEM -

FILING GATE 1 OPENS MAY 31, 1996

Amateur operators who meet the following eligibility standards may request a vanity call sign on or after May 31, 1996. File your request on FCC Form 610-V. Legibility is critical! If the information on your application is not legible, you could experience a delay in processing, lose the opportunity to obtain a requested call sign or even obtain a call sign different from what you want. You must hold an unexpired amateur operator/primary station license grant of the proper operator class, as described below, to request a vanity call sign for your primary station. To request a vanity call sign for a club station, you must also hold an unexpired club station license grant listing you as the license trustee. Refer to the licensee data base to verify that the call sign you are requesting is not already assigned. A call sign is normally assignable two years following license expiration, surrender, revocation, set aside, cancellation, void ab initio, or death of the grantee. See Fact Sheet PR5000 Number 206-V AMATEUR STATION VANITY CALL SIGN SYSTEM. For explanations of Groups A, B, C and D and the geographic Regions, see Fact Sheet PR-5000 #206, AMATEUR STATION SEQUENTIAL CALL SIGN SYSTEM.

REQUEST BY FORMER HOLDER (PRIMARY STATION) - For your primary station, you may request a call sign that was previously assigned to your primary, secondary, repeater, auxiliary link, control, or space station. When so requesting for your primary station:
You may request your former call sign even though it has been unassigned for less than two years. The two year requirement does not apply to an otherwise eligible primary station if the call sign was previously assigned to a station of the requestor.
You do not have to hold a class of operator license required for the Group (A, B, C, or D) for the call sign requested. A call sign request by former holder may be from any Group in the sequential system.
Your mailing address does not have to be in the Region designated in the sequential system for the call sign requested. A call sign requested by a former holder may be in any Region.

REQUEST BY CLOSE RELATIVE OF FORMER HOLDER NOW DECEASED (PRIMARY STATION) - For your primary station, you may request a call sign that was previously assigned to the primary, secondary, repeater, auxiliary link, control, or space station of your now-deceased spouse, child, grandchild, stepchild, parent, grandparent, stepparent, brother, sister, stepbrother, stepsister, aunt, uncle, niece, nephew, or in-law. When so requesting for your primary station:
You may request the former call sign of a close relative now deceased even though it has been unassigned for less than two years. Upon the death of the holder, a call sign is assignable immediately to an otherwise eligible primary station of a close relative.
You must be an Amateur Extra Class operator to request a Group A call sign.
You must be an Amateur Extra or Advanced Class operator to request a Group B call sign.
You must be an Amateur Extra, Advanced, General, Technician Plus, or Technician Class operator to request a Group C call sign.
You must be an Amateur Extra, Advanced, General, Technician Plus, Technician or Novice class operator to request a Group D call sign.
Your mailing address does not have to be in the Region designated in the sequential system for the call sign requested. A call sign requested by a close relative of former holder now deceased may be in any Region.

REQUEST BY FORMER HOLDER (CLUB STATION) - For the club station for which you are the license trustee, you may request a call sign that was previously assigned to that station. When so requesting for a club station:
You may request your club station's former call sign even though it has been unassigned for less than two
years. The two year requirement does not apply to an otherwise eligible club station if the call sign was previously assigned to the club station for which the requestor is the license trustee.
You do not have to hold a class of operator license required for the Group (A, B, C, or D) for the call sign requested. A call sign request by former holder may be from any Group in the sequential system.
Your mailing address does not have to be in the Region designated in the sequential system for the call sign requested. A call sign requested by a former holder may be in any Region.

A $30.00 fee is required with your FCC Form 610-V application. Payment of fees may be made by check (payable to "FCC"), bank draft, money order or credit card. If paying by credit card, you must also complete and submit FCC Form 159 with your FCC Form 610-V. (Do not send cash.) Send your application package to:

Federal Communications Commission
Amateur Vanity Call Sign Request
P.O. Box 358924
Pittsburgh, PA 15251-5924

If you do not qualify under the above eligibility standards, your application will be dismissed. A future public notice will announce Gate

1A which will have expanded eligibility standards.

For further information, contact the Consumer Assistance Branch at 1-800-322-1117.

-->
-->Sexual preference is not a "Club" I would be happy to QSO with any
-->amateur including one from LAMBDA. I do however ask, that if you want
-->to be gay, be gay and SHUT UP about it. I am a hetero sexual with wife
-->and three boys. Should I join a heterosexual amateur radio club? Should
-->I wear a pin thats says "Straight and proud of it!" Should I march in
-->the straight parade? I don't think so. Your sexual preference is a
-->private matter and unless I ask you about it, trust me, I don't want to
-->know.
-->
-->Im not sure why a club called LAMBDA was ever formed, I dont get on the
-->air and talk with other amateurs about my sexual interests, do gay hams
-->do this? Does a gay ham feel more comfortable discussing antenna theory
-->or new digital modes with another gay ham? Why the club? What purpose
-->does it serve other than to tell the world hey I'm a ham radio operator
-->and I'm gay!
-->
-->I guess the long and the short of it is, whether or not LAMBDA is an
-->ARRL affiliated club doesn't mean a hill of beans to me. How about you?
-->
-->
-->Tim Hynde, ka8ddz

I normally wouldn't quote an entire posting for follow-up, but Tim makes the best points that I've read on this thread so far. Gay lifestyle is not normal (if it would, we certainly wouldn't procreate as a species) so why do they insist on making a big point of it? I've never understood that. If you want to be a homosexual than fine, but why flaunt the illness in front of normal people and give children the idea that this is some acceptable alternative. Either get professional help or keep it to yourselves.

Why does there need to be hobby clubs like Lambda? The ONLY possible reason I can think of is to solicit other gays for activities other than radio related.

Sorry if this is the politically incorrect view of the week, but when will it end?

Actually Chris it is EXACTLY what you did NOT say. Certainly not at first as you have backed off you have changed your position.

As was explained in the post you chose to delete AIDS is a clinical condition caused by the HIV virus. The text you chose to delete took issue directly with your position that AIDS cannot be transmitted via transfusions but stated explicitly that blood transfusions are the most sure mechanism of transmission of the virus. To say, as you did, "AIDS is not transmitted via blood transfusions" is nonsense in a layman's context. It is like saying "you can't catch a cold from someone sneezing on you" then sniggering behind your hand "but you can catch a Rhino Virus that may cause a cold." Bull muffins it is you who insults this group.

Bt the way where are your supporters they only seem to send e-mail they don't post. The only people who have posted seem to take issue with your thesis unless ofcourse you conviently forget what you have posted and/or delete what they say and assert you said that all along. You seem to be a bit reality impaired.

I also take issue with you using the name of Ohio State without a disclaimer. You would like the school's name to lend creedence to your lame arguments and a disclaimer would dilute this. If you look at other posts ethical people on the net use disclaimers to indicate that the opinions expressed are theirs and not those of their employer. You have told me in private e-mail that you don't represent the school why not

say so in public?

Well blast away Chris but try doing it outside of business hours your employer might wonder why you are flaming me rather than doing your job. Also please note this is my personal account not that of my employer I pay $19.95 a month for the priviledge of speaking my mind perhaps you could get a personal account too. But that would take ethics. Sorry I forgot.

Bye

124. Vanity Opens (part 1)

AMATEUR STATION VANITY CALL SIGN SYSTEM - FILING GATE 1 OPENS MAY 31, 1996
-
Amateur operators who meet the following eligibility standards may request a vanity call sign on or after May 31, 1996. File your request on FCC Form 610-V. Legibility is critical! If the information on your application is not legible, you could experience a delay in processing, lose the opportunity to obtain a requested call sign or even obtain a call sign different from what you want. You must hold an unexpired amateur operator/primary station license grant of the proper operator class, as described below, to request a vanity call sign for your primary station. To request a vanity call sign for a club station, you must also hold an unexpired club station license grant listing you as the license trustee. Refer to the licensee data base to verify that the call sign you are requesting is not already assigned. A call sign is normally assignable two years following license expiration, surrender, revocation, set aside, cancellation, void ab initio, or death of the grantee. See Fact Sheet PR5000 Number 206-V AMATEUR STATION VANITY CALL SIGN SYSTEM. For explanations of Groups A, B, C and D and the geographic Regions, see Fact Sheet PR-5000 #206, AMATEUR STATION SEQUENTIAL CALL SIGN SYSTEM.
-
REQUEST BY FORMER HOLDER (PRIMARY STATION) - For your primary station, you may request a call sign that was previously assigned to your primary, secondary, repeater, auxiliary link, control, or space station. When so requesting for your primary station:
You may request your former call sign even though it has been unassigned for less than two years. The two year requirement does not apply to an otherwise eligible primary station if the call sign was previously assigned to a station of the requestor.
You do not have to hold a class of operator license required for the Group (A, B, C, or D) for the call sign requested. A call sign request by former holder may be from any Group in the sequential system.
Your mailing address does not have to be in the Region designated in the sequential system for the call sign requested. A call sign requested by a former holder may be in any Region.
-
REQUEST BY CLOSE RELATIVE OF FORMER HOLDER NOW DECEASED (PRIMARY STATION) - For your primary station, you may request a call sign that was previously assigned to the primary, secondary, repeater, auxiliary link, control, or space station of your now-deceased spouse, child, grandchild, stepchild, parent, grandparent,

stepparent, brother, sister, stepbrother, stepsister, aunt, uncle,
niece, nephew, or in-law. When so requesting for your primary
station:
(continued)

125. Vanity Opens (part 2)

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-02 00:00:00 UTC
From: k0hb@hamlink.mn.org
Message-ID: <831028290.AA06227@hamlink.mn.org>
Source record: 226488

(Continued from previous message)

You may request the former call sign of a close relative now
deceased even though it has been unassigned for less than two years.
Upon the death of the holder, a call sign is assignable immediately
to an otherwise eligible primary station of a close relative.
You must be an Amateur Extra Class operator to request a Group A call
sign.
You must be an Amateur Extra or Advanced Class operator to request
a Group B call sign.
You must be an Amateur Extra, Advanced, General, Technician Plus,
or Technician Class operator to request a Group C call sign.
You must be an Amateur Extra, Advanced, General, Technician Plus,
Technician or Novice class operator to request a Group D call sign.
Your mailing address does not have to be in the Region designated
in the sequential system for the call sign requested. A call sign
requested by a close relative of former holder now deceased may be in
any Region.
-
REQUEST BY FORMER HOLDER (CLUB STATION) - For the club station for
which you are the license trustee, you may request a call sign that
was previously assigned to that station. When so requesting for a
club station:
You may request your club station's former call sign even though
it has been unassigned for less than two
years. The two year requirement does not apply to an otherwise
eligible club station if the call sign was previously assigned to the
club station for which the requestor is the license trustee.
You do not have to hold a class of operator license required for
the Group (A, B, C, or D) for the call sign requested. A call sign
request by former holder may be from any Group in the sequential
system.
Your mailing address does not have to be in the Region designated
in the sequential system for the call sign requested. A call sign
requested by a former holder may be in any Region.
A $30.00 fee is required with your FCC Form 610-V application.
Payment of fees may be made by check (payable to "FCC"), bank draft,
money order or credit card. If paying by credit card, you must also
complete and submit FCC Form 159 with your FCC Form 610-V. (Do not
send cash.) Send your application package to:
-
Federal Communications Commission
Amateur Vanity Call Sign Request
P.O. Box 358924

Pittsburgh, PA 15251-5924
-
If you do not qualify under the above eligibility standards, your application will be dismissed. A future public notice will announce Gate 1A which will have expanded eligibility standards.
-
For further information, contact the Consumer Assistance Branch at 1-800-322-1117.

126. Vanity Calls Gate 1 May 31

Newsgroup: rec.radio.amateur.misc

129. Propagation question

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-02 00:00:00 UTC
From: mauricea@glo.be
Message-ID: <4mao7c$9a5@rhea.glo.be>
Source record: 226492

Hi everybody,

In July/August I will operate a mobile HF station from the southwestern US
(reciprocal licence applied for).

Can anybody tell me what the propagation is like from the San Fransisco -
Monument Valley - Los Angeles triangle? Will I be able to make QSO with
Belgium (ON) from there and at what time and frequency?

We have easy paths into Africa almost daily but will I be able to works
stations in S. America only or...

Thanks for answering.....

Just my 2 cents, Your mileage may vary
Opinions are my own (most of the time).

130. WEST COAST VHF/UHF Conference

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-02 00:00:00 UTC
From: c_prewitt@emulex.COM
Message-ID: <3188EFA7@msgate.emulex.com>
Source record: 226493

The 41st Annual WEST COAST VHF/UHF Conference at the Gateway Plaza Holiday Inn 14299 Firestone BLVD., La Mirada, CA is this weekend.
Planned events include:
Friday, May 3rd 2:00 pm to 8:00 pm Registration
8:00 pm 2 meter T-hunt (sniffer recommended)

Saturday, May 4th 7:30 am Registration opens
9:00 am Technical sessions begin
9:00 am - 5:00 pm Exhibits open
12 noon Lunch Break
4:00 pm ARRL Forum
7:00 pm Banquet

Sunday, May 5th 8:00 am Breakfast
9:00 am - noon Exhibits open
1:00 pm International Fox Hunt

Speakers
Catherine Deaton from the FCC will speak about the reorg, top 10 complaints and will entertain questions
Joe Saddler, WA6PAZ will talk on entry level Microwave.
Joe Moell, K0OV will talk on World Champion Foxhunting
Ed Hare, KA1CV will talk on TVI and the VHF operator

Plus lots more

For updated information:
http://ourworld.compuserve.com/homepages/KC6YHM

Note: This is a conference go for the speakers.

In KISS mode, the connection is established and maintained by the
software you use, not the TNC firmware.

F_iota - [France] F5CCO (Eric) ,F6JSZ (Mark) and F1IXO (J.Michel) are
plannig a DXpedition to Planier Isl. (IOTA EU-095) for the 1996
IOTA Contest.This Island also has the Ref : ME-004.They will be
QRV on SSB (F5CCO) , CW (F6JSZ) and Satellite (F1IXO).QSL are
ok via the Bureau or direct to home-address :
F6JSZ: Mark A. Kentell P.O BOX 76 19002 TULLE CEDEX
F1IXQ: J-Michel Gueugnot - 208 rue de l'oradou 63000 Clermont
Ferrand
F5CCO: Eric Fayolle P.O BOX 29 43300 Langeac.
All in France , ... hi :-) email for info: f5cco@es-conseil.fr
J6 - [St.Lucia] Eric (F5CCO) is going on his honeymoon to this country
from 27 June to 4 July.He's taking care of the license.
JW - [Svalbard] Rag (OZ8RO) is going again to Svalbard from May 1-5th.
He will focus on the new bands.Call to be used : JW5HE.
TI9 - [Cocos Isl.] Until May 5th. two stations will be active from this
Isl. One in HF (TI9X) and other on Satellite (TE9RLI).
The operators are : JH1NBN, TI5RLI, TI5KD, JI3ERV and 7L2RPY .
QSL via JH1NBN ( Callbook Address ).
VK9C - [Cocos-Keeling Isl] From May 18 to 31 , VK4FW (ex-VK4CRR), VK2IVK
, VK4DHM, and possibly more ops.They will work on all bands ,
mainly in SSB , some CW is expected.The call is not known yet !
Flight, excess baggage, and accomodation have been paid. The
```

equipment has been checked and is ready. The team are looking
forward to making contact with as many stations as possible as
well as make special effort work stations as far away as possible.
QSL via VK4FW. (See address below)
ZD8 - [Ascension Isl.] Des (G0DEZ) will go to this Isl. from late May
until the end of 1996.He will sign ZD8DEZ.Activity will be
concentrated on HF and 50 MHz, mostly CW, but also with a little
RTTY and SSB.Operations as QRP are also expected.He plans to be
active on all major contest until the end of 1996.
All QSLs should be via bureau to G0DEZ or to his direct address:
Des Watson (G0DEZ), 12 Chadswell Heights, Lichfield Staffordshire
WS13 6BH, England. DO NOT SEND CARDS TO ASCENSION ISL. !!
ZL8 - [Kermadec Isl.] From May 4 to May 14 , ZL8RI . QRV Freqs will be:
CW -> 5 or 20 khz above the bottom of the band.
SSB -> 1830 3775 7065 14195 18120 21295 24940 28395/28495
RTTY-> 14080 21080 (if condx are bad : 7040 khz)

=== * VHF & UP * ===

TI9 - [Cocos Isl.] TE9RLI is QRV until May 5th on AO-13 and AO-10.

VK0WH -> As it seems , Warren only works at Monday , Tuesday and Thursday
on 40 Mtrs CW. He his normally on 7.010 , Look out for those Slims , there
are a few out there.

Info F5FHI -> Jean Pierre has changed is call to 9U5DX (ex 9U/F5FHI), the
QSL manager remains F2VX (PSE Via Bureau).The replies are sent automatically
to the bureau when J.Pierre sends the logs.9U/EA1FH is now signing 9U1CW.
Peter (ON6TT) is going to Bujumbura to operate on the low bands.If he op. as
9U5DX , QSL goes via F2VX.

4X6TU Beacon -> Is now operational from Tel Aviv on 14.100 18.110 21.150
24.930 and 28.200 with transmissions lasting 10 seconds every three minutes
on each frequency in turn.

9G5RC QSL info -> 9G5RC operated from 12 March - 24 March this year.The
operator was Joe (N1OCS) and QSL goes via his Homecall : N1OCS. He is
printing a special QSL card.

William Vaughn wrote 5 lines on the subject: Wilderness protocol????; here's some of it:

>A while back I saw a couple of references to an amateur radio wilderness
>protocol for amateur radio operators in the back country. Can someone
>direct me to the QST article or whatever mag it was in. Any help or
>leads would be appreciated. TNKS
>Bill KB7MRF
The wilderness protocol has to do with monitoring the National Simplex 2-meter frequency (in the US, anyway) of 146.520 mHz on specified times of day for signals from hikers/campers etc in distress.

Was in QST. Probably spring last year or the year before. Brought up as the Summer season approached. The idea was advanced that since most of us 2-meter folks have a favorite repeater we may not monitor five two any more. Yet, an out-of-area hiker might not have knowledge of the repeaters in a given area. Hence, five two. The concept went on to ask that certain watch times be set up and hikers use the special times to call if they have troubles enroute. As I recall the time sked was even hours during the day with emphasis on eight in the morning and again at noon.

What does the KKK have to do with sexual deviance / misconduct?

>--
>Gordon Charrick gmc@universe.digex.net
> http://universe.digex.net/~gmc

>He's your god. They're your rules. You burn in hell!

There is a difference between hatred and intolerance. What a person
does behind closed doors is thier own business, but when it is out in
the open, flaunted and shoved in our faces, and the faces of our
children, we get sick of it REAL QUICK.

Many of us believe that a penis was designed for one sexual purpose.
It was not intended to be put in someones anus or mouth for that
matter. To have a "gay" group is to say to the public, and our
children, "We put our genitals in places that they don't belong."
That type of advertisement is more than just a *part* of our
frustration with "gay" organizations.

If being 'gay' was a natural thing, or a regular occurrance in nature,
we'd find common house pet's and other animals exhibiting the same
characteristics / sexual _conduct_, of which we do not.

Do what ever you want to do, I cannot stop you, nor do I want to. But
keep this crap out of good wholesome hobbies and family activities.

If there is any hatred in the NG over 'gays', it stems from the lack
of someones ability to know the difference between a SIG, and open
advertisements for sexual deviance. Otherwise, why would we even need
to know that they are 'gay' in the first place? Much less have the
need to form thier own group. Hmm? Do you see Oral sex Ham clubs? Or
how about S&M Amateur Radio Group? Didn't think so.
In my opinion, there is no other logical reason for having a "gay" AR
group for any other purpose but to advertise or solicit membership
from the 'gay' community for personal gain, and this gain being of a
sexual nature no less, not technical.

These opinions are my own, to which I am (untill further notice)
entitled to.

Flame me if you wish, it will only serve to label you.

Although you have never indicated your sexual preference, I assume you to be heterosexual. Please correct me if I'm wrong. Given that, and that I've never seen you post against someone flaunting their hetersexuality in your face (and it happens _very_ often in this news group, just look for it) I must assume that your only aversion is to having homosexuality be made visible to you.

Drew, that makes you a homophobe. See.

I didn't know that Christianity, longevity groups, womens groups
were inherently lacking morals. Homosexuality is a wrong choice,
forget all that stuff about it not being a choice and that
homosexual can't help the way they are. Next thing you know we'll
have Pedo Ham groups, Skinhead ham groups and every other weirdo
lifestyle choice group "because they can't help it, they were born
that way."

Personally I don't care if the homosexuals have their own group,
I'm just tired of having it in my face all the time.

Can we have closet ham groups?

>Heck, I really want to know why *heterosexuals* feel the need to flaunt
>their behaviors in front of everybody.

Because it's normal human behavior to show affection to memebrs of the
opposite sex. By contrast, doing so with members of the same sex is
(take your choice here)

a) perverted
b) abnormal
c) abhorrent
d) disgusting
e) immoral
f) all of the above

The correct answer is obvious

duffy1 wrote:
>
> Man, if normal behavior makes you sick, I wonder what two
> homosexuals going at it would do to your stomach!

Methinks you need a sarcasm detector. Allow me to assist.

<sarcasm>
There is _NOTHING_ natural or normal about public displays of affection!
These activities belong behind closed doors, in private. I don't want
to have to explain to children who are "too young to understand" why
adults are pressing their lips together. The PERVERSION is from public
flaunting of behavior, not from one's choice of partner! Why, if I had
my way the women of the world would wear black robes and veils to keep
their attributes from public view...the Shiite Muslims have the right
idea. How do you expect me to raise my children to be celibate
misanthropes when there are all these filthy, unnatural temptations
around them all the time?!?
</sarcasm>

Fortunately, in the USA, we are supposed to have freedom of expression.
That includes the freedom to express one's sexuality (within certain
boundaries). We also have the freedom to peaceably assemble, and this
includes the freedom to peaceably assemble with a bunch of homosexual
amateur radio operators (and I know of no law that would prohibit such
an assembly from identifying itself as such).

If you don't like homosexuals flaunting their sexuality, TOUGH. Deal
with it. It's your problem, not theirs. Same goes for homosexual hams
having their own organization. It's their right to have such an
organization, and no one has the right to prohibit it.

Contempt says far more about its expressor than it does about its
object.

: >73 de Penn.

: OK, here's today's quiz. What happens to the larger-value resistors when
: they're connected in series?

: Roy Lewallen, W7EL

Actually, it all depends on how closely the resistors are matched and
the temperature coefficient (and it's sign) of the resistors.

Simple example: Assume the resistance goes down with temperature,
if you series connect, the highest valued unit gets hotter quicker,
which lowers it's resistance, which tends to balance the whole mess
out.

I just wanted to thank everyone who responded about my problem with the HTX202. The problem was the battery. I took it back to Radio Shack and they exchanged it for another one, without question! They did say, however, that those batteries are on back order until Sept. There has been a lot of bashing of Radio Shack on this group and others but the service I have received in exchanging or getting items repaired has been outstanding!

Thanks again for all the help.

SUBJ: IPS DAILY SOLAR AND GEOPHYSICAL REPORT
ISSUED AT 03/2330Z MAY 1996 BY IPS RADIO AND SPACE SERVICES
FROM THE REGIONAL WARNING CENTRE (RWC), SYDNEY.
SUMMARY FOR 03 MAY AND FORECAST FOR 04 MAY - 06 MAY

1A. SOLAR SUMMARY
Activity: Very low

Flares: none.

Observed 10.7 cm flux/Equivalent Sunspot Number : 68/2

GOES satellite data for 02 May
Daily Proton Fluence >1 MeV: 7.4E+05
Daily Proton Fluence >10 MeV: 1.8E+04
Daily Electron Fluence >2 MeV: 1.5E+07 (normal)
X-ray background: A1.0
Fluence (flux accumulation over 24hrs)/ cm2-ster-day.

1B. SOLAR FORECAST
04 May 05 May 06 May
Activity Very low Very low Very low
Fadeouts None expected None expected None expected

Forecast 10.7 cm flux/Equivalent Sunspot Number for 04 May: 68/2

2A. MAGNETIC SUMMARY
Geomagnetic field at Learmonth: Mostly quiet with one
unsettled period: 1500- 1800UT.

Estimated Indices : A K Observed A Index 02 May
Learmonth 6 2111 2322
Fredericksburg 5 7
Planetary 7 8

Observed Kp for 02 May: 2132 3222

2B. MAGNETIC FORECAST
Date Ap Conditions
04 May 8 Quiet to unsettled
05 May 8 Quiet to unsettled
06 May 8 Quiet to unsettled

3A. GLOBAL HF PROPAGATION SUMMARY

Latitude Band
Date Low Middle High
03 May Normal Normal Normal
PCA Event : None

3B. GLOBAL HF PROPAGATION FORECAST
Latitude Band
Date Low Middle High
04 May Normal Normal Normal
05 May Normal Normal Normal
06 May Normal Normal Normal

4A. AUSTRALIAN REGION IONOSPHERIC SUMMARY
Date T index
03 May 2

Observed Australian Regional MUFs:
Darwin: Near normal predicted monthly values except from
15 to 30% enhancements between 0200 and 0400UT, and 15%
depressions between 0500 and 0700UT.
Townsville: Mostly near normal predicted monthly values except
from upto 15% depressions between 0000 and 0500UT.
Sydney: Near normal predicted monthly values.
Canberra: Near normal predicted monthly values.
Hobart: Near normal predicted monthly values.

Predicted Monthly T index for May: 10

4B. AUSTRALIAN REGION IONOSPHERIC FORECAST
Date T index MUFs
04 May 0 near predicted monthly values
05 May 0 near predicted monthly values
06 May 0 near predicted monthly values

With it being so dead, it is hard to say. But, I have heard some
activity around 28.350. I even managed to talk to another New Yorker
(40 miles away) on the freq! What DX, huh?

151. This Week in Amateur Radio #162 (for air through 5/10/96)

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-03 00:00:00 UTC
From: "Stephan M. Anderman" <sanderman@delphi.com>
Message-ID: <RHCuQPa.sanderman@delphi.com>
Source record: 226264

Here is a summary of news items covered on edition #162 of
"This Week in Amateur Radio", North America's most up-to-the-minute
audio bulletin service, for the week ending 10-May:
-
1. FCC to Open Gate 1 of Long-awaited Vanity Call Sign Program
2. ARRL Re-seated on QPC, Differences Settled
3. Part 15 High-speed Digital Devices to Use 350 MHz at 5 GHz
4. Special Event Station Calendar with George Bowen, N2LQS
5. League President Appoints New Hudson Division Vice Director
6. New PC Standard Promises True "Plug'n'Play" Peripherals
7. "Gateway 160 Meter Net Report" with Vern Jackson, WA0RCR
8. NBC Moves to Bar Amateur and Other RF Devices from Olympics
9. Motorola's "Iridium" System May QRM Radioastronomy
10. "The RAIN Dial-up" from Chicago
11. RAC Board Forms New Section, Seeks to Increase Membership
12. "Amateur Radio Newsline" - Edition #977 from Los Angeles
13. Weekly Propagation Forecast
-
"This Week in Amateur Radio" is a weekly amateur voice bulletin
service, produced by Community Video Associates, Inc., a New York
State not-for-profit corporation based in Albany, NY. The program
is heard each Saturday at 8:00 PM (EDT) and carried on VHF/UHF
repeaters throughout North America and on 160 meters at 1860 kHz.
Contact your local amateur radio club or repeater operator if
"This Week in Amateur Radio" is not being heard in your area.
-
NOTICE: Due to the dissolution of the "Tech Talk Network", the
service WILL NOT be carried on satellite. Negotiations for the
donation or lease of satellite space continue in earnest. When a
new agreement is reached, "This Week in Amateur Radio" will return
to satellite air. Details will be posted as conditions warrant.
All affiliates are requested to contact the producers for further
information.
-
Production and transmission expenses are underwritten by donations
from repeater operators, amateur radio clubs, and individuals.
Further information is available from George Bowen, N2LQS, at
518/283-3665 (e-mail kxkvi@delphi.com) or Stephan Anderman, WA3RKB,
at 518/664-6809 (e-mail sanderman@delphi.com). You may also reach
them @ WA2UMX.FN32AW.ENY.NY.USA.NA via amateur packet.

152. Re: Matching Paint for Kenwood TS430

You had the right idea when thinking of auto paint. Most auto parts store sell touch up paint in spray cans. The paint comes in a number of metalic colors. I used "Plasti-kote" color GM 7181 on my Kenwood TS430. Take a look at the auto parts store and see what you think. You can darken some colors by putting on a dark primer. I baked the cabinet at about 50C to dry paint and get a good bond. Sanded and primed first of course. The paint I used finishes to a mat finish, like the Kenwood paint. To get a gloss finish it requires a clear coat on top. I bought the paint at PEP BOYS. I don't know if they are nationwide or not. 73 and good painting.

153. D/FW code practice?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-03 00:00:00 UTC
From: kc5ggv@aol.com
Message-ID: <4meka1$ppf@newsbf02.news.aol.com>
Source record: 226266

I am interested in finding someone in the D/FW area to do some code practice with. We could use simplex 2m or novice HF bands. An experienced CWer would be a big help. It would be good to learn the ropes before I start making bad habits. Email me and we can get together over the phone to set it up.
(For those of you old timers that like to bitch about No Coders not upgrading - this would be a good opportunity for you to do something about it besides gripe.)

ZCZC AG07
QST de W1AW
ARRL Bulletin 27 ARLB027
From ARRL Headquarters
Newington CT May 3, 1996
To all radio amateurs

SB QST ARL ARLB027
ARLB027 KB5UJD yields ham ticket for life

Irvin J. Foret, KB5UJD, of Metairie, Louisiana, whose Technician Plus class license was suspended by the FCC following allegations of interference to Amateur Radio operations in the New Orleans area, has reached a settlement with the FCC to end its proceedings against him. Foret has agreed to immediately surrender his Amateur Radio license for life and permanently divest himself of all electronic equipment capable of transmitting on the ham bands. In addition, Foret has agreed to refrain for life from applying for any FCC license or permit--regardless of the service, from participating

as a third party in any communication in the Amateur Radio service and from transmitting on CB. Foret also agreed to pay 500 dollar(s).

But the core of the agreement was his consent to cooperate fully and completely with all government officials in connection with any ongoing or future administrative or law enforcement investigations or proceedings involving ham radio operations by others.

The agreement does not prohibit Foret from engaging in otherwise lawful transmissions over land mobile radio facilities as part of his work.

The Commission s original action came April 5, 1996 after Commission personnel monitored and documented Foret s transmissions in December 1995 and January 1996. The FCC said some of Foret s transmissions on January 29, 1996, constituted willful or malicious interference to the transmissions of

other Amateur Radio stations, in apparent violation of FCC rules.

During an inspection of his station, the FCC said, Foret was lacking in candor and misrepresented material facts to Commission personnel by stating

that he did not make the transmissions the Commission observed. The FCC also

said some of Foret s transmissions were unidentified, included music or were

obscene or indecent, the alleged indecent transmissions occurring at a time when there was a reasonable risk that children were in the audience.

ARLP018 Propagation de KT7H

ZCZC AP39
QST de W1AW
Propagation Forecast Bulletin 18 ARLP018
From Tad Cook, KT7H
Seattle, WA May 3, 1996
To all radio amateurs

SB PROP ARL ARLP018
ARLP018 Propagation de KT7H

Every day last week except for April 28 had a sunspot number of zero. The solar flux on each day was below the average value for the previous 90 days, which was 71 at the start of the week and 70 at the end. All of this shows a continued downward trend in solar activity.

Because activity is so flat, this makes it difficult to predict changes in activity over the next few weeks, since this is always based on a solar rotation with activity recurring every 28.5 days.

Solar flux is expected to increase slowly to above 70 around May 6, peak around the mid-seventies around May 11, and drop below 70 after May 18. Look for disturbed conditions around May 11 to 16, with the worst conditions centered around May 14 and 15.

Because of lengthening days, low frequency DX is declining, and 20 meters should be better for DX, even with the low solar activity.

Sunspot Numbers for April 25 through May 1 were 0, 0, 0, 13, 0, 0 and 0, with a mean of 1.9. 10.7 cm flux was 67.8, 68.2, 68.2, 67.7, 68.4, 68.5 and 67.9, with a mean of 68.1.

I own the 147.435 repeater in Portland, Oregon. My repeater is similar, but not as mouthy as, the LA repeater. I often hear complaints & bitches from people about my 2 meter box (but never my 6 meter or UHF). If they don't like what they are hearing there are three things they do -

1. turn down the volume, 2 turn off the radio, 3 change frequency.

Any licensed ham sould be capable of this.

Why would somebody rant & rave & carry on like this with their bitching?

Watch the ROSANNE show on TV sometime. It is a prime time show. You all the same language then.

There is speculation, but no proof that homosexuality is "built-in preference over which a person has no choice or control". Thousands of homosexuals have been liberated from their homosexuality. The same speculation applies to pedophiles. There is debate as to what causes it and if it is genetic or not but there is no debate over the destruction that surrounds pedaphiles and their victims. All sorts of human cravings and behaviors are subject to speculation (alcoholism, etc.) but their origin does not serve as a basis for determining whether or not society should accept the behavior as normal.

Geez, you know you're getting old when questions like the above pop up. "Our DTMF" (we called it TouchTone) that we used on rptrs were yanked out of telephones themselves. I remember cutting a large hole in the case of my Swan 2m rig in the 70s to install a TT pad.

So yes, they are the same. The hams borrowed the idea from the phone company.

As it should. If that's not enough incentive to upgrade, then that Novice or Tech+ has no motivation. Have fun on 2m and leave HF for those with some incentive to do a little work to gain the privileges participating in worldwide comms.

Of course, there will be those who say "Show me where in Part 97 it says I have to display motivation..." Well, show me where it says "Incentive Licensing", yet that's how the FCC refered to it upon its creation.

>
>What to do?

What to do is to bring shack power through the ground window too,
bonding the safety ground to the window and suppressing the hots
and neutral to the window (use a subpanel *inside* the ground window
to feed all your equipment). That *short circuits* the loop formed
by the two different grounds as far as your amateur equipment is
concerned (that's what a ground window is for). If shack power is
on a separate (220) breaker at the entrance panel from the rest of
the house, the ground loop won't matter to the rest of the house
either because the rest of the house will be *outside* the loop.

The NEC *requires* all Earth connections to be bonded together, so
there's no way you can avoid ground loops and still meet Code if
you have more than one separated Earth terminal (well there are some
special exceptions, but I won't go into that here, they don't apply
to the typical amateur installation). That's why you need the ground
window. It short circuits the loops for the equipment connected through
it.

Tom's suggestion is best if you can physically arrange it, IE use
one ground window for the whole house. But if, as in your case,
you can't arrange a whole house ground window, then you have to make
one for the radio shack. You have to make *absolutely* certain that
every wire going to or coming from the shack has to pass through
that ground window and be appropriately bonded or suppressed to it.
That includes *everything*, power, antenna coaxes, rotator leads,
telco, house intercom, CATV, etc. *Anything* that goes or comes
from the shack has to pass through the shack ground window. If just
one wire bypasses it, the protection it offers is lost.

(Ask me about that sometime. I ran a "temporary" extension cord
that bypassed the ground window, and it cost me $10,000 in lightning
damage. I knew better, but like most of us I got careless because
I was in a hurry to try out a new toy. Don't make the same mistake.)

You have to think carefully about these wires to avoid creating
other ground loops in the house, and that's the reason for bringing
the balanced 220 feed to the shack rather than a 110 branch circuit.
If you brought in just a branch circuit, a lightning strike could
unbalance the legs of your power distribution panel and cause
problems in other parts of the house. By bringing over the balanced
220 feed, both legs and neutral elevate the same amount (determined
by the impedance of the ground window to Earth), so there's no net
voltage change between them for the rest of the house to see.

Drew et al.

The code requirement does not prevent anyone from 'using the frequencies'.
All one has to do is learn the code and pass the tests.
There are provisions to except those with physical or mental conditions
that preclude learning Morse.
Therefor, the premise of exclusion is invalid
basis for argument.

I concur that Morse is a dated mode. However, learning it is a good
measure of discipline. An alternative measure might work as well
but I can't think of one that would be as uniformly unbiased. I'm
willing to listen.

If a level of discipline should not be a requirement for sharing a limited
resource, I'd be interested in hearing what might be.

It is easy to argue from a faulty premise. The Morse requirement is
a proficiency requirement, not one of discrimination by those who
have met it. I can accept that this original proficiency
requirement is dated in it's applicability to communication.
I can not accept that maintaining the requirement is criminally
discriminatory. Perhaps a citation of applicable statutes with
justification as to how they apply would change my opinion.

An unstated, uncodifed result of the Morse requirement is that one
must put forth some effort to attain the priviledge. This begs the
question, should the amateur spectrum be free for all willing
to meet the requirements or just free for all.

If free for all, will it be what you want?

If you feel there should be some form of gated entry to the amateur
ranks can you think of one less biased than Morse? Esperanto maybe?

Try this.

If you want to drive to and from work and or school, pass the basic test.
If you want to ride a motorcycle to and from work, get the endorsement.
If you want to drive in the horse lanes, learn basic horse.

HF is basically the horse lane when it comes to communications.

I hear there's a 7 year old Extra too, Dick, but that doesn't change the demographics. The average HF amateur age is still 59+. Now what that has to mean, given longevity statistics, is that there are more people in the service over 60 than under 60. That's because there aren't many 100 year olds to counterbalance the 20 year olds in the service, so we have to have four 70 year olds to offset one 20 year old if the average is to be 60.

Now there's nothing wrong with being an old ham, it certainly beats the alternative of being a dead ham. In not too long a time I hope to be one of those over 60 hams myself. But the demographics aren't healthy for the future of the service. The average amateur age should be down around 45 for the service to be tracking the general population demographic (it can't be the same as the general population demographic because there can be darn few infants who can pass the license exams).

Now to get the average age down to 45, we need 30 year olds, but even more we need 20 year olds and teenagers to offset those of us who plan to still be around past 60. How many of them do you have in your Dx SIG? Not many I would guess. If we're to uphold the part of our charter having to do with self-education in the radio arts, we really need to get to those young people before they've settled in a career as a lawyer or real estate broker.

It doesn't serve the national interest nearly as much to have some old geezer learning new technology as it does to be introducing that technology to young people who may decide to make it their career (or at least to shape their understanding of technology for a longer time). A technically literate population is a good thing because it makes them more competent to decide national issues which have become increasingly technically based. It is hard to remain innumerate when you're an active amateur, and it is hard not to learn some geography and geopolitics if you're active on HF. (It's not impossible to remain an ignorant boor, of course, as 75m demonstrates nightly.)

It doesn't *hurt* to have old geezers learn new things, of course. It serves to keep the brain from fossilizing. People who are always learning are generally happier, healthier, and saner than those who rest on their past accomplishments. That's why amateur radio is supposed to be a lifelong learning laboratory. The learning isn't supposed to *stop* when the tests are passed, it is instead only supposed to be beginning.

I think too many hams lose sight of this, partially due to our licensing structure (but mostly due to our education factories and the wallpaper chase), thinking that once the last external requirement has been hurdled that they can rest on their laurels. Because they've never learned to be self-directed, they can't conceive of learning and doing for its own sake, but that's the type of outlook required for a lifelong learning experience.

And that's a reflection of demographics too because too often older people tend to be "set in their ways", and intolerant of people challenging those ways with new or different ideas. So we *need* young unfossilized blood to offset that tendency of age. Most people in science and technology have achieved their highest contribution to the art by the time they are 30. (There are shining exceptions, of course.)

170. CFV: rec.radio.amateur.dx

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-03 00:00:00 UTC
From: Jani Patokallio <jpatokal@cc.hut.fi>
Message-ID: <831092622.26314@uunet.uu.net>
Source record: 226348
Cross-posted to: news.announce.newgroups,news.groups,rec.radio.amateur.misc

```
FIRST CALL FOR VOTES (of 2)
unmoderated group rec.radio.amateur.dx

Newsgroups line:
rec.radio.amateur.dx Discussion, tips, notices and news for DXers.

Votes must be received by 23:59:59 UTC, 24 May 1996.

This vote is being conducted by a neutral third party. Questions
about the proposed group should be directed to the proponent.

Proponent: Richard Eckman, KO4MR <eckman@norfolk.infi.net>
Mentor: Jonathan Grobe <grobe@worf.netins.net>
Votetaker: Jani Patokallio <jpatokal@alpha.hut.fi>

RATIONALE: rec.radio.amateur.dx

One of the many activities enjoyed by amateur radio operators
("hams") is "DXing", the pursuit of making contact with as many
countries as possible. As used in this sense, a "country" might be
anything from a traditional geopolitical entity to a remote,
uninhabited island or coral shoal to which hams venture for the sole
purpose of "putting it on the air." The term "DX", apparently
derived from the word distance, can be traced to the earliest days
of amateur radio experimentation. Today, the term is universally
understood by amateur radio enthusiasts. A significant number
of the several million licensed amateur radio operators worldwide
characterize themselves as "DXers". Many shortwave listeners (SWLs)
also enjoy DXing amateur radio transmissions. Annual surveys
identify the rarest DX countries (i.e., those with which the fewest
hams have made contact), and each year a number of these are visited
for anywhere from a few days to several weeks by groups of hams.
Often these "DXpeditions" are multinational undertakings conducted
by the very best amateur radio operators in the world.

Existing moderated and unmoderated e-mail reflectors are dedicated
to DX topics, but many hams have indicated that they prefer
discussing DX on Usenet rather than have their mailboxes fill with
reflected mail. DX discussion on Usenet generally occurs in
"rec.radio.amateur.misc". Amateur radio is an extremely multi-
faceted avocation, however, and the wide range of topics discussed
in this newsgroup sometimes makes it difficult for individuals
interested primarily or exclusively in DX to easily identify articles
of interest to them. This problem can be further complicated by the
volume of traffic in this newsgroup and the short expiration periods
```

on many news servers. It is for these reasons that a new newsgroup devoted exclusively to DXing is being proposed. Since DX news is often of timely value, this new newsgroup is meant to complement, not replace, the mail reflectors, which often get messages to their destinations more quickly than news articles propagating through Usenet.

CHARTER: rec.radio.amateur.dx

The purpose of the "rec.radio.amateur.dx" newsgroup is to provide an unmoderated forum for the discussion of topics of general interest to DXers, including but not limited to:

o announcements of and invitations to join upcoming DXpeditions;

o information about QSL routes;

o tips and techniques regarding good operating practices;

o solicitations for schedules that will enable new DXers to get the last few "new ones" needed to qualify for DXCC;

o periodic postings of data files, such as the DXCC countries list, great circle coordinates used to determine beam headings, etc.;

o administrative policies and practices pertinent to DX operations, such as gaining recognition for a DXpedition by national societies, adding new countries to the DXCC countries list, etc.;

o the general joys and sorrows of participation in or making contact with a DXpedition.

Although the term "DX" is usually used in reference to global communications on the HF bands, operators who use other modes have different applications of this term. This is especially true of VHF and UHF operators, for whom a contact of only 1000 or even 100 miles might well be considered DX depending on the band in which the contact is made. There is currently no newsgroup dedicated to these operators. Although the majority of the traffic on "rec.radio.amateur.dx" is expected to concern HF DXing, proponents of the higher bands are welcome to use "rec.radio.amateur.dx" as a forum in which to discuss their DX activities and, in fact, are encouraged to do so.

Postings that would be considered inappropriate for this newsgroup are those whose topic falls more naturally under the charter of some other newsgroup in the "rec.radio.amateur" hierarchy. For example, discussion of radios used by DXers would be more appropriately posted to the "rec.radio.amateur.equipment" newsgroup. Similarly, general discussion of beam antennas typically used by DXers would be more appropriately posted to the "rec.radio.amateur.antenna" newsgroup.

END CHARTER.

HOW TO VOTE:

Follow these instructions *exactly*! Votes are counted by computer.
You should send E-MAIL (posts to a newsgroup are invalid) to:

voting@hut.fi

Please do not assume that just replying to this message will work.
Check the address before you mail your vote. Your mail message
should contain one and only one of the following vote statements:

I vote YES on rec.radio.amateur.dx
I vote NO on rec.radio.amateur.dx

If your mail software does not indicate your real name (for example,
AOL does not), please also include the following statement on a separate
line and add your name after the colon.

Voter name:

You may also vote ABSTAIN (which does exactly that) or CANCEL (which
removes any earlier votes). ABSTAIN does not affect the final vote count
in any way but is listed, whereas CANCEL is not.

IMPORTANT VOTING PROCEDURE NOTES:

Standard Guidelines for voting apply. One person, one vote. Votes
must be mailed directly from the voter to the votetaker. Anonymous,
forwarded or proxy votes are not valid. Votes mailed by WWW/HTML/CGI
forms are considered to be anonymous votes.

Vote counting is automated. Failure to follow these directions may
mean that your vote does not get counted. If you do not receive an
acknowledgment of your vote within three days contact the votetaker
about the problem. It's your responsibility to make sure your vote
is registered correctly. Duplicate votes are resolved in favor of
the most recent valid vote. Addresses and votes of all voters will
be published in the final voting results post.

The purpose of a Usenet vote is to determine the genuine interest of
persons who would read a proposed newsgroup. Soliciting votes from
disinterested parties defeats this purpose. Please do not distribute
this CFV. If you must, direct people to the official CFV as posted
to news.announce.newgroups. Distributing pre-marked or otherwise
edited copies of this CFV is generally considered to be vote fraud.
When in doubt, ask the votetaker.

Low Power EME Data Collection Experiments

de Mike, AF9Y

Introduction

The recent MoonNet discussions on low power EME has renewed my interest in development of an optimum waveform for the EME channel. Before the community settles on a particular waveform, we should first determine the channel characteristics. Important characteristics such as coherence bandwidth, selective fading and multipath are best determined by direct measurement with averaging over varying conditions. W3IWI, KA9Q and others have made astute theoretical statements concerning the impact of these perturbations on various modulation techniques. I believe there is an opportunity for the larger EME stations to collect data on the channel characteristics using their radio equipment and a PC equipped with sound card.

Data Collection Approach - Phase 1, Initial Experiments

For the first phase, we need recordings with the strongest signal possible via the EME path. The idea is to transmit various waveforms tailored to allow extraction of key channel characteristics. A one minute transmission is sent by one EME station and the resulting received audio is recorded at the second EME station. Post analysis of the recorded data should provide some interesting insight.

VE7BQH and I ran the first attempt at collecting data on April 28, 1996 using a PC program called TX55a. This program uses the sound card to generate audio waveforms that modulate the transmitter in SSB mode. I am releasing TX55a and its derivatives as a free public program. The program and the data collected from it is available from my webpage at: http://www.webcom.com/af9y.

In it's current form, TX55a provides the following:

- 1 Khz Tone (Transmitted every odd 4 second period)

This allows centering of the signal in the receiver passband and will be used as a reference signal during the test period.

- Narrow Band Spread Spectrum BPSK (Transmitted alternating even 4 second period)

This modulation is coded with a 63 bit Maximum Length Sequence (MLS) to allow extraction of channel delays beyond simple phase shifting. It is useful for multipath and channel coherence analysis. I

consider this waveform a candidate for weak signal modulation. TX55a transmits the "R" and "O" characters during the test. The main lobe bandwidth is 250 Hz.

- Multi Tone FSK (Transmitted alternating even 4 second period)

During this period, three simultaneous tones 1000 Hz, 750 Hz and 1250 Hz are transmitted. This waveform should provide insight into the selective fading aspects of the channel. Multi Tone FSK is a candidate for weak signal modulation and is being considered by W3IWI and KA9Q. The implementation of this modulation mode will likely require an update after W3IWI and KA9Q have had a chance to review it. I may not have captured their intent.

Data Collection Procedure

Lionel and I used the following procedure for the test:

1) Establish a 2mtr frequency just above 144.100 since this is SSB mode.

2) Using the program generated 1 Khz tone at the transmitter, tune the receiver for a 1 Khz receive signal

3) If available, rotate polarity for maximum signal. During our test, Lionel rotated his array through approximately 60 degrees during a 1 minute TX period of the 1 Khz tone. Using the FFTDSP42 program, the signal strength bar showed the best polarity position. This was an interesting side test that dramatically showed the advantage of polarity rotation. (I have include a picture of the results on my webpage)

4) Agree to a start time and record 1 to 2 minutes of the test transmission from the TX55a program. You can use FFTDSP42 to record the data as a WAV file. Just make sure the "R" button is red (active) and hit "SAVE" at the at the end of the test period before the signal image scrolls off the screen. If you are using another sound program for recording, I recommend you use a sampling rate of 8192 samples per second.

The stronger the signal, the better the analysis. I suggest that we strive for S/N ratios of at least 15 to 20 dB (100 Hz bandwidth). Each band will have different characteristics, so we need recordings for 144, 432 and above. If you email your recordings to me, I will post them on my webpage.

To: ALL WISCONSIN AMATEUR RADIO OPERATORS
From: Gary Schwartz K9GS

Subject: Wisconsin State Antenna Bill SB 544

This is an update to an earlier posting. Several groups of Wisconsin Amateur Radio Operators have been involved in the passage of legislation designed to ease local and county government restrictions that currently make it very difficult for Wisconsin Amateurs to erect antennas.

I am very happy to report that this legislation has passed a very important milestone. In March, this series of amendments passed the Wisconsin State Senate!

I would like to take this time to thank everyone that took the time to call or write their State Senators and Representatives. Your support was the key towards moving this important legislation forward. I would also like to thank the original co-sponsors of this bill, State Senator Grobschmidt and State Representative Brancel as well as the other Senators and Representatives that have shown their support by signing on as additional sponsors.

The next step will be the passage in the State Assembly. It is very important that a vote be taken in the month of May, before the summer recess. As of today, this legislation is slated to be voted upon the week of May 6th or 13th. Due to the great amount of pending legislation, the vote should most likely come the week of May 13th.

I would like to take this opportunity to again ask that you contact you State Representatives as soon as possible and ask them to vote in favor of SB 544. Either a telephone call and/or a letter are taken very seriously and do have a substantial impact.

If you do not know who your State Representative is, contact either your local city/village/county clerk or call the toll-free Legislative Hot-Line at 1-800-362-9472. Either of these sources can supply you with the correct address and/or phone number.

IT IS VERY IMPORTANT THAT THIS BE DONE IN THE NEXT FEW DAYS !!!!

If this important piece of legislation is successfully passed by the Assembly, the next step will be the Governor's desk. Arrangements are currently being explored with the sponsors of this bill to ask that the Governor sign this bill during National Ama teur Radio Week, June 16th - 23rd, pending a successful vote in the Assembly.

Once again, I'd like to thank everyone for their support and enthusiasm and ask that everyone please take the time to write or phone their Assembly Representative right away.

This is the paraphrased text of SB 544:

"SB 544 is modeled after current provisions which restrict local governments from regulating certain satellite antennas.

Amendments would be made to Wisconsin State Statutes 59.97 (4d), 60.61 (3c) and 62.23 (7) to create 59.97 (4dm), 60.61 (3d) and 62.23 (7) (hf) respectively. The text of the amendment(s) follows:

AMATEUR RADIO ANTENNA FACILITIES. The (board/town board/ governing body of a city) may not enact an ordinance or adopt a resolution on or after the effective date of this subsection, or continue to enforce an ordinance or resolution on or after the effective date of this subsection, that involves the placement, screening or height of amateur radio antennas unless the ordinance or resolution is reasonably crafted to address a specific health or safety concern. The (board/town board/governing body of a city) may not enact an ordinance or adopt a resolution on or after the effective date of this subsection, or continue to enforce an ordinance or resolution on or after the effective date of this subsection, that involves the placement, screening or height of amateur radio antennas if the ordinance or resolution is based solely on aesthetic considerations."

Jim & Donna,
I am an older ham and sometimes feel as though I have lived too long,
because I have seen the hobby of amateur radio evolve. The references
you quoted are certainly in poor taste and plain tacky. It indicates
poor vocabulary on the part of those using these terms. These terms
would not have been tolerated 40 years ago by hams on the bands then.

They would have been challenged. After all we must remember that we have young people on board now as active hams. Some 9 year olds are even extra class operators. You must have been exposed to worse here on the internet though. Stick to your standards and don't let others dummy you down to their level. The so called "Political Correctness" is simply one more indicater that we as a nation are spiritually adrift.

180. Anybody have info on TMRCC??

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-03 00:00:00 UTC
From: jaminge@pb2esac.esac.pacbell.com
Message-ID: <4mccoi$qjf@gw.PacBell.COM>
Source record: 226358

The last Amateur Radio Newsline (#976) made reference to the
Two Meter Repeater Coordinating Council in Southern California.
Apparently a substantial number of repeater operators are in
favor of endorsing TMRCC as the "bona fide repeater coordinator"
for the region.

I'm not familiar with TMRCC. Could someone tell me more about it?
How does a new coordinating body get established, and how does it
gain credibility with the ham community?

The coordinators for other bands here must be watching their backs.
When you compare the operation of SCRRBA to their northern Cal
counterpart, it's a wonder that they are still here.

It is an aberration. Anyone who has studied homosexual literature, even the now-"respectable" kind, knows that these are not just people like us who "happen" to have a yen for the same sex. They are perverse and profligate in the most extreme sense possible -- and they are breeding grounds for disfiguring, painful, and deadly diseases.

There is something wrong with their sexual orientation, and it really does not help them or the still-uninfected (I mean uninfected by perversion and by the various viruses and bacilli which thrive in the pervert's abused orifices) to encourage their unnatural behavior. It hurts everyone, even the unfortunates who were born with this sexual illness, to encourage homosexuality by exalting it to the same level as normal, healthy sexual relations.

They hurt themselves -- _that_ is obvious; but they also hurt the rest of us, not least those young people hooked into a life of perversion by having their first sexual experience at the hands of an experienced sodomite recruiter. (Anyone who has logged onto the various pervert sites on the Internet or who has read their "Gay Guide" or "Advocate" know beyond any peradventure of doubt that teenage or sub-teen males are the target of choice for the inverted thrill-seekers.)

A very good argument can be made that the suppression of homosexual behavior is good for the health of everyone, and _especially_ those generally inclined by defective genes to engage in such behavior if allowed.

I cannot condone the promotion of such behavior, and I will not support any organization which does.

With good wishes to all,

Kevin Alfred Strom WB4AIO 3950 kHz

I'm going to be buying a shortwave receiver soon, and while going through the shelves at the local library for SW stuff, I found a few Ham-related books too. Interesting reading...I'd never paid attention to the hobby before and these piqued my interest. However, the books are a bit dated (1976), so I have a few questions about current practices:

1. Which bands should I expect to find Ham communications on? The receiver can pick up everything from the 160 to the 10 meter band. Are most communications these days on higher frequencies than that?

2. How much of the old info is still valid? I know that most of the sets shown with tubes are just a bit dated, but should I get a newer book if I want to learn more, or is this sufficent? (The book is *So You Want to be a Ham*, Robert Hertzberg, Seventh Edition, 1976).

Thanks!

Activating Rare Latvian Grid

As part of a 23cm EME experiment by the Latvian Amateur Radio League this summer, grid KO07kn will also be QRV on 6m between July 3rd to the 10th. The QTH is at the recently acquired Ventspils International Radio Astronomy Centre (a former Soviet military site) 22km northeast of Ventspils in Kurzeme province (Courland of Hanseatic League fame). The centre is being refurbished for civilian use by the Latvian Academy of Sciences with the help of the Swedish government. Principal operator will be the immediate past president of the LRAL, Vitauts Klimavicus using "YL3AG". All QSLs should be sent to him directly in Riga:-

Those references are VERY OLD! A lot has changed in ham radio in 20 years --
both in equipment, operating practices, and MOST IMPORTANTLY licensing
requirements. There are a number of good books out now for people just
getting interested in the hobby -- see below.

>
> 1. Which bands should I expect to find Ham communications on? The
> receiver can pick up everything from the 160 to the 10 meter band. Are
> most communications these days on higher frequencies than that?

Using a shortwave receiver, you would find plenty of ham radio communications
in the 40 meter band -- 7.1 MHz. At night, you will have to fight
off a lot of SW interferrence, however. 20 meters (14 MHz) is the
"standard" band for long distance ("DX") communications.
There is a lot of VHF activities -- lots of 2 meter FM communications,
for instance. These will be above your typical SW radio range.

>
> 2. How much of the old info is still valid? I know that most of the sets
> shown with tubes are just a bit dated, but should I get a newer book if I

> be a Ham*, Robert Hertzberg, Seventh Edition, 1976).

I'd suggest going down to your local Radio Shack. They sell the ARRL
book "Now you are Talking" that guides the prospective ham through
the hobby and covers the technical information needed to pass the
first two written exams -- Novice and Technician. Its a great book.

Knowing some hams in your area will be a big help in getting started.
Contact the ARRL education dept at ead@arrl.org and ask for their
"how to get stated" flyer. It has a few pages discussing all the neat
things of ham radio but, most important, they give you a print out
of all the ham clubs in your area -- a great way to get help when starting out.

Hope this helps,

73,

Nat N4BTO

191. KaWin 6.38 released on the web

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-03 00:00:00 UTC
From: stan@mutadv.com
Message-ID: <4md4ko$c1o@news-2.csn.net>
Source record: 226369
Cross-posted to: rec.radio.amateur.digital.misc,rec.radio.amateur.misc,rec.radio.amateur.equipment

KAWIN NEWS

KaWin 6.38 is ready for download from the KaWin Home Page!

New files are:
KAWIN638.EXE the full KaWin system for new users,
KAWUP638.EXE just the updated KAWIN.EXE and squawk file,
KAWINHLP.EXE the latest KAWIN.HLP, help file.

The new features in version 6.38 are logging and Yapp!

The new logging feature is a modest start at a very big
subject. A simple text file, in comma-delimited format for
easy import into other programs, stores a wealth of info on
your QSOs. See the new help file for details.

With the addition of a very full implementation of the Yapp
file transfer protocol and a significant enhancement of the
existing KaWin HF protocol, KaWin becomes the undisputed
leader in file transfer technology for RF datacomm. The
following table summarizes the features of the three
protocols that KaWin now supports:

Feature KaWin/HF Yapp Gold

Applicable modes G-tor/Pactor Packet Packet
Full binary transparency yes yes yes
Robust error detection yes yes yes
Auto-start remote upload/download yes yes yes
Auto-start remote directory request yes no yes
Multiple file selection on Send File yes yes no
Wildcards on Get File yes yes no
Restartable after a broken transfer yes yes yes
Verifies original file on restarts yes yes no
Keyboard chat during transfer no no yes

All currently reported bugs are fixed in 6.38.

To add to the KaWin News mailing list, send email to
stan@mutadv.com with the word SUBSCRIBE in the subject line,
or use the handy subscription link on the KaWin Home Page.
To be removed from the list, send email to stan@mutadv.com
with the word UNSUBSCRIBE in the subject line and be sure to
include the email address this message was sent to in the
body. I cannot remove you if I don't know your address!

Unless your station in Belgium is on the wrong side of a hill,
it should be an easy matter to just listen for the many USA stations.
They probably outnumber Belguim stations by 20 to 1. Not only that, but
a lot of stations have big antennas and amplifiers, so listening for
them is the best way to verify good openings.

I assume you have downloaded software such as Voacap to get a
propagation prediction and found the path somewhat difficult.

Doug,
You my friend are pretty blind, to assume that bigots are that self evident puts you on the same level that your comment implies _they_ are.. No matter what we think, is it going to make some gay guy go straight? I doubt it.

Oh, and confronted about what Doug? That some believe that a penis was not meant to be put in someones anus, or someones mouth for that matter? That people don't like to have this 'lifestyle' publicized as an acceptable way of life (which it is not)?
The only confrontation that arises from this usually ends up much like your message,. "Bigot" this, and "Homophobe" that...

Use all the excuses and acusations you feel you need to, to make yourself feel better. It still does not change _the_ fact one bit.

Rob

You can word yourself around the point all you want my friend. It's
very simple as I allready stated. If you remove _SEXUAL ORIENTATION_
from this group, what do you have? A group of hams right? Good. So
then if it is necessary for them to tell everyone that they are 'gay'
then what purpose does that serve?
Having a 'gay' amateur radio group does not cause a band opening on
10m, or ducting on 10 gig. It does nothing to benefit the amateur
community in a technical manner. Therefore, the ONLY OTHER REASON to
have a 'gay' labeled AR group is to attract members of the 'gay'
community for reasons not of a technical nature, but of a sexual one.

>Anyway, IMHO this newsgroup may not be the apropriate forum for the
>discussion but it seems to me that misstatements should be challenged
>where they are made - and your imputation of motive to others is at
>least as offensive to me as the existence of gay and lesbian groups is

It's an amateur radio issue. And misc is right where it belongs. There
aren't any policy issues being discussed here, so it doesn't belong
there.

>As you said:
>>There is a difference between hatred and intolerance. What a person
>>does behind closed doors is thier own business, but when it is out in

Couldn't have said it better myself. (Or did I? GRIN)

>And you might realize that some others react to public defamation of
>gays in the same way. And so, since neither of us has a superior right

>to excluseve use of any public forum it appears that we will both be
>sick of it until we can find a way to mutual respect and toleration.

Call it whatever you wish, it's just plain stupid. There is no
defamation here. Every one is entitled to thier opinion, and I'm sure
they'll give it, but have I mentioned anything of a personal nature
about any specific person or persons actions in my previous postings?
Have I stated anything that is _untrue_, that will cause others to
have a different opinion of 'gays'?

Now, you can dance around the issue all you want, it won't change
anything. If you don't like a spade being called a spade, you will
have to deal with it.

It's not the affiliation that is offensive to me, personaly. It is the
fact that they publicize their sexual orientation. There is NO NEED
for _sexual orientation_ to be a SIG in amateur radio as it functions
today. NONE. And to say that this is not the case, is mis stateing
the facts.

>>

>Minorities need a "special organization" because bigots will attack anywhere
>they can and minorities, like most people, want to enjoy their hobbies in
>a congenial atmosphere - and this takes special effort for them.

There is no room for racisim in AR either. Don't use that as an excuse
to perpetuate the argument. And are you saying that homosexuality is a
religeon? Does the 'gay' god command sexual deviance? That's not a
good reason either. Ah, I see.. A "special organization". Label it
whatever you wish, it serves only one purpose, and protection is not
the issue (as far as from bigots is concerned).

>It is the fact of exclusionary tactics (such as language like "flaunt
>their aberration") that drives the people thus discriminated against to
>form groups where they can enjoy their hobby free from such harassment.
>If they had actually been treated "like everybody else" (which means being

>they wouldn't be forming their own clubs. Unfortunately, all it takes is one
>aggressive racist, or homophobe, or religious zealot to make life miserable -
>and the chances of getting at least one in a large club are pretty good.

If it makes a person feel bad to be told that what they do IS bad,
then there is nothing wrong with it. To physicaly attack or assault
someone because of this is a different issue.
And they would be treated like everyone else, if they didn't make
sexual orientation the issue that justifies thier existance. Those
in the 'gay community' that I have have had an association with, are
so blunt and crude when it comes to what they do (sexualy) it's
difficult to focus on the necessities of a job, much less anything
else, without getting upset or disgusted. I can _imagine_ that there
are some in the 'gay community' that ane not like that, but to my
experience, that in itself would be a minority within the minority. A
good example of this is the need they feel, (I guess) to have all of
their affiliations related to their _sexual orientation_.

>So, it seems to me entirely reasonable that members of any minority should
>form a "special" club so that they can enjoy their hobby in peace and
>tranquility and entirely unreasonable that those who practice discrimination
>should object even to this....

There is no discrimination here. It is not a 'gays' sex, race,
religeon, age or anything like that. The very definitive act that
their title implies is the basis for which we disagree. With such a
public hobby, how can you assume that this will afford 'gays' "peace
and tranquillity", or whatever? It will serve to focus attention, not
deflect it.

You are suffering from a lack of imagination.

>orientation for purposes of a sexual nature. Otherwise, there would be
>no need. Plain and simple.

You are plain wrong. Gay people get together with other gay people not to solicit sex or to convert heterosexuals but to avoid having to put up with people complaining about homosexuals.

Of course, some homosexual get-togethers are for the purpose of finding mates, but so are some heterosexual get-togethers.

It appears that you are so insecure in your own sexuality that you are afriad that if you encountered a homosexual man, you'd be so taken that you'd just want to hop in bed with him (whether or not he's attracted to you).

>I posted my grip in another thread, I'll keep this one short.

It is clear that you have no grip on the issue, only misconceptions.

>opposed to Ham Radio.

Oh gosh, imagine that. Hams who only talk about ham radio.
How utterly dismally boring.

Don't like what's being said? You aren't obligated to listen. There
are plenty of other channels for you to dial in, or you could even
(gasp!) turn off your radio.

One of the basic principles that helped found this country was the
concept of tolerance - that while there is a majority rule, those not
in the majority are still guaranteed certain basic rights, of which
one of the most important is freedom of speech.

Far too many hams, it seems, are willing to sacrifice this basic
principle instead of reaching for the channel knob. What does this
say for the future of our hard-won freedoms?

When a law is in conflict with the Constitution, that law must fall.
I would like to see a well-funded defense of First Amendment principles
versus the Communication Act's restrictions on speech. I think the CA
will lose. It's unconscionable that such an affront has been allowed
to stand for 62 years. It's time we came to our senses.

There's an awful lot of wisdom in the concept of 'community standards'.

Since when is LARC "in your face"? I've never listened in on a LARC net --
do they discuss rimming or where to get the best leather underwear or cool
stuff like that? Or do they talk about radio things.

At LARC meetings, are you required to bend over and take it like a man (as
it were) upon entry, or do you just discuss radio things?

>Many of us believe that a penis was designed for one sexual purpose.
>It was not intended to be put in someones anus or mouth for that

Sex between a male and a female is a _NATURAL_ occurance. Same-sex
sexual relations is _NOT_. There is no flaunting going on here, it's
a natural fact. Happens within almost all other animal groups on the
planet, whereas same-sex relations of this type _DOES NOT EXIST_.

> Amateur radio is supposedly based on equality and a certain amount of
> anonymity ...."From Champions to Newsboys", remember? I don't want to

> you hear from the other person is a bunch of dits and dahs!

That good. That's the way it should be. But there are those that must
use their sexual orientation as a basis for everything they do,
including radio.

>But there are clubs for vhf/uhf operators, DXers, traffic handlers,
>African-Americans, Christians, women,and people who live in particular
>areas. Why not homosexuals?

Those that you mentioned are a natural occurance. Women are born
women, vhf/uhf is a portion of bands we operate on (thus allready
related), religeon is a belief and a practice, and a geographic
location could even separate a group from the rest of the world. There
is _NO OTHER REASON_ for having a group labeled as 'gay' than to
recruit members from the same sexual orientation for purposes not
related to radio use or operation, but of a sexual nature. Remove
sexual orientation as an issue, and they are nothing but a another
group of hams.

> be a Ham*, Robert Hertzberg, Seventh Edition, 1976).

Great book, but real dated. Go to any Radio Shack store and get a copy of "Now You're Talking!", published by the American Radio Relay League (ARRL, the national ham association). It has up-to-date info on ham radio and becomming a ham. The ARRL is also on-line at http://www.arrl.org/

Best of luck...

There you go again bringing your sexual preference out
from behind closed doors. How many times does one have to ask.

KEEP IT TO YOURSELF!!! GET IT OUT OF MY FACE!!!

>To have a "gay" group is to say to the public, and our
>children, "We put our genitals in places that they don't belong."
>That type of advertisement is more than just a *part* of our
>frustration with "gay" organizations.

And your type of advertisement, which you seem to feel is perfectly
all right, is part of the frustration '"gay" organizations' have
with people like you. You don't seem to realize that you, mister
Dungeon Master, exude sexual orientation. I'm sure that not a
day goes by without you refer to your sexual preference in one
way or another.

Is it too much to ask that mister average Gay be allowed the same
freedom?

>
>If being 'gay' was a natural thing, or a regular occurrance in nature,

>In my opinion, there is no other logical reason for having a "gay" AR
>group for any other purpose but to advertise or solicit membership
>from the 'gay' community for personal gain, and this gain being of a
>sexual nature no less, not technical.

Well, the reason there are special interest groups is to give
people with similar interests a supportive place to congregate.

I wonder how you would react if a clean cut man who was wearing a wedding
ring accidentally slipped the fact that he was partners for life with another
man after you got done describing your wife and kids. Would you be interested
in seeing the 'wedding' picture he might have in his wallet? Or would you
avoid him like the plague for the rest of your life?

If the latter, you can consider youself an unsupportive acquaintance.
You avoiding him, makes him want to avoid you. And as soon as he
meets someone that doesn't want to avoid him he may get to be friends
with that person. If a form of mutual support occurs the two might be
considered a group.

>
>
>These opinions are my own, to which I am (untill further notice)
>entitled to.
>
>Flame me if you wish, it will only serve to label you.

Hph, label me as what?

I do not flame you, I simply poke fun at you. At one time I think
I was much like yourself. And then I met a few people who were later
described to me as gay. Really, I thought, they seem so normal. Then
I realized that gay people are just like strieght people except they
fall in love with people of the same sex. I can empathize with that
feeling. I know how I feel about people of opposite sex, and I figure
gay people have the same feelings for people of te same sex.

All you have to do is remember that you shouldn't believe everything
on TV is exactly the way it is shown.

The 5.4 Seattle earthquake knocked out telephone and cellular communications systems, probably due to excessive call attempts. Amateur radio ARES and RACES nets went into operation immediately following the earthqauke.

A complete story is now available at Ham Radio Online at
http://www.accessone.com/~vbook/hronline.htm

As are the start of May 1996 articles.

> Sorry. I couldn't resist a bit of levity.

Chris, you are obviously confused. Normal sexual intercourse is not perverse, by definition.

What homosexuals do to each other is not sexual intercourse; it is perverse; and it is harmful to themselves and to all who are affected by it. These acts are a primary vector for disease, and those who are recruited into them are cut off forever from a normal family life; and the descendants they might have had are lost to them and to us for all time.

I object most strongly to giving any form of societal approval to this sickness. The ARRL have made a serious mistake if they have indeed approved this "club."

"Discrimination" means only "to choose between alternatives." Pro-communists changed the meaning of the word several decades ago to serve their purposes and the "liberal" change-agents and dupes ran with it. I prefer the correct English meaning of the word. Anyone who is not free to discriminate is not free.

Still free,

Kevin Alfred Strom, WB4AIO

>Since when is LARC "in your face"? I've never listened in on a LARC net --
>do they discuss rimming or where to get the best leather underwear or cool
>stuff like that? Or do they talk about radio things.

The very fact that they have to make thier sexual deviance an issue,
is the issue. For no other reason do they have such a group as to
attract others of the same sexual orientation, although radio related,
sex is still the main reason for having it labeled as such, otherwise
they would be nothing more than _another_ ARG.

And what they discuss is not the issue either. I guess since the
natural selection process does not function for them, they must gather
in numbers to select a partner rather than be ridiculed and or hurt
for asking the wrong question to the wrong person.

>At LARC meetings, are you required to bend over and take it like a man (as
>it were) upon entry, or do you just discuss radio things?

Hell, I don't know, or care. I will never attend a meeting.

What's a mores? Oh, morals? I'm not talking morals. The fact that
homosexuality is immoral is not the arguement. I don't have a problem
with where your penis goes, so long as you don't tell me about it (and
it's nowhere near me GRIN).

>>children, "We put our genitals in places that they don't belong."

>Sez you.

Sez them. What else is there to being gay? You can love a man as a
person, a friend or what have you. That does not mean you have to have
sex with them.

No, I leave my amateur gear here in Az when I go to California now.
Last time I was there, it was worse that a CB channel 19. No calls,
profanity, jamming. Waste of time to try to operate in Southern Cal.
(in my opinion and experience)

Nope, no looney here. Just someone that can tell the difference
between what is right and wrong (In most cases). Homosexuality is
wrong, has been wrong, will always be wrong. It's my opinion and
cannot be changed. The fact that they must use their sexual
orientation as the means to justify their existance make it have
absoluetly no purpose in AR.

>Do you realize that not all LARC members are homosexuals? (I am not a LARC
>member.)

I imagine so. But if I am so much the bigot by your standards, then
why do you feel the compelling urge to tell me you are _not_ a member
of said group?

>>If there is any hatred in the NG over 'gays', it stems from the lack
>>of someones ability to know the difference between a SIG, and open
>>advertisements for sexual deviance. Otherwise, why would we even need

>What open advertisements?

Here, I'll grab the crayons and draw you a picture.

Gays = same-sex sexual relations

To say you are gay is to say that you have sex with members of the
same sex.

To have a group based on sexual orientation is to associate with those
of the same character, and desires.

This has nothing to do with amateur radio. Hell, you can't even make
future ARO's that way. (Can't procreate that way)

>>to know that they are 'gay' in the first place? Much less have the

>I dunno. Why do Christian ham clubs need to advertise that fact? Being
>Christian isn't any more natural than being Buddhist or Muslim or Jewish or

I don't know of a religeon that practices deviant sexual relations
with members of the same sex, do you?

>>need to form thier own group. Hmm? Do you see Oral sex Ham clubs? Or

>I wish I did.

hehe

>>how about S&M Amateur Radio Group? Didn't think so.

>I wish I did. The S&M ARC would probably have more interesting
>conversations than the colostomy bags being emptied onto 80m.

Hehehe. From what I hear, 80m is getting that way (GRIN)

>>In my opinion, there is no other logical reason for having a "gay" AR
>>group for any other purpose but to advertise or solicit membership

>Well, that's your completely uninformed, silly opinion. I know, I know,
>your mind is made up, don't confuse it with the facts. (It probably can't
>handle more than one or two in there anyway.)

What facts are you talking about? Oh, perhaps the million man
march-type facts? You know, where it doesn't add up or look like a
fact, but it is?

Now, have I insulted you directly? I would appreciate it if you could
debate on a rational level without sinking down to the very same level
you are acusing bigots of being on.

>>These opinions are my own, to which I am (untill further notice)
>>entitled to.

>You're entitled to your opinion. I am entitled to flame you for it.

Flame on.

>>Flame me if you wish, it will only serve to label you.

>Label me? How? I disagree with a stupid person. I like that label.

Stupidity in this, is replying to your waste-of-time responce. Jerry,
under normal circumstances, you're probably an allright guy. But keep
this above the table. Cursing and insulting only serves to discredit
any arguement you may have made.

Rob

>Of course, I have no interest what-so-ever in talking to anyone
>over radio. I want to play with spread-spectrum and radio controlled
>Airplanes, maybe with telemetry. Do you really want to force me to learn
>code for this?

I'd say that the codeless license is an excellent method for you to get into the hobby and explore the aspect of the hobby that you are interested in. For your interests you do not require access to frequencies below 30mhz, so no code examination is required anyway.

However.

You've stated that you are not interested in talking to anyone over the radio. Does that mean that you should be exempted from answering those questions that deal with "talking" to people over the radio? For example, if you >were< interested in obtaining HF access for digital modes, should you be exempt from questions that deal with SSB voice, merely because you are "not interested" in that mode?

I have little interest in HF digital. Should I be exempt from the questions that deal with HF digital modes, merely because I am "not interested" in them?

Unfortunately, the logic that you use to justify not taking the CW examination for HF access, as long as it is a requirement, can be used to justify not taking any other arbitrary section of a written examination too.

I have no intention of ever becoming a VE. Why should I have to answer those questions and possibly fail my Extra examination merely because there are questions about being a VE on the exam?

>I'll say the same thing I said on the ham group. Why do you want to limit
>your membership via a pointless skill?

Define a "pointless skill". My definition of a "pointless skill" is knowing how to be a VE. So can I just ignore those questions since I don't like them?

>If you really want to do something
>useful make the test a non-gimmee. Currently all the test answers are
>published.

Hey, if it were that easy, I'd *LOVE* to see the examinations harder. But as time shows over and over again, our testing standards are constantly being lowered in difficulty, not raised. You'll see a half-

dozen of the pro-code-elimination posters in this newsgroup alone talk
about how the "exams should not be hardened" because they are supposed
to be "entry level exams, not final exams".

>I get the
>feeling that the "must learn code" group falls into two catagories: the
>aforementionned "I did it so you should" and those that are afraid if
>real testing is implemented they would fall on their faces.

If this is the case, then you must not know many code supporters. There
are many supporters, such as myself, who would not object to the code
requirement being eliminated, *IF* (and only *IF*) it was replaced with
something meaningful.

>with people like you. You don't seem to realize that you, mister
>Dungeon Master, exude sexual orientation. I'm sure that not a
>day goes by without you refer to your sexual preference in one
>way or another.

See above statement. Thier frustration probably arises from not being
ablt to tell a gay from a straight and are afradin to ask, unless they
have somewhere to meet. Heterosexuals generaly do not have that
problem.

>Is it too much to ask that mister average Gay be allowed the same
>freedom?

Yes, and no. They should have the right to do and say whatever they
want. I don't want to put a sock in their mouths. Nor would I want
anyone to do the same to me. I am merely arguing a point. Now, I do
get sick of having people try to force people to _accept_ this
behavior as normal, for it is most certainly not. And as far a
heterosexuality is concerned, without it, humanity's days would surely
be numbered (as gays cannot reproduce).

>Strange you should bring it up. Just the other day I saw two drakes
>going at it in the park.

So. Did you stop and watch?

>Indeed, if you keep you crap out others may do the same.

Not! It's for that very reason that I am discussing this issue.

>Well, the reason there are special interest groups is to give
>people with similar interests a supportive place to congregate.

Oh, I see. An amateur radio group devoted to support of gay sexual relations and activities. Is that not what you just said? If sexuality has nothing to do with it, then what is there to support that warrants being labeled 'gay'?

>I wonder how you would react if a clean cut man who was wearing a wedding
>ring accidentally slipped the fact that he was partners for life with another
>man after you got done describing your wife and kids. Would you be interested
>in seeing the 'wedding' picture he might have in his wallet? Or would you
>avoid him like the plague for the rest of your life?

I would ask him not to bring that up, but that would not make me run and hide. There such a thing as reality. I may still have to work with gays, and I may have gay friends or associates, but that in no way means that we have to discuss our sexlives. Look, I have a wife. She is not only my companion but will soon be the mother of our children. This happens, everyday, to millions of men and women. It's happened for as long as life has existed (as we know it). Children are not a possibility with gay couples. What they do behind their closed doors is not my business not do I want it to be. Therefore, you cannot tell me that heterosexuality is perverse, or disgusting, or without purpose. You can make that arguement for homosexuality.

>If the latter, you can consider youself an unsupportive acquaintance.
>You avoiding him, makes him want to avoid you. And as soon as he
>meets someone that doesn't want to avoid him he may get to be friends
>with that person. If a form of mutual support occurs the two might be
>considered a group.

Good. I'm happy for that person in that case. Maybe they'll be happy ever-after for all I care. But when I have to do business with him, or similar activities, I don't want to hear about 'being gay'..

>Hph, label me as what?

>I do not flame you, I simply poke fun at you. At one time I think
>I was much like yourself. And then I met a few people who were later

>It is an aberration. Anyone who has studied homosexual literature, even
>the now-"respectable" kind,

"Now-'respectable'" literature? Is it the same literature as before, only now it is respected by society (but not you obviously). What about the great works of literature that have been written by homosexuals, but contain no mention of the topic? Is this "homosexual literature" too?

> knows that these are not just people like us
>who "happen" to have a yen for the same sex. They are perverse and
>profligate in the most extreme sense possible --
^^^^^^^^^^(*)

"Profligate" means excessive, promiscuous, etc. This mischaracterization results from the typical straight observer's biased sample that the most visible homosexuals are the unusually promiscuous ones. (see below about the folly of basing policy on the most visible example).

and they are breeding
>grounds for disfiguring, painful, and deadly diseases.

Every human being (especially unvaccinated ones) on the face of the earth is a "breeding ground" for disfiguring, painful, and deadly diseases. No people, no disease. (It really is that simple).

>
>There is something wrong with their sexual orientation,

Can't quite put a finger on it, though? Exactly what is "wrong"? Like "perverse" and "unnatural", it depends the writer's handle on "right", making it just opinion, not fact.

and it really
>does not help them or the still-uninfected (I mean uninfected by
>perversion and by the various viruses and bacilli which thrive in the
>pervert's abused orifices) to encourage their unnatural behavior. It
>hurts everyone, even the unfortunates who were born with this sexual
>illness, to encourage homosexuality by exalting it to the same level as
>normal, healthy sexual relations.
>
>They hurt themselves -- _that_ is obvious; but they also hurt the rest of
>us,

How do they hurt themselves? Will your jack-boot on their necks hurt them less? That is not obvious.

How do they hurt you? Even better, how do they hurt me? You said they hurt *everyone* [Later, I found out that when Kevin writes "everyone", he doesn't mean it in the conventional sense].

not least those young people hooked into a life of perversion by
>having their first sexual experience at the hands of an experienced
>sodomite recruiter. (Anyone who has logged onto the various pervert sites
>on the Internet or who has read their "Gay Guide" or "Advocate" know
>beyond any peradventure of doubt that teenage or sub-teen males are the
^^^^^^^^^^^^(*)
>target of choice for the inverted thrill-seekers.)

There are as many, probably more straight "inverted thrill seekers" who prefer young girls (and there are magazines and web sites to support them in their endeavours too). It is very common for radicals on both ends of the political spectrum to pick out a few rare but highly visible events and use them to advocate oppression of everyone. You have tried to use this tactic not just once, but twice in the article. If someone were to try to promote their gun-control agenda by exploiting the fact that the most immediately visible gun owners are the ones who go out in public and shoot large numbers of people, you would most likely dismiss it immediately with something like "mumble, mumble, that's just A TYPICAL LIBERAL DIVERSION TACTIC, mumble, mumble..."

If it is possible to "recruit" teenage boys into homosexual behavior, maybe some high-moraled straight ladies should get to them first, and show them the correct path.

>A very good argument can be made that the suppression of homosexual
>behavior is good for the health of everyone, and _especially_ those
>generally inclined by defective genes to engage in such behavior if
>allowed.

You have not even attempted to make it here. What is the alleged "very good argument" that you are not presenting? A very good argument can be made that the moon is composed of lumpy green cheese. Did that amazingly authoritative and enlightened statement by me convince anyone that it is?

I think the only way to fully suppress homosexual behavior is to kill the people involved, especally if it is, as you theorize here (in direct contradiction to your previous 2 paragraphs, where you implied it is due to some sort of "indoctrination," best given in the teenage years) caused by "defective genes." Since "suppressing" the homosexuals, especially to the point of killing them, is definitely not good for their health, it appears that they don't fit into your definition of "everyone". Maybe I'll re-define "everyone" for myself so it doesn't include you.

>
>I cannot condone the promotion of such behavior, and I will not support
>any organization which does.

That is your right. Is there any evidence that the LAMBDA group has done anything with homosexual behavior other than admit it? Is there any evidence that ARRL has done anything with the LAMBDA group other than recognize them as an ARRL-affiliated amateur radio club? As others in this flamewar have already pointed out, if anyone is promoting a particular mode of sexual behavior, it is the heterosexuals. You have to look a long way to find a gay person who will denounce heterosexuals as "perverse".

>With good wishes to all,
>
>Kevin Alfred Strom WB4AIO 3950 kHz

(*)Big words that are essentially archaic replacements for common ones. I have a dictionary too, why not just use the cliche "shadow of doubt?" Or even "peradventure" by itself since the word by itself can mean "doubt." It appears that you are throwing around archaic words just to distract the reader. Or maybe you didn't even write this diatribe yourself. That's OK, as diatribes go this one's not something to be proud of. Try looking again under "H" in your "Official 3950 Propaganda Book" for something a bit more convincing (it might have gotten shuffled into the enormous "J" section accidentally when you added the new update).

-Mike KD4QDM
Who knows he will immediately (incorrectly) be branded a "perverse, tain't natural, gol-dang HOMOSEXUAL" for writing this, in a dramatic demonstration of the *amazing* mental capacities of right wing lackeys everywhere.

you CAN get aids from a transfusion if the blood has not been
screened. most blood backs have sophisticated tests to determine the
presence of the virus. Canadian and french blood banks have been sued
because they knew their blood supplies were infected in the mid 80s
and didnt do anything about it. a number of aids cases resulted.

This is the Ham Poll Question that you can participate in at the Raymond Sarrio Co. WWW site.

http://www.sarrio.com

The question for May 1996:

This is the month of the Dayton Hamfest, the most well attended hamfest in the world. Our Ham Poll question for this month looks at hamfests in general and asks the question: If you could give a word of advise to all those responsible for organizing major hamfests, which of the following factors would
you tell them is most in need of improvement?

Although you may want to choose more than one item, you are restricted by this poll to only one choice, therefore select the item below that, in your opinion, is most in need of change.

The selections are....

1.More help for non-hams

2.Reduced entry fees

3.More tech. seminars

4.More equipment manufacturers

6.More activities for the non-ham spouse

Please stop by and vote, and check out the entire site. You will find a Free Ham Classified Ads page, A discount Catalog of Ham Products, The first ever Ham Wholesale Purchasing Club, Web site development, and much much more.

Send me a e-mail and let me know what you think of site, and do be honest.

>How utterly dismally boring.

[Rest deleted.]

You're right Brian. Surprisingly enough, there are more than ONE repeaters in operation in the Los Angeles area.

I've been hearing comments with regards to (recently deceased) Joe Merdler and the FCC. Something about his winning the right to swear on the air.

As to "435", I've heard of them. I think I've listened a total of 10 minutes worth over the past 20 years. But I'd rather they (they meaning the people you'd rather not listen to) stay over there on .435 and not come over to the repeater I talk on.

Each to his own. And the last time I checked, the only radio I own that doesn't have a channel selector knob is the TEKK KS-900 I run 9600 baud packer radio with. All the others are "frequency agile."

Yes, it is soooo "evil" for anyone to restrict in even the slightest way the fun and games of those whose taste for waste orifices threatens the mental and physical health of the rest of us. Even suggesting that the ARRL ought not to encourage such aberrant behavior is "evil" in your view, I suppose.

This is not a discussion of eugenics. But since you asked, the death of hundreds of thousands from sodomy-related illnesses and the recuitment into perversion of similar or larger numbers is a problem in the here and now and will have a much more profound effect on the future of our people than the perpetuation of a small portion of the genes of that fraction of homosexuals whose condition is inborn.

Is that a question? Assuming that it is: a large-circulation homosexual magazine, with current pretensions of "respectability" and containing not just a few "serious" articles not directly touching on perverse ways to experience orgasm, calling itself "The Advocate" carried as recently as 1990 advertisements for videos featuring teenage boys masturbating, though another more "modern" term was used. Please tell me if I am required to respect that.

> What about the
> great works of literature that have been written by homosexuals, but

>

No, that wasn't what I was referring to. When homosexuality is elevated to a level of equality with normal sexual relations, then you get the in-your-face sickness of the current homosexual press. When homosexual behavior is not allowed, then the dominant theme is participation in the larger culture, and some people with the problem can write a good play or tune (why shouldn't they?).

> > knows that these are not just people like us

Thank you for the definition of the word "profligate." Actually, the primary meaning is "lost or insensible to principle, virtue, or decency." Have you ever seen the statistics on the average number of "partners" for homosexuals versus heterosexuals? Profligate is a reasonably descriptive term, in both senses of the word.

>
> and they are breeding

Again, there is a very great difference in infection rates for numerous diseases between perverts and non-perverts. Anyone care to guess on just why that might be?

>
> >
> >There is something wrong with their sexual orientation,

In the final analysis, only Nature will decide who is right and who is wrong -- and the test will be survival. A society which regards natural sexual intercourse as being on the same level as sodomy is just a few steps away from accepting consensual bestiality, too. Why not? My opinion is that such a society is thereby degrading what ought to be sacred and weakening itself, perhaps fatally.

> >us,
>
> How do they hurt themselves?

How about 10 anonymous partners per night in a "bath house"? How about the homosexual-led fight against contact tracing and substantive HIV testing?

> Will your jack-boot on their necks hurt them
> less? That is not obvious.

A return to the laws which prevailed in a more decent America a few decades ago does not constitute a "jackboot" on anyone's neck. The chances of survival of that fraction which is genetically predisposed to perversion would be increased by suppressing the sick behavior that characterizes the current homosexual "scene." And under such circumstances, of course, recruiting would be drastically curtailed and so hundreds of thousands would be enjoying normal, healthy lives.

>
> How do they hurt you? Even better, how do they hurt me? You said they

> hurt *everyone* [Later, I found out that when Kevin writes "everyone", he
> doesn't mean it in the conventional sense].

One example: Homosexual sodomy is the primary way that the AIDS virus is spread. Do you not agree that if this practice was largely curtailed that the spread of this deadly virus would also be curtailed?

Another: Homosexual groups intent on continuing their fun and games at any cost are the primary opponents of widespread HIV testing and isolation of carriers where clearly necessary for the public health. Would fewer people die if these measures were implemented?

Another: The homosexual "scene" as it exists today is almost supernaturally perverse, disgusting, and crude. If such behavior were strongly disapproved by society, as it was for ages past, our women and children could be protected from such grossness, which inevitably hardens and callouses even strong men who are forced to encounter it.

> >A very good argument can be made that the suppression of homosexual
> >behavior is good for the health of everyone, and _especially_ those

> made that the moon is composed of lumpy green cheese. Did that amazingly
> authoritative and enlightened statement by me convince anyone that it is?
>

I think it is obvious to any thinking person that homosexuals are literally killing themselves with their "lifestyle." Therefore, suppression of the self-destructive behavior, as I have already explained, will benefit them as well as everyone else.

> I think the only way to fully suppress homosexual behavior is to kill the
> people involved, especally if it is, as you theorize here (in direct
> contradiction to your previous 2 paragraphs, where you implied it is due to
> some sort of "indoctrination," best given in the teenage years) caused by

> point of killing them, is definitely not good for their health, it appears
> that they don't fit into your definition of "everyone". Maybe I'll
> re-define "everyone" for myself so it doesn't include you.

What a flight of fantasy. _You_ brought up killing people, not I.

Further, everything I stated was consonant with my belief that a percentage of homosexuals are so due to gene structure. The rest are recruited, often at an impressionable and vulnerable age. I believe you will find not a few homosexuals who would say the same thing.

>
> >
> >I cannot condone the promotion of such behavior, and I will not support

> flamewar have already pointed out, if anyone is promoting a particular mode
> of sexual behavior, it is the heterosexuals. You have to look a long way
> to find a gay person who will denounce heterosexuals as "perverse".

Tolerance is not a universal good. No society tolerates everything. Some things are discouraged mildly, some things we have "zero tolerance" for, and often for good reasons. Homosexual behavior, if tolerated, leads to consequences so dire and destructive that most human societies have discouraged or prohibited it. Until very recently, ours was such a society. I believe that the ARRL should not tolerate, or act in a way that encourages others to tolerate, homosexual behavior. By doing so they are contributing to the destruction of my nation.

> have a dictionary too, why not just use the cliche "shadow of doubt?" Or
> even "peradventure" by itself since the word by itself can mean "doubt."

Thanks for trying to improve my writing style. Peradventure as a noun (in which part of speech it is certainly not archaic) has a meaning of "any chance, mistake or failure whatever" and so is stronger and more pithy than the hackneyed phrase you suggested.

You also asterisked "profligate." I have no idea why you consider it to be archaic, or "big" -- it's shorter than "replacement," for example.

Again, thanks for trying.

> Try looking again
> under "H" in your "Official 3950 Propaganda Book"

Doesn't exist except in your imagination.

With sincere good wishes,

Kevin Alfred Strom, WB4AIO

For FM, try 29.600 simplex. For SSB, I've noticed 28.340 seems like
the spot where the 10-10 gang congregates.

Good luck -- With SSN's around zero, it's been pretty rough, but
not completely impossible.

240. GB2RS News 5th May 1996

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-04 00:00:00 UTC
From: David Hough <dave@llondel.demon.co.uk>
Message-ID: <831248250snx@llondel.demon.co.uk>
Source record: 226301
Cross-posted to: uk.radio.amateur,rec.radio.info,rec.radio.amateur.misc

Good morning. It's Sunday the 5th of May and here is the GB2RS news broadcast, prepared by the RSGB and intended for all radio amateurs and short-wave listeners.

First, this week's headlines:

A new amateur band has been allocated at LF,

Special contest callsigns have been agreed,

And the RSGB Morse Testing Service celebrates its 10th anniversary.

We start this week with the good news that last Monday, the 29th, the Radiocommunications Agency announced a new frequency band for radio amateurs. The allocation is in the LF part of the spectrum and runs from 71.6 to 74.4 kilohertz, that is 73kHz plus or minus 1.4kHz. The new 73kHz band is available to any holder of the Class A Amateur Radio Licence who wishes to investigate LF propagation, including transmission to underground caves.

An effective radiated power of one watt may be transmitted using any mode from the Main Station Address only. No mobile or maritime mobile operation is permitted, and use of a Temporary Location requires 7 days notice to the District office of the Radio Investigation Service.

Use of the 73kHz band will require a Notice of Variation to an individual's licence, and the RA has asked the Radio Society of Great Britain to process the applications. Requests for an NoV must include: Name, Callsign, Main Station Address, Modes to be used, and whether the applicant intends to operate at a temporary address. The request must also include some background information explaining the reason for making the application and the intended uses of it. Applications should be sent to: LF Allocation, HF Committee, RSGB, Lambda House, Cranborne Road, Potters Bar, Herts, EN6 3JE.

This is yet another service made available to all UK amateurs following negotiations between the Radio Society of Great Britain and the licensing authority.

For keen contesters, there is even more good news. The RA has agreed to an RSGB request that special short callsigns can be issued for use by clubs in certain international contests. The calls will use either the G or M prefix, with the usual regional identifier, a number indicating the year (6 for 1996), and a single letter suffix. Typical callsigns would be G6A, GM6B, M6C or MD6D. The issue of the calls will be only for clubs entering one of eight major international contests. Full details and an

application form can be obtained by writing to RSGB Headquarters, marking the envelope 'Contest Calls'.

An RSGB Regional Open Meeting has been arranged by Fred Stewart, G0CSF, Council Member for Zone C, which covers the south-east of England and East Anglia. The meeting will take place on Sunday, the 26th of May, at 2.30pm at Rivenhall Village Hall, Church Road, Rivenhall, Witham, Essex. RSGB President Peter Sheppard, G4EJP, is due to attend, along with Executive Vice President Ian Kyle, GI8AYZ. For further details contact G0CSF on 01732 780721.

Nearly a thousand Morse Test candidates were examined for the year ending the 31st of March, with a pass rate of 72.5 per cent, reports RSGB Chief Morse Examiner Roy Clayton, G4SSH. An increase of five per cent in the number of candidates was due to an eleventh hour bid by candidates hoping to obtain one of the last 'G' series callsigns before the change to 'M' callsigns on the 1st of April.

Also from G4SSH comes news of the 10th anniversary of the RSGB Morse Test, which will be celebrated on Saturday the 11th and Sunday the 12th of May. More than 30 'GB10' special event stations will on the air over the weekend. A Morse Test Anniversary certificate is available to any station providing log extracts of contacts with 10 'GB10' stations using CW only. The award is also open to listeners. For more details contact Roy Clayton, G4SSH whose address is correct in the current RSGB Call Book.

The International Telecommunication Union celebrates World Telecommunication Day on Friday the 17th of May. The event - which this year focuses on the link between telecommunications and the Olympic Games - commemorates the founding of the ITU in Paris 131 years ago.

Now some items of HF DX news from the weekly RSGB DX News Sheet, which is edited by Chris Page, G4BUE:

From Trinidad and Tobago, 9Y4/HB9TU and 9Y4/DJ4XN will be on the island of Tobago until next Thursday, the 9th, using CW and SSB.

From the Bahamas, KM1E will operate as C6AGN until the 12th of June, concentrating on the WARC bands and 6 metres.

And from today until the 7th, JR0GFM/6 will run 5 watts from Tsushima Island on 10MHz CW, and 14MHz CW and SSB. The island counts as AS-036 for the RSGB Islands on the Air Award.

Now news of special event stations active next weekend:

On Sunday, the 12th of May, 33 special event stations will be on air from windmills and watermills around the country. This is to celebrate the 50th anniversary of the Windmills and Watermills Section of the Society for the Protection of Ancient Buildings. These stations will run in conjunction with the Denby Dale Amateur Radio Society. QSL cards will be available, featuring line drawings of each of the mills involved.

Also, certificates will be awarded to those stations which contact more than 10 mills. For further details contact Jasmine Marshall, G4KFP on 01274 869849.

The Annual General Meeting of the Worked All Britain Awards Group will be held at the Drayton Manor Rally next Sunday, the 12th of May. For further details contact G1NUS whose address is correct in the RSGB Call Book.

Next the Rally News:

Today, Sunday the 5th of May, the Anglo-Scottish Rally is at Tait Hall, Kelso. Doors open at 11am, or 10.30am for disabled visitors. Talk-in is on S22. The event features trade stands, a bring and buy stall and a raffle.

On Bank Holiday Monday, the 6th of May, the Dartmoor Radio Rally takes place at Yelverton Memorial Hall, Meavy Lane, Yelverton, Devon. Doors open at 10.30am and there will be access for disabled visitors. Talk-in is on S22. Telephone 01822 852586 for more information.

Also on Monday, the 6th, the Mid Cheshire Amateur Radio Society Rally takes place at Civic Hall, Winsford, Cheshire. For more details telephone 01606 77787 during the evening.

Next Sunday, the 12th of May, the Drayton Manor Radio and Computer Rally is held at Drayton Manor Park near Tamworth, Staffordshire. There will be trade stands plus a bring and buy sale. For further details telephone 0121 443 1189 during evening hours.

70cm repeater GB3OH in Central Scotland has been taken off the air for about one month to upgrade of the equipment. For details contact John Wilson, GM6WQH whose address is correct in the current RSGB Call Book.

70cm repeater GB3CL, in Essex, went off the air on the 25th of April for engineering work. Further details can be obtained from Richard Kearnes, G7HJK whose address is correct in the current RSGB Call Book.

70cm repeater GB3SV, in East Hertfordshire, is back on the air after being temporarily out of service.

Now for the contest news:

The RSGB 432MHz to 248GHz Contest is taking place this weekend, ending at 1400 UTC today, the 5th.

Next Sunday, the 12th of May, the second of four RSGB 24GHz Cumulatives takes place. Rules are on page 84 of the March RadCom.

And now the solar factual data for the 22nd to the 28th of April:

Solar activity increased to "active" levels with a M3.6/SF solar flare on the 22nd. Unfortunately, the sunspot group responsible for this solar flare was right on the west limb of the sun, and none of its energy had any effect on Earth. The following day the sunspot group had rotated out

of sight. Solar flux levels declined from 72 units on the 22nd to 67 units by the 28th with an average 69 units. The 90 day solar flux average on the 28th was 71 units. Geomagnetic activity was mostly "quiet" throughout with an average of Ap 7 units. X-Ray flux levels were up to B2.6 units on the 22nd in response to the solar flare on the same day but declined sharply to A1 units by the 25th.

Now the ionospheric data for Central France. The period from the 19th to the 25th of April saw the F2 daytime critical frequencies at a disappointing level averaging only 5.8MHz. The 19th was the best day at 6.3MHz. The darkness hour lows declined from 3.3MHz on the 20th to 2.4MHz the following day but improved to 3MHz by the 25th to give an average of 2.8MHz. The daylight highs took place between 1400 and 1900 hours except on the 25th, when they were at 1100 hours. The darkness hour lows took place at 0400 hours every day except on the 19th, when they were at 2200 hours.

And lastly the solar forecast. This week the quiet side of the sun is expected to be looking our way. Solar activity is expected to be at very low levels with the solar flux levels in the high 60s. Geomagnetic activity is expected to be "quiet" for the first half of the week but then may increase to "sub-storm" levels towards next weekend. Ionospheric MUFs for the south during daylight hours are expected to be about 18MHz, and for the north 15MHz. The darkness hour lows are expected to be about 11MHz.

The Eta-Aquarid meteor shower is at its peak today and tomorrow. Also, the beginning of May is associated with the start of the sporadic E season. There have been some openings already during April and this suggests conditions could be good this summer, especially now that we are so close to the sunspot minimum.

And that's the end of the solar information.

Finally in the main news, SSL has informed the Society that as of last Wednesday morning, the latest callsigns allocated were in the M0 Alpha Charlie and M1 Alpha Tango series, and Novice calls in the 2 0 Alpha Oscar and 2 1 Echo Zulu series.

i like ham gatherings because they make me feel so young and vigorous
compared to most of the attendees --- and i'm 48.

i find there are two types of older people; those who have been hams
since marconi was a pup and those who have retired and now have the
time to pursue the hobby. most of the latter have as much interest
and enthusiasm as any 20something, while the former think CW on a spark
gap is the cat' whatever.

interesting that many straights (and i am not gay) insist that they
have the right to persecute people AND that these people should not
talk about it. Interesting too that xtians who form the homophobic
core of the bigots in today's society should forget that the same lies
they used to say about jews are being recirculated about gays.

Guess the christians havent had enough genocide.

>One thing is for sure, If there are any of them perverts around, DON'T bend
>over!
lets see...the christians used to preach that jews used the blood of
christian children in their rituals.

then the christians used to preach that blacks needed slavery to
christianize them

then christians used to preach that women were too stupid to vote

and they used to preach that the jews killed christ, and that the
earth was created 6000 years ago.

now theyre preaching hatred against gays.

With a batting average like this, i think the facts speak for
themselves.

It seemed to hint at giving evidence against other amateurs. But why the Commission believes that someone they have already characterised as lacking in candor and misrepresenting facts (i.e. being a liar) could later be brought before an administrative judge and held to be a truthful government witness is of great concern to me.

245. Amateur exam practice via WWW & Email

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-04 00:00:00 UTC
From: Simon Twigger <simont@post.its.mcw.edu>
Message-ID: <318B8CD9.3D92@post.its.mcw.edu>
Source record: 226306

Hi there,

I have a WWW site currently up and running which provides practice amateur radio examinations. It generates authentic exams for Novice through to Extra (including the new extra pool) along with appropriate figures and will grade your answers and provide you with an indication of which areas you need to work on to ensure a pass.

The site also has the question pools, figures and FCC part 97 available for viewing/downloading.

It can be found at:

http://www.biochem.mcw.edu/Postdocs/Simon/radio/exam.html

It is also possible to receive sample exams via Email. For example, to recieve a sample Novice examination, simply send email to:

exams@eeyore.biochem.mcw.edu

with the line:

generate novice

in the body of the email and you will receive back a generated exam paper with the answers provided at the end. To receive the other exams simply replace novice with technician, general, advanced, extra or extra96 (new question pool). Please use lowercase letters. If you wish to receive more than one exam, add on extra 'generate exam_name_here' lines as required, eg.

```
generate novice
generate novice
generate technician
```

This will send you two different novice papers and one technician paper.

I am keeping all the results for each exam that is taken so you can also see the statistics for each exam and subelement. Currently the Advanced is proving to be the hardest with a ca. 56% pass rate.

Thanks to all the people who have sent me email about the site over the past few months, it is most appreciated. :)

Once again, the FCC shows it can slap a wrist with the best of 'em!

The only way to deal with these idiots is swiftly and aggressively. Mainline hams have been SCREAMING for years to the FCC to do SOMETHING, ANYTHING about this. Okay; so the guy gives up a technician license, pays a $500 fine and cooperates with authorities. That means he'll be back on CB as long as it takes to get to Radio Shack!

Now that the FCC's on a roll, how about a crackdown on the REAL idiots; those retired confederate soldiers on 3850 and up running 5kw and QRMing every net on the air. It's ridiculous! Half the time, I can't hear the trader's nets because some alcoholic's got a digital voice box full of obnoxious sounds!

Don't let me find 'em. I'll be more than happy to take a pair of wire cutters to their antennas.

You'll need more than a wire cutters for these folks. From the power levels that these boys are running, I would guess most of them are using hardline and not coax.

A friend of mine has one and his battery light goes on within the first
15 minutes of use after a full charge. Try ignoring the battery light and
seeing how long the pack lasts until it won't let you transmit (turns itself off)
you may infact have a mal-adjusted battery light and a perfectly normal pack!

Jim, Gate one opens May 31, 1996. If you qualify for Gate one send
$30.00 with your 610-V to:
Federal Communications Commission
Amateur Vanity Call Sign Request
P. O. Box 358924
Pittsburgh, PA 15251-5924

As you may know Gate one is for former holders, relatives of deceased
operators, and request for club calls. See Fact Sheet PR5000 Number
206-V for further information.

From: res@cmprime.cis.att.com
Message-ID: <4mgdcj$s5i@anchor.cis.att.com>
Source record: 226324

This is a posting regarding ham boatanchors - "Rigs with, at most,
2 modes - CW and AM" - quote by kc2mf

I suggest that until we get our rec.radio.amateur.boatanchors list that
we begin posting in this newsgroup. If postings begin with "BA"
they will be readily spotted within the newsgroup, and I am sure some
interesting threads will get underway. This way we can have a "virtual
newsgroup" until the real one gets created. Boatanchor postings are
within the charter of this newsgroup.

This is a boatanchor post -

I promise to keep you up-to-date on the status of our newsgroup proposal here. Not meaning to bore anyone, but for the benefit of readers to this newsgroup who have not been following the action over in rec.radio.swap I will recap:

About 3 weeks ago I volunteered to create a new newsgroup proposal and started the long processes of getting it voted in. I DID submit a proposal (called a request for discussion, RFD) and uunet referred it to a committee, called group-advice, for comment. They recommended "antiques" instead of boatanchors, because they are concerned about the name having a clear understanding worldwide, and among readers who are not necessarily hams. I asked if they would condsider "classics" as a compromise (now I'm sorry I did) and they said it was tolerable. Then after discussing with some folks who were interested in helping me, we decided to go ahead with boatanchors and I resubmitted. That is when I got a VERY serious response from one of the group-advice members saying they would allow the RFD to go through but would vote against it and would encourage others to vote against it.

There was a release of RFDs 5/2/96 and ours was not included. So right now we are just waiting. I have been told by someone who is quite experienced that we should be patient.

This is a boatanchor posting -

There is a bunch of activity in the northeast (US) on QRP AM.
Several of the guys use modulated Hartley oscillators. They are
always built with triodes, it seems. Tubes like 210s (?).
I checked my junkbox for triodes and all I can find are 12AX7-types.
Are there any modern (!) triodes in the 10 watt range that might
be easier to find?
Or, how about making a triode out of a tube such as a 2E26? would
that work? If I tied the screen to the plate ....

>is the issue. For no other reason do they have such a group as to

How do they make their "sexual deviance" an issue on the air? Can you
provide some kinds of examples, or are you just making something up?

>attract others of the same sexual orientation, although radio related,
>sex is still the main reason for having it labeled as such, otherwise
>they would be nothing more than _another_ ARG.

Indeed, they *are* nothing more than another amateur radio club.

>And what they discuss is not the issue either. I guess since the
>natural selection process does not function for them, they must gather
>in numbers to select a partner rather than be ridiculed and or hurt
>for asking the wrong question to the wrong person.

Let me get this straight. You're stuck on this idea that all LARC does is
try to capture people for sex?

>>At LARC meetings, are you required to bend over and take it like a man (as
>>it were) upon entry, or do you just discuss radio things?
>Hell, I don't know, or care. I will never attend a meeting.

Yes, yes, I know, my mind is made up, don't confuse it with facts.

>>Good for you. But don't shove your sexual mores in MY FACE or my child's
>>face, OK? We don't want to hear about your hangups about where my penis
>>goes.
>What's a mores? Oh, morals? I'm not talking morals. The fact that

Mores? It's a word. It appears in my (Merram Webster's Collegiate)
dictionary. If you don't know what a word means, you could look it up.

In any case, to save you the trouble of going out and purchasing a
dictionary, it means "1. The fixed morally binding customs of a particular
group 2. Moral attitudes 3. Habits, manners"

It is, as you presumed, almost synonymous with morals.

>homosexuality is immoral is not the arguement. I don't have a problem
>with where your penis goes, so long as you don't tell me about it (and

>it's nowhere near me GRIN).

So, if LARC members were discussing their collective penises on the air,
that would be a problem in this case, but if they're just discussing SWR,
that should be OK, right?

>>>children, "We put our genitals in places that they don't belong."
>>Sez you.
>Sez them. What else is there to being gay? You can love a man as a

You have a serious lack of imagination. And you are the only one claiming
that certain genitals belong or don't belong somewhere.

>person, a friend or what have you. That does not mean you have to have
>sex with them.

Indeed.

>>Actually, homosexual behavior *has* been found among wild animals. (I wish
>>I could pull up a quote for you on that one off the top of my head -- I'm
>>certain the soc.motss FAQ has one.)
>Get out the book. I doub't it seriously.

Here is the reference:

Judd Marmor, "Homosexual Behavior," 1980; chapter 1: Ambisexuality
in Animals, by R. H. Denniston, p. 34

And a quote:

Frequent homosexual activity has been described for all species of
mammals of which careful observations have been made. This behavior is
so common in domestic stock as to attract little notice from the
husbandman, unless he chooses to use it for some specific purpose. Cows
in heat so frequently mount other cows that the behavior is considered
diagnostic of the estrous condition. Young bulls or steers are often
used as "teasers" to arouse mature bulls in preparation for the
collection of ejaculates for use in artificial insemination.

>>??? See above. Do you hear LARC members trolling the aether looking for YMs
>>to lure into their dens of iniquity? Or are you just a loony paranoid
>>bigot looking to hate someone else but lacking any good reason to?
>No, I leave my amateur gear here in Az when I go to California now.
>Last time I was there, it was worse that a CB channel 19. No calls,
>profanity, jamming. Waste of time to try to operate in Southern Cal.
>(in my opinion and experience)

Have you accidentally replied to another paragraph? Are you responding to
internal stimuli again?

>Nope, no looney here. Just someone that can tell the difference
>between what is right and wrong (In most cases). Homosexuality is
>wrong, has been wrong, will always be wrong. It's my opinion and

See above. Don't hurt your lips too much while reading it.

>cannot be changed. The fact that they must use their sexual
>orientation as the means to justify their existance make it have
>absoluetly no purpose in AR.

??? Yeah, I know, don't confuse you with the facts. Well, I have some news
for you: you don't have to like homosexual acts, or homosexuals for that
matter. Like, who cares? But they are entitled to have their own little
club, just like you can have a club of like-minded people around you.

>>Do you realize that not all LARC members are homosexuals? (I am not a LARC
>>member.)
>I imagine so. But if I am so much the bigot by your standards, then
>why do you feel the compelling urge to tell me you are _not_ a member
>of said group?

I don't want you to think that my defense of LARC has to do with a vested
interest in it.

>>What open advertisements?
>Here, I'll grab the crayons and draw you a picture.
>Gays = same-sex sexual relations

Not always.

>To say you are gay is to say that you have sex with members of the
>same sex.

No, that is not true. You could be celibate. I happen to personally know
gays who are happily married to members of the opposite sex because their
religious convictions preclude them from engaging in homosexual acts.

But, your mind is made up. You have a wonderful certainty of knowledge.
It's too bad it's not in any way colored by reality.

>To have a group based on sexual orientation is to associate with those
>of the same character, and desires.

Right. So?

>This has nothing to do with amateur radio. Hell, you can't even make

Neither does being Jewish, or Christian, or being old (QCRA).

>_future_ ARO's that way. (Can't procreate that way)

So? If they all die out, then it's just a matter of time. So be patient.

>>>to know that they are 'gay' in the first place? Much less have the
>>I dunno. Why do Christian ham clubs need to advertise that fact? Being
>>Christian isn't any more natural than being Buddhist or Muslim or Jewish or
>>Martian.
>I don't know of a religeon that practices deviant sexual relations
>with members of the same sex, do you?

What does it matter? We're talking about whether or not something is a good
reason to form an ARC.

BTW: some druidic and pagan religions (along with, of course, some
long-gone ancient cultures) engage in some, ahem, interesting sexual
practices.

>>>need to form thier own group. Hmm? Do you see Oral sex Ham clubs? Or
>>I wish I did.
>hehe

So if this is so funny, what's wrong with LARC?

>>>how about S&M Amateur Radio Group? Didn't think so.
>>I wish I did. The S&M ARC would probably have more interesting
>>conversations than the colostomy bags being emptied onto 80m.
>Hehehe. From what I hear, 80m is getting that way (GRIN)

See above. S&M isn't in any way natural. Why should an S&M net exclude,
say, non-homosexuals?

>>>In my opinion, there is no other logical reason for having a "gay" AR
>>>group for any other purpose but to advertise or solicit membership
>>Well, that's your completely uninformed, silly opinion. I know, I know,
>>your mind is made up, don't confuse it with the facts. (It probably can't
>>handle more than one or two in there anyway.)
>What facts are you talking about? Oh, perhaps the million man
>march-type facts? You know, where it doesn't add up or look like a
>fact, but it is?

No, facts like LARC isn't out there to solicit sex for its members. (If you
think so, the burden of proof is upon *you* to show it.) The fact that the
logical reason ofr a "gay" ARC is the same as the logical reason for a
Christian one or a Jewish one or a Black one or or or.

>Now, have I insulted you directly? I would appreciate it if you could
>debate on a rational level without sinking down to the very same level
>you are acusing bigots of being on.

Oh, I'm sorry. Yes, by being stupid you've insulted me. You see, there's
nothing wrong with being stupid, so long as you are making an effort to
stop being stupid.

I'm certain that you have it in you to cease from holding onto your silly,
uninformed opinions of LARC. If you inform yourself about LARC, and find
out that everything you say is true, then at least it's an informed
opinion, and I can't argue well with that.

>>>These opinions are my own, to which I am (untill further notice)
>>>entitled to.
>>You're entitled to your opinion. I am entitled to flame you for it.
>Flame on.

Oh, you must have missed id.

>>>Flame me if you wish, it will only serve to label you.
>>Label me? How? I disagree with a stupid person. I like that label.
>Stupidity in this, is replying to your waste-of-time responce. Jerry,

After you get that dictionary and look up "mores", look up "response" too.
And you're right, it seems that my response to you was a waste of time,
since you stubbornly continue to embrace your stupidity.

>under normal circumstances, you're probably an allright guy. But keep
>this above the table. Cursing and insulting only serves to discredit

Cursing? Where have I used a word that would not be acceptable at the
dinner table?

>Rob

>If that's what you want to call it Jerry.

After your last message, I see it is not a lack of imagination but rather
just some inability on your part to *think* that *possibly* ther would be
other reasons for gay people to congregate other than to solicit sex.

After all, every congregation of heterosexuals serves no other purpose than
to solicit sex, right?

>>You are plain wrong. Gay people get together with other gay people not to
>>solicit sex or to convert heterosexuals but to avoid having to put up with

>Get a gip pal. Heterosexuality is natural. Without it, you would not
>be here, nor I for that matter. Homosexuality is not.
>

Heterosexual SEX creates offspring. But it takes just one egg,
one sperm. The experts, for years, have approximated the gay population
at between 3 and 10 percent of the total population.

Your child has a 3/100 to 10/100 chance of being homosexual,
according to these odds. You had the same odds when you were conceived.

Think about this:

Say that 97% of men get married at some point (approx)
and 90-97% of men are heterosexual

Hmmmm, could a homosexual man be your father?

Will you suddenly shun your mom or dad, even though they're happy?
Will you suddenly love your gay child any less, or make his or her
life miserable trying to "cure" them of their "disease?"

Have fun thinking about that...back to CW...

284. Re: CW and Steam Locomotives

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-04 00:00:00 UTC
From: gary@ke4zv.atl.ga.us
Message-ID: <1996May4.075217.22087@ke4zv.atl.ga.us>
Source record: 226345

In article <317817EB.1225@aloha.net> Jim Reid <jreid@aloha.net> writes:
>CW, as does a steam locomotive, has a built in romance that will not
>die. Tho of no more use commercially or economically in the US,
>steam locomotives are still in use, and valuably so, in much
>of Asia and parts of Europe and Africa, of which that I am aware.
>Here in the US, only hobbyists and are left
>to keep many steam locomotives alive and operating all about
>the country, and are very popular tourist attractions.

Yes, the steam locomotive is quaint. It cannot compare to the
diesel-electric for operating economy, however. Even in the
third world, no new steam locomotives are being put into
service. In regions where fuel must be imported, there's no
question that the diesel-electric is cheaper to operate.
And operating cost totally dominates railroad economics.

Read that last sentence again. It's important. Much the same
argument can be used for superior digital operating modes in
amateur radio.

>CW is destined for the same fate. And, as with steam engines,
>should you want to operate a train in certain parts of the world,
>you had better know how to operate a steam engine and know
>quite a bit about its' mechanics!

But I don't live in the third world, so if I want to operate
a locomotive here in the US, I'd better know how to operate
a diesel-electric. This line of argument is similar to the
one which says that much of the third world has outdoor plumbing,
so I should too. That just doesn't follow.

>So there will exist a need for
>CW knowledge for some time to come, as these same parts of the
>world where steam engines are still very viable, are the same
>parts of the world where CW is still very popular to those
>countries' amateur radio community. See for example the article about
>those who have worked 100 or more countres since Nov. 15, 1995,

>author concludes, get on CW, and in particular upgrade to Extra
>since it is in the Extra CW segments of the bands in which these
>DX stations were operated! Of course, your interests in amateur
>radio must include DX chasing for these points, in your case,
>to be meaningful.

Indeed. It should be noted, however, that I've worked over 100 countries on Pactor and RTTY, including some very third world nations (and I'm not a Dxer and don't especially look for foreign contacts). How is that possible? It seems that many of the operators in third world countries are educated and fairly well to do members of their nations (or are first world expatriates), and have the very latest equipment. Even those still using CW have new Kenwood, Icom, or Yaesu radios. Those aren't chicken feed, and the added cost of a Pactor or RTTY unit is negligible. Though I have worked one Indonesian station which was 100% homebrew. In fact, I've worked more foreign Pactor stations than domestic. I'd add that GRAPES has made more overseas sales of its 56 kb RF modem than it has domestic sales as well. It would appear that foreign amateurs are quicker to adopt new and superior techniques than domestic operators.

Perhaps one reason Dx chasing is on CW is that most US Dxers cling to CW as their only alternative to SSB, so perforce the foreign Dx must as well since US operators make up the bulk of possible contacts for them. Something to think about.

A similar line of reasoning can be applied to TV. The US has the most inferior TV standard still used in the world. Other nations use superior PAL, SECAM, or HDTV techniques while the US remains mired in NTSC. Why is that? It's because the US has a huge existing base of NTSC receivers representing almost $100 billion dollars worth of capital equipment. This has established an inertia which has dominated all attempts to modernize. It is going to be wrenching to switch to digital HDTV because so much has already been invested in the NTSC infrastructure.

US amateurs also have a huge investment in CW skills, and it is wrenching for them to discard that investment for superior techniques. In other nations where there may be only a handful of amateurs, conversion is much easier.

I'm afraid I have to agree with Mike's posting. Normally, we've agreed in the past to limit, for instance, on the air discussion of sex, politics and religion. I certainly object to the conduct of those who have used this thread for gay bashing but I feel strongly that there is no need for a group which "advertises" itself as a gay and lesbian organization and an amateur radio club. There are gay organizations and there are amateur radio organizations. If it twirks your bird, join one of each.

As to individual rights, that term is certainly much misused these days. Your rights, as an American citizen, are outlined in the Bill of Rights and amendments to our Constitution. They are few but powerful. Anything else claimed as a "right" isn't legit.

For People that travel fairly regularly between NYC and Washington DC I
am interested in getting to gether (most likely by e-mail) and forming an
organization to put a series of connected 2 meter and 440 repeaters all
the way up and down I-95 and the NJ Turnpike with 911 capability. This
would make it possible to ragchew your way continuously.

Hello all. I need some help with a Kenwood Radio that I purchased at a ham fest this weekend. What I need to know is how to set the tones in the radio. It has the tone board installed but the radio came without a manual. What I need to know is how to set the tones up on this radio. Any help will be appriciated.

together?

>race car enthusists, fishermen, and golfers ? Come on Jerry Boy, wake
>*up*. If you wanna pack fudge, you join a fudge packer's club. Plain and
>simple.

??? Wake up? I'm sorry, how many gay people do you know? (I know quite a
few.) They want to get together, maybe, to discuss ham radio without being
told that they're a bunch of fudge-packers.

I mean, does a group of Jewish radio amateurs get together to perform
religious services, or to talk about ham radio? So why should gays be
different?

Oh, I see. You think that all gay people are busy trying to screw one
another like crazed animals in heat. It is obvious that you have never
dealt with any gay people. Either that, or you are just afraid of admitting
to yourself that you, personally, are one, and want to overcompensate.
There is a thirs possibility, and that is that you are a complete moron,
but I'm magnaminous enough to give you the benefit of the doubt for now.

>And I agree with what Rob has been trying to tell you. If you wanna

Well, then, you're both stupid. No law against two people being equally
stupid on a particular matter.

>pack fudge, do it at *your house*. I don't care how much fudge you
>pack. It's your God given constitutional right to pack as much fudge
>as you wanna pack. I don't think anyone wants to take your fudge
>packing rights away from you. Just keep your fudge packing to yourself.

Fine. But what if I want to have anal sex?

>Don't bring your fudge packing to our amateur radio clubs, our car

They're not bringing fudge-packing to *your* radio clubs, they're forming their *own*. They're doing exactly what you want! So what is the hubbub?

>racing clubs, our fishing clubs, and our golfing clubs. Keep it home
>in the closet where it belongs and *nobody* will complain about it.

Fine, and you do the same. Never mention your sexual desires, leer at women (or men, if that's you're thing), or do any of the such. After all, the sex thing doesn't belong in your radio club!

>It's kinda like masterbation, Jerry Boy. You know, sometimes you
>just get that irrepressible urge to grab that thing an give it a
>good whack. Well, *go for it* !! In the privacy of your own home.
>But don't expect that if you go for it on the sidewalk in front
>of a KMART store on Saturday morning that nobody is going to get
>offended by it. And don't expect that just cuz it feels good to
>you that the rest of us have to put up with it.......

No one is asking you to put up with it. I'm certain that the Chronic Masturbators ARC gets together in the comfort of their own meeting halls and talks about radio and what-have-you. They don't want to bother you, so you don't bother them.

[977]

Newsline report number 977 for release on Friday, May 3, 1996 to follow.

The following is a QST
==========

The FCC says goodbye to the Morse Code for ship to shore communications and also backs away from a pilot project where those who suffer from RFI have to pay for the repair. These stories and more on a special extended Newsline report number 977 coming your way right now.

(*****
MARITIME CW: RIP

The Morse code has come one step closer to passing into oblivion. This, with the April 5th action by the FCC to drop the requirement that vessels equipped with the Global Maritime Distress and Safety System also carry manual Morse code radiotelegraph gear.
Previously, any United States flag cargo vessel of more than 1600 gross tons and U.S. flag passenger vessels were required to carry a manual Morse code radiotelegraph installation when navigating in the open sea or on international voyages. But the older Morse code based safety system is being phased out internationally and is scheduled to be totally replaced by the more modern satellite based system on February 1, 1999. After that date, qualifying vessels won't have to carry any CW equipment if the US Coast Guard determines the vessel has the satellite based safety gear installed.
The Commission requested that Congress authorize the shift away from Morse code as a part of the Telecommunications Act of 1996. The change

will also have a ripple effect into ham radio. After February of 1999 it will become very rare for hams to handle ship to shore emergencies using Morse code to communicate. Chances are that any maritime emergencies that ham radio involves itself in after that date will be using SSB voice or some form of data based communications.

(*****
VANITY CALL SIGN GATE I OPENS MAY 31, 1996

This is a Newsline instant update. Dateline Washington, D.C. May 1st. The FCC has announced that Gate 1 of the long awaited vanity call sign program will open on Friday, May 31st. Amateur operators who meet the eligibility standards may request a vanity call sign on or after May 31, 1996.
As previously reported, to qualify for a vanity ham radio call sign, you must hold an unexpired amateur operator and primary station license grant of the proper operator class. To request a vanity call sign for a club station, you must also hold an unexpired club station license grant listing you as the license trustee.
There will be four application gates opened over a period of time to service the holders of various license classes. Since we do not have the time to outline the entire plan we might suggest that you obtain a copy of FCC Fact Sheet PR-5000 #206 for further information.
And this very important note. The FCC says that you must file your request on its special FCC Form 610-V and that legibility is critical! If the information on your application is not easy to read, you will experience a delay in processing, lose the opportunity to obtain a requested call sign or even obtain a call sign different from what you want.
A $30.00 fee is required with your Form 610-V application. Payment of the fee may be made by check payable to FCC, by bank draft, money order or credit card. If paying by credit card, you must also complete and submit FCC Form 159 with your FCC Form 610-V. The FCC warns do not send cash. Send your application package to the:

Federal Communications Commission
Amateur Vanity Call Sign Request
P.O. Box 358924
Pittsburgh, PA
15251-5924

We'll have more for you on this, the opening of the amateur radio vanity call sign program next week.

(*****
FCC DROPS RFI PROGRAM

The FCC is admitting that trying to get the public to pay to resolve TVI and other kinds of interference, just won't fly. It has quietly end its pilot program in Florida.

The Federal Communications Commission has ended its pilot program here in Tampa, Florida, that referred consumer electronics interference cases to a local repair shop for resolution. Jim Dailey, the FCC engineer in charge in Kansas City headed up the FCC's privatization RFI task force. He says that data collected by the FCC showed the program had no takers. This, says Dailey, was because the complainants do not want to spend their money to eliminate the interference problems.
Fear may have been another factor in the failure of the program, says Roy Lewis, W4WLY. Lewis operates Vulcan Electronics in Tampa was the only shop certified by the FCC to deal with interference problems. He reports that all of the 2,000 or so complaints of RFI to televisions, stereos, telephones and even air conditioners, stemmed from unlicensed, high-power operations that the customers already had identified. He said the customers not only didn't want to pay to have the problems resolved, but that some were afraid of retaliation if a repairman went out to investigate the problem.

The big question now is what other possible interference resolution services the financially strapped FCC will suggest next. So far their only action is to make available a pamphlet on the cause of RFI that contains a cut out complaint card. No the card does not get sent to the FCC. It gets mailed to the company that made the device suffering the interference problem. If that brings no response, the FCC says to file a complaint with the Electronics Industry Association, a lobby group that represents the consumer electronics industry.

(*****
NEW STATION LIMITS

The Federal Communications Commission has raised the number of commercial broadcast stations that any entity can own. According to the new limits, a company can own as many TV stations as it wants as long as the station's don't reach more than 35% of the nation's TV viewing households. Previously broadcasters could own only up to 12 stations, reaching up to 25% of households. The changes were designed to allow TV networks expand and compete more freely with cable networks and direct broadcast satellite systems and are a part of the new communications act signed into law earlier this year.

HAM RADIO BANNED FROM OLYMPIC VENUES BY BROADCASTERS

If you're going to the Atlanta Olympics as a spectator, leave your handheld in your hotel room.
Despite reports to the contrary from other amateur news sources, the official in charge of radio usage at the 1996 Summer Olympic Games says spectators may NOT bring handheld ham rigs or scanners to Olympic "venues," the formal name for sites where events will be held.
Mike Smalls, Chairman of the Olympic Broadcast Frequency Coordination Committee, told CQ VHF that exceptions MAY be made for hams providing

communications support for the games, but only if the appropriate officials request them. Even then, each radio will be subject to inspection, testing and approval.
"I can't afford non-coordinated transmitters," Smalls told us. "Who knows if a transmission is going to blow away a live wireless microphone or an NBC news feed?"
In summary, according to Smalls, "No scanners, no HTs, except for game support." On the other hand, cellular phones WILL be allowed, in accordance with an FCC request.

(*****
DISH OPPOSITION

Opposition is growing to an FCC mandate that says anyone can put up a tiny direct broadcast satellite dish and its the property owners that are making the noise. The Building Owners and Managers Association International has put the FCC on notice of its opposition to being forced to let anyone put up Direct Broadcast Television satellite dishes. At issue is the FCC's plan to allow the mounting of satellite antennas on a building owner's property regardless of the building owners' opposition. BOMA is joined in its 40 page filing by the National Apartment Association, National Realty Council, Institute of Real Estate Management, International Council of Shopping Centers and the National Association of Real Estate Investment Trusts.
BOMA says that any attempt by the Commission to compel building owners to allow the placement of antennas in or on their buildings or surrounding property by third party telecommunications providers, tenants, or residents violate the owners' rights under the Fifth Amendment to the U.S. Constitution. In addition to its constitutional claim, BOMA cites aesthetic, safety, security and structural integrity issues.
BOMA's April 15th comments closely follow those it filed last month which opposed mandating access for telecommunications providers onto private property. Most observers see this issue headed into the federal courts.

(*****
N6NHG PLEADS GUILTY

Computer super hacker Kevin David Mitnick, N6NHG has pleaded guilty to charges of illegally using stolen mobile phone numbers. His April 22nd plea in Los Angeles is part of an agreement arranged by Mitnicks' attorneys with federal prosecutors in North Carolina. Mitnick was arrested in Raleigh last year after being tracked down by a San Diego computer security expert.
Under the plea bargain agreement, Mitnick also pleaded guilty to violating the terms of his probation on an earlier conviction on computer hacking charges. He could face up to 20 years in prison when he's sentenced on July 15th but Judge Marianna Pfaelzer is expected to impose a far shorter sentence.

(*****
ALLEGED NY JAMMER CAUGHT

The lawyer for a Great Neck New York ham accused of using his Amateur Radio station to reroute taxicabs and jam Long Island police communications says that his client will fight the charges.

The lawyer for a Great Neck, New York ham accused of using his Amateur Radio station to reroute taxicabs and jam Long Island police communications says that his client will fight the charges. Michael Abbey, N2LPD, a 19 year old student at Queens College was arrested on April 16th by Nassau County police who say that caught him in the act of making radio transmissions from his bedroom. Police say that he was broadcasting illegally on a frequency used by a local livery service at the time he was taken into custody.
According to the newspaper Newsday, Abbey was booked at the Sixth Precient police station and then ordered to appear in court in Hempstead, New York on two felony counts of eavesdropping and one misdemeanor count of obstructing governmental administration.
Abbeys lawyer told Newsday that a not guilty plea will be entered at the arraignment.

If Abbey does stand trial and is convicted on all charges, he faces up to eight years in prison.

(*****
SPOC PLANS MADE PUBLIC

If there ever is a single point of contact between the repeater coordinators and the FCC, it probably will not be what was decided at last Octobers repeater coordinators conclave in St. Louis, Missouri. The coordinators have finally released several documents that detail their desires and what they are asking is for ARRL funding and almost complete autonomy.
Basically, the coordinators have decided to form a national umbrella group called the National Frequency Coordinators Conference or simply N.F.C.C. Its similar in many ways to the National Conference of Volunteer Examination Coordinators except that N.F.C.C. will concentrate on issues of interest to repeater owner operators and the coordinators that assign them their operating frequencies.
NFCC has completed a proposed Memorandum of Understanding that will be submitted to the American Radio Relay League. The Leagues Board of Directors will then vote on the proposal when they meet next summer. Until that time, the N.F.C.C. will continue to work on defining its role in coordination issues and the part it will play in overall ham radio society.

(*****
NOT READY FOR PRIME TIME RULE

San Francisco communications attorney Phil Kane, N6SP tells Newsline that the FCC broadcast rule used to suspend the license of Irvin Foret Jr., KB5UJD of Metarie, Louisiana for two years was not the Prime Time rule as we reported. Rather, it is a regulation known as the Safe Harbor ruling. Kane says that the prime time rule limits the amount of network vs. non-network television programming you get to see every evening. The "Safe Harbor" rule invoked in the case of the Louisiana ham is the law that sets

the hours when broadcasters can use indecent language in their programming. And Phil Kane, N6SP knows this law quite well. Before going into private law practice he served as the District Director and Engineer in Charge of the FCC's San Francisco Office.

(*****
HAM RADIO HERO

The March 4th edition of Time Magazine has named Richard Eastman, K1OJH, of Billerica, Massachusetts, was one of Time magazine's Local Heroes. The magazine says that while managing a CompuServe forum, Eastman became aware that one of the participants, the Rev. Kenneth Walker of Scotland, thought he might be having a stroke. Eastman got Walker to type his telephone number and then contacted police in Scotland. They quickly reached Walker and provided first aid. Eastman says that this was a simple thing, with an interesting twist since it was 3,000 miles away.

(*****
LAWRENCE NAMED NASA MANAGER IN RUSSIA

Astronaut Wendy Lawrence, KC5KII has been named to replace Charles Precourt, KB5YSQ as the NASA manager of operational activities at Star City in Russia. As Director of Operations for the Russia operation, Lawrence will support training and preparations of NASA astronauts at the Gagarin Cosmonaut Training Center. She also will be the primary link between NASA and the Russian center's management, coordinating all training and other operations involving NASA or contractor personnel in Star City.

(*****
JAS 2 LAUNCH

Reports from the Japan Amateur Radio League indicate that the launch of JAS-2 is expected about mid August. This newest Japanese amateur satellite is to ride as a secondary payload along with the ADEOS spacecraft.

(*****
UK AWARDS

Also from overseas, the Annual General Meeting of the Worked All Britain Awards Group will be held at the Drayton Manor Rally on the 12th of May. Worked All Britain members wishing to make nominations for the committee or proposals for the agenda should send their suggestions to J. R. Thornnley, G1NUS.

(*****
HAMVENTION BUSSES

The 1996 Dayton Hamvention is now only three weeks away. As anyone who has ever been to the Hamvention knows, at times it is a lot easier to drive to Dayton than it is to park your car. But there is some relief this year. Hamvention General Chairman Ken Allen, KB8KE says to take the bus and leave the driving to us:

"We listened to folks last year when they had a few difficulties with some of the bus service. We have done some things this year to improve that, streamline it a little bit. Make sure that the waits will be a little shorter. A little more uniform. We got agreements at this point with 22 properties in the general Dayton area, most of them, of course close in, that will be selling the bus tickets this year. Again this year one round trip will be $3.00 this year. Tickets available at the hotel desk. KB8KE

The audio of Ken Allen you have been listening to the past two weeks was supplied by Hap Holly, KC9RP of Chicago's Radio Amateur Information Network. This year in addition to recording many of the Hamvention seminar sessions Hap will be hosting a special session of his own for newcomers to ham radio. His list of guests include several well known hams. This includes the editor of a very popular ham radio magazine and the co-founder of one of the nations most powerful repeater coordination groups.

(*****
DX

In DX, 6 meters is the hot band these days and not just here in the good old USA. Neil Carr, G0JHC reports the first E skip opening of the season from Northern England to Italy came on April 21st. The Italian stations were S9+ according to G0JHC.
And Bill Sattler, N0XX says that On April 22nd there was a half an hour of double hop from Oregon to Florida. The only station worked was N0KBH but Bill also heard was K4SC and about a dozen others. The problem was getting through the single-hop stations they were working, plus the fact that they were mainly all on top of one another on 50.125 MHz.

(*****
NEW UK CALL SIGNS

On the high frequency bands, the British Radiocommunications Agency has presented the first of the new "M" series callsigns at a ceremony in Bristol on Saturday the 30th of March. M0AAA was issued to the Reading Novices' Amateur Aerial Association, with the license being presented to club members Paul Sayer, G0VKT, and Ben Clarkson, G7WHO. Ben, aged 14, recently upgraded from his Novice callsign 2E1DHA, and is an active member of the Reading and District Amateur Radio Club. The first "M" series Class B callsign, M1AAA, was presented to Ian Oliver.

(*****
LAST CALL FOR 1996 MCGAN SILVER ANTENNA AWARD NOMINATIONS

If you're planning to nominate someone for this year's Philip J. McGan Memorial Silver Antenna Award, the deadline is May 31, 1996. The McGan award goes to a ham who has achieved exceptional public relations success on behalf of Amateur Radio. The award is sponsored jointly by the New Hampshire Amateur Radio Association and ARRL.
All nominations must be accompanied by an official entry form, available from ARRL's Public Relations department, at (860) 594-0328.

(*****
YHOTY

This note to those who have sent for nominating forms for the Newsline 1996 Young Ham of the Year Award or who have downloaded a form from one of the electronic data sites. If you have a completed form and a nominating package and are holding it back in hope that your nominee will do one more great thing, please don't wait. Send it in now.
The committee judging this years award is spread out across the nation. Once a nomination is received it has to be duplicated and sent to the committee. That takes a lot of time and the more last minute nominations we receive means that each will get a lot less time to be judged.
Some hams have told us that they want their nominee to get credit for working the 1996 ARRL Field Day contest. Take it from us, if you have a good candidate, his or her participation in Field Day will not weigh heavily on the judges decision. Routine activities that most hams participate in are not all that important in judging an award such as this. We ask that you please begin sending in your nominating packages today.

(*****
GENTRY RETIRES

The man credited as being the father of the modern Amateur Radio repeater has retired from the ham radio scene. On April 4th, Art Gentry, W6MEP and his wife Millie, K6JJN left the smog of Los Angeles, California for the splendor of Oregon. Art, who is 90 years young developed the first practical voice repeater system in the early 1950's while working as an engineer for Don Lee Broadcasting Company. Using World War 2 surplus parts, Gentry fashioned a 2 meter receiver that would still hear other signals on the band even though a high power transmitter was retransmitting what the receiver heard on a frequency nearby. By the end of the '50's decade, Gentry had assembled and put on the air K6MYK -- an AM repeater that was to be the grandaddy of every FM repeater on the air today.
Art Gentry's repeater, using his personal W6MEP call sign is still on the air. Since the late '60's it has been an FM machine operating on the frequency pair of 147.24 and 147.84 MHz. About two years ago Art turned the day to day operation of the repeater over to Bill Arens, N6NMC. Arens tells Newsline that the repeater will keep the W6MEP call sign as long as Art is alive. This says Arens as a lasting tribute to the man who made repeaters available to all hams, many of whom have never even heard the name Art Gentry or the call sign, W6MEP.

Subject: Sell out

BF> C O M P L E T E S T A T I O N

BF>I am selling my entire station as one package. See it, test it, buy it.

If you are unable to sell the whole station as a package, I would be
interested in some of the parts. Please advise.

SB DX @ WW $OPDX.253
Ohio/Penn DX Bulletin No. 253

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 253
BID: $OPDX.252
May 6, 1996
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 14400/9600/2400/1200/300 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2DND, W3LPL, WD4NGD, K4CEF & Southeastern Cluster Group, AA5AU, KD7P, KF7E, K8JP, KF8VW, WT8S, DF4RD, DL7VOA, DL9GOA & DX News Letter, DK3VN, F5PFP, F6HKA, G4BUE & DX News Sheet, HL1SSG, JA3AAW, XE2CQ and YB0ASI for the following DX information.

3C0, ANNOBON ISLAND (Pagalu). Paul, WT8S, spoke with Teo, EA6BH, recently on RTTY and was told Teo has plans to return to Equatorial Guinea (3C) next month. While he is there, he will try to get to 3C0 to operate.

3V8BB STATION'S OPERATING PERMITS. Javier, XE2CQ, who recently operated from here states the station's permit will only allow operations on 10, 15, 20, 40, 80 and 160 meters operating on CW, RTTY and SSB with 100 watts. While Javier was there, he tried to get a permit for the WARC bands, but did not receive it. He mentioned Mohamd and Hatm, who are in charge of the 3V8BB club station, are still trying to get all the proper permits to activate the other bands.

3W, VIETNAM. This will be the last week to work Nikolay, UA0FM, as 3W5FM, because he will be leaving on May 9th. He will fly to Moscow on his holiday and will be active from Sakhalin Island as UA0FM in July. He will be on Sakhalin until October or November before he returns to 3W-land. East Coast USA look for him between 1200-1300z on or around 14018 or 14195 kHz. QSL via P.O. Box 66, Vladimir 600011, Russia. Also, Toly, 3W5RS, has been active on 20, 30 and 40 meters CW. Check as early as 0500z and as late as 1430z on 20 and 30 meters. On 40 meters, watch around 1815z or 1400z. QSL via P.O. Box 303, Vung Tau, Vietnam.

7Q, MALAWI. Karl, WF5A, is here until around May 18th, operating as 7Q7KH. He is in the bush, near Vwaza Marsh National Park on the Zambia border, operating with 100w and G5RV as often as work and the hippos permit. Activity is on CW/SSB and most bands. QSL WF5A.

9H, MALTA. The DXNS report Ruben, DL4VCR, will be active May 22nd to June 21st as 9H3II with emphasis on 160 meters. QSL to home call.

9N, NEPAL. Kyoko --- famous for her big Pacific trip in 1990 and 91, and for a previous Nepal operation --- is back in Nepal as a volunteer worker and is on the air signing 9N1KY, which she used previously. She was reported on 21228 kHz on May 1st around 1100-1200z by the JA Cluster, on 7072 kHz around 1945z and on 3797 kHz around 2030z. She will be in Nepal until July.

C6, BAHAMAS. Bill, KM1E, is active now until June 12th as C6AGN from Green Turtle Cay. He will be concentrating on the new bands and 6 meters. QSL via KA1DIG.

CALL FOR VOTES: "Internet Usenet Newsgroup for DXers". Frank, W3LPL, has informed OPDX that a "Call for Votes" (CFV) has been initiated for an Internet Usenet Newsgroup for the DX community, to be known as:
rec.radio.amateur.dx
The complete text of the CFV, dated 3rd May, can be obtained at the Usenet Newsgroup: news.announce.newsgroups
Or you can obtain the complete text of the CFV by sending an e-mail addressed to: jpatokal@alpha.hut.fi
The text of the message should read: request CFV for rec.radio.amateur.dx
Anyone who downloads the CFV text must be careful to NOT redistribute the full text or extracts of the CFV because the Usenet voting procedure considers this to be voting fraud, and this could invalidate the request for this new DXers newsgroup. A Message like this pointing people to the CFV is perfectly okay.

ET, ETHIOPIA (on RTTY!). Waldemar, DK3VN, has recently taked to Peter, ET3BN on 20 meters. Peter told him he is active on RTTY now. When the conditions are good look for him around 1800-1900z on 14085 kHz (+/-QRM). Peter prefers cards direct to POB 150194, Addis Abeba, Ethiopia.
Also, look for ET3SID on RTTY around the same frequency and time.

HB0, LIECHTENSTEIN. F6ELE, F1PNA and F6HKA will be active from the Principality of Liechtenstein, from July 13-20th. There will be two stations active at the same time from 160-10 meters.

IOTA NEWS.... Min, HL1SSG, will be involved in a DXpedition to Jebu Island, Korea (AS-105) with the members of KDXC (Korean DX Club). Their activity will be from May 24-26th. They will begin to operate around 0500z on May 24th and continue until around 0500z May 26th (48 hours). Their equipments are two HF TRCV's and a linear amplifier, and 6 element Yagi for upper bands, and a dipole for 160, 80, 40, and 30 meter bands. The callsign DS0DX/2 will be used for the operation. Jebu Island is located 1.5 miles off west coast of Korea, and was first activated on July 16, 1993 by KDXC (HL93A/2 was callsign). QSL manager is HL1XP direct or via bureau.

ISLAND HOPPING AGAIN. Well known DXer, Ron, ZL1AMO, is at it again. Last weekend Ron was on Fiji, but this past weekend he was active from Western Kiribati as T30BH. His length of stay is unknown at this time, but as

always Ron can be found mainly on CW usually on 40 or 20 meters. He was heard on SSB at 3795 kHz around 0930z. QSL via ZL1AMO.

JX, JAN MAYEN (UPDATE). As reported last week, Per, LA7DFA, is now active as JX7DFA and has been very active on 20 meters (around 14008 kHz) CW. He seems to be active around several different various times throughout the day. Per is primarly a CW operator, but has been heard on SSB. He has antennas up for 160-2 meters at his eastern QTH. Per is into special bands/modes like 144mhz and EME that does not give him much time for "straight HF QSO's". For those that need him on RTTY, check Fridays somewhere between 1000-1400z. He had been working Japan early and stateside later. He was heard saying he will be active on 6 meters during June and July.

AL7EL/KH9 QSLS UPDATE. Lloyd, K4HQI, reports that the cards started going out last weekend. He expects all the received "in log" cards to be mailed by next Monday. Those that require a manual lookup because the call signs don't match will be worked on next week.

KP5, DESECHEO ISLAND. Dan, KE3WH, has stated that he has started the ball rolling for a possible KP5 DXpedition. He has sent many questions on the access to KP5 to the US government, but has not received any replies. Dan is looking for help from any local official to help open up the Island for amateur radio use again. If you can help Dan, it would be greatly appreciated. To contact Dan, KE3WH, write to: Daniel Hart, EMT-P, POB 774, Bear, DE 19701-0774 or via InterNet: DHart29274@gnn.com

NEW DX NET. The LYON DX GANG will be starting up a DX Net every Saturday at 1600z on 14245 kHz beginning May 11th. The net will be run by F5PYI, F5PFP and F5UFX.

NEW IOTA ISLAND. Look for 8A5ITU to be active from Mentawai Islands (OC-???) off South Central Sumatera (Indonesia). Activity will be from May 16-20th with operations on CW/SSB (including WARC). QSL via YC5BLG.

QSL TIDBITS..... Shin, 9V1ZW, has a new QSL Manager. Please use the following address for all QSLs: JA9IFF, Jim Nakajima, Setogaya 138-19-704, Hodogaya, Yokohama, 240 Japan..... Jim, KF7E, informs OPDX the following: "I have the logs for both 5X1XX (93) and 5X1HR (94 CQWW); there was a mix-up with bureau cards, but I now have caught up and straightened it out. I will be sending out the last outgoing batch for both calls by the end of May. K7UP was manager for my 5X1XX, 7Q7JH, and KF7E/V5/Z2/A24 operations 1990-1992. I now have all the logs, and anyone with a card still outstanding may QSL to me direct at the CBA: P.O. Box 627, Organ, NM, 88052"..... Wayne, VE1CBK, reports the Sable Island QSL cards are comimg along a bit slower than planned. His work and other commitments have slowed down the process. He will continue to mail out batches of cards every Monday. Please do not send again, thinking your card may be lost. Wayne will make an annoucement when all cards have been shipped. Thanks to all for your patience....

SPECIAL EVENT STATION. The SPECIAL EVENT station for the Atlanta Olympic games came up May 5th, at 0100z with the call N600BFM. The operator was Bob, 9K2ZZ, stating he was in Atlanta, GA. He said to QSL via W8CNL.

VP5, TURKS & CAICOS ISLANDS. Joe, K8JP, will be active from here as VP5/K8JP from May 9-13th. He will be operating mainly on CW, +7 or +26 kHz from the lower band edges, 160-10 meters. QSL via K8JP, Joe Pontek, P.O. Box 59573, Schaumburg, IL 60159-0573 (Please note, his Indiana address is no longer valid).

VP8, SOUTH GEORGIA. The DXNL reports DA4RG is currently staying on the Falklands from now until August and he hopes to visit South Georgia on a business trip. He will try to use commercial equipment when hitting the airwaves from down there. QSL via bureau to DA4RG or direct to GW8VHI.

ZL8RI FROM KERMADEC ISLAND IS NOW UP AND ACTIVE UNTIL MAY 14TH!!!

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 216-237-8208 14400/9600/2400/1200/300 and leave a message with the Sysop or send InterNet Mail to one of the two following addresses: kb8nw@barf80.nshore.org -or- aq474@cleveland.freenet.edu
- OR - Send a message via packet to KB8NW @ WA8BXN.OH.USA.NA
- OR - Use the VOICE or FAX answering machine at 216-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

In article <4mdv64$1kn@ka4ybr.netmha.com> rmd@ka4ybr.netmha.com (Bob Duckworth) writes:
>
>HF is basically the horse lane when it comes to communications.

Unfortunately true, but it doesn't have to be that way. We now
have some high performance dirt bikes we could be running down
those lanes. It might frighten the horses, but just as we no
longer require a man to go on foot with a red flag in daytime
or with a lantern at night to warn of the coming of a motorcar in
order not to frighten the horses, we don't need special precautions
on HF either to avoid frightening the buggy whip set.

297. BA: boatanchor knobs, PS, and manual

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-05 00:00:00 UTC
From: thompson@atl.mindspring.com
Message-ID: <4mh342$1bdi@mule1.mindspring.com>
Source record: 226198

WTB: I am looking for the following:

1. 2 small alum. knobs for the Heath SB-10 SSB adaptor.

2. A power supply for two old AM/CW mobile transmitters with
these
voltages:
500 to 600VDC@225 to 250ma
6.3V ac @ 4 to 5A
This could be ELMAC PSA500, M1070, Palco or the like.
I have a desk universal but want a dedicated PS if possible

No schematics please as I already have several if I want to roll my
own

3. A manual or copy for the B&W 51SB. I have one for the
51SB-B/51SB-1. I need one for the 51SB as it has its own PS.

Please reply by E-mail to me at: thompson@mindspring.com

Dave K4JRB

: > Japan, China and Indonesia the last several days from Hawaii JIM

During the peak of the last cycle, around 1990, I noticed that 28.400
appeared to be an informal North American calling frequency, and that
28.495 appeared to be the Novice band DX calling frequency.

In the Novice CW band 28.150 appeared to be a calling freq for those
calling CW in CW; 28.060 is the recognized CQ QRP calling freq in the
General CW band.

Glad to hear that KH6-land is getting some 10 meter DX: here in W6-land,
I've not heard much recently except for a sole ZL and a few weak South
American stations.

>a clear understanding worldwide,...

I am amazed that the committee did not realize that "boatanchors" is
the most appropriate, truly descriptive name. All BA enthusiasts call
them that! The committee members may be out of touch with this aspect
of the hobby.

I think the word "Antiques" suggests very old commercially
manufactured receivers (essentially, the early broadcast receivers).

I am not interested in antiques, only BAs.

An AM modulated oscillator would probably show frequency modulation
and would probably also have considerable distortion. Are they really
using modulated oscillators? How do they sound?

I am selecting a dual band HT that transceives on 2m and 440MHZ. I am currently looking at Alinco DJ-582T and Yaesu FT-530. Does anyone have any comments/opinions on either of these radio? Also any suggestions on any other models are welcomed. Oh. if you don want to suggest another HT, the specs for it should be: 2m/440, CTCSS encode/decode, at least 2W output, DTMF. Also extended receive capablility is preferred.

Thanks in advance,
James.

PS I have a Radio Shack HTX-202 now, should I sell it after I buy a new one?

If I am not mistaken, I believe this facility already exists on the
DX-Clusters. There is also a list along these lines in the RSGB
"Amateur Radio Operating Manual", with the origin at London, England.

You may want to check out the new Yaesu dual band 50R. It's very small in size,5w output, exellent audio, wide band coverage (76-200,200-540,590-999), mil-spec 810.

> Can anyone help ? Are there special instructions required ?

> Your help will be very much appreciated. Thankyou.

You've got a misconception as to the function of KISS mode. The purpose of KISS is to provide a way for a computer and software to be able to manage the mechanics of the connection, with the TNC providing only a minimal level of intellegence. All the TNC does is:

1) accept packets from the host computer and send them on the air, while making sure the channel is clear before keying the radio.
2) receiving all packets on the channel that don't have errors and passing all of them to the computer for it to process.

So - to use KISS mode, you have to have software running in the computer that implements the layer 2 protocol you wish to use on the air (typically AX.25). It can also implement other protocol layers above 2 by wrapping those packets in the layer 2 protocol. This is what KA9Q NOS and its variants do.

So - to summarize, a TNC in KISS mode does not exhibit any significant level of intellegence - the reason KISS is available is for those who wish to have the computer perform link management activities - i.e. do all the work...

Hope this helps.

Regards, Bob

: >>people complaining about homosexuals.

I can't verify *why* gay people get together, since I am not one and I have
never gotten together with any. Maybe we can figure it out *logically*.

OK, Jerry, lets think about this for a minute.

I am an amateur radio operator. So I join a ham club. To be with other hams.
So we can play 'radio' together.

I am a race car enthusist. So I join a car club. To be with other car
enthusists. So we can race cars together.

I am a fisherman. So I join a fishing club. To be with other fisherman.
So we can go fishing together.

I am a golfer. So I join a golf club. To be with other golfers.
So we can play golf together.

I join all these clubs so I can find people with the same interests
that I have and I can share those intrests with other people of the
same interests.

But someone who is gay *doesn't* join a gay club to be with other *gay*
people ? They join because they don't wanna be with amateur radio operators,
race car enthusists, fishermen, and golfers ? Come on Jerry Boy, wake
up. If you wanna pack fudge, you join a fudge packer's club. Plain and
simple.

And I agree with what Rob has been trying to tell you. If you wanna
pack fudge, do it at *your house*. I don't care how much fudge you
pack. It's your God given constitutional right to pack as much fudge
as you wanna pack. I don't think anyone wants to take your fudge
packing rights away from you. Just keep your fudge packing to yourself.
Don't bring your fudge packing to our amateur radio clubs, our car
racing clubs, our fishing clubs, and our golfing clubs. Keep it home
in the closet where it belongs and *nobody* will complain about it.

It's kinda like masterbation, Jerry Boy. You know, sometimes you
just get that irrepressible urge to grab that thing an give it a
good whack. Well, *go for it* !! In the privacy of your own home.
But don't expect that if you go for it on the sidewalk in front
of a KMART store on Saturday morning that nobody is going to get
offended by it. And don't expect that just cuz it feels good to

you that the rest of us have to put up with it.....

321. ICOM IC-W31A tech question

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-05 00:00:00 UTC
From: don childress <childcd@camalott.com>
Message-ID: <318D0B07.181D@camalott.com>
Source record: 226222

When the IC-W31A is turned on the word "ICOM" is displayed
for 5 seconds. Is it possible to program my call in place of
ICOM? No mention the manual..ICOM will not accept tech
questions on the net..they refer you to dealers.
D. Childress

Uh Drew. Where does it say you have to become one of them? All they are
saying is that if you already are one, there is a club that you can belong
to without running into the likes of you.

Geeze... some people.

>Sideband Eliminator !

Maybe he's referring to the fact that the bandwidth is 15 KHz and
a sideband station can't get anywhere near the frequency without
being splattered. I've listened to those guys and their sigs are
nothing to brag about. During modulation, the carrier FM's all over
the place. Between that and the bandwidth, it's a mess.

I think people have forgotten why AM was abandoned. It should have
been banned years ago on all Amateur frequencies below 28 MHz.

Kevin,

I think you bring up a very valid point here. I think what we,
as concerned hams, need to do is email the ARRL and ask them, in
fact, if they did approve this club, and if so I think they should
post their reasons to this newsgroup so we all can find out what
is really going on here.

If anyone has the email address for the ARRL, please post it
here so we can all send them a message demanding an explanation.

> a clear understanding worldwide, and among readers who are not necessarily
> hams.

Group advice may mean well but they are a bunch of insufferable idiots
who are bent on "organizing" newsgroup names to their notions of
"order". For example, they have "given" us the stupid set of
rec.autos.makers hierarcy, which adds a wholly unnecessary and
superfluos level, changing rec.autos.vw to rec.autos.makers.vw for one.

They don't necessarily know anything about the culture of the newsgroup
that want to impose their views on.

> I asked if they would condsider "classics" as a compromise
> (now I'm sorry I did) and they said it was tolerable. Then after

> it and would encourage others to vote against it.
>

That's unfortunate, because while they are often anal-retentive, they
also may influence a lot of people who don't know any better. I do,
however support the choice of rec.radio.amateur.boatanchor as the best
choice for the newsgroup name. It's meaning is certainly clear to hams,
and anyone who finds the group in the rec.radio.amateur hierarcy ought
to expect the group to be about amateur radios.

> There was a release of RFDs 5/2/96 and ours was not included. So right
> now we are just waiting. I have been told by someone who is quite

Yes, but don't be bamboozled into accepting "group-advice" (advice,
hell, they try to enforce their damn "advice"!). You certainly have the
right to propose the newsgroup of your, not their, choice.

Rec.radio.amateur.equipment, however, might be a much lower volume,
higher signal to noise, and more appropriate group for this.

Well you may also ask them what it would cost them not to do so.
After all, they had to settle out of court with LAMBDA before.
Maybe they are tired of law suits and just row with the flow?

It would work better, have more gain but.....you have to match the
now 1/2 wave radiator to 50 ohm. Your better bet would be to replace
it with a 5/8 wip.

Color Video Cameras $99.95 Complete!

Get in on the hot new Teleconferencing on the Internet, with
CoLoR! Surf the net's CuSeeMe, Freevue, VDOlive, and other
two way video conferencing packages, and do it in COLOR!

AT+T has liquidated a limited number of these 'state of the art'
video cameras, and they are available while supplys last.

The PV-200 can be used for:

- Video Conferencing - tested on CuSeeMe, Freevue and VDOlive
- Monitoring banks, stores - security - surveillance

PV-200 Color Cameras include:

- Everything you need to produce high quality color video
- NTSC output, plugs into your VCR or any other video device
- CCD - solid state video lens
- Adjustable focus ring - for 'Close up' work
- Power on lamp above lens
- Automatically adjusted iris - for varying light levels
- Mounting kit, power cube, standard RCA video jack
- Measures 3 3/4" wide, 3 1/8" high, and 2 3/4" deep, on tilting base

To own one of these quality video cameras
send check for $99.95 + $5.00 shipping to:

JRM
PO Box 22598
Minneapolis, MN 55422

Your new camera will be sent within 5 business days.

For futher information see the web page:

How about using tubes such as 6SN7. there should be lots of them around.
Also there was a dual triode voltage requlator one of which was
the Western Electric 421 I think.

Among other things, it will raise the feedpoint impedance and cause
the antenna to accept less power.

So politely tell 'em to buzz off. If those "advisers" had half a
brain, all these groups would be named rec.ham.radio.* anyway.

It would be better not to have the group at all than to name it
"antiques" or "classics". Either of those will simply cause the
group to be deluged with posts unrelated to Amateur Radio, and even
less related to boatanchors.

>I am an amateur radio operator. So I join a ham club. To be with other hams.
> So we can play 'radio' together.

If you stop right here, you have the answer. LAMBDA is a ham club for hams
that want to play radio together. The other point is, they don't want to
constantly have to deal with people like you.

Show me an ad for LAMBDA that says "Convert" or "Try it, you'll like it."

>that sex between members of the opposite sex is a normal occurance.
>Get real John.

Normal or not, if you say that you have the right to advertise
your sexual preference and others do not, you are unfairly
descriminating.

>>Is it too much to ask that mister average Gay be allowed the same
>>freedom?
>
>Yes, and no. They should have the right to do and say whatever they
>want. I don't want to put a sock in their mouths. Nor would I want
>anyone to do the same to me.

Now! That's a step in the right direction. As I recall, you started
out the post that I responded to saying you don't want gays
to advertise thier existance. Keep it out of your face, you asked.

>I am merely arguing a point. Now, I do
>get sick of having people try to force people to _accept_ this
>behavior as normal, for it is most certainly not.

Well, you expect me to 'Get real' WRT your sexual perferences, in essence
'having [a person] try to force people to _accept_ this behavior as normal'.
Your sexual prefences, which include streight sex, no oral, are normal enough
if not a great deal mundane. But what are your sexual preferences to be
considered the norm for every one, what gives you the right?

>>I wonder how you would react if a clean cut man who was wearing a wedding
>>ring accidentally slipped the fact that he was partners for life with another
>>man after you got done describing your wife and kids. Would you be interested
>>in seeing the 'wedding' picture he might have in his wallet? Or would you
>>avoid him like the plague for the rest of your life?
>
>I would ask him not to bring that up, but that would not make me run
>and hide. There such a thing as reality. I may still have to work with
>gays, and I may have gay friends or associates, but that in no way
>means that we have to discuss our sexlives. Look, I have a wife. She

>is not only my companion but will soon be the mother of our children.

First, Rob, please do not bring up your sexual orintation again. I didn't ask you nicely the first time, but this time I am. It has nothing to do with what _you_ feel is right or wrong, disgusting or acceptble. It has every thing to do with common courtesy.

And, your right. If the entire world were gay there would be no more humans. But that does not mean that gays do not occur naturally. A large percentage of the world could be gay and we'd still procreate.

>Therefore, you cannot tell
>me that heterosexuality is perverse, or disgusting, or without
>purpose. You can make that arguement for homosexuality.
>

Uh, no _I_ can't make the argument that homosexuality is perverse, or disgusting. It's your aversion, only you can make that argument. My only point is that you either accept gays, and their being public, or stop expecting _everyone_ to accept what you do in the privacy of your own home is the norm for everyone.

>there are still hams out there who cannot afford to buy a commercial rig,
>and still build HF rigs that talk to the world, out of tin cans, and
>scrounged up RS parts. How many guys do you know who can actually do that,
>and actually get a QSO ? Especially on morse code ?

well, i have wound coils on used shotgun shells, and went on the air
with a 102, 2222, 3053, and an ir510 straight from a very small RS. made
caps from glass and aluminum foil. designed and built a keyer from RS
parts. then built the key. worked 40 meter CW.

however, i did all the above because i enjoy that stuff. i don't think
homebrewing, or CW is necessary for the hobby. there is too much emphasis
on making someone's favorite aspect of the hobby a requirement for others
that have no interest in that area.

Recently a fairly new licensee posted a question here, asking about whether some words (I think "hell" and "damn" were mentioned) should properly be used on amateur radio. It was a fair question, if maybe a bit naive.

I am bothered by some of the responses I saw. One, from an experienced Amateur Extra, is excerpted below:

>>
If 'hell and damn' are the worst you are hearing on 2 meters, consider yourselves lucky. If you find 'hell and damn' offensive, foul, or profane, I suggest you give up amateur radio and stay in the house.
>>

This amateur, rather than trying to be helpful to an obvious newcomer, adopts a sarcastic attitude and belittles the question. Let's all have a look at the "amateur code" by Paul Segal and guage our behavior toward each other based on his suggestions.

>makes you feel good. Just keep it our of our face.....

So what? Rob's wife and kids don't have to go to LARC meetings in the first place. Moreover, what makes you think that all that goes on at LARC meetings is sex? You seem preoccupied with it.

>: They're not bringing fudge-packing to *your* radio clubs, they're forming
>: their *own*. They're doing exactly what you want! So what is the hubbub?
>There you go again, Jerry Boy. Did you *read* what started this

>thought would let us down, those bowtied wonders who are otherwise
>unemployable, the A.R.R.L in NewingClown, Conn. admitted
>the 'boys' into *our* club. Try this next time (seems I told you this

They gave them "affiliated" status. So what? Each (or almost every) member of LARC individually joined ARRL, so what's the big deal? Does that mean that the ARRL approves of their lifestyle? No. It means that the LARC met the requirements for being an ARRL affiliated club, just like the Ocean Parkway ARC might (if I bothered to form it). You don't have to attend the LARC meetings if you don't want to, and they don't have to attend the Stupid People's ARC meetings, either. Guess what? Said LARC members passed the FCC exams to become licensed amateurs, and many of them even hold driver's licenses. Some of them may even enjoy fishing, and join fishing clubs? So what?

By the way, the "our" in "our hobby" includes those gay amateurs as well. If you feel that the ARRL has let you down, you can always vote with your feet and drop your membership.

>1. Read.
>2. Think.
>3. Type.

Indeed. I would strongly suggest you start.

>: Fine, and you do the same. Never mention your sexual desires, leer at women
>: (or men, if that's you're thing), or do any of the such. After all, the sex
>: thing doesn't belong in your radio club!
>Jerry, did your daddy work at a cinder block company ? I'm starting to think
>so cuz your head is hard as a brick. This discussion is *not* about sex.
>Sex is normal. If a boy does it with a girl. I don't need to mention my
>sexual desires at a radio club meeting, Jerry Boy, my wife takes care of
>all of those in the privacy of our own home, thank you very much.......

Like I don't care if your wife or your wife's dog takes care of your sexual problems. Why are you throwing it in my face? How can you be so dense about it? You're complaining about LARC throwing their sex acts in your face, and here you are throwing yours into mine.

A moronic hypocrite. Well, it is to be expected.

>Again you have verified the fact that you are totally unaware of why this
>discussion even started. Let me refresh your feeble memory, in the hopes

Actually, I've been following it from the beginning. I'm responding to specific points in your (ahem!) argument to show how inane they are.

>that this may lower your blood pressure a bit. The gentleman who wrote
>the *original* post concerning LAMBA was upset about the fact that the
>ARRL had made them an affiliated club, i.e., the ARRL by admitting them
>as an affiliate was condoning their activities when in the past the
>ARRL had refused their advertisements in QSTreet ragazine, probably

Right, and ARRL shouldn't have done that. LARC money is as green as yours, right?

>because of their perverse sexual activities. Read that 3 or 4 times,

Get this through your head (if you can). LARC isn't about sexual activities. It is about similar people getting together to talk about (and work on) radios. NOT about sexual perversions, or about Purity of Essense, or whatever.

>think about it for five or ten minutes, and then explain to us where it
>says 'Homosexuals shouldn't be allowed to have their own ham club'.

So if they are allowed to have their own ham club, why can't it get ARRL affiliation? The club meets the criteria.

>Neither is ham radio. But who needs it anyway ? As long as we have
>guys like you that will take an opposite point on any subject, we can
>all have a *new* hobby - arguing on the information stupid highway.
>That would solve this discussion also, because if you are in fact,
>a fudge packer, I would *much* rather talk to you via email that at
>a ham club meeting anyway.....

Like I said, I could give a rat's behind whether you think I'm gay or not. I don't take an oppositive point on the subject for kicks and giggles, but because I can't let moronic comments go unanswered. Besides, what makes you think that, were I gay, and we met by chance, I'd try to "convert" you? I'm not into necrophilia in any case, and it's pretty clear that your brain died long ago.

It appears that the choice of the "boatanchors" name represents a certain amount of childish mischief, deliberately intended to compete with an existing mail list and create a certain amount of confusion. There already is a Boatanchors list covering exactly this same subject. This proposal was put forward by people who admit that they were unhappy that this mailling list began charging a subscription fee.

If this were a commercial business, then trade mark privileges would apply and the proposed newsgroup would have to find another name.

As a matter of common courtesy, this proposed group should choose another name. There are a lot of obvious alternate candidates from the colorful

(such as "doorstops") to the descriptive(such as "tubes").

The campaign for the "boatanchors" name only looks like sour grapes.

361. HELP TEACHING CW CLASS

Newsgroup: rec.radio.amateur.misc

>Jeff KH2PZ

Well sort of. If dad kept his old class C callsign, then anybody
(except a novice) can get the callsign. It's not the type of license
that matters, but the CLASS of callsign.

The 146.820 repeater club gives the test in Gainesville once a month
(at least they used to.) That is where I took the test last May.

Ever heard about any *heterosexual* bath houses in San Francisco ?

There were many bath houses in SF that didn't have any requirements as
to gender or sexual orientation. You're as ignorant of this as you
are about many other things.

>ON THE AIR. Guess I don't like to see radio equipment to be abused.

Welcome to the eras of budget-problems in enforcement! The FCC's attitude about this machine is that it provides a cess-pool, where all the effluent of Amateur Radio can congregate. It also provides an easy targeting situation should they actually decide to go after all the law-breakers, since they seldom stray from .435 and would be quite easy to DF down.

Now, in defense of the few individuals on .435 who DO set a good example, who do ID properly, who DON'T jam, who refuse to talk to the ELEPHANT/bargain with the ELEMENT..etc. You people are wasting your time, but it's YOUR'S to waste, enjoy!

...when .435 is down, the drek, bootleggers, jammers and other scum all migrate to the various OTHER 2m machines; causing havoc EVERYWHERE! Think of it as a 'sacrificial-anode'...to prevent the spread of such nonsense..a small price to pay..and easy enough to cure, should the funds come available to the FCC to do so.

Consider the Financial ramifications.... The ARRL had to defend itself in a
lawsuit over refusal to run the Lambda classified ads. Yes this is our dues
money at work in legal defense. The end result was a ruling that the ARRL was
in the wrong. To make Lambda "whole" the ARRL had to not only accept their ads
but provide free space for some period of time. Given the beating the ARRL
took in this case, the outlook over winning a lawsuit over the granting of
affiliation was a money pit waiting to happen with the liklihood of loss
eminent. Why waste more resources ?? ARRL is in a no win situation with
membership. Homophobes cry foul about letting the gays in and gays cry foul
about misuse of funds and support of the homophobes demands.

368. ARES/Emergency Response Exposition - London, Ontario

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-06 00:00:00 UTC
From: Dave Colvin <dave.colvin@uwoadmin.uwo.ca>
Message-ID: <4mlfmp$r7s@falcon.ccs.uwo.ca>
Source record: 226118

I would like to take this opportunity to invite members of this list to visit the Web Homepage for a very unique Community Emergency Preparedness Project that I coordinate.

http://hamster.business.uwo.ca/~dcolvin/partners/part96.html

To be held May 10 and 11 in London, Ontario, Canada we would welcome all list members to visit. We are about two hours east of Detroit or west of Toronto. There's already been interest from the Internet community outside of our area to come visit.

Here's some details:

WHAT IS PARTNERS IN RESPONSE?

Amateur Radio, Police, Fire, Ambulance, Search & Rescue, Industry and Transit are all Partners in Response when a major emergency strikes a Community.

This emergency preparedness display provides the Community a chance to see the equipment and talk to the people that protects their Community. Partners in Response is also a great opportunity for paid and volunteer emergency response organizations to get to know each other in an information sharing environment. Originally organized as an Amateur Radio Club meeting at the London Transit garages, this exposition has grown to be a full community-based event. This year's location Westmount Shopping Centre, provides improved public accessibility and a much higher profile.

NATIONAL EMERGENCY PREPAREDNESS WEEK

May 6th to 12th is Emergency Preparedness Week in Canada. In declaring this special week, the federal government joins with several provinces this year in an effort to increase public awareness of the need for individuals, families, municipalities, businesses and community organizations to prepare for emergencies of all kinds.

Every year Canadian communities are hit by large-scale emergencies and local disasters -- floods, forest fires, toxic spills, blizzards, tornadoes, and industrial accidents -- to name only a few of the natural and human-caused events that can threaten lives, property, the environment and the local economy. Local volunteers, teams of professional first responders, regional, provincial and federal organizations all have a role.

OBJECTIVES

There are four main goals for the 1996 event:

-Demonstrate to area residents the level of preparedness in the Region
-Facilitate the networking of responders and the documentation of resources
-Provide a demonstration of Amateur Radio to the public safety agencies and other interested officials
-Introduce the capabilities of agencies that respond to emergencies to the Amateur Radio community

ACTIVITIES

There will be upwards of seventy displays spread over the parking area across from Saunders Secondary School as well as throughout the Mall. We plan on having a wide range of things happening over the two days. There will be demonstrations including a US Coast Guard HH65 Dolphin rescue helicopter, and a National Helicopter Bell 222 medivac landing, police dogs, police explosives robots, repelling demonstrations, hazardous materials response demonstrations, vehicle accident extrications, and simulated downed aircraft tracking. Inside there will be videos, handouts, videos, and slides. And, you'll see Amateur Radio in action with capabilities such as television, data, and long range an Amateur Radio HF Special Event Station....

370. Re: Help! New to Amateur Radio.....

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-06 00:00:00 UTC
From: John Kitchens <kitchens@earthlink.net>
Message-ID: <4mlnh5$3r3@chile.it.earthlink.net>
Source record: 226120

31 years ago, in the 7th grade, I was fortunate enough to have an electric shop teacher offer me an automatic "A" if I went into the radio room. A few of us did, got that "A", and became hams. I still have friends on the radio that I run into every once in a while from those days. I was fortunate also to have someone hold my hand while I fumbled my way through my various experiences at the age of 11. The best thing you can do is to find a local ham club that will help. i assume you are on the University of Kansas campus. They should have a club there. If not, visit your local Radio Shack. Most Radio Shacks have a listing of local radio clubs, especially if radio clubs have the smarts to do alittle advertising, and put up flyers in the store. I know locally we have had great success using this means. Also, look in the yellow pages for a local radio store. There are a few in your area. They will support the local clubs. "CQ" and "73" magazines are sold on magazine stands, sometimes in the local drugstores, such as Wal-Mart or Target, even in grocery supermarkets. Get a copy of the magazines, read it, look at the ads, and get an idea of some of the topics available. At last count, I had 76 different aspects of amateur radio that you might be interested in, from television, to contesting, to chasing rare stations, to digital modes of communications, to just plain talking to folks. When you find the ARRL (Amateur Radio Relay League, so-named because years ago we were not able to directly communicate across the country, but had to have our message relyed from station to station) web page, look for your local volunteer representative. They are broken down in to divisions, and then sections. Your section manager should have someone responsible for new people, and definitely a club representative. Their telephone numbers are listed. Give them a call. Also, if you find "QST" sold in stores, the official publication of the ARRL, the names and numbers of your local person will be listed. Some libraries have "QST", and I have been told that it is now being sold in major bookstores, such as Crown and B. Dalton. The best way to learn about radio is to have someone show you what to do, and someone available to ask questions. I have done that over the years, both asked and answered many questions. Second to personal contact, read the magazines, get the books, and have fun. Remember, this is supposed to be a fun hobby, one where you will learn while having fun. Don't stop with one aspect of radio, such as repeater use or packet, or whatever is the current end-all. Continue to grow and learn, try new aspects, and grow. If one part of radio doesn't excite, then maybe another one will. 73, and email any time you have a question or comment. John Kitchens, NS6X kitchens@earthlink.net

371. US License Examination Opportunities Scheduled 5/6/96 through 9/9/96

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-06 00:00:00 UTC
From: "Bart Jahnke, KB9NM ARRL/VEC" <vec@arrl.org>
Message-ID: <318E5501.12D6@arrl.org>

You can Email the ARRL/VEC (or this page's content
administrator) at "vec@arrl.org".

****

Have you recently passed your test? Find out your new call sign and/or
license privileges using the following World Wide Web URL (or by using
the phone number shown below):

http://www.ualr.edu/doc/hamualr/callsign.html

At ten (10 days) after the test session call 860-594-0300.

****

AMATEUR RADIO EXAMINATION OPPORTUNITIES

****

Want to find out what if your new FCC license has been granted?
Has it been 10 days since you took you examination?

If so, Call ARRL at 1-860-594-0300 (8 am to 5 pm weekdays, eastern time)
to find out. We suggest that you not call the FCC (should you choose to
call the FCC at 1-800-322-1117 during business hours, be aware that their
number is normally busy).

Your hardcopy (printed) license would follow shortly after the license
grant is indicated in the FCC Amateur Service data base.

If your test was coordinated through the ARRL/VEC, license turnaround
time will be approximately 7-15 days. This includes 1-5 days for the
VE team to complete their processing (the team has up to 10 days before
they must mail the results), 3-5 days between the VE team and the VEC;
2 business days at the VEC (in some cases only 1 day); and 1-3 business
days at the FCC. Allow 5 business days from the date that the VE team
estimates the test session results will reach the VEC.

****

NEED AN FCC FORM 610?

The ARRL/VEC can supply you with your needed Forms 610, whether
they be for the Reciprocal Permit for Alien Amateur Licensee,
Form 610-A; Club/Military-Recreation/RACES station, Form 610-B;
or Form 610 for Amateur Operator/Primary Station License. FCC
Form 610-R is a computer generated renewal form that will be
sent from the FCC (beginning September 1995) to licensees whose
license is to expire within 90 days. Form 610-V is the special

application for persons seeking a Vanity call sign (see below).

Several FCC forms, including Form 610, are available through the
FCC's fax-on-demand service by calling 202-418-0177
(request form "000610" for Form 610, form "006108" for Form 610V).

You can obtain FCC Form 610V along with FCC form 1070V and FCC
vanity call sign information fact sheet PR 5000, number 206v)
by writing ARRL, 225 Main Street, Newington, CT 06111.
You must include an SASE.

Form 610V also is available from the FCC via the internet at

http://www.fcc.gov/Forms/Form610V

or

ftp://ftp.fcc.gov/pub/Forms/Form610V/

The FCC Forms Distribution Center will accept FCC forms requests
by calling 800-418-3676.

****

STILL NEED TO PREPARE FOR YOUR EXAM?

If you would like information on how to become licensed; or
how to locate Amateur Radio clubs, instructors, licensing
classes and/or Novice examiners in your area; please contact
the ARRL Educational Activities Department (EAD) at
860-594-0301. The EAD can also provide information on
recommended study materials. Electronic mail may be forwarded
to the ARRL EAD via USENET at "ead@arrl.org" or via MCI Mail to
MCI ID: 215-5052.

****

THINGS TO BRING TO EXAMINATIONS

Bring a photo ID along with a second form of identification (else
bring two non-photo forms of ID); bring your original FCC license
and a photocopy of your license (if you are currently licensed);
bring the original and a copy of any Certificate(s) of Successful
Completion of Examination (CSCEs); if necessary, bring a scientific
calculator (that does not have the ability to store formulas); bring
a pen and two pencils; and be sure to bring payment for the test fee
if charged by the VEC.

****

EXAMINATION CREDIT IS AVAILABLE AS FOLLOWS

By presenting an original, current FCC-license, the following
exam credit will be conveyed to the applicant by the VE Team:

Novice - Elements 1A and 2
Technician (dated after 2/14/91) - Elements 2 and 3A
(*)Technician (dated before 3/21/87) - Elements 1A, 2, 3A and 3B
Technician Plus - Elements 1A, 2 and 3A
General - Elements 1B, 2, 3A and 3B
Advanced - Elements 1B, 2, 3A, 3B and 4A
Extra - All elements

Footnote:

(*) For grandfather Element 3B credit, only an original license or a copy which was issued on or before 3/21/87 is acceptable by VEs. VECs may be able to allow such credit based upon an original CSCE issued on before that date which shows Element 3 credit for passing the (then) 50 question Technician/General written test. If such documentation has been destroyed, the FCC will itself issue the necessary verification. To obtain such verification, acceptable by all VE Teams and VECs, write to FCC and request a "Letter of Verification of Technician License Held Prior To March 21, 1987". Mail (or fax 717-337-1541) your request to: FCC, 1270 Fairfield Rd, Gettysburg PA 17325-7245. If you include reference to a fax number in your reply, the FCC will fax your verification letter to you. Normal turnaround at FCC is 3-5 business days after receipt.

By presenting an original Certificate of Successful Completion of Examination (CSCE), the following credit is conveyed:

* For Technician licensees: A CSCE showing Element 1A, 1B or 1C credit qualifies the holder for Technician Plus HF privileges. The CSCE may have been issued more than 365 days earlier.

* For others: A CSCE issued up to 365 days earlier conveys credit for the element(s) shown as passed. A Physician's Certification on a Form 610 is acceptable by a VE Team for 365 days after the Physician's signature date. Once accepted by the VE Team, assuming the applicant qualifies for a General or Advanced license, a CSCE is issued showing Element 1C (or "Physician's Cert. and Release: 1C") credit is valid for 365 days toward an Extra class license.

****

The following test session information is provided by the ARRL/VEC for the upcoming eight to twelve week period. For further information, please contact the test session CONTACT PERSON at the telephone number provided. If necessary, you may contact the ARRL/VEC at 860-594-0300 for additional information. Electronic mail may be forwarded to the ARRL/VEC via USENET at "vec@arrl.org" or via MCI Mail to MCI ID: 653-2312 or 215-5052.

Although the test session information presented here does not indicate whether walk-ins are accepted or not, most test sessions do allow walk-ins. We encourage you, however, to

always contact the CONTACT PERSON at the telephone number
provided so that the VE Team is aware that you be attending
the test session.

EXAM LISTINGS - DEFINITION OF FIELDS

STATE
Test Date,VEC,City,Zip-code,Contact Phone,Contact Person

The SECOND field in the following listing specifies the VEC
which is coordinating this examination. This single-character
designator denotes the VEC as defined below. An "A" (for example)
indicates that this examination is coordinated by the ARRL/VEC.

For further information on any examinations listed, or if you do not
find any examinations listed for your area, you may contact
any of the coordinating VECs below.

>was put forward by people who admit that they were unhappy that this
>mailling list began charging a subscription fee.

Joe, I'm not sure how long you've been on the list, but a "boatanchors" news
group has been a hot topic LONG before anyone ever dreamed boatanchors
would go subscription.

>If this were a commercial business, then trade mark privileges would apply
>and the proposed newsgroup would have to find another name.

This is like saying Joe's Pizza would have to change its name to Joe's
[whatever] because Tim's Pizza had the name fist.

>As a matter of common courtesy, this proposed group should choose another
>name. There are a lot of obvious alternate candidates from the colorful
>(such as "doorstops") to the descriptive(such as "tubes").
>
>The campaign for the "boatanchors" name only looks like sour grapes.

Using this logic, the list should change its name since it no longer
represents a free, unmoderated, easily accsessable exchange for
boatanchor enthusiasts on the internet. With a reflector set up, the
proposed newsgroup will more closely resemble the pre-porch list.

Personally, I wouldn't mind r.r.a.vintage or something like that, but to say
the list has a right to the name is crazy.

Sean
p.s. could the sour grapes be on your end?

Learn Morse then use clover or whatever....

While I concur that Morse is outdated, I feel there should be some
gate to operation on the H.F. amateur frequeucies.

If one agrees that a gate is required, what could be more unbiased than
Morse (except maybe esperanto?).

SUBJ: IPS DAILY SOLAR AND GEOPHYSICAL REPORT
ISSUED AT 06/2330Z MAY 1996 BY IPS RADIO AND SPACE SERVICES
FROM THE REGIONAL WARNING CENTRE (RWC), SYDNEY.
SUMMARY FOR 06 MAY AND FORECAST FOR 07 MAY - 09 MAY

1A. SOLAR SUMMARY
Activity: Low

Flares: none.

Observed 10.7 cm flux/Equivalent Sunspot Number : 74/11

GOES satellite data for 05 May
Daily Proton Fluence >1 MeV: 7.3E+05
Daily Proton Fluence >10 MeV: 2.0E+04
Daily Electron Fluence >2 MeV: 1.1E+07 (normal)
X-ray background: A1.3
Fluence (flux accumulation over 24hrs)/ cm2-ster-day.

1B. SOLAR FORECAST
07 May 08 May 09 May
Activity Low Low Low
Fadeouts None expected None expected None expected

Forecast 10.7 cm flux/Equivalent Sunspot Number for 07 May: 74/11

2A. MAGNETIC SUMMARY
Geomagnetic field at Learmonth: Mostly quiet with
one unsettled period: 0000-0300UT.

Estimated Indices : A K Observed A Index 05 May
Learmonth 6 3222 1111
Fredericksburg 5 9
Planetary 5 7

Observed Kp for 05 May: 2332 2221

2B. MAGNETIC FORECAST
Date Ap Conditions
07 May 8 Quiet to unsettled
08 May 8 Quiet to unsettled
09 May 8 Quiet to unsettled

3A. GLOBAL HF PROPAGATION SUMMARY

Latitude Band
Date Low Middle High
06 May Normal Normal Normal
PCA Event : None

3B. GLOBAL HF PROPAGATION FORECAST
Latitude Band
Date Low Middle High
07 May Normal Normal Normal
08 May Normal Normal Normal
09 May Normal Normal Normal

4A. AUSTRALIAN REGION IONOSPHERIC SUMMARY
Date T index
06 May 6

Observed Australian Regional MUFs:
Darwin: Near predicted monthly values. Spread F has been
observed between 1400 and 2000UT.
Townsville: Near predicted monthly values.
Sydney: Mostly up to 15% enhanced from predicted monthly
values.
Canberra: Near predicted monthly values.
Hobart: Up to 15% depressed between 0000 and 0600UT, and up
to 15% enhanced between 1500 and 2100UT. Spread F has been
observed from 0800 to 1400UT.

Predicted Monthly T index for May: 10

4B. AUSTRALIAN REGION IONOSPHERIC FORECAST
Date T index MUFs
07 May 0 near predicted monthly values
08 May 5 near predicted monthly values
09 May 10 near predicted monthly values

Well--
I was there. There were a few isolated outages for a short period, and some
delayed dial tones (People calling each other to ask "What was that?!". I turned
on my monitor--it was actually relatively quiet.

I'm really glad hams are available to help. They perform extremely valuable
services during emergencies. This one was more in the nature of one hell
of a wake-up call rather than a catastrophe (except for a small number of
folks who did have serious damage).

I thought the account was a bit overblown under the circumstances.

Just my $.02

Don
Bellevue, WA

I second the motion. HAMS have always performed valuable services
during emergencies.

One the most key elements of recovery from almost any disaster is
communications. The HAMs perform a service like that of small
independent businesses and agencies do in our market driven economy when
the big government agencies fall flat on their behinds.

My $.02

384. Plans for a 2M 1/4 wave

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-06 00:00:00 UTC
From: delaney@j51.com
Message-ID: <4mlqg7$p0l@tzlink.j51.com>
Source record: 226134

Are there any plans for 2M 1/4 wave antenna online? Specificly mobile ones (and how to attach/make a mag mount for them). My ARRL handbook has plans for one, but I think it's missing part of the article (no infomation on the needed capicitor)

v
Cu vi parlas esperanton?

How about, just having the current test elements without Morse, or making the current ones a bit harder, or Len Winkler's idea of *all* of the current elements but no Morse exam.

But, only if it's true you need a gate to HF (as opposed to VHF/UHF/nosebleed).

This is a policy issue. Please respect the Followup-to: line.

From: "Bart Jahnke, KB9NM ARRL/VEC" <vec@arrl.org>
Subject: US License Examination Opportunities Scheduled 5/6/96 through 9/9/96
Date: Mon, 06 May 1996 13:56:57 -0400
Organization: American Radio Relay League - VEC
Message-ID: <318E3D69.4664@arrl.org>

You can Email the ARRL/VEC (or this page's content
administrator) at "vec@arrl.org".

****

Have you recently passed your test? Find out your new call sign and/or
license privileges using the following World Wide Web URL (or by using
the phone number shown below):

http://www.ualr.edu/doc/hamualr/callsign.html

At ten (10 days) after the test session call 860-594-0300.

****

AMATEUR RADIO EXAMINATION OPPORTUNITIES

****

Want to find out what if your new FCC license has been granted?
Has it been 10 days since you took you examination?

If so, Call ARRL at 1-860-594-0300 (8 am to 5 pm weekdays, eastern time)
to find out. We suggest that you not call the FCC (should you choose to
call the FCC at 1-800-322-1117 during business hours, be aware that their
number is normally busy).

Your hardcopy (printed) license would follow shortly after the license
grant is indicated in the FCC Amateur Service data base.

If your test was coordinated through the ARRL/VEC, license turnaround
time will be approximately 7-15 days. This includes 1-5 days for the
VE team to complete their processing (the team has up to 10 days before
they must mail the results), 3-5 days between the VE team and the VEC;
2 business days at the VEC (in some cases only 1 day); and 1-3 business
days at the FCC. Allow 5 business days from the date that the VE team
estimates the test session results will reach the VEC.

****

NEED AN FCC FORM 610?

The ARRL/VEC can supply you with your needed Forms 610, whether they be for the Reciprocal Permit for Alien Amateur Licensee, Form 610-A; Club/Military-Recreation/RACES station, Form 610-B; or Form 610 for Amateur Operator/Primary Station License. FCC Form 610-R is a computer generated renewal form that will be sent from the FCC (beginning September 1995) to licensees whose license is to expire within 90 days. Form 610-V is the special application for persons seeking a Vanity call sign (see below).

Several FCC forms, including Form 610, are available through the FCC's fax-on-demand service by calling 202-418-0177 (request form "000610" for Form 610, form "006108" for Form 610V).

You can obtain FCC Form 610V along with FCC form 1070V and FCC vanity call sign information fact sheet PR 5000, number 206v) by writing ARRL, 225 Main Street, Newington, CT 06111. You must include an SASE.

Form 610V also is available from the FCC via the internet at

http://www.fcc.gov/Forms/Form610V

or

ftp://ftp.fcc.gov/pub/Forms/Form610V/

The FCC Forms Distribution Center will accept FCC forms requests by calling 800-418-3676.

****

STILL NEED TO PREPARE FOR YOUR EXAM?

If you would like information on how to become licensed; or how to locate Amateur Radio clubs, instructors, licensing classes and/or Novice examiners in your area; please contact the ARRL Educational Activities Department (EAD) at 860-594-0301. The EAD can also provide information on recommended study materials. Electronic mail may be forwarded to the ARRL EAD via USENET at "ead@arrl.org" or via MCI Mail to MCI ID: 215-5052.

****

THINGS TO BRING TO EXAMINATIONS

Bring a photo ID along with a second form of identification (else bring two non-photo forms of ID); bring your original FCC license and a photocopy of your license (if you are currently licensed); bring the original and a copy of any Certificate(s) of Successful Completion of Examination (CSCEs); if necessary, bring a scientific calculator (that does not have the ability to store formulas); bring a pen and two pencils; and be sure to bring payment for the test fee if charged by the VEC.

****

EXAMINATION CREDIT IS AVAILABLE AS FOLLOWS

By presenting an original, current FCC-license, the following
exam credit will be conveyed to the applicant by the VE Team:

Novice - Elements 1A and 2
Technician (dated after 2/14/91) - Elements 2 and 3A
(*)Technician (dated before 3/21/87) - Elements 1A, 2, 3A and 3B
Technician Plus - Elements 1A, 2 and 3A
General - Elements 1B, 2, 3A and 3B
Advanced - Elements 1B, 2, 3A, 3B and 4A
Extra - All elements

Footnote:

(*) For grandfather Element 3B credit, only an original license
or a copy which was issued on or before 3/21/87 is acceptable by VEs.
VECs may be able to allow such credit based upon an original CSCE
issued on before that date which shows Element 3 credit for passing
the (then) 50 question Technician/General written test. If such
documentation has been destroyed, the FCC will itself issue the
necessary verification. To obtain such verification, acceptable
by all VE Teams and VECs, write to FCC and request a "Letter of
Verification of Technician License Held Prior To March 21, 1987".
Mail (or fax 717-337-1541) your request to: FCC, 1270 Fairfield Rd,
Gettysburg PA 17325-7245. If you include reference to a fax number
in your reply, the FCC will fax your verification letter to you.
Normal turnaround at FCC is 3-5 business days after receipt.

By presenting an original Certificate of Successful Completion
of Examination (CSCE), the following credit is conveyed:

* For Technician licensees: A CSCE showing Element 1A, 1B or
1C credit qualifies the holder for Technician Plus HF privileges.
The CSCE may have been issued more than 365 days earlier.

* For others: A CSCE issued up to 365 days earlier conveys credit
for the element(s) shown as passed. A Physician's Certification
on a Form 610 is acceptable by a VE Team for 365 days after the
Physician's signature date. Once accepted by the VE Team,
assuming the applicant qualifies for a General or Advanced license,
a CSCE is issued showing Element 1C (or "Physician's Cert. and
Release: 1C") credit is valid for 365 days toward an Extra class
license.

****

The following test session information is provided by the
ARRL/VEC for the upcoming eight to twelve week period. For
further information, please contact the test session CONTACT
PERSON at the telephone number provided. If necessary, you
may contact the ARRL/VEC at 860-594-0300 for additional
information. Electronic mail may be forwarded to the ARRL/VEC
via USENET at "vec@arrl.org" or via MCI Mail to

MCI ID: 653-2312 or 215-5052.

Although the test session information presented here does
not indicate whether walk-ins are accepted or not, most test
sessions do allow walk-ins. We encourage you, however, to
always contact the CONTACT PERSON at the telephone number
provided so that the VE Team is aware that you be attending
the test session.

EXAM LISTINGS - DEFINITION OF FIELDS

STATE
Test Date,VEC,City,Zip-code,Contact Phone,Contact Person

The SECOND field in the following listing specifies the VEC
which is coordinating this examination. This single-character
designator denotes the VEC as defined below. An "A" (for example)
indicates that this examination is coordinated by the ARRL/VEC.

For further information on any examinations listed, or if you do not
find any examinations listed for your area, you may contact
any of the coordinating VECs below.

A = ARRL/VEC, 225 Main St, Newington, CT 06111; (d) 860-594-0300
The 1996 test fee is $6.05.

X = Anchorage ARC, 2628 Turnagain Parkway, Anchorage, AK 99517;

389. Re: Problem with tale name of "boatanchors"?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-06 00:00:00 UTC
From: rs@ham.island.net
Message-ID: <RsHJND9w165w@ham.island.net>
Source record: 226139
Cross-posted to: news.groups,rec.radio.amateur.misc

jfeng@vnet.ibm.com (Joseph Feng) writes:

>
> It appears that the choice of the "boatanchors" name represents a certain
> amount of childish mischief, deliberately intended to compete with an
> existing mail list and create a certain amount of confusion. There already
> is a Boatanchors list covering exactly this same subject. This proposal
> was put forward by people who admit that they were unhappy that this
> mailling list began charging a subscription fee.
>

This suggestion is ridiculous. The term "boatanchor" is a generic term,
and doesn't belong to the boatanchor mailing list any more than the
existence of a corvair mailing list would preclude anyone from starting
a rec.autos group with corvair in the name.

> If this were a commercial business, then trade mark privileges would apply
> and the proposed newsgroup would have to find another name.
>

It's not. And discussion of boatanchors isn't, nor should it be,
confined to the paid members of the boatanchor list. (Which includes me,
BTW)

> As a matter of common courtesy, this proposed group should choose another
> name. There are a lot of obvious alternate candidates from the colorful
> (such as "doorstops") to the descriptive(such as "tubes").

Bull. A boatanchors newsgroup isn't likely to be confused with a paid
members only mailing list, even if they are both about the same subject.
>
> The campaign for the "boatanchors" name only looks like sour grapes.

Wrong. The campaign for a boatanchors newsgroup - which hasn't properly
started yet since there hasn't been an RFD posted yet - is the logical
outcome of having a subject matter - amateur radio boatanchors - that's
so popular the subject deserves it's own newsgroup.

The existing boatanchors list is a valuable and useful resource, and no
one would be forced to abandon it. Making an additional worldwide
resource for those of us interested in the subject is a good thing, not
bad.

: for 5 seconds. Is it possible to program my call in place of
: ICOM? [...]

Hi !

I own an Icom 'IC-Z1E' HT and it showed the same behaviour.
Here's the way i tought it to show my call 'DF1HX' instead
'ICOM' after turning on:

- Push 'MSG' twice untill 'tx' shows on display, x= number
between 0 and 9 .
- Turn 'DIAL' untill 't0' shows on display.
- Push 'FUNC' and then 'SET', '------' appears on display.
- Turn 'DIAL' to get letter wanted, 'D' in my case.
- Push 'MN' to store the letter and to go to next one.
In case of error push 'MSG' to erase.
- Repeat untill your call is complete.
- If shorter then 6 digits, push 'MONI' to finish,
otherwise 'MN'. Maximum storage space is 6 digits.
- Push 'CLR' to leave storage mode.

This is described in section 'storing messages for sending'
of my (german) manual. Storage area 't0' holds the 'welcome'
message.
Maybe this helps, even your trx is annother type but same manu-
facturer at least.

----------------
important legal disclaimer
------------
-you MUST be licensed by your country's telecom authority to
set up such a network.
fines and imprisonment are realistic possibilites
for skirting the law.
--------------
amateur radio frequencies are regulated by the ITU, and are
for amateur use only for non-commercial , non-business
purposes only
------------
amateur radio digital modems, however, will work on a wide
range of frequencies, including business frequencies
-------------
This is what you want:
(all currency amts USD)
$100.00 to $1000 depending on features-
---------
essentially a Packet Assembler/Dissasembler (PAD)
----------
Connects between comm port on computer and tranciever.
-----------
Advanced Electronics Association PK-232 MBX
(AEA PK-232 MBX) is good, about $500.00
-------
and numerous other mfgs and models
----------------------
these boxes are designed for use in amateur (ham) radio
but there is nothing amateur about the performance, price
```

or quality - work fine on business freqs.
---
essitientially no different than commercial gear
costing thousands more, and for no good reason
other than limited buyer knowledge
---
in the ham radio world, a worldwide network moves ham digital
traffic on such equipment 24 hrs a day 7 days a week.
---
available with 1200 baud, 9600 baud 19.2 k baud and 56 k baud
modem

Does almost every protocol you can imagine
---
works with HF, VHF and UHF trancievers
---
supports FM and SSB
---
supports packet (ax.25), pactor, rtty, clover, piccalo,
baudot, amtor, TCP/IP, etc.

Full digipeater support.

Support BBS, ROSE, NOS, TNOS, and JNOS control/networking
bulliten board and routing software.

Incredible wide range of commercial and shareware
software support for any purpose possible.

Hire a licensed amateur radio operator to set it up,
or a licensed commercial radio company.
---
licensed ham operators may not accept payment for work done
regarding ham radio frequencies,and services, but of course
can use their knowledge of radio to earn money in commercial
enterprises.

Good luck,

: Didn't you read *any* of his message? He said that the quake *KNOCKED
: OUT TELEPHONE AND CELLUAR PHONES*. Govt. radio would have been just a *tad*
: overloaded at the time, so they probably needed and welcomed the help of
: ARES and RACES. Also, you said that 'nobody was killed.' With
: communications down, HOW WERE THEY SUPPOSED TO KNOW THAT???

Writing as one who is a member of the Snohomish County RACES and who checked into our net following the quake: my impression is that most of the checkins who reported their phone service interrupted simply didn't wait long enough for a dial tone. Quakes tend to get everyone calling everywhere at once, overloading the system. We were without power for an hour and a half; very slow dial tone, but the phones did work. There may well have been places in the South Snohomish/North King county area where you would not have been able to get through on the phone with emergency traffic, but my impression was that that was certainly not a widespread thing. This is a reminder that unless you have a serious need, stay off the phone immediately following a quake or similar event.

As for the net: we had a very good turnout, over 100 checkins (more than a normal weekly net, I believe). We were not activated, however. You need to make the distinction between having people check in and say they are available for duty, and actually activating them and sending them to places to help out (with communications). In this case, we weren't activated, but there were plenty of us who were available if we _had_ been needed.

When an emergency justifying activation does happen, be glad for the folk who have practiced at drills and who check in when there is a possibility of need, even though actual need may not (thank goodness) always materialize.

[ANARTS - Australian National Amateur Radio Teletype Society]

ANARTS News Bulletin 906 28TH APRIL 1996

Cols column. de Col VK2CTD

After breakfast next day we left by the motel car for a nominal fee, driven by a native employee. The natives did most of the work. I could believe my eyes at the height of the walls of the City, Still over 20 feet high in a perfect circle or so it seemed to my eyes. There was no mortar between the granite stones and yet you couldn't push a penknife into the joints, I know, we both tried. Inside the wall was another wall about 2 metres back, to reach the centre of the City you walked around the path between the two walls until an entrance was found. The entrances were only narrow, it has now been discovered that if any invading tribes made their way over the outside wall the narrow gaps could be easily defended and some were purposely left unguarded to allow the invaders in while the King escaped along another section of the passage. Most of the City was in ruins and most of the houses were the normal straw huts associated with Africa. A huge Bird carved out of soapstone and called the Zimbabwe Bird was found there in the early days of the white settlers and taken to Salisbury, it became the Symbol of the State and remains so to this day. Up above the City was an area known as the Acropolis, granite stone built on granite rock it resembles the Acropolis in Athens. Evidence still existed of Gold refining and for years it was thought that the Portuguese or Arabs had come there, built the City. It was even suggested that it was the long lost fabulous King Solomon's Gold mine. Which made the hair of a young lad stand up.

Archaeologists have now shown that it was built in the 16th Century by the Shona people, the dominant race in Zimbabwe now. The Matable who lived in the southern part of Zimbabwe were fairly new comers themselves. They were in fact Zulu's who had broken away from the main tribe and had fought a tremendous rearguard battle with other Zulus all the way from the South East of South Africa. Once in Zimbabwe they were fairly safe and dominated the indigenous peoples.

Zimbabwe means the King's or Chief's Capital. Great Zimbabwe was the capital of the Great King of all the Shona peoples, smaller Zimbabwe's have been discovered from as far south as over the Botswana border, into Zaire and to the East right to the

Mozambique coastline. Bulawayo by the way meant the capital of the Matabele's and changed places to wherever the Matabele King was located at the time.

We spent about three days searching and as young men do mucking about inside and around the City, before deciding to return to Gwelo as a lift was going begging.

One final thing, on our way back to Bulawayo we got a lift with a white man and his native worker. The vehicle was a Ute so we were in the back again. The last 30 miles or so was in dusk,the sun had just gone down. As it got darker and darker we could see an animal about the size of a Lion running Parallel with us and gradually closing the gap between us. My pal said "its a Bloody Lion". I had to agree with him and banged on the roof of the cab but there was no response. As the 'Lion' came closer and closer we started to slide down into the body of the ute. "Can a Lion jump up here on the run" my friend asked. I told him no, but in my mind knew it could.

I thought my last day had come as the animal came quite close to us, but there was just enough light to see it was a Donkey or Ass. I had never hugged a male before other than my Dad an
d Brothers, but for a few seconds we clung to each other in sheer relief. The Donkey gradually ran out of energy and was lost in the dark, I hope he survived.

Thats all for now, next time perhaps it will be Cable and Wireless or maybe the good old days of Rtty in the Department of Civil Aviation.

WEEKLY SOLAR AND GEOPHYSICAL REPORT

(19 APRIL - 25 APRIL)

DATED 26TH APRIL 1996

Notes of interest:

SABLE ISLAND, OPPS! In RTDX0419, the implicatn that the group going to Sable Island in October is part of the group that will be QRV 18 June-2 July was in error. They are not associated.

YEMEN, 7O. Luciano, I5FLN was in contact with Jean Jacques, J28JJ/7O and was told that he will be in Yemen moving from Saana to Aden until the 25 of the month. On the 21st, he was in Aden using a vertical antenna and 100 watts. QSL via F6HGO.

ANGUILLA, VP2E. JH4IFF and JH4EZI will be QRV on CW, SSB and RTTY from 29 April to 3 May as VP2EFF and VP2EZI respectively. QSL via home call.

ALAND ISLAND, OH0. Dave, K8MN will be QRV as OH0/K8MN this weekend from 2200 zulu Friday 26 April to 1300 zulu Sunday 28 April on all bands and all modes. As usual his manager is WA8JOC. Bureau cards for this trip only go to his own call, K8MN.

THE VK2SG RTTY DXNOTES are also available on Internet at reflectors dx@ve7tcp.ampr.org, and digital-dx@st.rim.or.jp. See also the OH2BUA WebCluster at URL http://www.clinet.fi/~jukka/webcluster.html

DXpedition to (VK9C)

DXpedition to Cocos-Keeling Island (VK9C)

Jim VK1FF/WB2FFY advises that a DXpedition to Cocos-Keeling Island (VK9C) will take place next month. Operation will be on HF, mainly Single Sideband, with some CW ops. The callsign to be used is not known at this stage but will be advised later.

The DXpedition will run from the 18th to the 31st May, and the operators will be VK4FW, VK2IVK, and VK4DHM, and possibly others.

QSL will be via VK4FW, Bill Horner, 26 Iron St, Gympie, QLD 4570.

WICEN News
WICEN news

Next Sunday is the Hawkesbury Bridge to Bridge Speedboat Race, for which Dave VK2KFU is looking for volunteers. Packet radio as well as voice, on 80m, 2m and 70cm, will be used for this event, and it is an interesting exercise in operating from a boat anchored in the middle of a river, with some land positions. Some people have volunteered, but more are required, so if you are interested in seeing some very fast and very LOUD speedboats going full-bore then please contact the Event Commander, Dave Horsfall VK2KFU, during business hours on (02) 9957-4224, after hours on (02) 489-1810, or mobile on 015-097-217.

On the same weekend is the "2GO Forest Classic" rally, over the 4-5th May. The course is much the same as last year's, and around twenty people are required; please contact Andy VK2XRX if you can help.

And if that wasn't enough, also next weekend is the Dobie Camping Area exercise, organised by Frank VK2XVJ, over the 3rd-5th May; and the Senior Rescue Instructors' Conference on 4-5th May. Later on this month, for those still standing, is the Central Coast meeting at Wyong on the 10th May; the closing date for the "Green Slip" Raffle on the 11th May; and the Management Committee meeting on the 11th May.

Future events for the calendar include the close of nominations for the Management Committee on the 8th June; the WICEN AGM is on the 14th July; the annual City to Surf Fun Run is on 11th August; JOTA is over 19-20th October; and the Hawkesbury Classic paddle is over 26-27th October.

Those regions wishing to have their activities publicised on this broadcast are requested to have the details with the Publicity Officer, Dave VK2KFU, by Thursday night at the latest. Packet radio is the preferred medium, to the VK2KFU system itself (AX.25 or TCP/IP), or failing that, to VK2DAA, VK2OP, or VK2GJB.

News Briefs
News Briefs

A new DX opportunity: Astronomers at San Francisco State University in California have discovered a new planet they say may support life. The newly discovered planet, which is roughly the size of Jupiter, orbits the boringly-named star HR3522 in the constellation Cancer, some 40 light years away. The group that four other planets orbiting stara like our own Sun have been disovered since late last year.

Meanwhile, NASA is hoping to fund an international space station dedicated to searching for new planets. The space station will sport a 50 metre long array of four infra=red telescopes, and will be placed in orbit near Jupiter, from where it will have a clear view of the universe.

SOLAR ACTIVITY WAS VERY LOW ALL WEEK, EXCEPT FOR 22 APRIL WHEN ACTIVITY WAS MODERATE.

THE GEOMAGNETIC FIELD AT LEARMONTH W.A. WAS ACTIVE ON 19TH APRIL, UNSETTLED TO ACTIVE 20TH TO 21ST, QUIET TO UNSETTLED 22ND TO 23RD, AND QUIET 24TH TO 25TH.

MAXIMUM USABLE FREQUENCIES AT SYDNEY WERE MOSTLY NEAR PREDICTED MONTHLY VALUES, EXCEPT FOR DEPRESSIONS TO 15 TO 30 PER CENT TO 0800 UT ON 19TH AND 20TH, AND DEPRESSIONS OF 15 TO 30 PER CENT TO 0900 UT ON 21ST APRIL. SPREAD F WAS OBSERVED DURING LOCAL NIGHT FROM 19TH TO 22ND.

FORECAST (26 APRIL - 02 MAY)

SOLAR: VERY LOW

GEOMAGNETIC: MOSTLY QUIET TO UNSETTLED.

FREQUENCIES: NEAR PREDICTED MONTHLY VALUES.

COURTESY OF IPS RADIO AND SPACE SERVICES

SUMMARY BY PAT VK2JPA ANARTS BROADCAST OFFICER

Club News - Mid South Coast

Members of the Mid South Coast Amateur Radio Club Inc. invite you to join them at their next quarterly meeting and social get together to be held Saturday 4th May at the usual venue of "Hancock's Ranch" in Little Forest Rd. Milton.

Little Forest Rd. turns off the highway 3kms north of the historic town of Milton. Follow the signs to the ranch.

Bring the family and your lunch. B.B.Q. facilities are available and the club provides tea, coffee, milk and sugar and afternoon tea.

We look forward to seeing you there.

from David VK2CX, Hon. Secretary

Club News - Orange

Orange club's May meeting

Members of the Orange and District Amateur Radio Club, their guests and other visitors are invited to the next meeting, at 7.30pm Friday 3 May in the Cultural Centre, Sale Street Orange.

Our well-known guest speakers who are coming from Sydney for the meeting are Tim Mills VK2ZTM and Dave Horsfall VK2KFU. Tim's talk will be on the history of repeaters and Dave's will be on the internet and its effects on amateur radio operating. Dave and Tim are acknowledged experts in their chosen subjects, so this will be a particularly interesting evening. Dave is a software engineer and a member of our club, by the way.

Everyone is welcome at the monthly meetings of the Orange club, where there is plenty of parking right at the door, where the meeting room is comfortably heated and where so many stay and enjoy the free supper and easy going "rag-chew" after the talks.

On behalf of the club's management committee and members, I look forward to personally greeting you at our meeting on Friday 3 May.

Peter Carter VK2ETK, Orange club president

Club News - AATC

The next meeting of the A.A.T.C. Inc. will be held as usual on the 2nd Sunday of the month of April (sic) at 109 Wigram St. Parramatta 1.00 pm.

This meeting will be the showing of a stereo sound demodulator with local easy to get components.

A demonstration of a simple DTMF decoder building block.

The net is back, on Tuesday nights after some technical maintainance had been completed - have a chat to the AATC club around 7.30 pm on Tuesday nights on 146.625.

For more information about ATV contact Bob the Publicity Officer on (02) 587-3491 during normal civilised times.

A.A.T.C. Inc. Publicity Officer Bob Barnes

Hiya, folks-

Just accepted a job in Elkhart, Indiana. I'm wondering about various aspects of the ham radio scene there.

1) Is there a PacketCluster node in South Bend? There sure isn't one in Elkhart!

2) Any DX'ers or contesters in the area?

3) Anybody know of a person in Elkhart who has rental property that would let me put up a 35' tower? (Yeah, yeah...I know...)

Any other useful tidbits of info that I should know about Elkhart that pertain to ham radio?

Thanks for any help,

Sean

Eugene Kang wrote 8 lines on the subject: 2x 1/4 wave = increased range?; here's some of it:

>Would doubling the length of a 1/4 wave whip (approx 18") to approx >36" on a mag mount (radio shack, specifically) affect the performance >in any way?

Sure will. It won't work worth a durn.

You have made a quarter-wave antenna into a half-wave antenna, but you haven't changed the feed arrangement to match it.

Quarter-wave verticals have a feed point impedance around 25-30 Z but a half wave presents a high impedance. The quarter-wave makes a decent match to 50 Z line, but the half-wave does not.

Make your radiator about 47 inches long and you'll be in the range for a five/eighths-wave antenna, and That Does exhibit some gain on the horizon relative to a quarter-wave.

Good luck.

The best Dungeon Masters are into heavy s&m. Most admit to the gay life style. Why do you want to emulate the boyz in san francisco? :)

I have listened to the members of the Lambda group on local repeaters for several years. You would be hard pressed to tell by listening that any of them are gay. This group is active in public service events. Most of their discussions are technical and sound no different than any other net on the band.

On the other hand there are several "sex talk" 2 meter repeaters in major metropolitan regions that do cater to the pruriant interests of both gay and hetero amateurs. Most of these folks are castoffs only interested in serving their own egos. You would have something to talk about if these guys and gals could get their act together and form an ARRL sponsored club.

I would rather have my kids listen to the Lambda Club members and gain respect than listen to the trash talk on other frequencies.

: different?

I don't know what they talk about Jerry Boy, the only group of Jewish
amateur radio operators I ever came across was on a repeater in the
Washington, D.C. area - they talked Jewish or Yiddish or whatever it
was on repeater, basically, I think, cuz it pissed off the other
repeater users, but you had to be one to know what they were talking
about. Being a Jew is a religion, very much unlike being a fudge packer,
which is a perversion. Look those two words up in your 'Ro-gay's Thiserus'
and see if you can figure out the difference. I'd assume they get
together to be with other Jews.

: Oh, I see. You think that all gay people are busy trying to screw one
: another like crazed animals in heat. It is obvious that you have never
: dealt with any gay people. Either that, or you are just afraid of admitting
: to yourself that you, personally, are one, and want to overcompensate.
: There is a thirs possibility, and that is that you are a complete moron,
: but I'm magnaminous enough to give you the benefit of the doubt for now.

Good to hear your are magnaminious Jerry Boy, makes me feel better.
From what you have been saying, I was starting to wonder if you were
one of those fudge packers too..... *Normal* people don't have to
form groups for sexual purposes, because sex is something that only
requires a male and a female. If a boy is walking down the street,
he can be relatively sure that a girl is a possible candiate for sex
(unless he is in San Francisco). On the other hand, if what you say
is true, if a 'boy' is walking down the street and sees another male,
he isn't sure if the other male is, in fact, another 'boy' or a
boy. So whats the quickest way to find out - start a 'boys' club and
see who shows up.....

Ever heard about any *heterosexual* bath houses in San Francisco ?

: >And I agree with what Rob has been trying to tell you. If you wanna

: Well, then, you're both stupid. No law against two people being equally
: stupid on a particular matter.

Stupid is as stupid does, Jerry Boy..... can't remember where I heard
that.

: >pack fudge, do it at *your house*. I don't care how much fudge you
: >pack. It's your God given constitutional right to pack as much fudge
: >as you wanna pack. I don't think anyone wants to take your fudge
: >packing rights away from you. Just keep your fudge packing to yourself.

: Fine. But what if I want to have anal sex?

Go for it. Do it at *your* house, with whomever or whatever you
please. Just don't do it in front of Rob's wife and kids at an
ARRL meeting. Do your dog, do your vacuum cleaner, do whatever
makes you feel good. Just keep it our of our face.......

: They're not bringing fudge-packing to *your* radio clubs, they're forming
: their *own*. They're doing exactly what you want! So what is the hubbub?

There you go again, Jerry Boy. Did you *read* what started this
discussion ? Nobody cared about the fact that the 'boys' started their
own radio club, the discussion started over the fact that the saviors
of our hobby, the guys we *all* look up to, the ones whom we never
thought would let us down, those bowtied wonders who are otherwise
unemployable, the A.R.R.L in NewingClown, Conn. admitted
the 'boys' into *our* club. Try this next time (seems I told you this
before maybe).

1. Read.
2. Think.
3. Type.

: Fine, and you do the same. Never mention your sexual desires, leer at women
: (or men, if that's you're thing), or do any of the such. After all, the sex
: thing doesn't belong in your radio club!

Jerry, did your daddy work at a cinder block company ? I'm starting to think
so cuz your head is hard as a brick. This discussion is *not* about sex.
Sex is normal. If a boy does it with a girl. I don't need to mention my
sexual desires at a radio club meeting, Jerry Boy, my wife takes care of
all of those in the privacy of our own home, thank you very much.......

: >It's kinda like masterbation, Jerry Boy. You know, sometimes you
: >just get that irrepressible urge to grab that thing an give it a
: >good whack. Well, *go for it* !! In the privacy of your own home.
: >But don't expect that if you go for it on the sidewalk in front
: >of a KMART store on Saturday morning that nobody is going to get
: >offended by it. And don't expect that just cuz it feels good to
: >you that the rest of us have to put up with it.......

: No one is asking you to put up with it. I'm certain that the Chronic
: Masturbators ARC gets together in the comfort of their own meeting halls
: and talks about radio and what-have-you. They don't want to bother you, so

: you don't bother them.

Again you have verified the fact that you are totally unaware of why this discussion even started. Let me refresh your feeble memory, in the hopes that this may lower your blood pressure a bit. The gentleman who wrote the *original* post concerning LAMBA was upset about the fact that the ARRL had made them an affiliated club, i.e., the ARRL by admitting them as an affiliate was condoning their activities when in the past the ARRL had refused their advertisements in QSTreet ragazine, probably because of their perverse sexual activities. Read that 3 or 4 times, think about it for five or ten minutes, and then explain to us where it says 'Homosexuals shouldn't be allowed to have their own ham club'.

I will have to admit Jerry Boy, you are absolutely right about one thing you have said: 'Entropy just isn't what it used to be'.

Neither is ham radio. But who needs it anyway ? As long as we have guys like you that will take an opposite point on any subject, we can all have a *new* hobby - arguing on the information stupid highway. That would solve this discussion also, because if you are in fact, a fudge packer, I would *much* rather talk to you via email that at a ham club meeting anyway.....

STATE FREQUENCY COORDINATOR, TEXAS VHF-FM SOCIETY

(We do the repeater coordinating in Texas.)

I have done HF, Satellites, VHF/UHF, and been in amateur radio for 10
years. I don't know it all, but through my contacts I can find someone

that can usually answer most of the questions.

I also know of several other coordinators in the US and have contacts through the ARRL and a BBS.

Brian Gilhuly VE3BGB

Brian Gilhuly VE3BGB Author of KENTROL, the ultimate in
rig control/logging/memory mgmt software
brian@kentrol.synapse.net for Kenwood HF rigs and MS Windows
CompuServe: 73257,3131
Tel/fax: +1 613 623-9735 Kentrol Web Page:
http://www.synapse.net/~kentrol/
76 McDonald Street S Kentrol FTP Site:
Arnprior ON K7S 2W5 Canada ftp://ftp.synapse.net/private/k/kentrol/

Kentrol is a Windows 3x control program for Kenwood HF transceivers and the R-5000 receiver, which has built-in logging and memory-management capabilities. Since its introduction in 1991, Kentrol has set the standard for Windows-based rig automation, and new features continue to be added regularly. SkedMan is an automated sked manager for Kentrol. Enter schedule data, set alarms, and when an alarm goes off, SkedMan uses - even launches - Kentrol to tune it in.

Kentrol and SkedMan are shareware, so if you haven't tried them, you are most welcome to do so.

DIGITAL SIGNAL PROCESSING

COMPUTING AND ELECTRONICS FOR THE BLIND (INCLUDING RADIO)

Eran Glago KD6KVO

glago@aol.com

I am into public service, and also ARES/RACES. I am the Emergency Coordinator for both organizations in Sonoma Valley, Sonoma county, San Francisco Section of California.

We do ARES and RACES as one program here, and actually lean more towards RACES because the government entities are so supportive.

I like to encourage newer hams to participate in the events for which I coordinate the communications. It's ideal training for emergency services, and it's fun, too. Codeless Technicians who can't participate on most HF NTS traffic nets have a real role to play here,

as we generally use VHF and UHF, and these amateurs are instrumental with their enthusiasm in filling the rosters.

It's also sometimes a good initiator for those new hams who are self-conscious talking with other, experienced hams one-on-one, but are OK talking formally to a net control station. Similarly, I try to encourage those new hams who became hams so they could talk to their ham spouses, and all you ever hear them do is talk to their spouses and to no-one else. While that's perfectly OK in and of itself, public service is a good way to break out of that mold and get more fun from radio while really helping out.

E-mail me for information about KAMterm (host mode for Kantronics TNCs).

KAMterm is a host mode terminal program for Kantronics TNCs that I wrote and released as shareware.

My professional field is telecom (data communications is my key area of expertise).

I also have experience with wire HF antennas for apartments and other small spaces.

Cheyenne T. Greatorex N1QZS

n1qzs@magrathea.com

http://www.magrathea.com/~ctg/

I co-maintain the Boston Amateur Radio Club anonymous FTP file archives with Phil Temples, K9HI (phil@temples.com).

A sampling of the archives include:

A VIRTUALLY COMPLETE ARCHIVE OF ALL ARRL BULLETINS SINCE 1992 IS AVAILABLE AT:

ftp://ftp.barc.org/pub/hamradio/barc/w1aw-list/

A MIRROR OF ALL FILES AVAILABLE FROM THE ARRL INFO SERVER IS ALSO AVAILABLE:

ftp://ftp.barc.org/pub/hamradio/arrl/infoserv/

THE ARRL INFOSERVER MIRROR HAS FCC PART 97 (U.S. AMATEUR RADIO SERVICE RULES AND REGULATIONS) AT:

ftp://ftp.barc.org/pub/hamradio/arrl/infoserv/rib/part97.txt

PROGRAMS MENTIONED IN QST ARE IN:

ftp://ftp.barc.org/pub/hamradio/arrl/qst-binaries/

AMATEUR RADIO NEWSLINE IS NOW ALSO BEING ARCHIVED, TOO:

ftp://ftp.barc.org/pub/hamradio/docs/newsline/

MACINTOSH AMATEUR RADIO SOFTWARE ARCHIVE:

ftp://ftp.barc.org/pub/hamradio/mac/

HAM RADIO AND MORE, THE RADIO SHOW CARRIED LIVE EVERY SUNDAY (6PM - 7PM EST) ON THE TALK AMERICA RADIO NETWORK, NOW HAS A WORLD-WIDE WEB HOME PAGE:

http://www.barc.org/barc/ham-more/ham-more.html

Please direct any feedback, submissions, or administrivia regarding these resources to my E-mail address above.

Ken Gunton WB6QWF

kenny@erinet.com

MICROWAVE COMPONENTS WORLD-WIDE WEB PAGE:

http://www.erinet.com/kenny/microwave.html

It changes from time to time, so stop back often! Don't see the component you want? Just call, fax your spec, or e-mail and attach your drawing or spec for a quick quote at BIG savings.

My company, Techlock Distributing, sells RF and microwave components of many different types. I own the company, and it's a small, one-man operation. While I don't sell Ham equipment per se, I have sold some dividers, etc. to hams for their use.

JPS COMMUNICATIONS, INC.

For those interested, JPS Communications, makers of DSP noise filters and other radio-related products, has a page on the WWW. The URL is:

http://emporium.turnpike.net/J/JPS/jps.html

Also, I'm in the process of collecting links to pages relating to uses of DSP in amateur radio. If you know of some, I'd appreciate hearing about them. There are a lot of people experimenting with new modulation schemes, voice compression, noise reduction, DSP IF techniques, and lots of other interesting applications. I'm planning to add a page with links to this information, so keep an eye out for it, and if you have something to share, please drop me a line.

Lance Halle KC7FVX

lanceh@crl.com

I will be glad to field questions in the following areas:

DFing
Local interference committee chairman

OO questions
Phoenix area Official Observer Coordinator

BSA Merit badge
Advisor of Ham Radio Explorer Post

Just let me know what all you need and I'll do what I can.

News of local enforcement actions and FCC Notices of Apparent
Liability (NAL) may be found on the WWW page of the Arizona Repeater
Association (of which I am a member):

http://www.indirect.com/www/ara/

Brian Hammill KD4BFJ

- ---
Brian Hammill, KD4BFJ | brianh@dante.exide.com
Software Engineer | Exide Electronics - Small Systems Group
Raleigh, NC | "Powering Your Network with Intelligent Solutions"
- ---

I am especially interested in VHF/UHF and microwave amateur bands as
well as Amateur television. I am treasurer and a founding member of
the newly-formed Triangle Amateur Television Association in
Raleigh-Durham- Chapel Hill, NC. I am willing to share my expertise in
the following areas:

* ATV - Getting started, starting local activity, repeaters.
* VHF/UHF - Propagation, what you need to get started, operating
portable, contesting, weak signals, and DX.
* Sealed Lead Acid Batteries - How to take care of them.

Steve Harding KA6ETB

ka6etb@grafex.sbay.org +1 408 252-0578 alternate: harding@nas.nasa.gov
For amateur radio related information, send a message to:
ham-server@grafex.sbay.org
and put "HELP" and/or "GET /HAMRADIO/INDEX.TXT" in the body.

HAM-server is now on a 486 with nearly 70 MB of data. Besides DOS,
there are some UNIX, Mac, and OS/2 files.

Most files have been taken from the various ftp-servers world-wide.
However, there are many programs that have been donated by HAM-server
users.

Submissions welcome. Send to incoming@grafex.sbay.org.

ARRL LABORATORY ENGINEER

* Radio Frequency Interference (RFI) matters
* Equipment Testing

My survey of automotive EMI problems is mostly complete. The results are in September 1994 QST, including warranty and customer service information for most automobile manufacturers (many of whom have published installation guidelines).

I am also continuing to pursue more formal contacts and standards-making through the EMR and EMI Standards Committee of the Society of Automotive Engineers (SAE), of which I am a member.

Copies of General Motors installation guidelines are available. Saturn allegedly has a video on mobile installation, but none of the dealers seem to know about it. I have a call into one of my low friends in high places. :-)

If anyone would like a copy of the GM installation guidelines, send a 9X12" SASE with two units of postage *and* a specific request for the "GM Installation Guidelines" to the ARRL Technical Department Secretary, 225 Main St, Newington, CT 06111. A copy has been reprinted in the ARRL book -- Radio Frequency Interference -- How to Find It and Fix It.

EMI/RFI Resource List and RFI Tips package available. A business SASE with 98 cents postage is appreciated. Please specify the desired documents in your correspondence.

The FCC has released the results of a telephone interference survey just completed.

If you would like a copy of the survey, which includes a list of telephone models checked, send an SASE with two units of first class postage to the Technical Information Service at ARRL HQ. Alternatively, you may obtain an electronic copy from the info server below.

If leakage from your local Cable TV operator is interfering with the Amateur Radio Service, it is in violation of the provisions of Part 76 of the FCC regulations.

I would first direct the problem toward the cable company system engineer or service manager. Chances are the "front-line" people who answer the phone don't know what you are talking about.

If this is not effective, contact me here at ARRL HQ. I can put you in contact with our liaison to the National Cable Telecasters Association. This liaison will help your cable operator understand their responsibilities.

For CATV interference problems in general, I recommend you obtain our Radio Frequency Interference Book. If you are a League Member, you can also get a copy of the ARRL Technical Information Service info package on CATVI -- "EMI/RFI - CATV" by sending a LARGE SASE with 3 stamps on it to the ARRL Technical Department Secretary, 225 Main St, Newington CT 06111. This package is a reprint of an article I wrote for Communications Technology -- the Journal of the Society of Cable Television Engineers. We submitted it to "their" journal because we felt that it would carry more weight with the cable companies.

If you have any questions after you have read the material, contact me here at HQ. I can usually get back to you within a few days to offer some additional help.

Many amateur radio informational documents (including EMI/RFI files) are also available from the ARRL info server. Send E-mail to info@arrl.org with the word "HELP" in the message body.

See Cheyenne Greatorex's entry for information about the ARRL Anonymous FTP Archive and David Newkirk's entry for information about the ARRL World-Wide Web Home Page.

Richard Hieber DL8MFQ, AA8CP

sz0026@daphne.rrze.uni-erlangen.de
AX.25: DL8MFQ@DB0SIF.DEU.EU

Areas of expertise:

* QRP work
* mobile operation
* computers (DOS, OS/2, Linux)
* Packet Radio
* wire antennas

I am an EE student at the University of Erlangen-Nuernberg, Germany. I am active in the university ham radio club (IG-Funk), spending time and thoughts in improving the permanent club display in the lecture hall building. So I have some first hand experience in making printouts and display arrangements visually appealing.

My main interests are shortwave, especially QRP, and computers (Packet Radio, Internet). I have some experience in shortwave mobiling and considerable success with a modified citizens band whip on the bands from 10 to 20 meters. Generally I am fascinated with simple yet

effective equipment, hence my obsession with QRP. I like wire antennas. I feel that over the course of time I will more and more learn to appreciate old ham radio equipment (boatanchors) and get more into homebrewing.

I've compiled a list of QRP Clubs worldwide and a FAQ file for the QRP-L mailing list. They are available from the QRP-L WWW Pages at:

* http://ncc1701-d.cc.nd.edu/qrp-l/index.html
* http://www.lehigh.edu/lists/Archives/qrp-l/ (on or after June 1, 1995)

The QRP-L mailing list is intended to be a relatively noise-free environment for discussion of any subjects relating to low-power amateur radio operation. Example topics: portable operation, equipment design and construction, solar and battery power, QRPp, contesting, kit building.

Jack G.F. Hill W4PPT

Jack, W4PPT/M (75M SSB 2-letter WAS #1657/#1789 -- both from the mobile! ;^)

root@jackatak.ThePorch.com - "Plus ca change, plus c'est la meme chose"

MOBILE ANTENNA SYSTEMS AND INSTALLATION (PRIMARILY HF)

* power distribution
* frame grounding
* antenna selection and construction
* mounting the rig
* useful accessories
* Keeping it Simple (avoiding task overload)

I have agreed to provide a new home for the "Boat Anchor" mail list, with the blessings of Paul Prescott, N1AAC, who took over from Our Esteemed Founder Jim Lockwood, KM6NK. I have also agreed to take over the rec.radio.amateur.* Working Group mail list, formerly maintained by Ian Kluft, KO6YQ. In addition, a new mailing list devoted to homebrewing tube transmitters and receivers ("Glowbugs," a sort of intersection between Boatanchors and QRP) has been created.

The mailing list addresses are:

* boatanchors@ThePorch.com (*)
* rra-wg@ThePorch.com
* glowbugs@ThePorch.com

Use these addresses for messages of general interest to the entire group. Please don't use them to subscribe, change address, etc.

(*) Effective 15 March 1996, the BoatAnchors list went to a subscription-only list, with $12 US per year as "dues" to support the list.

With monthly costs for Net access at $350 US/month and telephone line charges of $50 US plus, we are not getting rich. The fee was set after much consultation and wrangling, and was designed to cover the costs of running the list... and hopefully provide a surplus to upgrade the services we can provide, like better mail delivery, larger archives, etc.

The new automated list manager address is

ListProc@ThePorch.com

Use this for subscribing, unsubscribing, getting archived info, getting the FAQ message, changing your address, etc.

To subscribe, send a message to this address with "subscribe boatanchors <your name>" or "subscribe rra-wg <your name>" Similarly, to unsubscribe, replace "subscribe" with "unsubscribe"

The new list owner address is

ListOwn@jackatak.ThePorch.com

Use this address only when there is a problem which really truly can't be resolved otherwise.

de NA4G, "Boat Anchor Bob", an ol' cw fart .....

If I can be of assistance in older equipment, junk-boxing your way to hamdom, the cheapskate's approach, let me know.

22 yrs a ham, extra class, mostly cw, mostly boat anchors and radio in the traditional sense.

{Telegraphy has been in my family for almost 100 years!}

CWISTS FRIDAY NIGHT FIST FUNCTION

Standard time: Friday Nights at MIDNIGHT LOCAL TIME

Standard freq:
80 meters --- 3702.5 khz for all hands.
40 meters --- 7102.5 khz alternate, for all hands
(between the heterodynes, someone scout out a better QRG)

Standard calling signal:
CWIST IMI DE <yourcall> K (if there are no control stations calling for you to check in), or, CWIST DE <yourcall> K (if there is a control station inviting checkins) (The alternative check in for those OTs with salt behind the ears is a simple DE to get the control station's ears followed by DE <yourcall> K when the control station acknowledges.)

Note:
A simple informal net style protocol will generally be used, unless no control station assumes control for the evening, in which case it is an open roundtable format discussion group.

Note:
The midnight local time gathering is designed to maximize the number of checkins spread out over the world, so less confusion and more checkins are heard. The hope is that someone will be aboard almost anywhere and be heard at least locally, anywhere in the world.

Definition:
A CWIST is a person with an active interest in the PRACTICE and USE of continuous wave radiotelegraphy as directly is applicable to amateur radio. Such PRACTICE and USE may take the form of learning about radiotelegraphy and its history in amateur/commercial areas, its application to radio telecommunication, the practicing of the art and craft of radiotelegraphy, and the refining and developing of the technology of radiotelegraphy.

AUTHOR OF NA4G'S NATIONAL ELECTRICAL CODE FOR HAMS

ABSTRACT

This work was presented as a talk to the Homebrew Special Interest Group (HB-SIG) of the Raleigh Amateur Radio Society (RARS), on 15 January, 1991 and was revised for another presentation on 26 January, 1994.

This document contains excerpts of the National Electrical Code (NFPA 70-1990) that, in the author's opinion, apply to the installation of amateur radio equipment as would commonly be found in most amateur radio stations. Direct excerpts from the Code are contained within inset quotations. Paraphrased excerpts from the Code are itemized. The author's interpretation and discussion of the Code is set full-width. The author's interpretation and discussion of various sections of the Code is not meant to be all-encompassing, nor the official interpretation of the National Fire Protection Association, nor of any official governing body having legal authority of jurisdiction over electrical installations, but is meant to be used as a teaching tool for amateur radio operators.

For ease of access, the group of files have been 'rolled into one' both in tar-compress (862K, for Unix jocks) and PKZIP 2.04g (732K, for MS-DOS users) formats. Both are available from:

ftp://sunsite.unc.edu/pub/academic/agriculture/agronomy/ham/things-to-build/na4g/

Robert A. Kile KG7D

midnight@accessnv.com

A Current list of Dealers and Manufacturers of Amateur Radio Equipment in North America is now available on HR Showcase Amateur Radio WWW. The URL is:

http://www.accessnv.com/hrshow/

The listing will be updated as more come on line. Enjoy!

PACKET : WB3FFV @ WB3FFV.MD.USA.NA |

HOW TO ACCESS THE WB3FFV AMATEUR RADIO INTERNET BBS !!!

I have placed a BBS system on-line that is mainly oriented towards the Amateur Community (but there are plenty of other wares on-line). Through user support I hope to keep the latest and greatest ham software on-line. The BBS also offers access to nearly all of the Internet (USENET) NetNews groups, plus access to most Internet services such as E-mail, FTP, TELNET, Gopher, WWW, Callsign Lookup, Etc... Below is the information that is needed in order to access the BBS via Telephone, Telnet, or FTP. Please pass it around to as many ham's as possible.

System Name: WB3FFV
User Login: bbs

+1 410-361-8170 - 12/24/48/96/14.4/16.8/19.2/21.6/28.8/33.6 (V.32bis,V.32terbo,V.34+,V.FC,HST,V.42bis)

TELNET/FTP - telnet://bbs.abs.net/ (login: bbs)
ftp://ftp.abs.net/

WWW - http://www.abs.net/

Data Settings: 8 Bits, NO Parity, 1 Stop Bit
Times: 24hrs/365days (except for routine maintenance)
Software: UniBoard UNIX BBS Software (Version 2.00b)
Misc. Info: Machine is an Pentium-90/MP running UNIX System V Release 4.2MP and features more than 9 Gigabytes of on-line file storage.
Most transfer protocols are available!! (multi-line system)

I attempt to keep the latest and greatest HAM software on-line, and encourage all to upload anything new that they come up with, as it is of benefit to all. Here is a sample of the software that is available for downloading:

* KA9Q TCP/IP Software for the PC (Latest OFFICIAL release + TEST Versions)
* KA9Q TCP/IP for the Atari-ST, MAC, & Amiga
* KA9Q TCP/IP for UNIX based systems
* KA9Q TCP/IP (The NOS release) [UNIX, MS/DOS, Amiga]
* KA9Q TCP/IP (Version by G1EMM, PE1CHL, PA0GRI, Etc.)
* N2GTE Packet Message Switch [GTEPMS]
* WA7MBL BBS for the PC
* W0RLI BBS for the PC
* MSYS BBS for the PC running KISS TNC's
* AA4RE BBS for the PC (plus BETA versions)
* F6FBB BBS for the PC

* G8BPQ PC-Node (Version 4.08)
* Various BBS utilities and enhancements
* Several MORSE CODE Tutors
* TheNet software by NORD><LINK
* Modifications for many HAM Rigs and Scanners
* Digital Signal Processing software (DSP)
* DX and contesting programs

If you are interested in using UUCP to connect to the BBS, this can also be done as I support Anon-uucp. The login to the system is 'uucpanon', and there is NO password. The listing of available archives are stored in a file called 'FILES', and it is located in the /var/spool/uucppublic. To retrieve the files listing just use the following command:

uucp wb3ffv!~/FILES /usr/spool/uucppublic (ASCII Text)
-or-
uucp wb3ffv!~/FILES.Z /usr/spool/uucppublic (16-Bit Compressed)
-or-
uucp wb3ffv!~/FILES.gz /usr/spool/uucppublic (GNU Gzipped)

This will move a copy of my file listing into your uucppublic directory.

If you want to access the BBS via Telnet, all you have to do is access:

telnet://bbs.abs.net/

and login is 'bbs' with no password required.

To use anonymous FTP, just access:

ftp://ftp.abs.net/

and login as 'anonymous' (may not be necessary, depending on your FTP client).

AMPR.ORG IP COORDINATOR FOR MARYLAND SUBNET (44.060.XXX.XXX)

AUTHOR OF THE QRZ! HAM RADIO CDROM

I am interested in receiving amateur-radio-related public-domain and/or shareware programs, data bfiles, frequency lists, etc., that would make a useful edition to the QRZ! CDROM. Can help arrange volume discounts for clubs and groups, and will donate copies of QRZ! to qualifying non-profit organizations. Send E-mail or call +1 602

483-2036.

We now have the QRZ! FTP archive and QRZ! WWW server online, 24 hours a day. Our connection is via a T1 line so you should get pretty decent file transfer times.

We've got about 7,000 files online, including radio mods, software, most everything imaginable. We are also accepting uploads of all ham radio related material.

Feel free to stop by and have a look:

* ftp://ftp.qrz.com/
* http://www.qrz.com/ (WWW interface to the FTP archive as well as a Callsign database server)

Authors of ham radio shareware programs, data files, mods, etc., are invited to contribute their materials to the QRZ! anonymous ftp server above.

I would also like to thank those who have volunteered in helping port the QRZ! source code to a wide variety of platforms. In the next edition, we'll have support for DOS, Windows, OS/2, Windows NT, Sun, NeXT, SGI, Linux, AIX, and HP/UX executables, directly on the disk.

Notably not mentioned is Macintosh, which so far has been a bit troublesome to put together. If anyone who can program in 'C' on a Macintosh would care to volunteer, please let me know. Although there is an experimental Mac interface at this time, I'd like to make it an officially-supported platform.

The QRZ! Callsign/E-mail Registry now contains over 4100 callsign-to-E-mail-address listings and is growing daily.

We have a WWW page where you can input your E-mail address directly into the QRZ! Callsign Database, where it will be published on both CDROM and on the Internet. When you use this page, your E-mail address is made instantly available to the online database.

Everyone is encouraged to check in and add their E-mail address to the server. There are no charges or listing fees, and it's free to all radio amateurs. The procedure takes only a second, and you are only asked to supply your callsign and E-mail address.

The URL is:

http://www.qrz.com/email.html

Register your E-mail address today!

We're pleased to announce that the online FCC database at qrz.com is now updated nightly from the FCC with fresh information.

According to FCC rules, if you've just passed your first test, you can begin operating as soon as your callsign shows up in the online

database.

Please pass on any ideas, suggestions, comments, etc., to my E-mail address above.

Luther M. Lord N4DA

n4da@mindspring.com

If you need a good place to get your amateur radio repaired, I can help. Visit the Radio Doctor's home page at:

http://www.mindspring.com/~n4da/top.html

I will answer all technical questions received via E-Mail at my address above. This service is offered presently at no charge.

Dean R Madsen, KE0WO Computer Science Major
Internet: dmadsen@iastate.edu Iowa State University
ke0wo@iastate.edu Ames, Iowa
AX25: KE0WO @ KE0WO.#NWIA.IA.USA.NA
Secretary for the Tristate Amateur Packet Association
Treasurer for the Cyclone Amateur Radio Club

A few members of our ham radio club were interested in helping out. Since our turnover is usually 4 years or so (graduation is a horrible thing), I thought it may be difficult for us to keep the list up to date. I thought that by creating a local mailing list called elmers@iastate.edu we could add or remove people as need be. There would always be at least one person receiving mail on that list, usually more! Even after I graduate, this list will be maintained allowing ISU hams to easily help others.

Currently we have people with packet experience, some HF experience, much repeater experience, in addition to a considerable background in theory, as many here are electrical engineering or computer engineering students. If a question can not be answered by the readers of the list, there are many other local hams that could be prodded for the info.

Our local ham radio club has been especially interested in helping local disabled hams (or hams to be) get on the air. But anyone local who needed help would find a group at their door ready to work.

Fred O. Maia W5YI

3511297@mcimail.com

The W5YI Group, Inc.
P.O. Box 565101
Dallas, Texas 75356
Tel. +1 817 461-6443

This firm consists of two separate divisions:

EDUCATION DIVISION:

Develops and distributes amateur radio self-training materials, including the Gordon West/WB6NOA line of audio, video, computer software and printed study materials. Credit card orders and information from (toll free): +1 800 669-W5YI (9594). All materials are guaranteed current and shipped within 24 hours with 2-day priority delivery. They offer a special discount for instructors conducting training classes.

W5YI Amateur Radio written license exam and Morse code training products are also available from every Radio Shack nationwide. Color photograghs of the major training products are available at their Express Order or Radio Shack Unlimited desk.

THE W5YI-VEC:

Coordinates the activities of more than one thousand volunteer examining teams world-wide. The locations of test sites near you can be determined by calling +1 817 461-4663 anytime, including evenings and weekends. Any General, Advanced or Extra Class amateur may form their own VE team by calling +1 817 860-3800 during normal business hours.

All examination results are electronically filed with the FCC. Amateur radio licenses and call signs are normally issued within 48 hours of VEC receipt of the examination paperwork. New amateurs may determine their call signs by calling the FCC's toll free consumer assistance line: +1 800 322-1117.

Will Marchant KC6ROL

marchant@netcom.com

I'm one of the SAREX school group technical mentors. A group of about nine of us are assigned by AMSAT/NASA/ARRL to make sure that the schools selected for dedicated contacts on a SAREX flight are prepared. I'd be happy to try handling E-mail from people interested

in SAREX.

CIVIL AIR PATROL

CO-HOST - HAM RADIO AND MORE

Ham Radio and More is available for free to any AM station that is willing to run it with national ads intact. If you want there to be a nationwide amateur radio talk show, call your local station and ask them to get the program. They don't have to be part of the Talk America network. They can call KFNN in Phoenix (+1 602 241-1510) or Talk America at +1 508 460-0588.

Effective 4/7/96: WWCR shortwave will air the show LIVE each Sunday at 6:00pm ET, (2200 UTC) on 7.435 Mhz AND 12.160 Mhz. Also, tape delayed at 5:00am ET (0900 UTC) Mondays on 3.315 Mhz and Saturdays at noon ET (1600 UTC) on 12.160 Mhz.

Call in and be part of the show. The toll free number is +1 800 293-5366 and outside the country at +1 602 230-2755. Fax at +1 602 241-1540.

See the entry for Cheyenne Greatorex for the Ham Radio and More World-Wide Web Page.

It focuses primarily on Contesting, DXing, and technical matters.

David Newkirk WJ1Z

webmaster@arrl.org

AMERICAN RADIO RELAY LEAGUE (ARRL) WEBMASTER

The American Radio Relay League is pleased to announce the startup of
ARRLWeb, your League's new HQ-based World-Wide Web site, at the URL

http://www.arrl.org/

ARRLWeb will serve as an essential Internet resource for active hams, carrying ARRL news, details on upcoming hamfests, conventions and Amateur Radio examinations, the ARRL Publications catalog, information of ARRL membership benefits and services, and more.

In inaugurating this new service, the League thanks Scott Ehrlich, WY1Z, and the other Boston Amateur Radio Club volunteers who've worked since December 1994 to keep ARRL up and coming on the Web via the ARRL home page they installed and maintained at oak.oakland.edu. Their volunteerism helped show us that upgrading our Internet connection to a level that allowed on-campus Web service would be essential to ARRL's mission of serving Amateur Radio.

Your comments, criticism and suggestions on how to make ARRLWeb bigger and better are *essential* to its ongoing success, so please drop by and say hello!

TUSCON AMATEUR PACKET RADIO (TAPR)

I am no longer a TAPR officer, but try to help out with the TAPR file server and am the "official" contact person on the Internet and CompuServe (71540,2364).

To access the TAPR file server, send E-mail to:

file-request@tapr.org

To get the help file and a list of available files, send the following commands in the body of the message:

help
dir
quit

All mail sent to that address is not read by a human. Conversely, mail sent to tapr@tapr.org is read by a human who will be glad to take your orders or process membership applications, but cannot send you file server files.

Joe Nobody N0CALL

nobody@nowhere.nodomain

REC.RADIO.AMATEUR.MISC FREQUENTLY ASKED QUESTIONS (FAQ)

No longer available from:

* ftp://ftp.uu.net/usenet/news.answers/radio/ham-radio/faq/
* http://rtfm.mit.edu/pub/usenet/news.answers/radio/ham-radio/faq/

Well, it's finally happened. The long-defunct FAQ's have finally been removed from most archive sites. This important document, one which served as an excellent "Read Me First" for the readership of the amateur radio-related Usenet newsgroups, is now no longer publicly available.

Efforts are still underway to bring it back, but so far, no volunteers have stepped forward that have been able to resume its regular posting and maintenance.

As stated many times before, new editors are being actively sought to take over maintenance of the above resources and keep them from disappearing from the net permanently. As with any volunteer effort, new volunteers are often needed. We need new editors to post the above FAQ's. Preferably this should be someone who has enthusiasm for hobbyist radio, experience with Usenet, and the ability to work with the other editors. No single person can know all the various aspects of this diverse hobby, so the editorial review group is intended to make a greater combination of experience. A new maintainer is desired at this time to provide a fresh outlook as well as the opportunity to train new volunteers and avoid overreliance on a small group of people.

The FAQ's were posted with the auto-faq software, which is written in Perl (see Paul Schleck's entry). So it would be a plus for volunteers to post the FAQ to have Perl installed on their system and be able to use "cron" or "at" so that postings can go unattended.

With widespread net acceptance and use of the World-Wide Web, it might be desirable to rewrite the FAQ as a minimal "pointer" article with URL links. Such a minimal FAQ would reduce maintenance burdens, ward off criticism of the document for being "too big," and could be maintained as Hypertext Markup Language (HTML) at a WWW site, then "dumped" to an ASCII file for posting to news (to cover users who don't use WWW, as well as to actually feed a couple of automated FTP, Gopher, and WWW sites. Such an approach is used for the Elmers list; see the companion posting to this file, "Amateur Radio: Elmers List Info and Administrivia" for more information).

Anyone who wants to make their contribution to the Net as a volunteer should contact the Elmers Directory maintainer at elmers-request@gonix.com.

P.O. Box 7039
Cut 'n Shoot, TX 77303-0039
(H) +1 713 592-8636 (6pm to 9:30pm Central Time)
(W) +1 713 770-1836 (6:30am to 3:30pm Central Time)

I have a collection of service information and literature dating back to the 1920's. I will be happy to assist those needing copies of out-of-copyright information for specific makes and models of receivers, transmitters, test equipment, etc..

The collection spans commercial, amateur, and military surplus gear of all types. Unfortunately I have not taken the time to catalog all this information, but it is logically filed by make, model, etc.

If you need service information for a specific piece of equipment, (and I have the information in my collection) I will research and copy it for you. Cost will vary depending on the time required to find the information and the amount of pages to be copied. I estimate 10 pages or less at $1.00 US/page including US postage. I will quote on larger

manuals.

This is NOT my career or a business. Any requests must be prepaid or I will ship COD at additional postage costs.

AUTHOR, SWISSLOG HAM RADIO LOG PROGRAM

http://www.worldcom.ch/business/swisslog/swisslog.htm

Bruce Perens AB6YM

perens@hams.com

MAINTAINER OF LINUX FOR HAMS CDROM

What Is Linux for Hams?

Linux for Hams is a full-featured Linux system with special additions for Amateur Radio. The system includes all of the sophisticated software that one would expect on one of today's engineering workstations, along with software for packet radio communication, electronic design, printed-circuit manufacture, a database of FCC rules and license exams, a code-practice program, and other Amateur Radio applications.

The general-purpose software includes software for connecting to the Internet, compilers for the C and C++ languages, a full-featured typesetting system, a symbolic mathematics program, CDROM authoring tools, and many other programs. Unlike other Amateur Radio software collections, Linux for Hams is an integrated system. The programs are already compiled and configured to work together with the rest of the system.

Linux for Hams is being built by Bruce Perens AB6YM, with the help of several volunteers. Of course, it builds on the work of the thousands of volunteers who helped create Linux and the other programs it contains.

The system will be available for free if you download it using FTP. A low-cost CD will be available, for about $30 US.

FREE CDROM SUBSCRIPTION FOR VOLUNTEERS

Most of the software in Linux for Hams is free software, contributed by its author for anyone to use. I would like to compensate those authors for their work. If you are the author of a significant piece of software included in Linux for Hams, please E-mail to Perens@Rahul.net. You may be be able to get a free CDROM subscription to Linux for Hams.

Bruce Perens AB6YM reserves the right to decide who gets free subscriptions, what is included in a free subscription, and for how long those subscriptions last.

For more information about Linux for Hams, check out the WWW page:

http://www.hams.com/perens/LinuxForHams

or send E-mail with the word "help" to:

PHD CANDIDATE IN ADULT AND HIGHER EDUCATION

EDUCATIONAL ADVISOR, AMERICAN RADIO RELAY LEAGUE

I am primarily an adult educator conducting research in self-directed learning. I have been involved in the following activities:

* Teach licensing classes, since 1974.
* Organize clubs, Stuttgart Amateur Radio Club, Panama Canal Astronomy Club, Lawton Astronomy Club.
* Public speaking and publish on growth in volunteer organizations, marketing adult and higher education and teaching amateur radio courses.
* Research in adult learning theory, adult motivation and organizational theory.
* Conducted a SAREX activity that involve seven communities, 21 schools and 3,000 children.

I am primarily interested in assisting amateur radio clubs grow.

Tony Reeves AB6GA

tony@toners.com

Prescott, AZ

* Novice training, local VE for Novice-Tech tests
* General questions

I also operate a 24-hour landline BBS for Ham and General Interest:

+1 520 445-8472

Peter Reynolds KE4ABD

Peter Reynolds (KE4BAD) E-mail: reynolds.stc.nato.int
Voice: +31 70-314-2410 FAX: +31 70-314-2111
Senior Scientist, Radio Branch, Communications Division
SHAPE Technical Centre, PO Box 174, 2501CD The Hague,
The Netherlands CompuServe: 100276,1340

I am very lucky in that I earn my living in radio communications, so my expertise is fairly broad (but not focused on amateur techniques only):

* Modulation types - FSK, PSK, MSK
* Error control - various types of ARQ and FEC systems
* RF - Antennas, HF propagation
* Networking - TCP/IP over HF
* Frequency bands: VLF, LF, HF, VHF, UHF, SHF

This is a very brief synopsis of the areas that I have dealt with over the years. I always enjoy discussing and researching a communications problem so if you don't see it listed above drop me a line anyway, especially if you happen to be in Europe.

AMSAT-NA LIFE MEMBER #2109

I am the AMSAT coordinator for the Portland, Oregon area and I do a lot of the "Elmering" in this area as well as steering people toward others.

This would be for satellites only, as I am not doing HF anymore.

I am currently set up for all of the digital and analog satellites, all modes including AO-13 Mode S and weather sats.

I would be happy to assist people with getting started and beyond in all areas of satellite operations.

Henry Ruh KB9FO

atvq@aol.com

AMATEUR TELEVISION QUARTERLY (ATVQ) MAGAZINE

The magazine's E-mail address and mine are the same: ATVQ. There is also a ham radio section for "manufacturers and dealers" on America On-Line in which we list Amateur Television Quarterly, as expert and manufacturer. That is where most of the Frequently-Asked Questions (FAQ's) come from.

Most FAQ's are answered in one of two books we published. ATV Secrets for Aspiring ATV'ers is a non technical book, and Volume II is a 300-page technical manual with theory and projects for all equipment necessary to operate an ATV station. Prices in US funds are $9.95 and $24.95 plus postage ($3.10). Most of your inquires can be answered by either of these two books.

I am also compiling a set of W6ORG Notes, a regular column in ATVQ, which answers many of the technical FAQ's on various equipment and operations. This will be available for $9.95 also.

I can try to answer questions on here, and frequently do, but time is expensive and limited!

John Rymell N3PFF

ryme@husky.bloomu.edu
Bloomsburg University
Bloomsburg, PA

Over 25 years in electronic/computer service work. Enjoy designing, building and operating vacuum tube and solid state equipment. Experienced in wire antenna and tuners, SWL, and Amateur Radio. Have real enthusiasm for building just about anything from next to nothing (:^)! Glad to help those in need.

I can help people with HF stuff, cheap antennas, and am willing to help troubleshoot problems with rigs.

I believe that one of the pillars of ham radio - construction/
understanding at the burn-your-hand-with-a-soldering-iron level - is
drifting out of ham radio. With Japanese radios which cost so much,
fewer and fewer hams are willing to risk their warranty to service
their own equipment. I would like to see a turn-around here...

ko4ta@mindspring.com

NET CONTROL, BEST OF 75 NET

Meets every Saturday evening at 1930 Eastern Time at 3.975 Mhz (75 Meter HF Amateur Radio). Guests via the KO4TA phone patch usually arrive about 2100 Eastern Time.

The purpose of this net is to bring the Amateur Celebrity to the Amateur for an opportunity to ask and answer questions. Past guests have included Barry Goldwater, Wayne Green, Hap Holley, Fred Maia, and Bill Pasternak.

The 3.975 Mhz frequency is also home of the Friday Night Trader's Net at 1930 EST as well as good-natured discussion in general almost any other time.

I'm certainly willing to be an Elmer if there's a need. I hope I've learned a few things since 1966 when I first went on the air. :-) Here's a list of subjects I might be able to help with:

* Combining amateur radio and flying
* Antennas
* Civil Air Patrol
* General Operating Practices
* Older (Tube) Equipment
* Test Equipment and Measurements

Jeff Stillinger KB6IBB

Flight Test Center, crashing aircraft so you don't have too.
- ---

For hams that are interested and live in my area, they are welcome to login to IBBS. IBBS is a full-time Unix-based computer that is dedicated to ham radio. I carry a full rec.radio.* news feed and E-mail. There will never be a fee for anything.

Over the past 10 years I have operated from 160 M - 23 CM and would be willing to answer any question a new person to the hobby has. If I don't know the answer, well, NASA is only two blocks away. :-) I live and work here at Edwards Air Force Base, CA. I am also very active in SAREX.

Dave Stine WA2JTA/6

dstine@cisco.com

My areas of expertise are:

* vacuum tube amps, receivers, exciters
* CW operating tips
* wire antenna tips, hints & kinks

David Stockton GM4ZNX

dstock@hpsqf.sqf.hp.com

* SWL since 1960
* Licensed since 1984 (UK full class A)
* Degrees in electronics&comms and digital techniques etc.
* Currently senior design engineer doing RF design

* Fairly broad interest in amateur radio (but not contests!)

* Antennas, Transmission lines,filters from fundamental theory to
practice
* Receiver structures and circuits from simple to state of the art.
* Transmitters, ATUs
* Test equipment
* Wide experience of troubleshooting/repairing equipment.
* Professional experience of EMC/RFI
* QRP
* UK Operation and Licensing

* My morse is flaky, but I keep working on it
* No interest in contests
* No interest in packet radio or in fixing computers

Just wrote the new oscillator and synthesiser chapter for the 1995
ARRL Handbook. Also co-developed (with G3ROO) a robust phase-locked
summing loop circuit to replace the common mixer-filter LO frequency
adder. A technical article describing the project was recently
published in RADCOM.

ARRL TECHNICAL INFORMATION SERVICE COORDINATOR (TIS@ARRL.ORG)

ARRL E-MAIL INFORMATION SERVER SYSOP (INFO@ARRL.ORG)

The ARRL Technical Information Service (TIS) is a valuable membership benefit that helps hams find answers to difficult technical questions.

The answer to a ham's most common technical questions can be found in one of the many books about Amateur Radio. Folks who call or write to ARRL TIS staff are often referred to one of these books or to a past magazine article.

However, most hams find that the fastest way to get the answer is to do their own research. Publication catalogs often talk about what kinds of information are available in different books. A few good books will answer the vast majority of questions as well as enhance a ham's knowledge and enjoyment of this fascinating hobby.

Magazines are also a superb technical reference. An annual index of articles appears in the December issue of QST and other magazines. These indexes will usually have an article or two (or six) about a particular topic. If an older QST or QEX article is not available locally, the ARRL Technical Department Secretary can provide a copy for a small fee. Back issues are also available from the QST Circulation Department.

The ARRL Technical Information Service is a valuable source of information and research for questions that cannot be answered by other means. ARRL TIS has information packages and bibliographies that are available on request to answer most technical questions.

For those who want to know if something has been previously published on a particular subject, TIS can also assist with research to locate this information. TIS also helps locate companies that sell hard to find parts or supplies used in our hobby.

Many amateur radio informational documents are also available from the ARRL E-Mail Information Server (or Info-Server for short). To find out how to use the Info-Server, send E-mail to info@arrl.org with any subject (it is ignored) and the following text in the body of the message:

"Why don't you just make 10 louder?"
(Spinal Tap)
- --

Having recently discovered the joys of Perl and CGI on the WWW, I decided to get into the swing of it by coding a WWW page where one can take practice Amateur Radio Exams. The page is now complete and has all five examinations along with figures (including Extra).

The results are displayed question-by-question and then broken down by subelement so that you can see which areas need extra study.

I am also saving the results from each examination taken so that one can get some idea of the relative success rate for each Exam and subelement. This may provide some interesting information as time goes by.

The page can be found at:

http://www.biochem.mcw.edu/Postdocs/Simon/radio/exam.html

I _think_ it should all work as expected but I welcome any reports of bugs and/or suggestions!

I hope this is of use to people interested in upgrading.

PS: If the page is slow, or not to your liking, try Ham Exam at:

http://w5ac.tamu.edu/ham-exam.html

==========
This message does not constitute any official or unofficial statement or policy of American Turnkey or any other organization, corporation or institution.

I just upgraded to Advanced, and am now working on Extra. Was first licensed about ten months ago.

What I've learned:

1. How to operate HF from your apartment without being evicted
2. How to pass tests, both written and code
3. How to make a virtue out of the necessity of your limited equipment, and enjoy the process while doing it

I operate CW HF exclusively. The only time I get to operate is when the baby is asleep, so the XYL demands silent running. Besides, with my wimpy wire, there is little point in trying to run voice.

Jim Walsh W7LVN

jwalsh@efn.org

Quarter Century Wireless Association, Inc. (QCWA), headquartered in Eugene, OR, is pleased to announce the QCWA World-Wide Web Home Page, available by either text or graphics browser at:

http://www.efn.org/~qcwa/

Membership in QCWA, a not-for-profit 501(c)(3) corporation, is open to any radio amateur licensed today AND also licensed 25 years or more ago (there is NO REQUIREMENT for continuous licensing over this time period -- if you received your first ham license on or before January 1, 1970, you're now eligible). Included on the Web page are:

* Photos, biographies, addresses and phone numbers of QCWA 1995-1996 Officers and Directors
* Database of local Chapters (nearly 200, worldwide), including name, address, and callsign of Chapter Secretary
* Listing of on-the-air Chapter meetings
* Details of upcoming National Convention -- with photos, as soon as we receive them
* A few words about the quarterly QCWA Journal (we hope soon to have excerpts from Editor Barry Wiseman's new, improved Journal available to you on the Web)
* Rules and schedule for QCWA Phone and CW QSO Parties
* QCWA Memorial Scholarship Program
* Criteria for and recent winners of QCWA Awards
* A Photo Tour of QCWA Headquarters and W2MM/7 memorial station (soon to display a spiffy new IC-738 . . . THANK YOU, ICOM!)
* Links to other interesting ham-related Web sites

Please visit QCWA on the Web . . . and take a moment to E-mail me with your comments, corrections, and suggestions at my E-mail address

above. If you administer a ham-related Web site, QCWA would appreciate
a Link from your page. We're 12,000-strong -- worldwide -- and
growing! Come join us!

Paul Williamson KB5MU

kb5mu@amsat.org

I'm not the author of InstantTrack itself, but I was extensively involved in its testing. I'm the author of OrbitDRV (the tracking TSR that comes with InstantTrack) and a number of other InstantTrack auxiliary programs.

AMSAT-NA (the Radio Amateur Satellite Corporation in North America) operates the Internet host AMSAT.ORG to provide for efficient communications between people interested in the amateur satellite program. At this time two services are provided: a message remailing service and a mailing list service.

In addition, the AMSAT World-Wide Web home page provides interactive access to a variety of information related to the amateur radio satellite program. Use your Web browser program (e.g., Mosaic) to access the URL:

http://www.amsat.org/amsat/AmsatHome.html

Anonymous FTP is available from:

ftp://ftp.amsat.org/amsat/

This archive contains much of the same information as the WWW server. In addition, various files and programs are available for anonymous FTP. This is a relatively new archive, so the older FTP site:

ftp://ftp.ucsd.edu/hamradio/

still has lots of files not available there.

The message remailing service permits users to send each other mail on the Internet without keeping track of each other's Internet address. The remailing service allows each user to receive mail sent to the address callsign@amsat.org, where callsign is that user's amateur radio callsign, or other unique identifier. Mail sent to that address will be routed first to the AMSAT.ORG host at UCSD in San Diego, then remailed from AMSAT.ORG to the network address specified by the user. In most cases, this process delays the message by only a very few minutes. The mailing list service groups subscribers into mailing

lists to receive certain types of messages. There are public mailing lists available to anyone, and private mailing lists available only to certain people (for example, AMSAT Board of Directors members or PACSAT command stations). Currently the following public mailing lists exist:

ANS - AMSAT NEWS SERVICE

This mailing list carries official news releases from the AMSAT News Service. These messages are posted in a form suitable for direct posting to a packet radio BBS system. Each message contains a Bulletin Identifier (BID), which permits the message to be introduced into the packet network at many places without resulting in duplicate bulletins at any BBS. The primary purpose of this mailing list is to distribute ANS bulletins for redistribution (via the packet net or on AMSAT voice nets), but individuals may also subscribe for their own use. If your local packet BBS doesn't seem to get the ANS bulletins reliably, you are encouraged to post the ANS bulletins yourself.

Only authorized AMSAT News Service personnel should send messages to the ANS mailing list.

AMSAT-BB - AMSAT BULLETIN BOARD

This mailing list carries general AMSAT information. This information may NOT be suitable in content for transmission via amateur radio, so automatic reposting of AMSAT-BB messages to packet radio BBS's is discouraged. The purpose of this mailing list is to provide a forum for general discussion of any satellite-related topic.

Anyone may send messages to the AMSAT-BB mailing list. Simply address your message to amsat-bb@amsat.org, and it will be automatically forwarded to all subscribers to the AMSAT-BB mailing list.

Editors of publications should ask permission of the sender before publishing anything seen in AMSAT-BB elsewhere, unless the posting was obviously a public press release. However, posters should realize that anything posted to AMSAT-BB is essentially public.

KEPS - KEPLERIAN ELEMENTS MAILING LIST

This mailing list carries official postings of Keplerian element sets for satellites of interest to radio amateurs. Like the ANS bulletins, these messages are posted in a form suitable for direct posting to a packet radio BBS.

Only authorized AMSAT News Service personnel should send messages to the KEPS mailing list.

NASAINFO - NASA RELATED INFORMATION MAILING LIST

This mailing list contains information about current and planned NASA space missions. Be forewarned: at times this mailing list delivers many large messages.

SAREX - SHUTTLE AMATEUR RADIO EXPERIMENT MAILING LIST

This mailing list contains information and press releases pertaining to SAREX missions.

To obtain any of these services, just send a message to the address

listserv@amsat.org

This address may be reached from CompuServe MAIL as:

>INTERNET:listserv@amsat.org

For the moment, the maintenance of the AMSAT.ORG mailing lists and remailing aliases is done manually. Later, this service will probably be automated and you will have to follow a strict message format. For now, you may send requests in free format. They will usually be processed within a few days. In general, you will not receive an explicit reply to your request. Be sure you specify:

1. Which mailing list(s) you want to receive
2. Your callsign, if any
3. The Internet address to be used, if different from the one in your From: header.

You should not send messages about your subscriptions to any of the mailing lists. Send them to listserv@amsat.org instead. This includes questions, requests for changes, requests for information about mailing services, and complaints.

The list of amateurs who may be reached via the message remailing service may be obtained by requesting the "address book". Note that the address book as distributed contains only the callsigns of the available addressees, not their actual Internet addresses. The address book is updated occasionally, and does not necessarily contain the very latest information.

You may request to be added to the list, to be deleted from the list, or to have your Internet address changed on the list. Please include your callsign if you have one. If you don't have a callsign, that's OK, but please say so. If you have more than one Internet address you want to have available on the AMSAT.ORG remailer, you may so specify. For instance, if you have a regular Internet address and a CompuServe account, you may appear in the address book as both w1xyz and w1xyz-cis. Mail sent to w1xyz would go to your Internet address, and mail sent to w1xyz-cis would go to CompuServe. MCImail accounts have the form w1xyz-mci, and so on.

You may also subscribe or unsubscribe to any of the public mailing lists described above. Send a message to listserv@amsat.org, specifying clearly which mailing list(s) you want to add or drop, and giving your callsign if you have one. When you subscribe to a mailing list, you will automatically be added to the remailing service as well, because the mailing lists are maintained by callsign. If you have more than one address listed in the remailing service, please

indicate which one(s) you want the mailing list messages sent to.

Additional mailing lists, public or private, can be set up as needed.
Send mail to listserv@amsat.org for details.

Questions about any service offered by AMSAT.ORG may be directed to
listserv@amsat.org as well.

Please note that the AMSAT business office is separate from mailing
list maintenance. You may address membership requests to
martha@amsat.org, or send them by mail, phone, or fax to AMSAT
headquarters:

Conway Yee N2JWQ

yee@mipg.upenn.edu
2144 East 21 Street
Brooklyn, New York 11229

MAINTAINER OF THE UNIVERSAL AND FREE LISTING OF REPEATERS FOR RADIO AMATEURS

This listing with all the data is available for anonymous FTP from:

ftp://mipgsun.mipg.upenn.edu/pub/yee/rptr010.Z

An experimental search and submission front-end is available at:

http://www.acs.ncsu.edu/scripts/HamRadio/repeaterdb.perl

As far as I am aware, all the data is freely redistributable and my
intent is to make sure it stays that way. For this reason, I have
applied the GNU General Public License.

The repeater project will now include repeaters from ALL bands and is
not limited to the US. This reflects the intent to make this directory
universal.

Contributions of data may be made by anonymous ftp to:

ftp://mipgsun.mipg.upenn.edu/pub/yee/uploads/

or via E-mail to yee@mipg.upenn.edu

The data format has not been changed from the old format so
contributions that you were planning to make (prior to my recent
troubles) are still current and most welcome. This repeater listing
will be of use if people take an active part in making it accurate and
useful.

AMATEUR RADIO: ELMERS LIST INFO AND ADMINISTRIVIA

This administrivia file and the companion Amateur Radio Elmers Resource Directory are intended for non-commercial distribution via the Internet. Any other uses, please E-mail for permission.

In order to standardize the Internet resource notation used in this Directory, I've decided to adopt Uniform Resource Locator (URL) format throughout. In addition to being a straightforward, human-readable, format for specifying File Transfer Protocol (FTP) archives, Gopher and World-Wide Web (WWW) servers, and Usenet newsgroups, it is also amenable to formatting as hypertext links in Hypertext Markup Language (HTML). For example, users viewing this document at designated World-Wide Web Servers (see "How may I obtain the latest copy of the Elmers List?" below) will see all URL's converted to hypertext links on their WWW client. Rather than fumbling with the various conventions of FTP, Gopher, WWW, and Usenet News software, the document or directory referenced by a hypertext link is but one mouse-click (or key-click) away.

While I'm happy to incorporate the latest and most popular information-formatting standards into the documents that I maintain, I really can't allow myself to be dragged into the role of a WWW help-desk for all of the Internet. Please understand this when I politely refer you to other Elmers, easily-obtainable on-line documentation, or even local expertise such as resident gurus, consultants, or help-desks at your school, company, or information service provider.

I expect there to be a bit of controversy regarding my adoption of this somewhat radical new standard, especially to many users who can't or won't use WWW. Those users should be assured that I wouldn't have adopted a standard unless it was easily human-readable by those accessing this document as straight ASCII. The URL format is easily mapped into human FTP, Telnet, Gopher, and Usenet News reader commands. For example:

ftp://ftp.cs.buffalo.edu/pub/ham-radio/README

Anonymous FTP to ftp.cs.buffalo.edu and get the file README under the /pub/ham-radio directory.

gopher://oes1.oes.ca.gov:5555/

Access the Gopher root page at oes1.oes.ca.gov via non-standard port 5555 (if the standard Gopher port of 70 was used, the ":5555" part would be replaced by ":70" or most likely not appear at all).

telnet://callsign.cs.buffalo.edu:2000/

Initiate a Telnet (remote terminal) session with callsign.cs.buffalo.edu via non-standard port 2000 (if the standard Telnet port of 23 was used, the ":2000" part would be replaced by ":23" or most likely not appear at all).

news:rec.radio.info

Access the rec.radio.info newsgroup on your Usenet newsreader from your local news server.

URL's that start with:

http:

Are only accessible via WWW client software (which is why almost all http: URL's in this directory also have corresponding ftp: or gopher: URL's).

For more information about URL formats, see:

ftp://nis.nsf.net/documents/rfc/rfc1630.txt
http://www.w3.org/hypertext/WWW/Addressing/Addressing.html

Disclaimer: While I have personally confirmed the accuracy of all URL's through the Lynx WWW client, any referenced documents external to this document are subject to future changes beyond my control. In addition, with networks and their administration being what it is, many services with up-to-date URL's may be temporarily unreachable. Please consult with your local gurus, consulting staff, or help-desk to confirm that it's a non-local problem, then ask the Elmer him or herself (me in the case of URL's which appear outside of individual entries). The currency and accuracy of URL's should be at least no worse than that of the Elmers entries themselves (which are each individually confirmed by me every 2 years, and updated within 1 month on request of the Elmer).

A Brief Historical Overview:

If there is any one constant in the changing state of the communications art, it is that "Hams" (Amateur Radio Operators) have always been on the forefront of it. Rumors abound where the term "Ham" came from. Some of the more amusing are described in the list of

Frequently Asked Questions for this newsgroup.

Regardless of origin of the name, a "Ham" is universally recognizable as one who experiments in radio and communications.

Whether it be constructing a low-power CW radio with vacuum tubes, or designing TCP/IP packet networks, such experimentation has historically spilled over into the mainstream such as was the case with Howard Armstrong, who developed the regenerative oscillator and FM radio, or General Curtis LeMay (W6EZV) who was instrumental in making Single-Sideband the communications standard for the Strategic Air Command (1947-1992, now reorganized into a joint command called USSTRATCOM) and eventually the U.S. Air Force. Although packet-switching techniques originated from DARPA (Defense Advanced Research Projects Agency) and the ARPANet, no one can deny the tremendous influence that amateurs have had in demonstrating the viability of TCP/IP and AX.25 communications via radio links. The efforts of AMSAT (the Amateur Satellite Corporation), including the development of many ham satellites and the low-orbiting Microsats (communications satellites no bigger than a breadbox that use store-and-forward packet techniques), have certainly advanced the state-of-the-art in communications, one of the defined purposes of the Amateur Radio Service, as recognized by international treaty.

Since in many cases hams are writing "the book", there is often no "book" or other established reference for a beginner to refer to. Traditionally, information has been passed on from ham to ham via word-of-mouth. Like many of the traditional crafts, a variation of the Master-Apprentice system has emerged, the Elmer-Novice relationship. Called "Elmers" because they are usually older and wiser, having the benefit of many years in the hobby, including several failed projects, and an electric shock or two, they have traditionally been the mainstay of amateur radio, and the source of many new hams, particularly those interested in working on emerging technologies.

Even more importantly, Elmers provided an outlet for the impatient newcomer who wanted "to know everything, and right away." Faced with such a request, a good Elmer will smile and proceed to lead the novice through some project or operating experience. Several hours, days, or weeks later, the novice would have his answers, but would have earned them. Even better, the sense of accomplishment would boost the novice's confidence and nudge him or her down the road to being a model, experienced ham operator.

Many present hams feel that such an experience is missing today. In today's hustle-bustle world, the response to such natural curiosity and desire to learn is, more often than not, "I'm too busy" or "RTFM." As a result, the quality of new hams declines and the knowledge and operating habits they develop in their first formative months and years leave much to be desired. And the very same hams who claim that they "can't understand the new generation" also, in almost the same breath, lament about the "decline of amateur radio."

What is an Elmer today?

An Elmer today is of any age, male or female, who has some expertise and is willing to share it with beginners. Elmers don't even need to be licensed amateurs, just people with knowledge in some area of electronics or communications technology.

What is an Internet Elmer?

With the ever-widening scope of the Internet, the amateur radio newsgroups on Usenet, and now the World-Wide Web, the potential for Elmers to share their knowledge to a wide audience has never been greater. To that end, I maintain a list of such Elmers. Volunteers need only send me their name, E-mail address, and area(s) of expertise. URL-format pointers to resources they maintain, such as WWW home pages or FTP archives, would also be quite welcome. The list has gotten large enough that there should be plenty of suitable examples to model your entry after. If you need some further assistance formatting your entry, drop me a line and tell me a bit about yourself. Ironically, sometimes the best Elmers write to me saying, "I'm not an expert, but..."

I have set up an administrivia mailbox for correspondence related to this list (elmers-request@gonix.com, the default Reply-To: of this message). I would prefer that all such correspondence be directed to that address. In addition to saving it into a special folder, my incoming E-mail filter will also send you an automated return-receipt. While I can guarantee that I will read all mail sent to elmers-request before the next month's posting of the list, mail sent to pschleck may not necessarily get reviewed for some time (although all E-mail sent to me is certainly read with interest *eventually*).

Those desiring a more extensive list, or who need more specific assistance, are encouraged to contact Rosalie White, WA1STO, Educational Services Manager at the American Radio Relay League, 225 Main St., Newington, CT 06111 or via electronic mail addressed to rwhite@arrl.org.

How may I obtain the latest copy of the Elmers List?

There are currently 6 ways of obtaining the Elmers List. Any site at least reachable by Internet E-mail can use options 3 or 4:

1. Usenet News: The latest copy of the list can be found in the companion postings to this message, "Amateur Radio: Elmers Resource Directory [A-*]," "Amateur Radio: Elmers Resource Directory [*-*]," and "Amateur Radio Elmers Resource Directory [*-Z]" (The * represents a wildcard character, as the need to split the list evenly, as well as keep all parts under the 64K

message limit for Usenet, requires that I adjust the split occasionally). Since the list is cross-posted to the following newsgroups:

+ news:rec.radio.amateur.misc
+ news:rec.radio.info
+ news:rec.answers
+ news:news.answers

on the first Monday of each month, with an expiration date 6 weeks into the future, there should always be a copy available at most news sites. Check your newsreader documentation for information about reading previously-read articles or articles that are "threaded" to this one. Also complain to your local news administrator (E-mail to "news" or "usenet" on your local host) if your local news server is configured to ignore Expires headers (and thus prematurely delete the articles) in worthwhile, mostly moderated, information newsgroups like those listed above.

2. Anonymous FTP: If your site is directly connected to the Internet, you may retrieve the latest copy via File Transfer Protocol (FTP) from the following sites:

+ ftp://ftp.cs.buffalo.edu/pub/ham-radio/
+ ftp://rtfm.mit.edu/pub/usenet/news.answers/radio/ham-radio/elmers/
+ ftp://ftp.uu.net/usenet/news.answers/radio/ham-radio/elmers/

3. Mailing-List: Since the list is cross-posted to rec.radio.info, the latest copy may be obtained from the mailing-list gateway for that newsgroup (along with many other informational articles about radio) when it is published each month. To subscribe, send E-mail to:

listserv@ucsd.edu

and in the BODY (not the Subject) of the message, write:

subscribe radio-info

The server may not be able to determine your return address. In that case write:

subscribe radio-info (your E-mail address)

You should get an acknowledgement very shortly.

4. Mail-Server: If you don't want to read through the entire gateway of rec.radio.info, or want a copy of the list right away, send E-mail to:

mail-server@rtfm.mit.edu

and in the BODY (not the Subject) of the message, write:

send usenet/news.answers/radio/ham-radio/elmers/admin
send usenet/news.answers/radio/ham-radio/elmers/index
send usenet/news.answers/radio/ham-radio/elmers/list/part1
send usenet/news.answers/radio/ham-radio/elmers/list/part2
send usenet/news.answers/radio/ham-radio/elmers/list/part3
send usenet/news.answers/radio/ham-radio/elmers/diff

and the latest copy of the list should be sent to you E-mail
within 24 hours (the mail-server uses batch priority to reduce
system demand).

5. Internet Gopher: The latest copy of the list should be available
from the following Gopher sites:

+ gopher://jupiter.sun.csd.unb.ca/
+ gopher://gopher.univ-lyon1.fr/
+ gopher://ftp.win.tue.nl/
+ gopher://gopher.win.tue.nl/

see also news:comp.infosystems.gopher

6. World-Wide Web (WWW): The latest copy of the list should be
available from the following WWW sites (In addition to enabling
the Elmers List to be viewed as hypertext, the site marked with an
asterisk also offers WAIS index searching by keyword):

+ http://www.gonix.com/pschleck/elmers/
+
http://www.lib.ox.ac.uk/internet/news/faq/rec.radio.amateur.mi
sc.html
+ http://www.cs.ruu.nl/cgi-bin/faqwais *

(Note: Because of maintenance problems - FAQ documents not being
promptly updated in particular - the sites at Ohio State and Smart
Pages are no longer recommended for accessing a current copy of
the Elmers List and have been removed from the above list.)

see also the newsgroups under comp.infosystems.www.* (I haven't
listed URL's for all of the newsgroups under this hierarchy as
there are now about a dozen of them (!!!).)

How may I contribute to the Elmers List?

By using this resource, you are benefitting the net by obtaining
assistance in the fastest and most efficient way possible. By
volunteering to appear on this list, you are contributing to the good
reputation of the radio-related newsgroups.

Thanks to all the volunteer Elmers, as well as courteous list users,
for making this service a success.

John Ackermann AG9V

jra@lawdept.daytonOH.ncr.com -or- jra@ag9v.ampr.org

My primary interests are in packet radio network building
(particularly higher speed stuff) and TCP/IP. I've got quite a lot of
info on using the Kantronics D4-10 19.2kB radios, as that's the
hardware we've been struggling with here.

TAPR (Tuscon Amateur Packet Radio) has formed a special interest group
to discuss issues of regional packet networking (Net-SIG). As a
result, the TAPR net-sig mailing list was born, and is now ready for
operation.

This list is <not> intended to replace any of the existing
packet-related mailing lists. Its purpose is provide a medium for
communications among those interested in packet radio networking, both
dealing with technical issues and political/regulatory ones. We'll
discuss things like how the potential 219MHz band will fit into the
networking picture, how to link areas using different networking
schemes, how to set network parameters, etc. The list's charter will
be posted there regularly.

The address of the list is net-sig@tapr.org and you can subscribe by
sending mail to listserv@tapr.org with the text "join netsig".

Apart from subscribing to the list, you can contact me for further
details about the Net-SIG (including upcoming conferences).

JOINT AMPR.ORG IP COORDINATOR FOR OHIO SUBNET (44.070.XXX.XXX)

Please direct all correspondence regarding the assignment of ampr.org IP numbers in Ohio to:

ipaddr@ag9v.ampr.org

which is a mailing list read by a team of coordinators.

(see also Tony Schliesser)

[Editor's note: All ampr.org coordinators are listed in the document at:

MAINTAINER OF STANDARDIZED INFO SHEETS ON QRP RIGS

They are available from the QRP-L WWW Pages at:

* http://ncc1701-d.cc.nd.edu/qrp-l/index.html
* http://www.lehigh.edu/lists/Archives/qrp-l/ (on or after June 1, 1995)

OWNER OF QRP-L MAILING LIST

The QRP mailing list is open for discussion of any subjects relating to low-power amateur radio operation. Example topics: portable operation, equipment design and construction, solar and battery power, QRPp, contesting, kit building, etc.

This list was started by me with an announcement on the rec.radio.amateur.misc USENET group in early 1993. Bruce Walker, WT1M, maintained the mailing lists and FTP area from then through August 1994 on a system at Thinking Machines Inc., think.com. Then it was moved to qrp-l@netcom.com until May 14th, 1995. Thanks to Mike Ardai, N1IST, for all his hard work during the time that QRP-L was on netcom.com.

I am still the keeper of the non-electronic archives, including copies of some schematics, etc. Contact me directly or watch this list for more info.

To subscribe, send E-mail to:

listserv@lehigh.edu

and in the body of the message, write:

SUBSCRIBE QRP-L your_name your_call

where "your_name" is your real name, and "your_call" is your callsign, if any. For example:

SUBSCRIBE QRP-L John Doe K5FJZ

A welcome message with more detailed help will follow shortly.

To unsubscribe, type:

UNSUBSCRIBE QRP-L

Edward Addy KE0EG

eaddy@nacec.org

EXECUTIVE DIRECTOR, NORTH AMERICAN CENTER FOR EMERGENCY COMMUNICATIONS

After a large disaster strikes your community and your family, I am sure you will agree that its a little late to start building a massive rapid response, emergency communications system supported by thousands of people within companies, organizations and serving as volunteers to provide essential support services.

We are the North American Center For Emergency Communications Inc. (NACEC), a federally-registered non-profit organization serving North America since 1992. We have been developing a system that merges many different technologies to create a unique, high-capacity, rapidly-deployable solution to the problem of communications outages and shortages that occur following a large disaster. Our volunteer network in using the Internet as its communications backbone, is itself using one of the many technologies employed in NACEC's overall solution.

To help ensure the greatest possible effectiveness in as many communities as possible throughout North America, we are developing a very large volunteer network of community volunteers (Community Ambassadors) who work with our staff and their local communities. If you are community active and are interested in helping, we need your help, NOW. Please, don't wait until disaster strikes, help us to be prepared and be ready to assist your community.

The more communities that are represented by our volunteer network, the more effective we can be in disaster preparedness, emergency operations and in the area of emergency and military family message handling and delivery.

As a NACEC volunteer (Community Ambassador) you will assist with the movement of information that is vital to the continued success and growth of this organization and the survivability of your family and your community following a large disaster.

This project is growing rapidly, as we locate and add new dedicated volunteers from as many communities as possible from across North America. I hope you will join us in making this organization a

success.

To find out more about how you can get involved in this project and use your Internet skills to help your community, please review the information that is in our WWW Homepage area which can be found at:

http://www.nacec.org/

An electronic volunteer application form can also be found there as well. Should you have any questions, please address them to my E-mail address above.

AUTHOR OF THE FOLLOWING MS-DOS HAM PROGRAMS:

* AutoExam - Examination simulator and study aid
* AutoCW - Morse Code practice program
* DOSGATE - allows users to run programs on your PC remotely
(AutoExam compatible)
* AutoCall - Allows use of the Buckmaster HAMCALL CDROM online
callbook with DOSGATE
* AutoFax - Allows reception of weather fax using Kantronics TNC's
* SeeSats - Real time satellite tracking (text only), DOSGATE
compatible

Most of these programs are available via anonymous FTP from:

* ftp://oak.oakland.edu/SimTel/msdos/hamradio/
* ftp://wuarchive.wustl.edu/systems/msdos/msdos/hamradio/

or write me at:

7 Redfield Circle
Derry, NH 03038

and enclose:

* A FORMATTED high density diskette (either 1.44 MB or 1.2 MB; 3.5"
or 5.25").
* A Self Addressed STAMPED return diskette mailer.
* A note explaining that you want a copy of AutoExam and/or AutoCW
(or one of the other programs).

I am always receptive to individuals interested in maintenance,
enhancements, and non-commercial distribution for these shareware
programs.

MAINTAINER OF THE REC.RADIO.AMATEUR.* SUPPLEMENTAL ARCHIVES AVAILABLE FROM:

ftp://ftp.cs.buffalo.edu/pub/ham-radio/

MAINTAINER OF THE INTERNET HAM RADIO CALLBOOK SERVER AT:

telnet://callsign.cs.buffalo.edu:2000/

For further information about the Callbook Server, please consult the
server's help facility, the rec.radio.amateur.misc FAQ, or additional
server documentation at:

ftp://ftp.cs.buffalo.edu/pub/ham-radio/faq_callsign

Well, I've been talking about it for years. Those of you that have talked with me via E-mail know that. But this time I've actually started on my rewrite of the callsign server at Buffalo. And I've finally got a design that I'm happy with. The new searching capabilities are going to be *much* improved over the current system. I'll be getting rid of the bugs in the current telnet system and making it available to more people. Also coming is a WWW front-end for web surfers. Time to step into the 90s.

Part of the rewrite is an entire reorganization of the database look-up system. The old system was very specific to the FCC database format because that's all that was available when it was written (yes, the server is very, very old). But now there are a number of databases floating around the net for different countries and I am rewriting the system to be more flexible and to accommodate a variety of formats and search types.

In doing so, I'll have the ability to add data for many more countries. That is, of course, if I have the data. In order to do this I need help. I need to get in touch with all people that have access to databases from countries other than the US. The more up-to-date these databases are, the better. If you have access to a database and would be willing to donate a copy to the callsign server for everyone to use, please contact me. A lot of people would genuinely appreciate it.

The callsign server has become remarkably popular on the net and this has happened because the community has contributed so much to it over the many years it's been running. I have heard stories of reunions with old classmates, stories of silent-keys that have been remembered, and stories from blind hams doing simple look-ups of other hams, all possible because of the server. Congratulations to the community for making this system so useful.

Look for the new server in two or three months. Until then you can access the current one.

Please direct all other feedback, submissions and administrivia regarding these services to my E-mail address above.

My electronics expertise is mostly analog, but I have some insights
into DSP applications that can do better in what used to be the analog
dominions. I can be of the most help with low-frequency analog stuff,
particularly measurements and low-level/low-noise/low-distortion
applications. I breadboard with IC's, discretes, and surface mounts
(which I prefer to use now, as surface mounting requires less drilling
of PCB boards once they are etched). My electrical engineering
education (Ph.D.) emphasized control systems. I also have a clear
understanding of transmission line measurements and behavior (a
personal research interest for the last 25 years or so).

Barry Buelow WA0RJT

Barry Buelow WA0RJT Packet BBS in Cedar Rapids, IA
barry@ia.net WA0RJT@WA0RJT.IA.USA.NOAM

The Tuscon Amateur Packet Radio (TAPR) Bulletin Board Special Interest
Group (BBSSIG) is sponsoring a working group to generate and
distribute a series of information bulletins which will serve to
instruct packet radio users in a variety of areas. These bulletins

will be distributed via the packet network and can be retained at each BBS in a file area. An index will be provided to allow users to find information they desire.

If you are interested in actively participating in this effort and can work on a collaborative effort, please speak up. Send a message to my E-mail address above.

[Editor's Note: As this project is still very much a work in progress, and its eventual products will certainly be made available via several information sources (including the Internet) as soon as they are completed, I'm sure Barry would appreciate it if only serious volunteer contributors contacted him at this time.]

Rusty Carruth N7IKQ

Rusty Carruth aka N7IKQ aka rusty@indirect.com (NIC: RC541)

The Phoenix Linux User's group has formed! Details: me.
Join the Usenet Un-Net: 1700-1900Z Saturdays, 28.410 or 28.390 MHz

I'm willing to act as a reference for anyone wanting info on getting tapes (especially Callsign tapes) from the Department of Commerce National Technical Information Service (NTIS) or wanting other info on callsign-project related stuff.

One of these days I'll actually be around for the un-net! I promise, really!

My job is currently System Administrator for a large Unix site so I know a little bit about day-to-day Unix operations and Unix installation :-) I also have much experience with constructing E-mail paths that will work rather than bounce.

I also have a fair amount of experience in hardware/software interfacing and machine control.

MAINTAINER OF LIST OF PERIODICALS OF INTEREST TO QRP ENTHUSIASTS, ELECTRONICS BOOKS OF INTEREST TO QRP ENTHUSIASTS, AND ANTENNA BOOKS OF INTEREST TO QRP ENTHUSIASTS

Available from the QRP-L WWW Page at:

http://ncc1701-d.cc.nd.edu/qrp-l/index.html

Since QRP-L has moved to lehigh.edu, the articles will also appear at this address on or about June 1, 1995:

http://www.lehigh.edu/lists/Archives/qrp-l/

(Note: the "A" in Archives is capitalized.)

Please direct all submissions, feedback, and administrivia for these articles to my E-mail address above.

I serve as an Educational Advisor to ARRL and hence fall within the loose bounds of their field organization. I know something of the fundamentals in electronics, having written the current Chapter 6 of the 1995 ARRL Handbook, and something of antennas, with a series appearing in Communications Quarterly. I serve on the Board of Directors of 10-X International and maintain memberships in most of the QRP organizations, as well as the Quarter Century Wireless Association (QCWA). As to what I do not know, there are no limits.

I also know something of the craft of technical writing and editing, being director of Techwright, an occasional consulting operation in this field with my wife, Jean, N4TZP, who has been a technical editor and writer since 1980.

Arthur Chandler KO6OA

arthurc@crl.com

BayMOO, an all-text virtual-reality on the Internet (a form of Multiple-User Dungeon, or "MUD") has just completed an amateur packet radio simulation "room." This room can serve to help orient non-hams, or non-packet-operating hams, to some of the operating conventions and experiences of amateur packet radio networks.

BayMOO may be accessed from:

telnet://baymoo.sfsu.edu:8888/

When you log into BayMOO, just follow the instructions ("HELP," "MOVEMENT," and "HELP COMMUNICATION" will give you most of the basics.) To go to the packet radio simulation room, type:

@go Virtual Ham Central

You will need to contact "Akira" or "Dr.J" in the room to get transmission privileges.

You may use BayMOO with guest privileges by using your callsign as your guest login name (if you have one). If you want a permanent login, write to:

rk@world1.worldbit.com

giving your callsign as your username.

GRAPES 56 KBAUD PACKET RADIO MODEMS

I'm not an official representative of the Georgia Radio Amateur Packet Enthusiasts Society (GRAPES), but I am in contact with them, and have experience using their 56 kBaud radio modems. At the very least, I can forward requests I can't handle to the proper people.

The Proceedings of the 6th Computer Networking Conference has a paper by WA4DSY explaining the theory and practice of the 56 kBaud radio modem. (I think it's the 6th, I don't have my copy handy.)

GRAPES furnishes instructions for modifying a TNC2 to drive the modem, but there are better solutions. The Ottawa PI card and the Gracilis PacketTwin card are two good solutions. Of course they are PC bus cards. If you need standalone capability, the Kantronics Data Engine can handle it, as can the incredible Gracilis PacketTen. PacComm claims their new Sprint TNC can, too (PacComm now also manufactures the Gracilis cards under license and you can get them either from them or from Gracilis direct).

WA4DSY has interfaced raw telco codecs to the modems and done "digital voice" while mobile. It works quite well.

If you want information on the RF modem (full document sets are $20 US, creditable towards a later order) write to GRAPES at

GRAPES, Inc
PO Box 636
Griffin, GA 30224-0636

GRAPES is a volunteer networking organization. There's no phone number, and turnaround on info requests may be slower than when dealing with commercial outfits. Please cut the volunteers a little slack.

(see also Bob Merritt)

Derrick C. Cole KC4WEJ

dcc@ssds.com

I'm a Network/Systems Analyst with a national systems integration firm. My professional fortes are UNIX-based system administration, sendmail, TCP/IP-based ethernet network engineering, network systems security (including firewalls), and programming (primarily Perl and C).

I've had notable success dealing with issues surrounding PC's, DOS, Windows and various applications/protocol stacks, including PC-NFS and LAN Workplace.

I'm still clueless in the electrical/circuit department.

RELAYER OF AMATEUR RADIO NEWSLINE BULLETINS

Amateur Radio Newsline is produced as an audio service by Newsline, a service of the Westlink Radio Network. The transcribed version is produced by Dale Cary, WD0AKO from materials provided by Newsline, and is jointly distributed to online services and bulletin board networks by Steve Coletti and Dale Cary.

Copyright owner is Newsline. Permission to reuse all or part of either this written or the audio form requires that the item be taken in its entirety, not be subject to any further editing or commentary, and that full credit be given to Newsline as the source.

Permission is granted to all amateurs who want to transmit the audio version in its entirety over nets or repeaters. The text version may be used for packet distribution as long as it is sent in its entirety and the BIN header is kept intact.

NOTICE: When Newsline is transmitted in its full form over voice or digital forms of Amateur Radio, it is recommended that the closed circuit advisory be deleted. Audio, Computer, and Packet retransmissions must be made without the editing or deleting of any other part of the Newsline content. Unauthorized additional commentary to the original message is also prohibited. To do so is a violation of copyright and subjects the initiator to legal action by Newsline.

Newsline may also be excerpted for code practice transmissions, and may be used as a reference source in bulletin board discussions under acceptable Fair Use practices.

Any other use is not allowed without the expressed permission of Newsline.

Editorial comment, news items and all other business should be directed to

Bill Pasternak, WA6ITF, Newsline's Producer and Editor-In-Chief.
E-Mail - 3241437@mcimail.com or BILLWA6ITF@aol.com

MAINTAINER OF ADVANCED COMPUTER CONTROLS (ACC) AND LINK MAILING LISTS

The ACC list has approximately 60 members at this time. I am trying to
restrict the list to only ACC users (control people) and owners. The
list is also supported by the new owner of all the rights to ACC, Link
Communications. I am also running the Link repeater controller list
server. It has approximately 90 members at this time.

The way to join the list server is to send me a short E-mail and tell
me what equipment you are using.

(Note: I have no ties to Link Communications or ACC. I started the
Link list first and found how useful it is. I had a lot of requests to

start the ACC list and did it.)

LINK COMMUNICATIONS WORLD-WIDE WEB HOME PAGE:

http://www.link-comm.com/linkcomm/

William (Bill) Coyle N3OGH

wcoyle@dccc.edu

AX.25: N3OGH@AA3CH.EPA.USA.NA

My primary experience is with HF communications, particularly with the Kenwood TS-830S and TS-940/AT. My preferred mode is CW, although I also use SSB. I have had experience with light service on both rigs (including the internal antenna tuner on the 940 and the tube finals on the 830). I have the service manual for the 940.

I am particularly interested in helping new hams design and set up HF stations with multi-band wire antenna arrays.

Other than HF, I am also involved in VHF and UHF, particularly 2 meters, and have recently gotten involved in packet radio (having gained some experience on the hardware end of setting up such a station).

Michael Crick

mica@crick.com

Bellevue, WA

http://crick.com/mica/

I design and write software. I have written a top of the line Ham Radio training program for Windows called "Ham University". You can download a free demo copy from my web site.

I also helped write Microsoft Windows. I am not a ham operator but more of a web nut (I was part of the group at BBN that developed the ARPANET back in 1967). However, in designing Ham University, I got a lot of expert advice. I think it will meet many people's training needs.

- D -

Matthew A. (Matt) D Alessio KC6VIM

mattd@branson.org -- send here first, please!
mdaless@ocf.berkeley.edu

I cannot claim to be an expert in any field, but I did participate in SAREX as the project coordinator for our school (The Branson School) in the STS-64 mission. I will be happy to help anybody else who is interested in any and all aspects of the SAREX project. I also know a little bit about UNIX administration, but I find myself asking questions more often than answering them.

I am a high school senior, so my real area of expertise is getting young people involved in ham radio. I was a speaker at the Dayton HamVention Youth Forum, and am active in recruiting in my local community.

Cols column. de Col VK2CTD

AS I TURMED MY COMPUTER AND PK232 ON TODAY AND PUT THE SYSTEM

IN BAUDOT MODE MY THOUGHTS TURNED TO THE NAME BAUDOT. BEING OF

AN INQUISITIVE MIND I WONDERED HOW LONG WE HAVE BEEN CALLING

THE FIVE UNIT CODE THE BAUDOT CODE. I LOOKED IT UP IN MY

''DICTIONARY OF ELECTRONICS'' AND IT SAYS, QUOTE BAUDOT CODE.

THE STANDARD FIVE-CHANNEL TELEPRINTER CODE WHICH HAS BEEN USED

FOR OVER A CENTURY BY THE TELEGRAPH INDUSTRY. UNQUOTE. THAT DOESNT TELL US MUCH ABOUT THE NAME AND ORIGIN OF THE CODE, BUT, IT IS INTERESTING TO KNOW THAT IT WAS INVENTED OR DESIGNED OVER A CENTURY AGO. I KNOW FROM MY OWN EXPERIENCE IN THE DOMESTIC TELEGRAMS IN THE UK THAT IT WAS QUITE OLD, SOME OF THE OLD SUPERVISORS WERE USING IT IN THE 1920'S, BUT I DID'NT REALIZE IT WAS QUITE THAT OLD. WHEN I DID MY TELEGRAPHISTS COURSE IN THE RAF WE WERE TAUGHT THAT THE CODE WAS INVENTED BY AN AUSTRALIAN NEWSPAPER MAN BY THE NAME OF MURRAY. WHICH CITY OR STATE HE CAME FROM I CANNOT SAY, IT WAS IN THE RAF'S TRAINING MANUAL THAT HE WAS AN AUSTRALIAN. IT WOULD BE INTERESTING TO KNOW MORE ABOUT MR MURRAY. I LOOKED THE NAME UP IN THE DICTIONARY AND FOUND ONLY ONE ENTRY UNDER MURRAY. IT IS POSSIBLE THAT IT IS THE SAME PERSON, I SAY POSSIBLE. THE ENTRY IS, QUOTE MURRAY LOOP. A LOOP CIRCUIT FOR TESTING AND LOCATING FAULTS ON LAND LINES. UNQUOTE. NOW THAT IS PRETTY CLOSE TO THE SUBJECT AT HAND, ALL EARLY TELEPRINTERS WERE JOINED BY CABLE UNTIL RADIO CIRCUITS CAME IN PERHAPS IN THE LATE THIRTIES, THEY WERE CERTAINLY USED DURING THE SECOND WORLD WAR.

I WONDER IF OUT THERE IN RTTY LAND THERE MAY BE SOMEONE WHO HAS MORE INFORMATION ABOUT MURRAY AND THE MURRAY CODE, I FOR ONE WOULD FIND IT VERY INTERESTING TO KNOW MORE ABOUT HIM AND THE CODE.

I CANNOT SPEAK FOR THE OTHER SERVICES, IE NAVY AND ARMY, BUT WE HAD TO LEARN THE MURRAY CODE, IN THE SAME WAY THAT WE LEARNT MORSE CODE. THE PASSING OUT SPEED WAS 10 (TEN) WORDS PER MINUTE, WHICH WE THOUGHT WAS FAST AT THE TIME. BEING ABLE TO READ THE MURRAY CODE (I PREFER TO CALL IT MURRAY) HAS COME IN HANDY OVER THE YEARS, HAVING WORKED IN SEVERAL COMMUNICATION CENTRES.

ANY STATION THAT HAS ANY INFORMATION ABOUT WHO INVENTED THE

BAUDOT CODE AND WHERE AND WHEN PLEASE SEND ANY INFORMATION

TO ME VK2CTD AT VK2DAA. ALSO IF YOU HAPPEN TO KNOW ANYTHING

REGARDING WHEN IT WAS CHANGED TO BAUDOT AND ANYTHING ABOUT

MR BAUDOT WOULD BE APPRECIATED. ANY INFORMATION RECEIVED WILL

BE PUT INTO A FUTURE BROADCAST.

THATS ALL FOR ME FOR THIS WEEK, 73S DE COL VK2CTD.

VOLTA RTTY WW CONTEST

11-12 MAY 1996

CONTEST PERIOD: FROM 1200Z SATURDAY TO 12OOZ SUNDAY (24 HOURS,

NO REST PERIODS REQUIRED).

BANDS: 80, 40, 20, 15, AND 10M.

CLASSES: A1: SINGLE OP. ALL BANDS

A2/XX: SINGLE OP., SINGLE BAND (XX=BAND)

B: MULTI-OP, SINGLE TRANSMITTER

C: SWL

EXCHANGE: SEND RST + QSO NR. + CQ ZONE NR.

MORE NEXT WEEK

WEEKLY SOLAR AND GEOPHYSICAL REPORT

(26 APRIL - 02 MAY)

DATED 3RD MAY 1996

SUMMARY

Date 26 27 28 29 30 01 02

10cm 68 68 67 68 68 67 67

VK2SG RTTY DX NOTES FOR WEEK EMDING 3 MAY 1996 (BID RTDX0503)

The long awaited Kermedec Dxpedition starts 4 May and runs

until 14 May. Look for ZL8RI on RTTY on 14080, 21080, or 7080

khz. Other modes will be active as well. Contributions will be

welcome with your QSL card to ZL2HU.

The 24 hour ARI International Contest runs this weekend from

2000z Saturday 4 May to 2000Z Sunday 5 May. For details see

the Digital Journal, April issue, page 16, or QST, May issue,

page 100.

Our information this week came from AA5AU, DJ3IW and the

Central Europe DX Cluster DB0SPC, I5FLN and the IK5PWJ

Packetcluster, IK1CJO, OH2BUA, W5KSI, WB2CJL, the NJ0M node of

the Minnesota DX Packetcluster Network, OPDX/BARF-80, and QRZ

DX.

ARLD021 DX news

This week's bulletin was made possible with info provided by Maria, ZS1AFZ, Rich, G3NBB, Mauro, I1JQJ, Chris, G4BUE, Tedd, KB8NW, the OPDX Bulletin, and Contest Corral from QST. Thanks to all.

NORTH KOREA, P5. A group of Japanese DXER's who operated XY1HT is expected to be visiting North Korea soon. It has been heard they will apply for licenses. The Hungarian couple of Sanyi, HA7VK, aka XU7VK and XU95HA, wife Judit, HA7RJ, will arrive in Phenjan May 21 and be in the country until the end of July. Sanyi is trying to obtain permission to operate.

P5BK was spotted on the Japanese DX packet cluster 14295 kHz SSB at 0920z.

GRENADA, J3. J37Q and J37P will be active on 20 meter CW through May 7 during their early evening hours.

MARION ISLAND, ZS8. Chris, ZS6RI, is enroute to Marion Island by ship. He hopes to be active in the WPX CW Contest. 160 to

10 meter CW and SSB is planned for after the contest, as well as some 6 meter work.

FRANZ JOSEF LAND, R1FJ. Sergey, R1FJZ, will not be picking up QSL cards from his mail drop until after he goes off the air in August. Please be patient.

REUNION ISLAND, FR. Bernd, DL1VJ, and Heinz, F5NRG, will sign TO3R during the CQ WW WPX CW Contest May 25 and 26. Before and after the contest they will sign FR/home calls. QSL via F6KLS.

ISRAEL, 4X. The 4X6TU beacon is on the air from Tel Aviv on 14100, 18110, 21150, 24930 AND 28200 KHZ. 4X6TU joins ZS6DN, LU4AA and YV5B on these frequencies.

MACQUARIE ISLAND, VK0. Warren, VK0WH, can be found working 40 meter CW on Monday, Tuesday or Thursday. Check around 7009 kHz between 1000 and 1100z. He sometimes shows up on 14038 or 14260 kHz with his qsl manager. QSL VK9NS.

SENEGAL, 6W. F5OGL, aka S92AA, S92PI, TR8GL and TR0D, will be QRV for two years from Dakar starting sometime in July. CW, SSB and RTTY are planned for this all band activity. QSL via F6KEQ.

MINAMI TORISHIMA, JD1. JG8BQI/JD1 is QRV most weekends. QSL via JA8CJY.

IWO JIMA, JD1. JH2ENF/JD1 is on the air from the Kazan Archipelago about 250 km south of the Ogasawara Islands, operating mostly CW.

: They don't necessarily know anything about the culture of the newsgroup
: that want to impose their views on.

There may be some good news to report in a day or so. I have found out that there are other views in the "official" community who will agree with us. I need to get a better understanding myself before it gets reported. Stay tuned to the frequency.

Rick

Source record: 226191

: >Sideband Eliminator !

: Maybe he's referring to the fact that the bandwidth is 15 KHz and
: a sideband station can't get anywhere near the frequency without
: being splattered. I've listened to those guys and their sigs are
: nothing to brag about. During modulation, the carrier FM's all over
: the place. Between that and the bandwidth, it's a mess.

Ed,
On the other hand, listen to W2ZM with his modulated Hartly osc.
It is stable, and with the bfo on you can JUST BARELY detect the
carrier wobbling. The mode is probably NBFM, I am going to make a
wild guess and say it is 1 KHz deviation. Probably legal NBFM.

Tims SBE is a joke. The antenna blowing in the wind modulates the
carrier ! Its just for fun - very entertaining. Fortunately there
aren't many of them on the air!

Rick

432. BA- Boatanchors in Dayton

Newsgroup: rec.radio.amateur.misc

All netters are welcome to stop by the "Friendliest spot in the Hamvention"
and have an eyeball QSO, and a cold drink with some boatanchor
enthusiasts. Quite a few BAs will be on sale if you get there early
Friday, but be aware, we "blow them out" fast at our table.
We scour the flea market at 6 am then set up around 9. CU there.

Spots # 1941 and 1942 (Pearl Harbor)

At this time I can promise you:
2 Ranger 1's
R392
HW100
TR4C parts rig
Other Drakes (possibly B Line)
Drake VHF converters
And (I hate to say it here, TONs of HTs, and newer rigs too)

Rick KT2Q
George KC2MF
and a bunch of other great Guys

433. Radio Station Database Program Stand Alone

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-06 00:00:00 UTC
From: Charles Bolland <chuck@flinet.com>
Message-ID: <318E27BD.1D66@flinet.com>
Source record: 226193
Cross-posted to: rec.radio.shortwave,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc.,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.noncomm,rec.radio.scanner,rec.radio.swap

Sir,

It's still available. The IBM/DOS Broadcasting Radio Station Database Program for Longwave, Mediumwave, and Shortwave. Over 4,000 records included already. The program is completely read and write. Records can be added or changed. Sorts in many different formats both on your screen and printing.

If you would like a copy of the program, send your request to "chuck@flinet.com". Please include your MAILING ADDRESS - SNAIL MAIL. For example, your street number, city, state and zipcode. Also include your EMAIL address.

The program will be sent to you via EMail probably within 24 hour is not sooner. If you reqeust the program and havenn't received it in that period, check back with me. Sometimes things get lost on the internet.

Remember to send your address. Requests without a mailing address will not be acknowledge to save time on the internet. In the past requests without an address were reminded with a message. Usually, the reminder went unanswered anyway. If it wasn't, the reply was sometimes very rude.

This program is FREE! Everything works. It has many features and they all work, not like shareware where some of the features work and other don't.

Your Postal address and EMail address will be kept CONFIDENTIAL. I may in the future contact you via Snail mail with a description about the Voyageur Database program. That's it.

Hope to hear from you and best regards.

Chuck Bolland

>John Gratton

Well actually no John, homophobic is a compound word created from homo and phobic, phobic of course being defined as "A persistant and illogical fear". Im not sure how you came up with the idea that the poster was homophobe since you are assuming his only aversion homosexuality is having it made visible to him. The poster makes no mention of having fear of homosexuality, just that he may not like it or want to see it, which does not make him a homophobe. See.

<snip>

: Your better bet would be to replace it with a 5/8 wip.

Without looking it up, it seems to me that 5/8 wave antennas are not
that close to 50 ohms either. As I recall the one that worked well for
me, it had an inductance in the base, that is a loading coil between the
coax and the antenna.

We're not talking about bourbon, we're talking about someones' need
to put their sexual organs into someone else anus. I do think
there is quite a distinction.

439. Help with Morse Code

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-07 00:00:00 UTC
From: redge@intranet.on.ca
Message-ID: <4mocl3$f6b@news.bellglobal.com>

I've decided to take a shot at learning Morse Code with the intention of applying for a license in a couple of months. I don't know much about Morse Code or radio, except that I use an SSB marine radio sometimes. I did read an article that said that Morse should be learned at a rapid character rate, which makes sense. I have a software program that purports to teach Morse called NuMorse. Is this program good or is there something better? Should I get a keyer and oscillator? What kind of keyer? What make? Any advice would be appreciated. Thanks.

I think that the average person doesn't know all that much about amateur radio, so they don't pay much attention to it. Probably more could be done to draw attention to the hobby...maybe putting some ads or articles in 'teen' magazines...maybe this would work, maybe not. For me, I didn't pay attention to it until a week or so ago, when I was looking through the library for books on SWL, and I found several old (1976) books on ham radio. Those books got me interested enough to buy a copy of ARRL's "Now You're Talking!" when I went to buy a new receiver. After going through it, I think I might take the Tech Plus test pretty soon.

Something needs to be done to at least make amateur radio a little more visible to teenagers and the rest of the younger generations. If people don't know that it's out there, very few of them will be interested in it.

>Just how do we pry young folks away from computer games and the web
>to do HF, code and 1200 baud packet?

Count me in (licensed at 15, now 27, love code and HF).

Add the following members of UMARA (undergrad, grad, and alum, all
under the age of 30):

KD3FG N3FZX KD3SU N3UMI N3UBM N3UUH N3MXZ KE3OM N3NKI N3RFI
NK3L N4ZTC

Yes, the numbers are dwindling, but the people are still there. Most
kids who get into the hobby are either

1) intensely interested in computers & electronics, too, or
2) children of hams

Well, if it waddles like a duck, and swims like a duck, and quacks like
a duck, it is probably a duck......

One who persistently insists that (some) others don't have the right to
appear in public and label their appearance "flaunted and shoved in his
face" is IMHO "one intolerantly devoted to his own church, party, or
opinion" - and that is the dictionary definition of bigot.

>
>Thanks,
>
>Earl, 4Z4TJ
>

Good freakin luck! I went so far as to advertise all over the net, etc in looking for some NOS 8950 pa tubes. Now remember the 8950 is not exactly a "rare" tube, RCA, GE, Sylvania and Plessy made millions of these from 1960 to 1981 - it was a ruggedized, 12v fil version of the 6LF6. Swan Electronics (remember them?..little radio company in Oceanside?) made tens of thousands of transmitters, transceivers, and linear amps using the 8950.

Now the last time I looked for some, the 8950's were selling for right-around $25-30 apiece..which seemed absurdly high even then! (circa 1980) but, to PROVE that there is no limit to the greed some people are capable of..I had email offers of USED TUBES, condition UNKNOWN for $20-$50...and the prices from the various vendors of NEW TUBES, condition GOOD ranged from a mere $75 PER TUBE, (which was a moot point becuz it turned out the guy had none left!) to $95 PER TUBE!

So what has happened? I'll tell ya..the tube merchants have scoured the whole countryside, buying up everything that even hints at being a sweep tube! And they expect that hams are gonna buy them at these outrageous prices, no matter what. (well, guess what? I DIDNT!) And neither should you. Instead, I swapped some equipment for 4 brand new 8950's.

As an aside, dont deal with the profiteers. And especially DO NOT sell them ANY tubes you may have. Sell them to: Other hams, SWLers...hell, even CBers! but please dont sell them to the commercial interests! GIVE THEM AWAY before you sell them to the 'Tube-Pirates'! Hams are one of the biggest markets for vintage tubes, its really a question of the greed factor. If we refuse to buy the tubes at outrageous prices, the prices WILL come down.

(ps-to-Cindy-in-NY: See? I told you those prices were absurd...)

FUTURE PREDICTION:

Our friends the Russians are gearing up to manufacture new sweep tubes! Yes! at some point you will be able to buy Sovtek and Svetlanna made 6146's, 6KD6's, 8950's...and MANY OTHERS! And the prices will seem almost reasonable, esp if

compared to the rip-off prices the 'Tube-Pirates' are charging now!
(what was that old saying about 'burying us'? Will the Russians actually make good the threat to overtake American Industry? When it comes to tubes, it does look possible! And maybe that's ok...)

TECH TIP for Tube Hunters:

Avoid the little outfits that call themselves "So-and-SO Electronix"..they are IMHO the WORST offenders! typically they feature some poor bozo as their 'Tech` who couldnt fix a clock radio! A manager-bitch who quotes all the prices, and some kid at the counter who can barely operate the telephone! The fact is that the manager of these outfits is usually out 80% of the time BUYING UP TUBES and reselling them at 5 to 25 times the original price! Help starve these people to death by refusing to deal with them! They are NO FRIEND to Amateur Radio! (they also usually deal in those cheap-ass CB linears, and probably other forms of illegal and unethical goods!) And fer God's sake, dont sell these people any tubes!

LISTEN to the local swap-nets. Here in Ca. we have the Swap Service @ 7.240MHz every Sat and Sun. PATRONIZE your fellow Amateurs who are selling tubes, they will almost always give you a better deal. (And in some cases, they will just GIVE you some tubes!)

73! and good Tube-Hunting!

You need a copy of 'Satellite Times'...try the newsstands. Also try the
web..there is an exellent FAQ published in Rec.video.satellite.tvro
..it's pretty easy to do this stuff. Just look at the frequency ranges
involved; most sat receivers have a 70MHz output, or a baseband output
(1-10MHz) perfect for scanners or HF multimode receivers!

You'll hear some amazing stuff! Mindbender coded stuff, some military
stuff thats clear audio, conferencing, sat control signals, telephone
conversations...a lot of interesting listening..on both Ku and C band.

>Why would somebody rant & rave & carry on like this with their bitching?

By your callsign John, I see you're rather new so let me explain. The FCC has granted us privileges that no other radio service could dream of. In exchange, they expect us to police not only ourselves, but our fellow operators, too. You need to spend some time reading about the history of amateur radio to fully understand why we "...rant and rave..." about these criminals violating federal law. But of course, you're not interested in that - from previous posts I see you're only interested in saying "I own a repeater <blah blah blah>..." (Anyone can put up a rptr - I can disable the PTT relay in my HW-202, add another antenna connector and as if by magic, it's a rptr.)

Just remember, there's lot of scanner folks in your area who are being soured on amateur radio just because you allow the garbage to continue. Some of those scanner hobbiests might even work in your local city, county or state government. Way to go, Johnboy, for helping to tarnish the fine image that's taken decades to build.

Well, yes there is something wrong with it, on several levels. First of all, your emphatic assertion "IS bad" is only your opinion and many react badly to assertions that someone else's opinion is a determination of fact about them. Second, no one has the right to drive others out of any public accommodation by attacks, verbal or otherwise.

>someone because of this is a different issue.

Guess you have had some unfortunate experiences but it seems to me that we should avoid stereotyping anyone. I know smart gays, dumb gays, rude gays, and gracious gays - and don't generalize. My experience has been opposite yours, but then I can imagine how it could come to pass that those who make seemingly dogmatic assertions that "gay IS bad" could have a really unpleasant experience with members of a group like Queer Nation that tries to be agressively confrontational.
>

>deflect it.

Yes, this is always the problem for an oppressed minority, and for Gays in particular. When they make themselves visible enough to have mutual

support they also make themselves visible enough for the bigots to attack. So, some try to stay hidden forever, and some become agressively confrontational like members of Queer Nation - and most are somewhere in the middle just trying to live their lives like everyone else.

>I didn't know that Christianity, longevity groups, womens groups
>were inherently lacking morals.

Well, your implication that gay groups are so lacking is arrant nonsense.
The beliefs of your particular group aren't universal nor are they the
only possible set of moral beliefs.

> Homosexuality is a wrong choice,

Proof by assertion just doesn't work. Homosexuality may be a wrong choice
for you, but the rest of us can decide for ourselves, thanks. This is
especially so in matters of faith and morals.

>forget all that stuff about it not being a choice and that
>homosexual can't help the way they are. Next thing you know we'll
>have Pedo Ham groups, Skinhead ham groups and every other weirdo
>lifestyle choice group "because they can't help it, they were born
>that way."
>
>Personally I don't care if the homosexuals have their own group,
>I'm just tired of having it in my face all the time.
>
Well then, you can avert your face - don't look if you can't deal
with what you see.
>
>Can we have closet ham groups?

You are welcome to have a closet ham group if you want to belong to one.
You are not welcome to insist that anyone else be denied the use of any
public accommodation because you don't want to see them.

We've all spoken to gay hams, built/used stuff designed by gay hams
and read radio articles by gay hams.

But please PLEASE don't muddle paedophilia with homosexuality!
Paedophiles thrust there urges upon those too young to make a choice.
Incidentally most police records show abt 90 percent of child sex
abuse is heterosexual. Why do we heree so much abt the other kind? Cos
its shock-horror value stirs follk up and sells papers!
If homosexuality is unnatural, how come its been with us so long? How
come it's as common as left-handedness (yes REALLY!! Why else would
companies spend money on advertising to attract the pink dollar/pound
- think abt it!!)

Life's too short to get wound up abt things that dont matter...

Sorry to continue the thread. I promise to say no more - this is the
wrong group!

Well guys, I just have to say that I totally **TOTALLY** support a "boatanchors" newsgroup. In fact, I think that it is LONG overdue. The fact is, 2 mode gear (who needs anything else?) is commanding high and higher prices because hams are really getting into the old gear, aka, "boatanchors". I think that the newsgroup would be perfect and provide an excellent forum for people (like myself) who love this stuff. Think of this as "boatanchors in cyberspace".....it doesn't get any better than that!

Go Boatanchors!

George
KC2MF
Why a radio with more than 2 modes??

How can you tell if you are a loser

1. You are divorced and think you are not at all at fault.

2. You are fat and think it is not your fault.

3. You think alcoholism is a disease.

4. You hit your spouse.

5. You hit your children.

6. You are a child molester and think you ought not kill yourself.

7. You ever drove drunk.

8. You own a gun "for protection" but do not live in a dangerous area.

9. You are a typical ham radio operator.

10. You are proud of being a homosexual.

11. You are a member of N.O.W.

12. You smoke.

13. You take illegal drugs.

Please feel free to add your own.

476. CAN YOU IDENTIFY THIS MICROPHONE ? << HELP >>

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-07 00:00:00 UTC
From: Bill <debral@falcon.cc.ukans.edu>
Message-ID: <1996May7.195015.119406@kuhub.cc.ukans.edu>
Source record: 226034

I have an old Turner microphone that I hope one of you out there can help
me identify.

Here is the description:

MANUFACTURER: Turner

TYPE: Desk mic (push-to-talk)

VINTAGE: Late 1950s to early 1960s (best guess)

DESCRIPTION: The microphone is satin chrome plated, with
a black plastic "push-to-talk" bar located
in the base (at the front). Overall height
is approx 8 inches.

The Turner logo is in red and chrome, and is
located in the center of a shiny chrome,
perforated screen.

When placed on a level table, the vertical portion
of the stand slants AWAY from the user at
about a 10 degree angle.

The overall appearance of this mic is VERY
streamlined.

It is all one piece (as opposed to, say, an
Astatic D-104 that has a very distinct
transition from the removable crystal element
to the UG-8 stand).

On top of the mic element housing is a small "fin"
that gives this mic a very 1950s look.

This appears to be a DYNAMIC type microphone. Removal of
the mic element reveals a small impedance (Z) matching
transformer.

ADDITIONAL INFO: There is a picture of this mic on page 9 of the
ARRL publication "Understanding Amateur Radio" by
George Grammer (first edition, 1963).

Please e-mail if you have an ID on this one, or if you need any additional
information.

A circulator usually refers to a magnetic piece of ferrite used in such a way so as to isolate forward and reflected waves through the port. Sometimes it is used for full duplex receive and transmit on the same band, sometimes it is used with a dummy load on the third port and it is then referred to as an isolator because it isolates the mismatch from a transmitter. As for what it may be worth, who knows? Depends how much power it can handle, how much isolation it has, how much loss it has, or whether it even works. You may just have another magnetic paper-weight.

Once upon a time, when Byte magazine was so thin it needed filler cartoons (remember Kill-O-Byte?), Ham Radio was the popular hobby for the brainy kids. It was inexpensive, it was accessible, and you could "talk to ANYONE ANYWHERE in the whole world!" How cool!

Yeah, it ain't too cool now. After all, here we are on the 'net, no-one can screw with our postings (well, they'd need to make an effort to do so); people around the world not only use it, they use it in droves, and they actually have interesting things to say (at least more so than what you hear on HF these days).

What's changed is the accessiblity factor. Too many houses have covenants regulating antenna installation. The law being what it is these days, nobody but the most dedicated want a legal battle just so they can enjoy their hobby. Not only that, home built radios are no longer so easy to build to the state of the art. There is no such thing as cheap military surplus radio gear either. It is all store-bought radio gear. Where's the challenge? Where's the fun? You put down your money --and then what do you do with the thing?

We need challenges: DF contests, more technical elmers who really understand what they're doing (how about technical competency awards?), better tie-ins to the internet, perhaps some real science studies such as some of the DSP work being done to recover lunar echos, and so on.

What happened to Ham Radio is what has happened to Shade Tree Mechanics, Aviators, and amateur chemists. The state of the art has moved ahead so far that it no longer appears accessible to the average brainy kid. Does that mean that we're doomed? No. General Aviation is still alive. Just go to any airshow! Mechanics? Go to an Indy race some time and tell me that no-one is interested!

Chemists? You notice how many interesting things are made with plastic these days --and they're GOOD!? No, we aren't doomed. But we do need a PR campaign, perhaps something the public can easily understand. How about a contained fox hunt? By athletes? In a race? In the mountains? --Hey I see an ESPN2 event here... don't bother me, I'm dreaming...

I have my doubts, Gary. There was some "stupidity" in you posting
your comments to the .scanner and .shortwave group, so I don't be-
lieve the code is what prevented you from completing the course.
Besides, you could have stuck with just the theory portion of the
course, then gone on to take the exam for the non-coded Tech license.

No, it wasn't the code - just your lack of motivation.

>The also agree
>with the guy who said that the ONLY people dumb or assinine enough to
>want to force you to learn code are old fartbusters who will be dead soon
>anyway, so why should we have to pay for their final years with our blood!

Well, I'm 42 and am 100% in favor of retaining the code. I don't believe
I'll be "dead soon" unless one of these crazy Honolulu drivers runs over
my bicycle (with me on it). Regardless, I see you didn't get much from
the course you half-heartedly sat through - no one is forcing you to
learn the code. Over 95% of the amateur spectrum is available to those
with a no-code Tech license.

I think it's true that lot of people, myself included, were opposed to
having the list go subscription instead of becoming a newsgroup. I still
belong to the list, but I also support extending the boatanchors
discussion by adding a newsgroup. There's no bitterness, here.
Disappointment that the list owner wouldn't consider going to a
newsgroup, yes.

In the first example, "Tim's Pizza", the generic part of the name is
"Pizza". If we get rec.radio.amateurs.boatanchors as a group, the
generic term is boatanchors, use of which term predates the mailing list
by decades.

Why question anyone's motives? The discussion of boatanchors is exactly what many of us want to do - both in the newsgroup and the list.

>some extent, the name of a closely-related Usenet newsgroup.

I don't know about that. Speaking as a radio amateur,
rec.radio.amateur.antique sounds more like a disscussion of antique
hams and codgers than vintage equipment.

If one wanted to nit pick, rec.radio.amateur.equipment.antique would be
the most descriptive and fit the current hierarchy.

We have .homebrew, we may soon have .dx. I've seen postings on
rec.radio.scanner asking about flatbeds, so you'll always have somebody
posting to the wrong group.

If it is determined that slang doesn't have a place in the
rec.radio.amateur.* (or any Usenet) hierarchy, then it should be made
consistent across the board.

If we are going to dumb things down for those who can't function
without a search engine, I suggest groups like the following:

rec.radio.amateur.homebrew -> rec.radio.amateur.equipment.i.built
rec.radio.amateur.dx -> rec.radio.amateur.communicate.far.away

or how about:

rec.radio.amateur.misc -> rec.radio.amateur.argue.bash.flame

-> Does anyone know of any software to create tables (or are there
-> ready-made tables available with convenient origins) to give
-> short-path and long-path beam headings by call sign prefix?

Hi Tony...

Yes, there is such software. You want a copy of RAC 'n Rollup v1.0.1 and the Radio Amateur Callbook, Inc. November 1995 release of the their 1996 CD-ROM Callbook.

RAC 'n Rollup sells for $ 9.95 US plus $ 1.50 US shipping state side and $ 5.00 US shipping overseas.

It allows you to enter your callsign, extracts the data from the CD-ROM and calculates Grid Square, Bearing and Distance, with option of displaying Short Path, Long Path or both to the screen. These features are new in v1.0.1, which is currently in beta testing and should be released in the next few weeks, the Grid square info is in v1.0.0 and again for only U.S. stations. For foreign stations the calculations will be made from a supplemental database, not the CD-ROM, as no Latitude and Longitude data exists, and the supplemental database will use the same data for all stations in each individual country, which will be the coordinates for the Captial City or the center of the country, Island or Reef, as case dictates closeness and data gathering.

It must be noted that, for the U.S. stations, the data in the CD-ROM for coordinates is not that for the actually stations location, but rather their postal area coordinates. However, this is close enough for antenna pointing and even calculation of the 6-place maiden head grid square, as the U.S. is broken down into small postal zones for the most part. However, a few U.S. amateurs using v.1.0.0 have told me that the 6-place grid square designator for their location was close but not correct, again this will be true. However, v1.0.1 also features tools for direct entry and calcualation of all data from entry of precise coordinates and backward calculations also, you can enter a stations grid square locator and get that stations coordinates.

I have experience in writing code for calcuation not only Maiden Head Grid Squares to and from Lat./Lon. but also UTM and MGRS as well. I have thought about adding UTM, but don't know if many amateurs would benefit from it. Many European countries have localized systems for greater accuracy as well.

By the way, the main intent of RAC 'n Rollup is to provide a front end for the RAC Callbook for the printing of mailing labels and envelopes, with country information (country imformation was left out of the first

version of the RAC CD-ROM and is only now about to be updated) and these additional features we have discussed were added as I seem them to be a long standing necessity in the hobby and the RAC CD-ROM is the most complete CD-ROM yet released and a perfect candidate for my efforts. The future versions of the RAC CD-ROM will also be supported as released.

Lastly, the program also features a Callsign prefix engine, in that you may enter a call or prefix and it will return the corresponding country and Continent and CQ Zone, Bearing and Distance (not all in v1.0.0) and a demo is available at http://www.4w.com/ham/n2ckh.bytewise.org or from the support BBS at 1-908-363-2760 as RAC_DEMO.ZIP, the demo does not print labels (v1.0.1 demo will) but does all other features.

>For once, I must agree with something Jeff says. The majority of
>HF operators are almost certainly grey muzzled.

Go back and read Jeff's article (I trimmed it for space), and you will see that Jeff is saying that old people will discuss these things; he is not saying that the majority of HF operators are old. (He is not saying they aren't, either.)

> In 1990, the average
>age of US amateurs was 59.

This does not match the calculations I did back around that time. Having had access to the license database, I looked at them all, and computed an average.

I no longer have the files, or I could re-do it, but the number was quite a bit younger than Gary claims. The number came out to be in the early to mid 40's, as I recall.

> Today it is 54, but I'd suggest that is
>mostly due to the generally younger code test free Techs pulling down
>the average, and that the average HF amateur is now even older than 59.

You suggest that the average HF amateur is now older than 59, but you fail to present any actual evidince.

>So it is not at all unexpected that one of the topics of conversation
>would be health related.

>At HF, the amateur population is almost certainly 25 to 30 years
>older than the average age of the general population.

Again, this is speculation, not a demonstrated fact.

We can expect that the amateur population in general to be older than the average population, since the number of children under 10 years of age getting licenses is relatively small, we would expect the average age of amateurs to be closer to the average age of people over the age of 10. This would skew the age up a few years above the general population.

As for folks operating on HF, we have simple economics to deal with here. The average 20 - 25 year old in this area will have a much more difficult time finding a place to live where HF antennas are allowed. If one needs to buy property to get around rental

restrictions, and houses in this area start at $250,000, it means the price of an HF antenna has gone way up. Older people, who have had their property for many years, are much more likely to be able to take up HF operation.

If indeed, there is an age difference in band selection in the amateur community, this economic difference seems more likely to be the reason than most of the other theories proposed here.

> This explains
>a lot about the attitude differences between these members of the
>"Old Guard" and members of the general population wishing to join
>amateur radio, or who have already joined amateur radio through
>the Tech route.

Last time I was at a club meeting, a lot of those new Techs looked pretty grey to me.

> The old HF operators are a generation out of step
>with society.

This is an emotional claim, again not based on factual evidince.

Thankyou for your reply,

What I was trying to do here is to measure the bit error rate of the
radio link.
Unfortunately, bring the TNC to KISS mode and thus removing AX.25 does
not
help because there is yet the HDLC layer embedded in the TNC. Can you
give me
some suggestions ?

What about the modem disconnect ? What is that all about ? Frankly, I am
an
absolute newbie to the radio world...

Thanks

Alex

Huh? The term "boatanchors" has been around long before the mailing list of the same name. It is -the- commonly-recognized term among afficionados. If a "vacuum-tube" mailing list had been created a few years ago would you then insist that a newsgroup not use the term? (r.r.a.audion, anybody?)

Hi Paul,

My manual shows that pins 8 and 9 are jumpered on the dummy plug for the
VFO.

Have fun and enjoy.

Dan, there are a TON of hams in the Fairmont/Morgantown/Clarksburg
area.

Fairmont - Mountaineer Amateur Radio Association
Morgantown - Monongalia Wireless Association
Clarksburg - Stonewall Jackson ARC

Try calling the guys/gals that gave you your test - they're probably
from the Fairmont club.

It was discussed in the boatanchors list. I don't know about the others.

>No. You misinterpret. Perhaps deliberately. If Tim's Pizza were there
>first in the market, Joe could not use the name "Tim's Pizza." If Tim
>had a record store called "Licorice Pizza", Joe might have a hard time
>if he tried to open a competing record store called "Licorice Platters."

No, I got you loud and clear. I get the impression you think "boatanchor"
is a term coined by the list, when in fact its a fairly common term for
old/large/heavy electronics gear.
I guess we could argue this to death.
I see your point, but disagree.

>Huh? I think you got the logic backwards. Deliberately?
>Clearly, the Porch operation exists now. Anything alternative
>would be new. Porch is not using any 'rec.radio.*' in its name.

Yes, I deliberately stated it backwards and the arguement is just as lame.
The point is neither one is an infingement on the other, they are completely
seperate entities, and could co-exist fine.

[snipage]
>I don't have any objections to a new, free list being started.

Agreed

>I do not assert that Porch has a right to the exclusive use of the name.

Agreed again

>I only question the motives of those who would insist on using "boatanchors"
>in the name. As I pointed out, there are reasonable alternatives.

I just cant get past this part, what motive? And why would they want an
alternative name? What did Groucho say about walkin and quackin like a duck?

Ya know, its funny I'm spouting off about this, I actually would prefer
rec.radio.amateur.vintage or .tube. I think it would be much clearer to the
usenet community.

It would be great if we had an influx of new hams. It looks like
most of what we got are 'old farts' and aging baby boomers. Very
few who are obviously under 30 (or 20).

Anybody care to speculate on this? (As if an invite was needed...)
Just how do we pry young folks away from computer games and the web
to do HF, code and 1200 baud packet?

It's a multi (usually 3) port device which transfers output from one port to the next port. The direction is dependant on the orientation of the internal magnet, so look for some arrows marked on the top. Often one of the three ports is terminated in dummy load and this makes it an isolator with good coupling one way and high attenuation in the reverse direction between the two remaining port connectors. These are often used to couple receivers and transmitters to the same antenna and protect the receiver.

They also make fine paperweights.

The only motive I have is that it is without doubt the most understood and meaningful name possible for the new group. "Antiques" doesn't cover it -- my 1975 HW-101 is a boatanchor but it's not an antique according to any understanding I have of the word. "Classics" has been mentioned, but a BA doesn't have to have anything "classic" about it -- some ugly monstrosity whipped up in a garage can still be very much a boatanchor.

As for the name not having universal meaning, I point to the rec.radio.amateur.homebrew group as evidence that this is -not- necessary. I've never seen a "what is homebrewing" post there (though they do get about one beer-brewing post a year, despite the word "radio" in the group name). I think the precedent of the r.r.a.homebrew group is the strongest reason to stick to the "boatanchor" name as the most meaningful one for the new group.

Burt doesn't want to sell out he just wants some attention. He seems to think that because his life is soooo boring that the lives of other hams are also boring. You've done as much as you can for Burt by giving him some attention.

Does anybody know of any club made up of mostly nymphomaniacs?
If so, let me know. I would really like to attend one of their meetings
to have some serious amateur radio discussions with them!!!

Yeah right!! Come on guys!! Enough is enough!! This thread has gone
on long enough. This newsgroup is for discussing amateur radio topics,
not sexual preferences and religious philosophy!! If amateur radio is
really the main reason for the club, then let's start making some posts
on amateur radio related topics!!

Steve

Heck, we even have people in our club, in their TWENTIES who are die-hard CW afficinados. Of course, they have been licensed since they were teenagers, and are not johnny-come-latelys who don't like the rules so they figure they'll whine and bitch to get things changed.

I hate to do it, but I've finally decided to part with my Yaesu FT-990
HF transceiver. The radio is in absolutely like new condition. It is
about 2 1/2 years old and has received little use over the last year and
a half. Of course, I have the original packaging and documentation.
I'm asking $1775 - I ship.

If you're interested or want more information, please email or phone.

Message-ID: <4mnls4$nbq@csnews.cs.colorado.edu>
Source record: 226085

Thomas Krull (df1hx@flux.isys.net) wrote:
: don childress (childcd@camalott.com) wrote:
: : When the IC-W31A is turned on the word "ICOM" is displayed
: : for 5 seconds. Is it possible to program my call in place of
: : ICOM? [...]

: I own an Icom 'IC-Z1E' HT and it showed the same behaviour.
: Here's the way i tought it to show my call 'DF1HX' instead
: 'ICOM' after turning on:

: - Push 'MSG' twice untill 'tx' shows on display, x= number
: between 0 and 9 .
: - Turn 'DIAL' untill 't0' shows on display.
: - Push 'FUNC' and then 'SET', '------' appears on display.
: - Turn 'DIAL' to get letter wanted, 'D' in my case.
: - Push 'MN' to store the letter and to go to next one.
: In case of error push 'MSG' to erase.
: - Repeat untill your call is complete.
: - If shorter then 6 digits, push 'MONI' to finish,
: otherwise 'MN'. Maximum storage space is 6 digits.
: - Push 'CLR' to leave storage mode.

this worked fine for me on my ic-z1a. my understanding is the ic-w31a is
nearly identical to the z1a, without the removable faceplate/mic.

also, icom has been very responsive to the questions i have sent them
via email.

As most of you regular participants in this discussion know, I support BOTH the Boatanchors-List and rec.radio.amateur.boatanchors. I feel there is place for both forums.

Let's not engage in bashing tactics that only weakens both of these valuable resources that have the goal of furthering the art and science of vacuum tube RF technology.

There has been some discussion about the name "boatanchors" being acceptable to the powers that be. I of course favor this name instead of antique (conjures up mental pictures of old table radios) or vintage which to me anyways infers wine or automobiles. I'd also like to point out that there is presently a CFV (call for votes) on a proposed group called rec.radio.amateur.dx. I offer this to the proponent of r.r.a.b as further evidence to present to those who officially question our name. DX means nothing to anyone not involved with radio either as an amateur or short-wave listener. If DX is acceptable to the usenet community then boatanchors should be also.

Let's support Rick and those who have worked with him on preparing the CFD and vote for the creation of r.r.b.a when the CFV is posted.

Hi Tom, Methinks you do not appreciate the difference. My dad is 85 years
old and drives a car in his small hometown in Texas. He has Parkenson's
and certainly cannot learn to ride a motorcycle. Sounds to me like you
don't acknowledge the existence of physical and mental handicaps. To the
best of my knowledge, no one gets to pick whether they have Parkenson's
or not.

When are all you normally-blessed people going to stop repeating the lie
that "Anyone can learn to ride a motorcycle or do CW"?

>of each.

It seems to me that there is a long distance between your having "no need"
and deciding for others that they have "no need" and that therefore
"there is no need." That seems to me to be the essence of the argument. It
isn't IMHO "there is (or isn't) a need" but rather some want something and
some don't.

I personally favor Bourbon whiskey and see no need for the other
varieties - but I don't assume that I should therefore try to prevent
distillers from producing Rye whiskey, for example.

Some of us see a need for an organization of gay amateur radio enthusiasts
and their friends, and it seems inappropriate (to me at least) that anyone
else attempt to forbid, impede, or hamper such - since Gays have all the
same rights anyone else has.
>
>As to individual rights, that term is certainly much misused these days.
>Your rights, as an American citizen, are outlined in the Bill of Rights

>else claimed as a "right" isn't legit.

Yes. That's why the courts have found for example a "right of association"
that grows out of the free speech and other rights mentioned in the Bill of
Rights in the Constitution even though it isn't specifically enumerated.
You might also see the 9th Amendment (the construction amendment) that says,
in paraphrase, that the fact that some rights are not enumerated in the
document is not to be construed to mean that these rights don't exist.

Today's Amateur Radio Operator is an appliance operator, with 100% all
commercial gear. Even their antennas(antenni?) are commercially
supplied courtesy of HRO.

As such, to afford all this gear, the Average Amateur Radio Operator must
have a certain level of income to substantiate the buying power they
need to own their gear. Not too many kids in college or high-school have
that level of buying power on their own.

I used a 1 1/2 inch water pipe (comes in 6m lengths)
bolted it to a rafter and a ceiling joist for about 1 1/2 meter.
Removed roof tile and replaced it with lead sheet flashing,
similar to pipe vents elsewhere on the roof. Much cheaper, too.

>away.

If it does, Monty, ham radio will be dead, and we will have the
personal radio service that many apparently seek. Fun and
excitement, not to mention a better understanding, in time,
of things technical, come to those who care to learn how things
work from the ground up. That's what ham radio is mainly for,
those interested in basic science. One can't get that directly
from the Internet, and never will. Discipline to learn and
learning by doing, as opposed to learning to avoid doing,
is what makes a ham. Governments don't teach the former, but
they tend to have a heavy hand in guiding us down the latter path,
especially in this country. A true ham demands more of
himself/herself.

Gary,

The motivational expert who is putting you in your place is going on 10
years without finishing his PhD and despite his increadable expertise

is still a general. He did however, during a recent trip to Guam, pick up a call that at least looks like an advanced call. I agree that code is a waste of time for those who are not interested. I was interested in CW when I first got into ham radio but attitudes like Mr. Hermann's have completely killed that interest. Now I will devote mt energy to getting the band plan changed better reflect usage. CW is a small portion of the traffic on the HF bands, takes less spectrum, and "can get through when nothing else can" so let the band plan represent this. I don't think CW/RTTY really need more that 20% of the available spectrum and that is generous. Food for thought anyway.

73 (without the insult) Jerry

What is Ham Radio, and
How do I get started?

A short introduction
by Hans Brakob, K0HB

Here on HamNet we frequently see messages asking for more
information about the hobby, and how to get started. This
file is a VERY brief attempt to explain the hobby and give
some pointers on where to get more information. Almost
certainly I won't answer all your questions, so feel free
to ask for help on the forum. Hams are famous for their
eagerness to help newcomers.

(First I have to explain something you might not have realized.
In doing so, I'm going to paraphrase something written by
Steve Ford, WB8IMY, in his introduction to a book entitled
"The ARRL Operating Manual". Steve, by the way is a regular
here on Hamnet. He acts as the ARRL HQ representative.)

In case you didn't know, belief in magic is a necessary
requirement for all Amateur Radio operators. Of course, you
won't see a question concerning magic or metaphysics on the
test you take to obtain your license, but in your heart you
will come to believe in that powerful, intangible force.

All of us in the hobby have felt its influence at one time
or another. Some night when the band is dead as a doornail
you'll be tuning aimlessly, not expecting to hear a single
signal because NOTHING could be coming through at that hour.
But then, rising out of the noise like a ghost, there will
be a faint call from another stalwart explorer thousands of
miles distant. You pounce, establish contact and both of
you marvel at the fact that the conversation is taking place
at all. A few minutes later, however, the signal vanishes
as quickly as it came. Your rational mind will shrug it off
as a quirk of propagation, but that little tingle in your
gut will tell you otherwise.

If you could travel back in time to, say, 1294 AD, you'd
probably be burned at the nearest stake for even suggesting
that two human beings could communicate with each other
over great distances without a physical connection. No

doubt they would accuse you of dabbling in magic -- and they'd be right!

As Amateur Radio operators, we work feats of magic every day. Many of us have become jaded about our powers and we tend to dismiss them as commonplace. We hardly think twice when we use our equipment to sommon the elemental forces of the universe. But every so often we need to pause and remind ourselves of what we are really doing. We need to remember the essence of what drew us to our unusual avocation in the first place: the wonderful magic of wireless communications.

So how can YOU become a magician?

First, you need to prepare to obtain a Magicians License. The Federal Communications Commission calls them Amateur Radio Operator Licenses, and they come in 5 "classes".

There are two "entry class" licenses, namely the Novice and Technician class. These two classes of license are designed to give the newcomer access to a number of frequency bands without a too-strenuous examination.

The Novice class gives the widest range of frequencies, and will be attractive to folks with a desire to talk to "distant" places. The written test is the simplest of all the tests, and the examination also requires you to be able to copy Morse code at 5 words per minute. This license will also give you access to some "local" bands, but not as many as the Technician class.

The Technician class license, as the name implies, is aimed more at folks with a technical bent (you don't have to be an electrical engineer though). The written test is a bit more difficult, but you don't need to know Morse code for this license. The frequency bands for this license give you more "local" communications, although if you wish, you CAN take the Morse test, in which case you will also get access to the "worldwide" bands the same as the Novice class.

The next three classes of license are General, Advanced, and Extra. These three classes have access to portions of all amateur bands, with progressively more difficult exams, and requirements for copying faster Morse code (13, 13, and 20 words per minute respectively).

Good heavens, Jeff, if what you read on bathroom walls so upsets you,
you must have a pretty weak stomach. Personally, what the freshman
class of Republicans in congress has been trying to do to the poor, the
elderly and education is far more worthy of nausea. If you really care
about your fellow human beings, work to help eliminate poverty! By the
way, I don't go into public johns to read, but to attend to, shall we
say, other necessities. May I suggest the same for you?

FCC OKAYS OLYMPIC CALL SIGNS FOR HAMS OPERATING IN GEORGIA

Hams operating within the state of Georgia may use special call signs
from April 15 until August 31, 1996, to commemorate the 1996 Olympics,
under a Special Temporary Authority issued by the FCC. Here's how it
works: An FCC-licensed radio amateur operating in Georgia with a "4"
in his or her call sign may replace that number with "96"
(representing the year) or "26" (commemorating the 26th Olympiad)
during the period of the STA. Hams with any number in their call signs
and operating within the State of Georgia may add "00" to the existing
number (to mark the centennial year of the Olympic Games). So, WA4BKD
in Georgia could identify as WA96BKD, WA26BKD or WA400BKD, while NG3K,
when operating in Georgia, could identify only as NG300K or as NG3K.
The Olympics start in July. The STA stemmed from an initiative by
James Altman, N4UCK, of Atlanta and the Georgia Amateur Radio
Operators Group he organized, with the support of ARRL.

>mailling list began charging a subscription fee.

[Look of astonishment]

Wait a minute. The correct method for doing a newsgroup from the beginning
was to form a mailing list, and after it achieved a large enough following
then do a RFD and CFV.

The fact that someone want's to do a newsgroup rec.radio.amateur.boatanchors
should be obvious that the size of the mailing list has gotten too large to
be easily delt with.

The reason there are so many alt.* newsgroups are because people do not want
to do things in the 'normal and agreed upon' manner. And for that same reason,
alt.* groups traditionally do not have the same coverage and penetration on
the net.

Geeze, you'd think people would be happy that the "boatanchor effect" is
popular enough to warrant a real newsgroup.

: An unmoderated newsgroup is open to everyone, so you'll have a hard
: time enforcing a "members-only" policy.

There is already a moderated newsgroup, for which a fee is demanded.
I agree that the proposed newsgroup may be somewhat a result of a)
those who do not want to pay a fee to share boatanchor information or b)
do not want a heavy-handed moderator.

As to the argument of the name "boatanchors" not being readily understood
outside of the amateur radio community:

For a moment, let us assume that there are two or more newsgroups with the
string "boatanchors" in the name.

I do a search for "boatanchors" and rec.radio.amateur.boatanchors appears.

If I am not interested in amateur radio, there is not need to look at this
newsgroup; the hierarchical name tells the story.

So, why is this outside "advisory" group so concerned?

Jim

Need a copy of a ICOM IC-4AT 440Mhz HT manual. Also, could use a copy
of the drop in charger. Copy costs and postage gratefully repaid.
Thanks for your help.

73, gary

From: stealth@aug.com
Message-ID: <4mp2f1$rkk@jaxnet.jaxnet.com>
Source record: 225958

I have inhereted the following from my dad and wondered if anybody out there could give me an estimate on what they think this stuff is worth:

1) HeathKit SB-200 1000 Watt Linear Amp = $
2) Kenwood TS-520S Receiver = $
3) Kenwood DG-5 Digital Display = $
4) Heathkit HM-2140 Dual Meter (REF & FWD) = $
5) Kenwood MC-50 Mic = $
6) AstAatic D-104 Upright Mic (Old Radio Style) = $
7) HeathKit HD-1410 Eletronic (2) Button Keyer = $

If you have any ideas on these values I sure would appreciate an e-mail at stealth@aug.com.....Thanks

J.S.

I am searching for recommendations on make and model of GPS receiver
to buy. Unit must have digital interface port and be hand held or
at least very small for mobile and marine use. Also I need information
on pc compatible "mapping" and "where am I" software to use in tracking
my movements and displaying my position on a map with only GPS data
input as my referance. Looking for good VGA map display with my current
location indicated. Will also be using KPC-3 with GPS rom upgrade
to send position information back to camp. Thanks and 73 KD3SH

572. Re: LAMBDA: Why the hysteria?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-08 00:00:00 UTC
From: davidb@ce.washington.edu
Message-ID: <4mpbdt$odc@nntp4.u.washington.edu>
Source record: 225962

(Followups reset to r.r.a.m from alt.test. Such juvenile tactics are a good way to demonstrate to all one's immaturity and inability to back up one's opinions with facts and logic.)

Why indeed? It always surprises me that so many members of a supposedly scientific and technological hobby like amateur radio suddenly lose all sight of scientific logic and reason when the subject of homosexuality comes up. Suddenly we're right back to the same kinds of knee jerk reactions that gave the world cross burnings, the Spanish Inquisition, etc. Good grief, how can any of you 'phobes stay on the air when something breaks -- after all, it may not be a defective part in your rig after all -- just an immoral one that needs to repent of its sins. Here's an idea: next time that linear acts up, why not show some faith in the Lord and fix it by splashing holy water on the 4CX500's? Trust me, God will make it better if you do that.

And then after all the hateful rhetoric they wonder why we want to create special spaces that we know are accepting. Just goes to show that some people couldn't get a clue even if they smeared themselves with clue musk and did the clue mating dance at the height of clue mating season in a field full of horny clues.

PS - Yes I am gay but not a member of LARC. Too many groups, too little time.

PPS - Electronics is not natural. No other animal species uses radio to communicate. Radio is not written of in the Bible. It is therefore immoral and unnatural. Repent. Repent NOW. I will gladly take that evil immoral Collins S-line station off your hands for a small disposal fee.

573. 6m Boat Anchor Help Needed

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-08 00:00:00 UTC
From: Tim Miller <tmille1@grfn.org>
Message-ID: <2.2.16.19960508013801.29dfd906@grfn.org>
Source record: 225963

Our packet club has recently aquirred a 6m Boat Anchor we hope to use for forwarding mail. Lucky as we are to have it, (as usual) we don't have any paper work. I was hoping that someone might be able to help us find a block diagram or any paperwork for this rig.

ANY help you can give would be greatly appreciated.

Please respond by email as I don't monitor the news groups regularly.

The radio is:

Make: RCA
Model: MCA19BB11C
Serial#: FJ09519
FCC XMitter Data: CT1014
FCC Rcvr Data: CR1004

Yea, I thought it was pretty reprehensible when the gays in Boston
demanded to march in the St.Pattys Day parade as a recognized gay
group. They threatened to sue if they were not allowed, what was that
you said about intimidation??

P.S They cancelled the parade

582. Stopping scan on Alinco DR-130T

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-08 00:00:00 UTC
From: dx@tir.com
Message-ID: <319089cd.3697449@news.tir.com>
Source record: 225972

I have an Alinco DR-130T VHF rig with the 100 memory option board installed. As it comes from the factory when scanning memories the rig will stop on a busy channel then resume scanning after about 5 or 6 seconds whether the channel is still busy or not. This is very irritating when listening to police calls. Does anyone know if the rig can be modified to stop scanning on a busy channel and stay on the channel until the carrier drops then resume scanning ? I can find nothing in the manual about this anywhere. Any help appreciated.

I was listening to a 2 meter net the other day and a fella checked in
with a call with 2 numbers in it. It was something like ke23abc.

No one seemed to comment so I guess he wasn't bootlegging. Does anyone
know what this is all about?

73,
Jim.

You probably heard something like KE96ABC. The FCC has authorized amateurs
in the "4" callsign district to sign "96" as their numeric in commemoration of
the 1996 Plympic games. Outside this area another substitution is authorized.

This is covered in an ARRL bulletin less than a month old. They can be found
at http://www.arrl.org.

>Anybody care to speculate on this?...

My nine-year-old daughter and my ten-year-old nephew are working on their licenses, and my 18-year-old nephew has his Tech already and is working on his Plus.

I don't think the Internet is a passing fad, but I think it has its place, and ham radio has its very different place. The heyday of ham radio may be over simply because the world is so full of diversions that hadn't been invented or even imagined in the 50s, but anyone who's built an antenna and had it resonate, or picked up that first contact or foreign country, and felt that grin knows that the fun is not gone from ham radio. I hope it never goes away.

590. Tech+ license upgrade

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-08 00:00:00 UTC
From: rogerjb@earthlink.net
Message-ID: <4mqbf2$n5@chile.it.earthlink.net>
Source record: 225980

About 3 years ago my YL passed her Tech+ test. (Boy, was I ever suprised that she had learned the code!) However, in those days the FCC did not differentiate on her license whether she was a no-code or a Tech +. Does anyone know if it would be possible for her to renew her license and get the "Tech +" designation now, without having to retake the whole thing?

Thanks.

If you wish to order the mods please send $5 (check or money order) for each radio model (1 radio= $5, 2 radio's = $10, etc.) to:

Jamie Bucher
P.O. Box 15653
Loves Park, IL 61132

Please specify if you want your mods faxed, e-mailed, or sent via the postal service when ordering. It is possible that when we send this information additional mods for that radio will be available, if so we will send them along also.

Please included an e-mail address if I have any questions about your order.

593. Who is W1WCR & Liberty Net

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-08 00:00:00 UTC

Kind Friends,

Our local NM 75 meter loudmouth and horse's patoot has been ranting for the past several nights about this net and this particular fellow. The ranter K5BLB (K5BigLoudBully) seems quite upset that there is a petition asking the FCC to suspend his (K5BLB's) license. Now I have had to put up with "Sid the Lid" as BLB is known for some time as he is close and runs mucho power all the time. He apparently feels that 3950 is his personal frequency and QRMs anyone he doesn't like. If such a petition is circulating may I please sign up. Sid seems to be particularly threatened by homosexuals perhaps some kind soul could send him LAMDA or NAMBLA membership materials. His address in the callbook is ols but his correct address is on the Arkansaa call server.

If W1WCR or the Liberty Net has a net presence please drop me an email.

73 Jerry

A circulator is a three port device. Power is applied to port 1, which is typically connected to the transmitter. The power comes out port 2, which is connected to the antenna. Now the interesting part. Any power reflected by the antenna, which is coming into port 2 is routed to port 3 and dumped into a dummy load. THis protects the transmitter from transmitting into a open or shorted load. It also keeps power from near by transmitters out of the final amp and prevents the two from mixing and all the bad things associated with that. You can think of the circulator as a power ring. Power applied to any port is delivered to the next port in the ring. Interesting devices. The magic is done with ferrites.

596. Standard C508A Cell Mod Disabled?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-08 00:00:00 UTC
From: otto@wpxi.com
Message-ID: <4mqi04$6no@news.usaor.net>
Source record: 225986

I have attempted the posted cellular mod on two Standard C508A HTs (S.N. 5XU110002 and 5YU120211) unsuccessfully. Just to make sure that I removed the proper surface mount resistor, I spoke with someone who did the mod on several older 508's, and we both agreed that I had the correct part. Also, I *did* reset the unit. My friend mentioned that he has heard about problems with this mod from others. BTW, the extended transmit mod (RD77) worked fine. Does anyone know if the cell mod has been disabled, or if there's some other trick needed to get it to work? TIA, Otto.

More young folks come to my VE session every month (2nd Wednesday, 7pm,
Administration Building, Room 14, Auburn Adventist Academy,
5000 Auburn Way South, Auburn, Washington 98092) than those 20 or older.

> >Just how do we pry young folks away from computer games and the web
> >to do HF, code and 1200 baud packet?

Find one that get's interested and let that young person sell the
others. I've got a hot wire kid that brings more high school students
into my VE test sessions (see above for ad) than anybody else (include
the other VEs on the team).

> the "Tech +" designation now, without having to retake the whole thing?

Does she still have her CSCE from the exam showing the code test being
pass? If so, ship that along with a copy of her license to the FCC with
a cover letter.

Supposedly the VEC that coordinated the test session was supposed to keep
a record also. I thought they were going to forward the information on
to the FCC when the FCC started keeping track. It appears to be so in my
son's case. I did look on the QRZ web page and your wife is not shown as
a TECH PLUS.

Perhaps talk with the VE team that gave the test and get in touch with
their VEC. You should be able to work this out.

Now that you mention it, I am not sure what was meant by "working a homosexual." Maybe it is an award with a couple of options, such as via the radio, via the immoral behavior, etc.

I wonder if homosexuals exchange QSLs or something similar for non-radio "contacts?"

I am not sure what you mean with the free speech comment but if you are referring to homosexuality being a form of free speech then I guess that is what they mean when they say a person is talking out their ass.

>you said about intimidation??

Seems a pretty basic part of our system - something about all of us being created equal.... and having equal rights. IMHO the fact that courts sometimes prevent impermissible behavior isn't intimidation in its pejorative sense. Surely there is some difference between due process in the courts and mob action. You find it reprehensible that our system protects minorities from the tyranny of the majority - or just that it protects those that you want to persecute?
>
>P.S They cancelled the parade

Good. If they won't play by the rules they can't play at all.

PS. We have a St. Patrick's Day parade in Chicago, sometimes called St. Paddy's day - is St. Patty a transgendered St. Paddy? 8-)

Ahh.

Not taking sides here, but if you want a discussion medium that
has "insiders" and "outsiders", a mailing list may be a better option.
An unmoderated newsgroup is open to everyone, so you'll have a hard
time enforcing a "members-only" policy.

(Have you considered rec.ham.boatanchors as an alternative?)

More like the late 1950s -- AT&T released publicity photos of prototype Touch-Tone phones in 1959, and the first commercial service began in late 1963.

Actually the CCITT (now called the ITU-TSS) adopted the AT&T DTMF tones as a worldwide standard.

608. Dayton Tech Talk

Newsgroup: rec.radio.amateur.misc

You're invited to a free technical presentation sponsored by the Colorado QRP Club and the Northern California QRP Club (NorCal) Thursday evening, May 16, from 7:00 to 10:00+ p.m. at Days Inn South in Dayton, Ohio. The topic is QRP Rigs - Circuit Analysis and will be presented by Paul Harden, NA5N, the author of the new book, Electronic Data Book for Homebrewers and QRPers including QRP Yellow Pages. Paul is the most sought-after author in the fast-growing QRP area at this time. A Q&A session will follow the presentation.

If you are coming to the Dayton Hamvention, begin the wild weekend Thursday evening at Days Inn South. We will meet in the Miamisburg Room at 7:00 and the presentation will begin at 7:30 p.m.

Days Inn South is located at 3555 Miamisburg-Centerville Road at I-75 and Exit 44 in Dayton.

If you have any questions, I can be reached until Sunday, May 12, 1200Z at CQC@aol.com or via packet at w0hep@kt0h.#neco.co.usa.noam.

CU in Dayton at the Colorado QRP Club table in space 3405.

611. Vanity Calls application timing

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-09 00:00:00 UTC
From: pmm@saf.com
Message-ID: <5818@safn2.UUCP>
Source record: 225851

I've heard the FCC won't be accepting any Vanity applications
before the appropriate gate is open. Lets suppose I'm applying for
my ex-Uncle's call under Gate 1. The gate opens May 31, 1996.
Does this mean they'll return my application unless I time
it to arrive on or after May 31? I find that hard to believe.

I would assume that if you wait until the appropriate gate is
announced and then mail your application that it will be
accepted. The May 31 date must be the first date that they
will assign calls. Thus, if I sent my application for gate 2
now, it would be refused, but they would accept a gate 1 application.

Anyone know to the contrary?

>advertise a gay ham club without making the general public
>aware of it.

It seems to me that advertisers who want to promote a ham radio related
product to likely customers would choose to advertise in a ham radio
magazine. Whether or not people are used to seeing such advertisements
wouldn't seem to be a good criterion for suitability - or we wouldn't
have accepted advertisements for new products like packet radio, etc.

Those who are interested in the thing advertised can respond and the rest
can ignore the ad.

> I can't imagine that anyone in the gay community
>is naive (sp) enuff to believe that constant public exposure
>will at some point in the future bring public acceptance ?

Acceptance in the sense of equal access to public facilities is the
law; the best way to preserve one's rights is to continue to exercise
them so that being seen to exercise them is a commonplace. Therefore,
in that sense, one might expect people learn to accept the use of public
facilities by all. Like it? Probably never. Learn to live with it? One hopes.

I do recall that "boatanchors" was one of the many affectionate terms that had been in use for "obsolete" equipment. Others in this same "cute" category that I also remember hearing before there was an Internet include "paperweights" and "doorstops". It appears *to me* that the "boatanchors" nomenclature became even more popular after the start of the Porch mail list(and I suspect if this Porch list had been were "Doorstops", then the proposed name for this new group would be rec.radio.amateur.doorstops). The other choices may not be as sentimentally desirable now to the vocal advocates who are insistent on the r.r.a.boatanchors name, but they are among the many reasonable alternatives. In my opinion, they are much more palatable and sensible than the silly straw-man suggestion of substituting "distant_station" or "long_distance_communications" for "dx".

Preposterous! _You_ don't get to choose for everyone. Nobody has (or can)
appoint you god, or dictator, or censor, or whatever. In a pluralistic
society such as ours we all have to realize that the customs of our own
tribe, or sect, or whatever, aren't laws of nature and can't generally
even be enacted into civil law.

Aids kills anyone - as even the minimally educated ought to know.
Seems to me that bigotry kills even more; witness the recent
crimes against humanity in the former YU, in Burundi, etc.

And, of course, a rebuke for the epithet as well. Uncultured!

Speaking of RELM, the company that bought the commercial radio section of the old Regency corp, I've dealt once with RELM and was very satisfied.

Someone gave me an old clunky 4-channel rockbound Regency BTL-304 39 mhz mobile radio, and I was able to buy a manual and 50 mhz/6 meter conversion parts from RELM with a fast delivery time. Although the service manual was fairly expensive, the other parts were reasonable and delivery was quick.

(My friendly local tech who did the 39-to-52mhz conversion said it was very difficult to retune, BTW. But the conversion did work fairly well.)

Your post made me look it up. Never really knew the answer. I show
3,750 Khz available on the low bands, and 1,182 reserved for CW/RTTY
or 31.5%. I am using the Extra Class allocations for measurement.
Interesting. Considering the bandwidth required for CW, it does seem
a little out of proportion.

Coy,

Works for me. I want my Extra class ticket before Field Day. How about
Friday evenings on 3.720 mHz +/_ 3 kHz @ 10 PM CDT? Will work any op, any
speed, any Novice sub-band (don't have any 2M all mode gear).

Hey you TI'ers out there.... Troy, Mitchell, & cast of several, working on
General class - let's bag some QSO's!

Rory,
I do not know the program you mention but two I have here use the
selectable character speed and the charcters per minute. One MORSE
and the other is SUPERMORSE. I prefer MORSE.

Seeing is believing!

The note I got with my my wife's 610-V said:

"If your Form 610-V should arrive at the FCC Bank Contractor before
the Gate you are applying for has opened, your Form 610-V may be
significantly delayed - or may be returned to you without action."

Also, in th FCC instructions for ITEM 7, Boxes 7A-7C it says:
"DO NOT FILE FORM 610-V UNTIL GATE 1 IS OPEN" and this is in BOLD
caps.

>I would assume that if you wait until the appropriate gate is

I have already lost the contents of my stomach of the crap the Democrats have done to this country over the past 40 years. It is such a mess now I don't think we'll ever recover. Then when I read these kinds of posts, I get even sicker because it shows how uneducated our society has become. Instead of trying to understand how the Republicans are trying to save this country from financial disaster, the writer merely spits out a bunch of Democrat rhetoric about the poor, elderly, education, etc. Stopping the flow of dollars to government employees that DO NOT educate children is not cutting education, it is cutting WASTE. Increasing spending on elderly but not at the rate the Dems want is not a CUT it is an INCREASE. Not paying people who do not want to work is not hurting the poor, it is helping them by incentivizing them to get off their ass and get a job.

I am tired of having to work to support everyone else but my own family. The government has no right to confiscate my money to give it to someone else. It is stealing and laws passes by Dems to support this is just "legal" stealing. The effect is the same except someone does not go to jail for it. People have a right to keep what they earn.

If you really want to eliminate poverty, then do it with your own money it a way that you see fit. I'll do it my way. The way to really eliminate poverty is to get a job. Keep government out of the charity business. All they do is waste precious dollars and deliver very little benefits.

Republicans are trying to correct 40 years of Democrats and their mistakes. They can do it, but they can't do it overnight especially with an idiot occupying the Whitehouse.

Both of you should go back to Civics 101. Our founders well understood
that rights are inherent properties of human beings, and not something
granted by governments. You've both fallen into the trap that Mason
warned against during the debate over adding a Bill of Rights to the
Constitution. The Bill of Rights serves as a *restriction* on government
abuse of power, not as an enumeration of the Rights of Man.

The 9th Amendment makes this clear,

"The enumeration in the Constitution of certain rights shall not be
construed to deny or disparage others retained by the people."

Source record: 225875

In article <4mlqg7$p0l@tzlink.j51.com> delaney@j51.com (Matthew Delaney) writes:
>Are there any plans for 2M 1/4 wave antenna online? Specificly mobile
>ones (and how to attach/make a mag mount for them). My ARRL handbook has
>plans for one, but I think it's missing part of the article (no
>infomation on the needed capicitor)

You don't need a capacitor for a 1/4-wave antenna. All you need is
a piece of wire about 19.5 inches tall. (You'll have to trim it to
length after it is mounted for best VSWR.) You could use a coathanger,
or a piece of #12 bare copper wire, but they'd get bent up pretty easy
in mobile operation, so you would normally use a piece of copper plated
spring steel (music wire) as the element.

Now you need to mount that element to a base. There are hundreds of
ways to do that. Most commercial antennas use a machined sleeve and
a set screw. You can just insert your element in a PL-259 connector
and solder it to the center pin. Fill the body of the plug with an
insulator (hot glue or epoxy) so that the element can't come in
contact with the outer shell of the connector.

Now all you need to do is mount a SO-239 connector on the vehicle,
solder your coax to this connector, and screw on the antenna. Normally,
you'd drill a hole through the center of the top of the vehicle to mount
the base connector. This will give best performance. If you insist on
using a magmount instead, you can make one from a large speaker magnet
(the kind with a big hole in the center) and two aluminum discs. Fasten
the aluminum disks to the top and bottom of the magnet with screws or
glue, drill a hole in the upper disk for the SO-239 connector, and rout
out a channel in the magnet to allow the coax to exit. Wire the coax
inner to the inner pin of the SO-239, and wire the outer to the aluminum
disks (both of them).

Or you could spend $14 with MFJ and get a pre-made magmount 2m antenna.
Or spend a little more and buy one from Radio Shack. Or spend yet a bit
more and get a good Larsen NMO mount system and whip. The latter is
the best. I don't want to discourage you from building an antenna,
but magmounts are really something best purchased rather than homemade.

Let me give you another use for that 1/4-wave you made above, however.
Take the SO-239 and mount it in a L bracket. Drill 4 holes around the
corners of the horizontal part of the bracket, and mount 4 radials
to it. Let them "droop" at about a 45 degree angle below the horizon.
Use a U-bolt to mount this assembly to a mast, and you have a base
antenna for the house. Goop up the soldered connection of the feedline
to the SO-239 to waterproof it. Alternatively, you can use a feedthru
barrel connector instead of a SO-239 and have a PL-259 on the lead in

cable and just screw it on the bottom of the barrel connector while screwing the PL-259 antenna element on the top. Simple, neat, works.

>73,
>Jack WB3U

Gee, I memorized Morse from a table in the encyclopedia at the
local library when I was 10. I didn't find out for a year that
hams don't use Morse (they use the International Code instead)
and that I'd memorized the wrong code.

I even made a sounder and a key from descriptions in the
encyclopedia and practiced every day with them. A retired
railroad telegraph operator on the next farm helped me practice.
We even ran a wire between our houses and powered it with 'A'
batteries. He had a real sounder and key, mine were made
from cut up tin cans and nails wrapped with wire on a pine
board.

About a year later, I met a ham, and found out I was doing
it all wrong. I still sometimes write down 'C' when I hear
.. . (though I prefer to think of it as cliclack cliclack
<pause> cliclack). I've never been comfortable with this
beeping stuff.

>something better? Should I get a keyer and oscillator? What kind
>of keyer? What make? Any advice would be appreciated. Thanks.

The code you describe is Farnsworth Code. The character elements
are similar to the International Morse Code at 18 WPM, but the
spacing elements are much longer than those required for Morse
so that the average time to send one minute's worth of text is
similar to 5 WPM (or 13 WPM) International Morse Code.

Now Farnsworth Code isn't Morse Code, but it is what the ARRL VEC
uses for its tests, so if you're going to test before an ARRL VE
team, you'd better learn it that way.

The computer program most people recomend is called SuperMorse.
It is available on many ftp sites. It understands Farnsworth
Code.

I'd *strongly* suggest that you resist the temptation to get a
keyer right away for two reasons. First, the test doesn't require
a demonstration of sending, so you needn't bother to learn to send
in order to be licensed. Sending is a mechanical process, and forces
you to think in terms of dots and dashes. You don't want to do that
while you are learning the Code. You want to learn characters as
distinct *sounds*, not as just combinations of dots and dashes.

Second, if you do want to learn to send, start with a manual hand key
(after you've learned to *copy* good machine sent code). Try to make
your sending as perfect as the computer's sending. Once you've mastered
this sense of timing, switching to a keyer will be easy. But if you
learn first on a keyer, you won't have that good sense of timing that
you need, and will have trouble sending good Code even with the aid of
the keyer.

639. GB2RS News 12th May 1996

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-09 00:00:00 UTC
From: David Hough <dave@llondel.demon.co.uk>
Message-ID: <831699913snx@llondel.demon.co.uk>
Source record: 225879
Cross-posted to: uk.radio.amateur,rec.radio.info,rec.radio.amateur.misc

Good morning. It's Sunday the 12th of May and here is the GB2RS news broadcast, prepared by the RSGB and intended for all radio amateurs and short-wave listeners.

The International Telecommunication Union celebrates World Telecommunication Day next Friday the 17th of May. The event - which this year focuses on the link between telecommunications and the Olympic Games - commemorates the founding of the ITU in Paris 131 years ago. The function of the ITU, which is part of the United Nations Organisation, is to co-ordinate telecommunications worldwide.

For those who missed last week's GB2RS bulletin, we repeat the news that the Radiocommunications Agency has announced a new frequency band for British radio amateurs. The allocation is in the LF part of the spectrum and runs from 71.6 to 74.4 kilohertz. This new '73kHz' band is available to any holder of the Class A Amateur Radio Licence who wishes to investigate LF propagation, including transmission to underground caves.

An effective radiated power of one watt may be transmitted using any mode from the Main Station Address only. No mobile or maritime mobile operation is permitted, and use of a Temporary Location requires seven days notice to the District office of the Radio Investigation Service.

Use of the 73kHz band will require a Notice of Variation to an individual's licence, and the RA has asked the Radio Society of Great Britain to process the applications. Requests for an NoV must include: Name, Callsign, Main Station Address, Modes to be used, and whether the applicant intends to operate at a temporary address. The request must also include some background information explaining the reason for making the application and the intended uses of it. Applications should be sent to: LF Allocation, HF Committee, RSGB, Lambda House, Cranborne Road, Potters Bar, Herts. The postcode is EN6 3JE.

This is yet another service made available to all UK amateurs following negotiations between the Radio Society of Great Britain and the licensing authority. Full details will be published in the June edition of RadCom.

RSGB Headquarters at Potters Bar will be open next Saturday, the 18th of May, between 10.00 am and 4.00 pm. The bookshop and GB3RS shack will be available to visitors, as will the National Amateur Radio Museum and Library. Morse tests are also available on demand between 11.00 am and 12.30 pm but don't forget to bring two passport-size photographs and the appropriate fee with you.

An RSGB Regional Open Meeting has been arranged by Fred Stewart, G0CSF, Council Member for Zone C, which covers the south-east of England and East Anglia. The meeting will take place on Sunday, the 26th of May, at 2.30pm at Rivenhall Village Hall, Church Road, Rivenhall, Witham, Essex. RSGB President Peter Sheppard, G4EJP, is due to attend, along with Executive Vice President Ian Kyle, GI8AYZ. For further details contact G0CSF on 01732 780721.

An RSGB QSL Bureau Sub-Manager has been appointed for the new M1AAA to M1AZZ series of callsigns. He is Mr M Marriott, G0OPC, whose address is correct in the RSGB Call Book. Mr Marriott is also the Sub-Manager for the G1 series of callsigns.

Now some items of HF DX news from the weekly RSGB DX News Sheet, which is edited by Chris Page, G4BUE:

From Malawi, WF5A is signing 7Q7KH from now until Saturday the 18th of May. Activity is on most bands, CW and SSB.

From Nepal, Kyoko, 9N1KY is active now until July. She has been worked on 15, 20, 40 and 80 metres SSB.

And from the Bahamas, KM1E is active as C6AGN until the 12th of June, concentrating on the WARC bands.

Now news of some Special Event Stations:

More than 30 'GB10' stations will on the air this weekend, the 11th and 12th of May, to commemorate the 10th anniversary of the RSGB Morse tests. A "Morse Test Anniversary" certificate is available to any station providing log extracts of contacts with 10 'GB10' stations using CW only. The award is also open to listeners. For more details contact Roy Clayton, G4SSH, whose address is correct in the current RSGB Call Book.

And 33 special event stations are on the air today, Sunday the 12th, from windmills and watermills around the country. This is to celebrate the 50th anniversary of the Windmills and Watermills Section of the Society for the Preservation of Ancient Buildings. These stations will run in conjunction with the Denby Dale Amateur Radio Society. QSL cards will be available, featuring line drawings of each of the mills involved. Also, certificates will be awarded to those stations which contact more than 10 mills. For further details contact Jasmine Marshall, G4KFP, on 01274 869849.

Next the Rally News:

The Drayton Manor Radio and Computer Rally is held at Drayton Manor Park near Tamworth, in Staffordshire, today, Sunday the 12th of May. There will be trade stands plus a bring and buy sale. The Annual General Meeting of the Worked All Britain Awards Group is also being held at this rally.

The Yeovil QRP Convention takes place at a new venue: Digby Hall in Sherborne, next Sunday the 19th of May. Please note that only the

Convention Dinner takes place on Saturday the 18th: the convention proper starts at 9.00am on the Sunday morning. Contact Peter Burridge, G3CQR, on 01935 813054 for full details.

The Trafford Rally also takes place at a new venue next Sunday the 19th. It will be held at the George H Carnall Leisure Centre, off Lostock Road in Urmston, Manchester, near junction 4 of the M63. Doors open at 10.30 and talk-in will be on channel S22. For further details telephone 0161 748 9804.

The Dunstable Downs Radio Club Amateur Radio Car Boot Sale takes place on Sunday the 19th at Stockwood Country Park, Luton, near junction 10 of the M1. The event starts at 10.00am and talk-in will be on 2 metres channel S22. For more details, ring 01582 613899.

The SDX Support Group holds its bring and buy and junk sale next Sunday, the 19th of May, at the Maryhill Central Hall, Maryhill Road, Glasgow. Doors open at 10.30 am. For details call Ray, GM4CXM, on 0141 942 6657.

And the Mid Ulster Amateur Radio Club Rally takes place at the Silverwood Hotel in Lurgan, County Armagh, next Sunday. Doors open at 12 noon and talk-in will be on S22. Call 01693 61298 for further details.

The Plymouth Radio Club Carnival takes place on Saturday and Sunday, the 25th and 26th of May, at Tamarside Community College near St Budeaux. For more details ring 01752 563222.

Two of the Emley Moor beacons, operating as GB3MLE on 1296.930 and 10,368.930 MHz, are back on the air after a break of several weeks caused by a relocation of the equipment rack. The output of the 23 centimetre beacon is about 6 dB lower than before the break, due to additional temporary feeder. The co-sited 70 centimetre beacon, GB3MLY on 432.910 MHz, is off the air for one or two months because the antenna needs replacing - not a simple procedure when it is about 2000 feet above sea level!

Next some contest news:

The second of four RSGB 24GHz Cumulatives is taking place today, Sunday, the 12th of May. Rules are on page 84 of the March RadCom.

And a series of 2 metre Contests take place next weekend. The main event is the 24-hour 144MHz contest which runs from 1400 UTC on Saturday the 18th. A six-hour single-operator contest also takes place within this period. Finally, the first 144MHz "Backpackers" contest takes place from 1100 to 1500 UTC on Sunday the 19th. The rules for these contests are in the September 1995 RadCom.

And now the solar factual data for the period from the 29th of April to the 5th of May compiled by Neil Clarke, G0CAS:

Solar flux levels increased slightly to 71 units and averaged 68. The 90-day solar flux average on the 5th was 70 units, one unit down on last week. X-Ray flux levels remained at A1 units but increased to A1.3 on

the 5th. Also on the 5th, a series of small B class sub-flares and a C3 solar flare took place. Geomagnetic activity was at "quiet" levels throughout and averaged Ap 6 units. The mean sunspot number for April 1996 was 5.1 with 17 days in which the solar disc was spotless. The smoothed sunspot number for October 1995 was 12.2.

Now the ionospheric data for Central France. The period from the 26th of April to the 2nd of May saw a dramatic increase in F2 daylight critical frequencies. Levels at first declined from 6.2MHz on the 26th to 5.7MHz by the 29th, but then the dramatic rise took place and levels were up to 7.3, 7.4 and 7.1MHz on the 30th, 1st and 2nd respectively. The average for the period was 6.7MHz, almost 1MHz higher, which gives an MUF about 3MHz higher than last week. The darkness hour lows averaged 2.8MHz. The daylight highs took place between 1700 and 2000 hours every day with the darkness hour lows between 0100 and 0400 hours. A short spell of blanketing E took place at midday on the 28th.

And lastly the solar forecast. Later this week the slightly more active side of the sun is expected to rotate into view, but solar activity is expected to remain at very low levels. Solar flux levels are expected to increase slightly to the low 70s later in the week. Geomagnetic activity is expected to be at "sub-storm" levels for most of the week due to a recurring coronal hole. Ionospheric MUFs during daylight hours are expected to be about 18MHz for the south and 15MHz for the north. The darkness hour lows are expected to be about 10MHz.

And that's the end of the solar information.

Finally in the main news, SSL has informed the Society that as of last Wednesday morning, the latest callsigns allocated were in the M0 Alfa Delta and M1 Alfa Alfa series, and Novice calls in the 2 0 Alfa Oscar and 2 1 Foxtrot Alfa series.

Its my opinion that the 5 word per minute code requirement for ALL ham licenses should stay. It keeps most of the dregs of CB off of the Ham bands.

I don't know what you consider an "outsider" to be. I've already noted that we have, near the front of the FAQ for a related newsgroup, an explanation of the term "boatanchors."

I also wonder how you are going to deal with the confusion between a radio discussed on rec.boats.electronics (for which an RFD is currently active) and a "boatanchor" amateur radio.

I think that you have to recognize that **most** of the Usenet world is what you are terming "outsiders." Your position is like that of someone who insists on "misc.haircuts.whiffle" because that is a term used in a relatively small region, without realizing that Usenet includes 50 states in the US, all of the Canadian provinces, Great Britain, Australia, and New Zealand just in the English-speaking realm, and that one of the side benefits of having a well-named newsgroup is that it will attract people from countries where English is very much a second language, with posters working from translating dictionaries.

Much as I disagree with David Lawrence and his "group advice" operation a lot of the time, in this case we're dealing with a very real conflict with a newsgroup proposal addressing electronics used on boats. You can pretty well count on a whole group of "no" votes from outsiders on the namespace issue, and I don't think you can count on enough "insider" votes to carry the proposal through a vote.

Joe, my man, you are certainly without clue on this one. When I was 12 years old in 1977, I got a Johnson Viking II. All of the old timers called it a "boatanchor". I never heard any of these guys refer to it as paperweight or doorstop. There wasn't a rec.radio.* back then, they called them boatanchors then, they call them boatanchors now (they also probably could care less about this discussion since they aren't on the net anyway).

The Porch mail list might have been called doorstops had that been the generally accepted term - but it isn't!

Now, repeat after me:

A Viking II is a boatanchor, A BC610 is a boatanchor, An HP608 is a boatanchor.......

Now isn't that better?

I've found a nice Uniden that sells for about $139 at the local Wal-Mart's around here. It is 900MHZ, and you can buy a spare battery to charge in the base while using the handset. It works for me up to 1/4 mile reliably, and that is thru trees and brush. I can use it inside my neighbor's house and they live about 500 feet away. There is no distortion at this range.

Give that model a look, I think it will be your best bet. Stay away from anything on 49 MHz, and look for spread spectrum in 900 because these are fairly safe from eavesdroppers.

Good luck...

Kenny

Source record: 225886

Now we have it... The SINGLE POINT OF CONTACT proposal. Just as I expected, it's not good news for ATV. It is skillfully constructed to get ARRL support for endorsing MACC's policy not to coordinate ATV on UHF. It is a move to get the ARRL to endorse a reduction in the rights and privileges of individual amateurs, granted to us by the FCC.

When I received a copy of this proposal a few days ago, from a reliable source, I thought about cutting & pasting it into an EMail message to post here. Because of its length, and the need to comment on it, I put it on my WWW page, instead.

http://www.why.net/home/tom.blackwell/

The proposal has also been published in the W5YI Report of May 15, 1996.

Neither of these are suitable in any case because they aren't in the
rec.radio.amateur hierarcy. There's already a group,
rec.antiques.radio+phono, that caters to tube broadcast receivers and
phonographs. The two you suggest are not specific enough to suggest old
amateur radio transmitters and receivers.

QST de W1AW
DX Bulletin 23 ARLD023
From ARRL Headquarters
Newington CT May 9, 1996
To all radio amateurs

SB DX ARL ARLD023
ARLD023 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, the DXNS, the DXNL, the Yankee Clipper Contest Club PacketCluster network and Contest Corral from QST. Thanks to all.

KERMADEC ISLAND, ZL8. ZL8RI is active from Raoul Island until May 14. Look for them on CW 5 or 20 kHz above the band edge, on RTTY on 7040, 14080 and 21080, and on SSB on 1830, 3775, 7065, 14195, 21295, 24940 and 28395/495 kHz, QSX up. QSL to PO Box 56099, Tawa, Wellington, New Zealand.

NEPAL, 9N. Kyoko has returned to Nepal and is again signing 9N1KY. She was reported on 21228 kHz around 1100 to 1200z by the JA Cluster, on 7072 kHz around 1945z and on 3797 kHz around 2030z. She will be in Nepal until July.

MALAWI, 7Q. Karl, WF5A, will be QRV until around May 18th, as 7Q7KH. He is operating with 100 watts and a G5RV and can be found on CW and SSB on most bands. QSL via his home call.

MALTA, 9H. The DXNS reports that Ruben, DL4VCR, will be active May 22 to June 21 as 9H3II with emphasis on 160 meters. QSL to home call.

JAN MAYEN, JX. Per, LA7DFA, can be found on 20 meter CW around 14008 kHz signing JX7DFA. For those who need him on RTTY, check Fridays between 1000 to 1400z.

ETHIOPIA, ET. Waldemar, DK3VN, reports that Peter, ET3BN, is on 20 meter RTTY. Look for him around 1800 to 1900z on 14085 kHz. Peter prefers cards direct to POB 150194, Addis Ababa, Ethiopia. Also, look for ET3SID on RTTY around the same frequency and time.

MONACO, 3A. Tony, 3A/IK1QBT, Frank, 3A/IK1HLG and Mauro, 3A/IK1CJO, will be active May 11 to 13. Operation will take place on all bands on SSB, CW and RTTY. QSL via their home calls.

WESTERN KIRIBATI, T3. Ron, ZL1AMO, is active from Western Kiribati as T30BH. His length of stay is unknown at this time, but as always Ron can be found mainly on CW usually on 40 or 20 meters. He was heard on SSB at 3795 kHz around 0930z. QSL via home call.

LIECHTENSTEIN, HB0. F6ELE, F1PNA and F6HKA will be active from Liechtenstein, from July 13 to 20. There will be two stations active at the same time on 160 through 10 meters.

TURKS and CAICOS ISLANDS, VP5. Joe, K8JP, will be active as VP5/K8JP from May 9 to 13. He will be operating mainly on CW, up 7 or 26 kHz from the lower band edges on 160 through 10 meters. QSL via K8JP, Joe Pontek, P.O. Box 59573, Schaumburg, IL 60159-0573 (Please note his Indiana address is no longer valid).

BAHAMAS, C6. Bill, KM1E, is active until June 12 as C6AGN from Green Turtle Cay. He will be concentrating on the new bands and 6 meters. QSL via KA1DIG.

CAYMAN ISLANDS, ZF. Mike, W5ZPA, will operate as ZF2PA on CW, SSB and RTTY from May 19 to 25. QSL home call.

IOTA NEWS. Min, HL1SSG, and members of the Korean DX Club will sign DS0DX/2 on a DXpedition to Jebu Island, Korea (AS-105), from May 24 to 26. QSL to HL1XP direct or via bureau.

THIS WEEKEND ON THE RADIO. The Alessandro Volta RTTY DX Contest, FISTS CW Club Spring Sprint and Nevada QSO Party are on tap for this weekend. Check page 100 in May QST for details.

The "boatanchor" name will not exist in a vacuum. It will exist in the rec.radio.amateur hierarchy. Why should it be any more confusing than the current rec.radio.amateur.homebrew, or the proposed rec.radio.amateur.dx?

>Much as I disagree with David Lawrence and his "group advice"
operation

Well, I just hope this isn't the case. Hierarchies exist for a reason, and we shouldn't assume that users are too dumb to understand them. Support for a boatanchors group is nearly unanimous in the rec.radio.amateur group (including the owner of the popular boatanchors mailing list), as is support for the term itself. It is a term that has been used for decades, and I know of no equivalent.

73,
Mike, KK6GM

Message-ID: <zachbDr4Hut.9s1@netcom.com>
Source record: 225894
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.equipment

I'm going to be testing for my Tech+ license soon, and I obviously need to start learning the code. In ARRL's Now You're Talking! it gives two addresses that sell the code practice oscillator kits. However, it doesn't provide current prices. Does anyone have a current catalog for either of these places, and if you do, could you send me the price and part #? I'm pretty eager to start here.

The companies are:

Van Gorden Engineering
PO Box 21305
South Euclid, OH

and

Hoosier Lakes RC
Bob Davis, K9RD
942 E Clark Street
Warsaw, IN 46580

Thanks!

Hi All !

I've just acquired a Grundig Yacht Boy 400 (SW). I have absolutely no idea how this works, though.

Do you know any Indonesian Radio stations that can be reached using this little radio of mine ? If there is, what is the frequency / channel ? And how to do this on the YB 400 ?

Is it possible to receive broadcast from local (Jakarta, Indonesia) FM radio station ? I'm in Melbourne, Australia. How do I go about finding these radio stations ? Do I just search thru all the frequency ?

Please help me ! Thanks soo much ! :)

Kind Regards,

Monda

: --
: This posting is purely the personal opinion of
: Ed Schaefer eschaefer@lucent.com ham radio: K9JMA

Ed,
If you walked into a meeting of a ham club that you haven't
attended before, how would you introduce yourself ?

'Hi, I'm Ed, K9JMA.'

or

'Hi, I'm Ed and I'm gay.'

I imagine you would chose option one. If you chose option
two, do you really expect people to respond to you in the same
fashion they would have if you chose option one ? If someone
who I have known for a period of time that I am friends with
told me that they were gay, I think my reaction would be much
different than it would be if someone I didn't know walked
into the room and announced it. In my opinion, a club like
LAMDA does nothing but get you labeled as 'Ed, the gay.' as
opposed to 'Ed, the person, who just happens to be gay.

I doubt that most people have a problem with gay ham radio
operators. I think the problem lies in the fact that LAMDA
feels it is neccesary to use their 'constitutional rights' to
advertise in magazines that people are not use to seeing ads
for gay clubs in.

Surely there is another way that the gay community could
advertise a gay ham club without making the general public
aware of it. I can't imagine that anyone in the gay community
is naive (sp) enuff to believe that constant public exposure
will at some point in the future bring public acceptance ?

Regards,
Jim KH2D

Source record: 225929

To name just a few of the new technologies that are eating HAM RADIO for lunch:

(1) CELL PHONES -- who needs 2meter FM when the cell phone does a better job and you don't need a license. Ever try to reach someone on your typical repeater at 3 am when you have a real emergency. A good many are silent at that time. NOT the cell phone.

(2) SATCOMM -- currently in the hands of organizations who can afford the steep price, BUT, reliable comm...anytime, anywhere, under any conditions. Bye bye ham radio. We don't need you here!

(3) THE COMPUTER -- we do an awful lot of "hamming" here! Why 1200 Packet when you can have 28.8?

My point...amateur radio has changed, and now exists mainly as a diversion for those wealthy enough to buy expensive Japanese equipment. I know...I'm one of them! Pioneer in technology...not anymore! User of technology, YES! This is just fine, until the FCC and ITU get involved. Don't think for a minute that we can keep freqs just because we like the looks and sounds of those little riceboxes sitting on the desk. Too much competition out there for available space.

I could go on for hours, but I better quit here.

Andy

>is a Boatanchors list covering exactly this same subject. This proposal
>was put forward by people who admit that they were unhappy that this
>mailling list began charging a subscription fee.

Not so. I'm not unhappy with the subscription fee.

There was a DX mail list. Now there is a proposal for a DX newsgroup.
I bet that keep you awake at night, Joe.

>If this were a commercial business, then trade mark privileges would apply
>and the proposed newsgroup would have to find another name.

Did you just arrive on this planet, Joe? The term "boatanchors" has
been used in the magazines for many many years. the BA email list has only
been around for about 3 or 4 years now. Where do you think the mail list
got its name from?

>As a matter of common courtesy, this proposed group should choose another
>name. There are a lot of obvious alternate candidates from the colorful
>(such as "doorstops") to the descriptive(such as "tubes").

No, "Boatanchors" has been the standard term for at least a decade. How
long have you been licensed?

>The campaign for the "boatanchors" name only looks like sour grapes.

No, prunes. You need to eat some prunes, Joe!

Joe, Joe, Joe - what are we going to do with you? "Boatanchors" is
a generic term. Here, let's at this example again: There was a DX
email list. Pretty soon there will be a DX newsgroup. Should an
alternate name to DX have been chosen? How about rec.radio.distant_station?

Now go eat some more prunes, Joe.

Amateur radio. I am sure you have heard of Citizens Band (CB) radio ?
Amateur radio is similar, only we are much more sophisticated.

Not only do we talk to each other on the radio, but we 'discuss' a
lot of things related to amateur radio, like homosexuallity, old
people dying, Morse code reception killing brain cells, people who
don't bathe before going to public events, the use of foul and
obscene language, people selling XXXX rated CD roms, and many other
amateur radio related topics.

Stick around, you never know, you might learn something.

Hope that answers your question.

Regency was renamed RELM Communications several years back.
I have been a Wilson turned to Regency turned to RELM
Communications dealer since the early 1980's. Good product at a
reasonable price.
Contact RELM at:
RELM Communications
7505 Technology Drive
Melbourne, FL 32901

407-984-1414

Hope this helps.

Steve Bramham, KD4RG

679. ICOM Z1A expanded Tx mod

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-09 00:00:00 UTC
From: Scott Mosher <smosher@pobox.com>
Message-ID: <3191EF73.6D19@pobox.com>

680. Re: HELP TEACHING CW CLASS

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-09 00:00:00 UTC
From: Gary Ross Hoffman <gary@carcs3>
Message-ID: <4mssf0$krt@newsreader.wustl.edu>
Source record: 225944

I think a very good approach might be to introduce Wheeler's
"Code QuiK" technique. This associates CW sounds with English
phrases (L = "di-dah-di-dit" = "a LIGHT is lit", etcetera).
It got me past the 5 wpm barrier in a hurry. "Code Quik" is
advertised in several amateur magazines. You might phone Wheeler
and ask him for permission to use his technique in your class
(it might help to buy one of his packages).
- Gary

681. Results of a CW Survey

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-09 00:00:00 UTC
From: Bruce Burke <burke_br@plhp002.comm.mot.com>
Message-ID: <3191DD58.41C67EA6@plhp002.comm.mot.com>

Many of you may remember that I conducted a morse code survey
last year as part of a class project. Well, the ARRL
looked at it and decided they didn't want to publish it.

I have since converted it to HTML. My friend Greg, KF5N,
was kind enough to put it on his web page and give permission
to make this public announcement.

So, if you would like to see what I found out, surf on
over to his homepage entitled "Telegraph Lore."

Hmmmm...I say that the universe is deterministic in nature and that
no one has any real choice over anything.

What this means for my pick of a vanity call, I'm not sure...

> Why should I keep $3000 worth of equipment around that I maybe used 20 minutes
> this year. You want it, I will be pleased to sell it.

If you also agree never to post to any amateur radio newsgroup again, I'll
volunteer to collect the contributions to buy you out.

If only 29 others feel as strongly as I do about your imbecilic postings
and agree to help underwrite the operation, it would cost between zero and
$100 each depending upon whether your collection is worthless through to
being fairly valued. We may even make a profit on getting rid of you!

1.4 List of contributions.
1.5 Credits and other things.

_____________________________________________

1.0 What is BASIC Stamp ?
-------------------------

This is being written for people who have no idea of what a BASIC
Stamp is...

BASIC Stamps are small reprogrammable single board computers (SBC)
that run BASIC programs and are made by Parallax, Inc. in US. At
first glance, they may seem fairly minimal - and in fact, they are.
But with software that fully utilizes all available hardware, the
Stamps give you powerful features - without the cost of hardware.

Their low cost and simplicity make the Stamps perfect for many
prototyping and control applications. It's suitable for electronics
hobbyists as well as electronics professionals in many different
areas.

Typical application areas for BASIC Stamp's are...

- General electronics
- Home automation
- Robotics
- Mini PLC
- Education
- Prototyping
- HAM related applications
- Special effects in films
```

- Industri control
- Geological instruments
- Computer peripherals
- Scale model hobbyists
- Model train hobbyists

As an talent engineer and technical writer expressed it...

- BASIC Stamp is the 555 of the 90's !

1.1 What is L.O.S.A all about ?

I started to compile L.O.S.A because I know there are lots of great ideas and many problems that are solved with the BASIC Stamp and the main purpose of this list is to get an idea of what other people are using their BASIC Stamps for and maybe get some inspiration or hints.

Remember it's up to all of us if this list are going to be any good and I'm looking forward to receive a description of your application.

1.2 How can I contribute to this list ?

If you have done something with the BASIC Stamp (big or small) that you are willing to tell others please use the form given below and write a short description, nothing fancy is needed just a simple explanation. If you have source code to share that's even better but it's not necessary.

Then e-mail the form to:

cj@hth.com

With the following as the subject:

L.O.S.A Contribution

Or you could point your Web-browser to the following URL and fill in the L.O.S.A form on the Web-page...

http://www.hth.com/losa.htm

==========
Title : Robo-Cat [# 001]
==========
Date : 950807
Author: Gustavson Guy W.
E-mail: GWGUSTAVSO@mpg.norstan.com

Stamp model : BASIC Stamp Rev. D
Code available: N/A
Filename : N/A
URL : http://www.winternet.com/~bigfoot/cat.html

Description :

My cat, Kesha, was recently diagnosed with Heptic Lipodosis. Or
"Fatty Liver", basicly what this means is that for some reason he
stoped eating and his liver started converting body to useable
sugars. The fat deposists biuld up in the liver and cause severe
liver damage. Because the liver isn't working well the cat feels
crappy and wants to eat even less. The treatment for this disease is
to run a tube down down the cats nose into his stomach, or a PEG
tube through the abomine wall into the stomach and feed the cat a
liquid diet this way.

I love my cat, but I can't be there every three hours to feed him
through the tube for a month. Something about work and deadlines and

such. So I went to a local supplus house and got a tiny motor driven pump, a case, some switches, a micro switch, ect...

The micro switch is mounted such that the switch trips for every rotation of the pump shaft. The stamp turns on the pump for on a single rotation at intervels programable from the controll switches on top. An alarm buzzer and LED flash if the pump fails to run for any reason. The unit is programable for 9 differents deleviery rates.

Now he gets a slow continuious feeding and he seems to tolerate this better than the 100ml feeding every three hours.

```
=============================================================================
Title : Logic Rudder [# 002]
=============================================================================
Date : 950812
Author: Christer Johansson
E-mail: cj@hth.com
-----------------------------------------------------------------------------
Stamp model : BASIC Stamp Rev. D
Code available: YES
Filename : LRUDDER.ZIP
URL : http://www.hth.com/filelibrary/BS1-IC/
-----------------------------------------------------------------------------
Description :
```

Many of the new and very realistic flight sims available today needs rudder to let you get full control. This one uses a digital pot from Xicor (X9104) and 10 other components. Connects to a standard IBM-PC game port and power is taken from the port.

It uses two micro switches for controlling the rudders left or right and to indicate when rudders move there is a red LED that lights up when you press the micro switches and to indicate center there is a green LED. If you press the both micro swithes the rudder will automaticly return to center position.

There is a trim pot to set the desired step rate from slow to very fast and the Xicor pot has 99 steps wich gives a fair resolution.

```
=============================================================================
Title : Interfacing MAX186 8 channel 12bit A/D [# 003]
=============================================================================
Date : 950925
Author: Helmut Fligge
E-mail: h.fligge@asco.nev.sub.de
-----------------------------------------------------------------------------
Stamp model : BS1-IC
Code available: YES
Filename : N/A
URL : N/A
-----------------------------------------------------------------------------
```

Description :

This Program interfaces the Stamp1 to the MAX186 A/D converter. Via RS232 2400bps the stamp is asked to measure channel numbern. After conversion the result will be returned to the host computer as an ascii string (0 .. 4096). Conversion rate is about 4 measures per second.

==========
Title : Scrolling LED Sign [# 004]
==========
Date : 950926
Author: Bob Blick
E-mail: Bob_Blick@redwoodfn.org

Stamp model : BASIC Stamp Rev. D
Code available: Maybe sometime
Filename : N/A
URL : http://www.execpc.com/~bblick/stamp.html

Description :

Scrolling LED sign, 35 super-bright LEDs in a 5-by-7 matrix in the prototyping area of a Basic Stamp rev D. A scrolling alphanumeric message moves one pixel at a time, just like real scrolling LED signs, except this one only displays one full letter or portion of two letters at a time as the message moves by.

==========
Title : Tone Decoder [# 005]
==========
Date : 950926
Author: Bob Blick
E-mail: Bob_Blick@redwoodfn.org

Stamp model : BASIC Stamp Rev. D
Code available: Soon
Filename : N/A
URL : http://www.execpc.com/~bblick/stamp.html

Description :

Listens for telephone touchtones, displays phone numbers on LCD screen and echos them out RS-232 port. Circuitry fits in prototyping area of rev D Basic Stamp:

Microphone preamplifier, touchtone decoder IC.

==========
Title : Pager [# 006]
==========
Date : 950928

Author: Don McKenzie
E-mail: donmck@labyrinth.net.au

Stamp model : BASIC Stamp Rev. D
Code available: YES
Filename : PAGER.BAS
URL : http://www.labyrinth.net.au/~donmck

Description :

This program for the Basic Stamp is used to monitor 4 hardware signals. If a change takes place, (after testing for a false trigger) then a cheap 2400 baud MODEM is used to dial into a Telecom Alpha-Numeric pager. It leaves a message which consists of a 2 digit I.D. (01 to 99) followed by the 4 signal levels of pins 3 to 0.

Status of the signal levels message: 0=Low, 1=High. EG: "011110" means Unit "01" has pins 3, 2, and 1 high, and pin 0 is low.

A "Ring-In" feature is also included. By ringing the MODEM for a short period, then hanging up, the Stamp will dial your Pager and report the current hardware status of these four signals.

This program uses about half of the available memory, so if the user wishes to add enchancements such as "Multiple Ring-In's" say within a minute, for a command selection, there is plenty of program space left.

==========
Title : HexWalker Mobile Robot [# 007]
==========
Date : 950929
Author: T. R. Thornton
E-mail: mandtsys@ix.netcom.com

Stamp model : BASIC Stamp Rev. D or BS1-IC
Code available: YES
Filename : WALK.BAS
URL : N/A

Description :

HexWalker is a six legged mobile robot that is controlled by a BASIC Stamp or BS1-IC, and driven by three servo motors (similar to Futaba S148). It is the simplest walking machine architecture that can walk forward, backward, and turn left or right.

==========
Title : Robo Bug [# 008]
==========
Date : 951003
Author: David Novick

E-mail: dkn@cimar.me.ufl.edu

Stamp model : BS1-IC
Code available: YES
Filename : N/A
URL : http://www.me.ufl.edu/~dkn

Description :

Using two stamps, a robot with six legs (2 degrees of freedom each) was able to walk and turn (at this stage, not very gracefully).

==========
Title : EXPBOT Robot controlled by Stamp [# 009]
==========
Date : 951009
Author: Marvin Green
E-mail: marvin@agora.rdrop.com

Stamp model : BASIC Stamp Rev. D
Code available: YES
Filename : EXPBOT.BAS
URL : E-mail author and he will send it

Description :

This program allows a cool robot to move abound a room in search of light. Like a moth. Simple program changes can dramatically change the robots behavior.

==========
Title : Andrews Ever Evolving Lego Robot [# 010]
==========
Date : 951119
Author: Andrew H. Hochheimer
E-mail: softarts@ciaccess.com

Stamp model : BS2-IC
Code available: YES
Filename : N/A
URL : http://www.wincom.net/~softarts

Description :

Currently the robot can only navigate to the brightest light source in a room. It's current operation mode has four major steps: - Scan a 180 Degree Field of "Vision" taking light level readings, and determining the brightest direction of light. - Decide if it needs to turn left, right, or continue moving forward. - Check for collision with an object while moving, if a collision occurs, display the total travel distance on the display - Move forward for 1.5 Seconds and then repeat the process.

Currently I am using Two Futaba FP-S128 Servos (any RC Car Servos would work) one to sweep it's "sensors" form left to right, and one to "stear" the robot.

You can see pictures and more information on my homepage, just follow the lego robot link.

==========
Title : Factory Monitoring System [# 011]
==========
Date : 951120
Author: Paul Willemse
E-mail: pjwill@merlion.singnet.com.sg

Stamp model : BASIC Stamp Rev. D
Code available: YES
Filename : N/A
URL : E-mail author

Description :

The system presently consists of 4 Basic Stamp units. Each monitors up to 5 inputs. The inputs are 'digital' (switches) and/or analog (temp, airflow, current, etc using commercial sensors). All stamps communicate the results via serial mode to a Macintosh (Yes a Mac!) where the results are graphically displayed and monitored. Alarms are set for certain conditions.

The transmission is simple, one way only. Each stamp sends the info at a 'random' interval not exceeding 2 seconds. The message format is fixed, the Mac will throw away any conflicts in case two or more stamps transmit at the same time. BTW this happens very seldom. The max time any stamp can be 'absent' from the chain before an alarm is raised is six seconds (failure, transmission collisons, etc). This is controlled by the Mac.

The 'system' is presently in beta test, the client wishes to expand up to 20 stamps. At that point we will likely use the BS1-IC or BS2-IC on custom boards located around the facility.

Code is available upon request (e-mail) partial, some is proprietory to my client.

==========
Title : Wave to the Cats/Desk Temperature [# 012]
==========
Date : 951121
Author: Paul Haas
E-mail: paulh@hamjudo.com

Stamp model : BS1-IC
Code available: Yes
Filename : See web server

URL : http://hogwild.hamjudo.com/cgi-bin/stamp

Description :

The Stamp has a serial connection to web server, a cardboard hand, a servo motor to move the hand, and a DS1620 thermostat chip to measure the temperature. The web server can request the current temperature or start the hand waving. See the web page for the source code for the temp and the web server.

It's mostly useless. The cats ignore the hand. A few people find it entertaining.

==========
Title : Gamer's Die Roller [# 013]
==========
Date : 951122
Author: Larry Tremblay
E-mail: ltremblay@domus.com

Stamp model : BS2-IC
Code available: N/A
Filename : N/A
URL : N/A

Description :

The Gamer's Die roller is a little thing I am putting together as my first Stamp Project. The Roller allows cumulative rolls of n dice up to 256 sides, so long as the sum does not exceed 99,999,999(!)

It uses two 74HC161 4 bit counters cycling at 1MHz to draw random numbers off of. Input is achieved via a Grayhill model 38 keypad and a 74C922 keypad decoder. Display is on a Siemens PDSP-2111 8 character smart display (5x7 LED characters) fed by two 74HC164 serial to parallel shift registers cascaded so I can use Shiftout to feed 16 bits of control + data off of 2 pins.

The code is very simple, the most exotic part being the random number generation. In a nutshell, it is:

Begin Loop
S = 8 bit number drawn from the counter (random)
if S < (255/N) x N (integer divide, N is number of sides on die)
exit Loop
End Loop

This gets (pseudo) random numbers whose average is not skewed downwards by the counter's max of 256 (i.e. a 100 sided die is not affected by the extra 56 in the count maximum)

Using gamer's dice notation, (5d6 = sum of 5 six sided dice, 3d10 = sum of 3 ten sided dice), the user can input whatever combination

they wish, including just 'd6' for one six sider. The keypad I have has removeable keycaps with legends, so I have 0-9 plus 'd' and '=' on them.

As noted earlier, since I am using an 8 bit counter, the maximum die size is 256, although that could be fixed easily by sampling two, three or more times for each die.

Anyhow, that's it. When the code is done and debugged, I'll be happy to e-mail it to any who want it.

```
=========================================================================
Title : Stamp II Serial I/O [# 014]
=========================================================================
Date : 951128
Author: John Hansknecht
E-mail: Hansknec@cebaf.gov
-------------------------------------------------------------------------
Stamp model : BS2-IC
Code available: Yes
Filename : HAL01.bs2 and HAL01.bas
URL : ftp.parallaxinc.com
-------------------------------------------------------------------------
Description :
```

A bare-bones demonstation of 2 way serial communications between a PC running Qbasic and 1 or more Stamp II's.

```
=========================================================================
Title : Voice and CW Fox Hunt Transmitter IDer [# 015]
=========================================================================
Date : 951221
Author: Sam Guccione
E-mail: sguccion@outland.dtcc.edu
-------------------------------------------------------------------------
Stamp model : Counterfeit Stamp
Code available: Yes
Filename : Revision of S. Edwards MORSE program
URL : N/A
-------------------------------------------------------------------------
Description :
```

An IDer based upon the MORSE program. Has 4 time delays as well as a random time delay. Circuitry includes selection of a voice id using the Radio Shack 10 voice board or the Walden bookstore 10 sec talking gift card. This is a very simple circuit and program but was developed by my students under my direction.

May be of interest to someone out there.

```
=========================================================================
Title : Lift (elevator) Controller [# 016]
=========================================================================
```

Date : 951225
Author: Dave Bell
E-mail: dbell@cup.portal.com

Stamp model : Faux Stamp (BASIC Stamp clone)
Code available: Yes
Filename : Upon request
URL : N/A

Description :

A simple control loop monitoring lift Call buttons (with debounce)
and Limit switches, forbidding manual control past limits, and en-
forcing a Stop before reversal of direction. This will be used in
an owner -designed and -built single story platform lift for a home.

==========
Title : Paging with the Stamp [# 017]
==========
Date : 960104
Author: Kurt Clement
E-mail: kclement@kraft.com

Stamp model : BASIC Stamp Rev. D
Code available: Yes
Filename : monitor.bas
URL : N/A

Description :

Use the Stamp to monitor several inputs, two temperature and two
contact closures in this application. When inputs go outside set
limits, dial pager and send coded message. Used to monitor power
failures and temperatures for computer and network equipment since
August 1994, running on 9 V power supply from one of the UPS units.

==========
Title : Switching Sytem [# 018]
==========
Date : 960109
Author: Alexander Avendano
E-mail: aavendan@aros.net

Stamp model : BS1-IC Module
Code available: N/A
Filename : N/A
URL : N/A

Description :

I'm almost finishing a Basic Stamp Based Switching System (Small
Phone system) which I consider very usefull for small companies that

cant'n afford other brands. This is designed with a host computer which will have a vox-mail and all the functions like big ones to choose. I'm using BS1-IC's for the extensions process right now.

As soon I have complete it I will give the code away for small Intelligent Switching phone system up to 2 Lines and 4 Extensions using the L.C.D serial circuitry for information display. I forgot to mention that the computer (Host for many processing functions) will be running under Windows 3.1 and Windows 95, making this way a usefull computer not only for the phone system but for ithers application at the office.

Please be free to send me E-mail, about any suggestion.

==========
Title : Door Entry Card Reader [# 019]
==========
Date : 960110
Author: Ed Buckley/J J Barbarello
E-mail: ed@milinst.demon.co.uk

Stamp model : BS1-IC Module
Code available: YES
Filename : N/A
URL : N/A

Description :

Stamp 1 based version of the Card Reader article by J J Barbello as described in the August 1995 edition of Electronics Now. This version uses the Stamp 1 as a local controller determining the card number and deciding whether or not to allow door opening. Optional serial comms back to a master controller and optional local message readout using an LCD Backpack.

Lots of scope for further enhancement/experimentation. Circuit schematic and listing available.

==========
Title : Telephone Card Reader [# 020]
==========
Date : 960119
Author: Francesco Volpe
E-mail: f.volpe@ee.mu.oz.au

Stamp model : BS2-IC Module
Code available: YES
Filename : TELEMARK.LZH
URL : ftp://ftp.ix.de/pub/elrad/010/

Description :

The BS-II is used to read a German telephone card, which is a smart card. For more details see the German Electronic Magazine ELRAD (http://www.ix.de/el).

The data is transfered via RS232 to any terminal program.

==========
Title : DTMF Decoder [# 021]
==========
Date : 960125
Author: Joe Altieri
E-mail: radioman@banished.com

Stamp model : BS2-IC Module
Code available: YES
Filename : DECODE.BS2
URL : N/A

Description :

A new parallax BASIC Stamp II program for decoding a nine digit DTMF sequence of "Touch Tones" for remote activation/de-activation of any electrical appliance via Ham Radio, radio link, telephones, intercoms, etc.

==========
Title : Ion chamber radiation monitor [# 022]
==========
Date : 960125
Author: Jeffrey L. Rothman
E-mail: rothman@bnlls1.nsls.bnl.gov

Stamp model : BS1-IC Module
Code available: YES
Filename : RADMON12.BAS
URL : N/A

Description :

A Basic Stamp monitors the operation of an ion chamber radiation detector. The ion chamber and related circuitry produce a signal with a frequency proportional to the dose rate. The Stamp measures the frequency and calculates the dose rate and total integrated dose.

The results are displayed on a log scale panel meter and an LCD respectively. The dose rate is also transmitted over RS-232 to a remote PC.

A Front panel button allows the user to reset the total integrated dose. Another button allows the audio alarm to be muted at low dose rates.

```
==========================================================================
Title : Barn Monitor [# 023]
==========================================================================
Date : 960203
Author: Lynn A. Roth
E-mail: lynnr@hesston.edu
--------------------------------------------------------------------------
Stamp model : BS2-IC Module
Code available: YES
Filename : N/A
URL : E-mail author
--------------------------------------------------------------------------
Description :

The Barn Monitor checks the temperature in 5 rooms of a farrowing
house. The temperatures are taken by DS1620 chips.

If the temperature goes outside the limit set by the farmer, the
Stamp dials a pager using a 2400 baud MODEM. The same occurs if the
power goes out.

Title : Dallas one-wire interface [# 024]
==========================================================================
Date : 960212
Author: Daniel G. Clemmensen
E-mail: dgc@shirenet.com
--------------------------------------------------------------------------
Stamp model : BS2-IC Module
Code available: YES
Filename : N/A
URL : http://www.shirenet.com/~dgc
--------------------------------------------------------------------------
Description :

As part of a furnace controller project, I've interfaced A Stamp II
to a string of Dallas 1820 digital thermometers. The interface
consists of three cheap IC's and some subroutines. A design note and
a demo program are available on the web. I have successfully tested
the interface with a string of twelve 1820's.

I have not yet tested it with other one-wire devices, although I
will update my web site when I do.

==========================================================================
Title : Sculpture control [# 025]
==========================================================================
Date : 960323
Author: Pierre Olivier
E-mail: olipie@aei.ca
--------------------------------------------------------------------------
Stamp model : BASIC Stamp Rev. D
Code available: N/A
```

Filename : N/A
URL : N/A

Description :

I have been working with sculptors for some time doing control circuits for their works using 555 (limited), industrial controllers (expensive and hell to program) and lately Basic Stamp.

Our latest piece deals with image deconstruction: it consists of 20 vertical cylinders on which an image is wrapped. Each has a photo detector to detect "position zero", and a custom basic stamp board with a MC3479 step motor driver that drives a step motor which turns one cylinder. Each cylinder can thus have its own routine which positions it precisely (400 steps/rev motors) where we want it for any amount of time, at any speed (very interesting sonically at sub-second stepping speeds!).

The stamp outputs direction, step and enable signals to the motor driver and a ready signal to a common line. It receives signals from the aforementionned ready line, and from the optical sensor.

It would have been quite a bit more complicated, bulkyer and expensive to implement this project without the stamp.

==========
Title : Commercial clothes dryer controler [# 026]
==========
Date : 960401
Author: J Amy
E-mail: Kuznjack@aol.com

Stamp model : BASIC Stamp Rev. D
Code available: YES
Filename : N/A
URL : N/A

Description :

Detects drop of coin and increments time remaining register. Actuates main and heat relays. Checks temperature, and controles heat relay Periodically decriments time remaining register. Provides cool down cycle in last four minits.

Replaces original controler which costs several hundred dollars, and is not reliable.

==========
Title : Morse Code Keyer [# 027]
==========
Date : 960415
Author: Richard Clemens
E-mail: clemens@academ.wvwc.edu

Stamp model : BS2-IC Module
Code available: YES
Filename : N/A
URL : http://www.ccue.org/stamps/morse2_bs2.html

Description :

This program provides a four message keyer for Amateur Radio. The user can input four different messages, their character counts, and use four buttons to display the output and/or key a transmitter.

NB: the messages are limited to the upper and lower case letters, digits 0-9, space, period, comma, ? and /

Program is based on the information in Stamp I - Note 8 and uses some code from that note.

==========
Title : Traffic Light Controller [# 028]
==========
Date : 960418
Author: M-Systems Inc.
E-mail: mstems@aol.com

Stamp model : BS1-IC Module
Code available: N/A
Filename : N/A
URL : N/A

Description :

We have used a BS1-IC to control a simple two way intersection coordinate the timing and switching of a traffic light at a two way traffic intersection.

==========
Title : Automotive Lamp Control [# 029]
==========
Date : 960427
Author: Ron Woodward
E-mail: RWoodward@gnn.com

Stamp model : BS2-IC Module
Code available: N/A (Will share concepts)
Filename : N/A
URL : N/A

Description :

This system involved connecting two BS2 units to a bank of 28 MOSFET drivers which controled the external lighting in a demonstration

vehicle shown at the SAE expo in Detroit MI.

The lighting control had to perform PWM modulation simultaniously on 10 different circuits while controling Turn, Stop, Tail, Backup Hi Beam, Low Beam and fog lamp circuits with a set of preprogrammed timing sequences.

The timing was worked out so that the PWM of the lamps was flicker free throughtout the demonstration sequence.

The BS2 units worked together in a master - slave relationship to maintain proper sequencing of lights on both hands of the vehicle.

==========

1.5 Credits and other things

Credits should go to all of you who makes this list possible I hope it suffices to say "Thank you to all who have contributed to L.O.S.A - we all appreciate it."

Special thanks to all of you at Parallax, Inc. who makes and support this great products !

If there is anything you think I've missed (or spelled wrong <g>) I would love to hear from you so we could make this list even better.

You could reach me at the following e-mail address: cj@hth.com

Stay tuned,

/Christer

Cross-posted to: news.groups,rec.radio.amateur.misc

vancleef@netcom.com (Henry van Cleef) writes:

> I also wonder how you are going to deal with the confusion between a
> radio discussed on rec.boats.electronics (for which an RFD is currently
> active) and a "boatanchor" amateur radio.
>

What confusion? What boater is going to look in rec.radio.amateur for
maritime radios? Having the name rec.radio.amateur.boatanchor is
specifically for amateur radio topics, and isn't likely to be confused,
I think.

> I think that you have to recognize that **most** of the Usenet world is
> what you are terming "outsiders." Your position is like that of someone
> who insists on "misc.haircuts.whiffle" because that is a term used in a

Gee, Hank, boatanchors are known as such throughout the whole amateur
radio world, not just the USA.
>
> Much as I disagree with David Lawrence and his "group advice" operation

> --

It's not a conflict. Even if a boater were to stray into the
rec.amateur.radio heirarcy, why would he confuse a marine radio with an
anchor?

Radio Gear

KLM Multi 2700 2meter multi mode transceiver for sale or swap.
has AM, FM WIDE AND NARROW, SSB, and CW. select frequency using
VFO or dial in. Has built in 10meter receiver also for OSCAR
satellite. This radio does just about everything. Sold for over
$800 when I bought it. I have not used in several years, and
want something slightly smaller and different. I would like to
swap for a 2meter/440mhz rig or perhaps sell.

several 23 channel cb mobile sets $7

FREE!!!!!!!!!!
750TL Xmitting tube. This is not a working one, but is a very
old high power transmitting tube from a by gone era. It has
collector value and is great for conversation piece, or unique
lamp. I will give this to a good home for price of shipping.

Chris,

If you got a lot of complaints from *different* folks that's one
thing. If you got a lot from *one* guy, anonymously yet(!), forget
it.

Your L.O.S.A. was well done and well organized. I for one would like
to see it continue. Thanks for your efforts.

On the contrary. There are those of us who are news.groups regulars and who will, from time to time, vote for or against a measure based purely (or almost so) on the discussion right here. Sometimes this is positive: "Wow, I didn't know there was the need, but there is, and this is a great proposal! I'm in favor!" Sometimes it's negative: "No matter how many times you shout about need, you have no traffic figures, and the namespace sucks. No."

I suspect I'm not the only one sort of watching this debate from the sidelines, seeing the potential for trouble and waiting to see how things sort out.

Hi Robert, I don't truly believe spark emits a continuous wave (=CW);
it's described more as a damped wave. Sketch a few cycles of
the function y = (sinx)/x to get an idea of its behavior.

Maybe this is why we *need* the elderly folks in this hobby - how
else are the young pups going to learn anything?

'A C A P I T A L I D E A'

The National Capital Chapter #70, QCWA
(Quarter Century Wireless Association)
INVITES ALL AMATEURS TO ATTEND
the 1996 QCWA International Convention
to be held at the
Citadel Inn in Ottawa, Ontario, Canada on 4/5 October 1996

A tentative, subject to change, outline of activities follows:

- Banquet speaker - John Gilbert, VE3CXL, former Director-General
of the Canadian Government Telecommunications Agency, will speak
on Canadian and U.S.A. involvement in early Arctic communications.
- George Roach, VE3BNO, will speak on the moving of the AM
broadcast transmitters of CFRA
- Barry Mclarnon, VE3JF, will speak on Packet Radio as it has
developed in the Ottawa area.
- Graham Lightfoot will speak on local and other UFO activity
- Bill Westbrook, VE3EKA, will speak on the new Ottawa ATV repeater
- Jack Belrose, VE2CV, will speak on Fessenden and Marconi
- Gerry King, VE3GK, 'The Golden Kilowatt' will speak on high-
powered transmitters and large-scale antenna systems
- Dennis Mungham, VE3ASO, will speak on VE3ONT and Moonbounce at
the Algonquin Observatory
- a Forum will be held either on the IARU(International Amateur
Radio Union) and upcoming conferences and changes to expect, or
on some other topic of current interest to Amateurs
- there will be a display by the Vintage Radio Group of Ottawa
- a City Bus Tour will include afternoon tea served at the Green
Valley Restaurant, also a Steam Train Tour to Wakefield, Quebec
- a Formal Banquet(Saturday) will be held with a speaker as noted
above, also a Saturday Breakfast, and a Sunday Brunch
- there will be a 'Meet & Greet' opportunity to chat with amateurs
from across North America and possibly from overseas
- there will be informal shopping, museum visits, and sight-seeing
available in our Nation's Capital

If scheduling or other problems prevent some activities, they will be
replaced by other activities of similar interest and appeal.

ALL Amateurs are welcome and are encouraged to attend. Basic Amateur
registration is $13.00Cdn($10.00US) and Spouse/Non-Amateur Guest
registration is $2.50Cdn($2.00US). There are additional charges to
attend the meals and the tours.

Further information on prices, hotel reservations, finalized agenda, etc. may be obtained from:

- Chairman : George Roach, VE3BNO, (613)234-0885
- Registration: Carl Everson, VE3BYX, (613)826-2426, or bo075@freenet.carleton.ca
- Treasurer : Keith Bedal, VE3GFI, (613)828-1870, bedal@cyberus.ca or VE3GFI@VE3FD.#eon.on.can.noam

I have been planning to drive to Dayton but my back is having trouble at the moment.

If you may have, or have knowledge of the availability, of reasonably priced air ticket between Phila or BWI, or maybe Newark or DC, and Dayton, going out Thursday and coming back Sunday, please let me know.

Thanks.

True, but now BUPERS should change the Radioman rate to Communications Equipment Operator.
BTW, the best CW operator I ever knew was a Master Chief Sonar Tech. Guy could copy 70+ a minute while drinking coffee and telling sea stories!

Yes, and I also believe--in the laws of statistics and the criminal code. (At least if I can get caught.)

Look at http://www.usps.gov/websites/depart/inspect/chainlet.htm

Suppose one person makes $15K. Well, then they have gotten the equivalent of all of the entry fees of 3K people.

So, there must be 3K people getting $15K. So, they must have gotten the equivalent of the entry fees of 9 million people.

So, there must be 9 million people getting $15K. So, they must have gotten the equivalent of the entry fees of 27 billion people. Earth has 5.7 billion people.

In other words, this is a fucking fraud!

Yup, some of us are even Hams... I know what the name means, and have
for the over 25 years I've been a ham and the term boatanchors is even
older then that. But I'm reading some real silliness from some of the
pro/op-ponents.
I'm also not convinced, yet.

>the most descriptive and fit the current hierarchy.

I've been thinking much along the same lines, and Rob seems to have
stated it the most succinctly for me.

If we make it a breakout from rec.radio.amateur.equipment.*, then we
should also have a rec.radio.amateur.equipment.misc. The existence of
.misc groups is well-established, and leaves room for future growth.

Since others have pointed out that boatanchors are not necessarily
antiques (and vice-versa), we may also wish to consider the alternative
name of rec.radio.amateur.equipment.tube+antique. The use of a + in a
name is already well-established in rec.antiques.radio+phono. It's also
under the 14-character limit. This is a long name, but since most
readers of news almost never type in the newsgroup name (relying on
.newsrc files), this isn't a significant user-interface issue (this came
up during the 1991 reorg changing rec.ham-radio to rec.radio.amateur.*,
and was dismissed with the same argument).

>We have .homebrew, we may soon have .dx. I've seen postings on
>rec.radio.scanner asking about flatbeds, so you'll always have somebody
>posting to the wrong group.

>If it is determined that slang doesn't have a place in the
>rec.radio.amateur.* (or any Usenet) hierarchy, then it should be made

>consistent across the board.

>If we are going to dumb things down for those who can't function
>without a search engine, I suggest groups like the following:

>rec.radio.amateur.homebrew -> rec.radio.amateur.equipment.i.built
>rec.radio.amateur.dx -> rec.radio.amateur.communicate.far.away

>or how about:

>rec.radio.amateur.misc -> rec.radio.amateur.argue.bash.flame

How about these?:

rec.radio.amateur.sk - Memorials for Deceased Amateurs (Silent Keys)
rec.radio.amateur.qsl - Exchange of Confirmation (QSL) Cards

Some slang is clearly more meaningful than others (dx and homebrew are
somewhat more meaningful than qsl, sk, or boatanchors). Rather than obsess
over a foolish consistency (i.e., allow all slang or allow no slang),
perhaps we should decide these on a case-by-case basis through on-line
discussion and voting. That's what the RFD/CFV process is designed for,
is it not?

Just to put a finer point on this comment, the *professional*
radio-controlled anchor community will unquestionably use
rec.boats.electronics. It's the vast, world-wide *amateur*
radio-controlled electronic anchor user-groups that could be
confused by the r.r.amateur.boatanchors name. If the r.radio folks
are willing to put up with all those newbie questions ("which transmits
better in sand, a GE MT-34 two-way Danforth or a Mohawk CQR?") I'm
sure the r.boats community will also find a way to adapt.

How do you protect the receiver? An isolator either allows
the receiver to be damaged with normal power flow or isolates
the receiver from the antenna, something no more effective than
putting in a resistive pad.

Now, you might think that if you hook up the receiver, transmitter,
and antenna to the proper terminals you can protect the receiver.
Except that the isolation is dependent on the third terminal
termination. In other words, if your antenna breaks you fry the
receiver. I discovered this while trying to build a high power
gunn transceiver with a circulator.

Roger:

From February 14, 1991 until March 12, 1994, people who qualified for a Tech Plus license at VEC-coordinated exams were added to a Tech Plus's data base maintained by the VECs. Then, when FCC created the real Technician Plus license class in early 1994, the FCC took a download of that data from the VECs' data base and added it to their own. Some people did fall though the cracks, but by and large it was successful.

I see that Debora still appears as a "Technician" in the FCC's data base. May I suggest that she contact the VEC who coordinated her test and ask that VEC to communicate the correction to the VEC. If it was ARRL, then just contact me.

The VEC will need the test date and location, and may need a copy of her CSCE (from that time).

If the correction is communicated to the FCC by the coordinating VEC, that VEC can ask FCC to send her written confirmation of the correction (in the form of a corrected hardcopy license).

> Randy Kielich N6WDV

FCC has not said. Gate two will no-doubt open after FCC finishes Gate 1, and after they get a good feeling of how Gate 1A is progressing. The number of Gate 1 and 1A requests will also have an effect.

Expect the Gate 2 date to probably be known sometime in the summer--watch W1AW Bulletins for up-to-the-minute details.

The petitions for reconsideration (legal issues) have at this time all be addressed--and are not presently causing any further delay.

Did you know that 50 % of ALL U.S. Hams (about 340,000) are
either No Code Techs, Novices, or Tech Plus?
According to the A.R.R.L. that is true if I did my math right.

That means one half of us are now operating at 5 wpm or less code
speed.

Did you also know that there is NO international requirement for Hams
to operate above 5 wpm in the HF bands? Each country (read U.S./
F.C.C.) sets its own code speed requirements for its hams.

I asked the A.R.R.L. about this since I am a member. I was told that
the majority of U.S. hams support the current code speed requirements
for HF work below 30 mhz. [They didn't ask me.] They also told me
that this could be changed by a petition to the F.C.C. I would need
to submit a request for a rule change. If accepted it would go out
for review during a comment period.

My question is: Do we want to change the code speed so more of us
can use the HF bands?

I propose that the only code speed requirement for Hams in the
U.S. be 5 wpm. Classes of hams could still be distinguished by
different levels of written tests. But a 5 wpm code speed would allow
any class of Ham (except: Novice, Tech and Tech Plus) to operate phone
in segments of ALL the HF bands. This would essentially mean that
General, Advanced and Extra class Hams would only need to show 5 wpm
code to operate where they can now. Their written tests would stay
the same.

This would be a simple and effect way to allow ALL hams to upgrade
immediately by passing the higher level written tests. This would
preserve the historic code mode and also allow the hobby to rapidly
expand our ranks to preserve the future of HAM RADIO into the 21st
century.

Is anyone interested in helping me put together such an effort before
the F.C.C.?

I will be out of touch from May 15th until June 2nd (on vacation).

Send info if interested to: KE4IKT@sco-inc.com

Ooooh, Jerry is back to take a few swings at me! Let's see what the old boy has to spew this time:

Gerald Schmitt <kc5egg@ix.netcom.com> wrote:
>The motivational expert who is putting you in your place is going on 10 >years without finishing his PhD

You get a D- for not knowing how to count (or lying again). Try 5 years, not 10. Teaching on two campuses means less time to study. Also, the sailing and spear fishing and girl watching also doesn't leave much time for studying. But at least I already have both my BS and Masters in Math.

>and despite his increadable expertise
>is still a general.

Gee, I'm happy being a General. I never bothered to upgrade my driver's license to bus or commercial driver, either. Does that really bother you?

>He did however, during a recent trip to Guam, pick
>up a call that at least looks like an advanced call.

Ah, a bit jealous, huh? You see, Jerry, Generals in the Pacific get to have 2x2 calls: KH#xx, NH#xx, and WH#xx are for Pacific Area Generals (and Techs, too). But you wouldn't know that since you don't get on HF.

Now go be a good boy and study your code.

Jeff KH2PZ (a Pacific Area General Class call) (previously NH6IL, a Pacific Area General Class call) (and from 1976, WA6QIJ, a Calif. General call)

Bart's reply is excellent. I recently change my station address and included, with the FCC 610 form, a letter stating my case (for me, that I had held the license and call sign since June 1970). I found this to be adequate for my situation.

>to get ARRL support for endorsing MACC's policy not to coordinate ATV
>on UHF. It is a move to get the ARRL to endorse a reduction in the
>rights and privileges of individual amateurs, granted to us by the FCC.

I too have reservations about the proposed SPOC. It does appear to
be an attempt to end run the right to petition government guaranteed
by the Constitution. And the proposed liability limits certainly go
too far. I'm also concerned about the "closed" nature of some of the
coordination bodies that would make it up. You make strong points
about all those things (see his web page).

However, I take issue with you on a couple of points. First, I don't
think AM ATV is a good usage of the 70cm spectrum for a number of
technical and demographic reasons. As example of the latter, it ties
up too much valuable spectrum for too few users. As example of the
former, much better performance can be obtained via FM ATV on the
higher bands. The mere availability of cable ready TV sets is not
sufficient reason to tie up this spectrum for a low usage high bandwidth
mode.

But the second point addresses this SPOC issue more directly. I don't
think that coordination and bandplanning should be done by the same
body. They are two separate issues. Coordination is strictly a technical
function of interference contours. This sort of thing can be handled by
private parties, and a SPOC would make a convienent interface with the
government for this purpose. Bandplanning is a necessarily political
process that potentially impacts *all* amateurs, and shouldn't be done
by bodies representing only a select few amateurs. Thus, I don't think
limited membership coordination councils have the right to also do spectrum
planning. Some of them have been doing spectrum planning de facto, however,
and I think that should be sharply and clearly separated from this SPOC
thing.

In other words, SPOC affiliated coordination councils should be limited
to assessing the technical feasibility of a given coordination request.
They should not be in the business of determining whether it meets some
litmus test of their idea of spectrum planning too.

There is no place for a SPOC in spectrum planning. The FCC rules define
what modes may be used on what frequencies. And every amateur has an
equal right to be heard if there are to be de jure or de facto changes
in that. A SPOC that would seek to interpose itself between the general

amateur community and access to petition the government for redress is inappropriate.

This SPOC would have a quasi-legal status as the sole gateway of amateur access to government regulators. That's a dangerous thing because the members of the SPOC are not answerable to the general amateur community. If it is limited strictly to technical coordination issues, it may be an acceptable danger, but if it starts addressing necessarily political matters such as spectrum planning, it is too dangerous a thing to let stand.

Now I'd like to see amateurs take a more direct role in spectrum planning. I'd like to see the local community have the flexibility to respond to local issues without involving Washington. But we can't let that fall into the hands of a closed group. It must be fully open to the entire range of amateurs in the affected community. And individual amateurs must still have an avenue of appeal for bad decisions made by other amateurs. That necessarily requires direct access to the government.

The real danger of the SPOC concept is that government regulators are basically lazy. They would tend to just take the word of the SPOC in any matter of dispute, just as they generally take the word of the ARRL as representing the sense of amateur opinion (even when it does not). That's dangerous because neither group is openly representative of the opinions of all affected amateurs. The ARRL only represents, and is answerable to, a minority fraction of the amateur population, its voting members, and the coordination councils a much tinier fraction, generally just existing repreater owners. Neither can rightly claim to speak *for* amateur radio to the government, though they certainly have the right to speak *to* government about amateur radio issues in which they have an interest. But they should not be able to preclude other amateurs from also speaking to government about amateur issues, de jure or de facto.

If ARRL membership were a majority of US amateurs, or if a coordination council's membership were a majority of amateurs in the affected area, then a better case could be made for the SPOC concept. But there still must be a route of appeal to the highest authority, the government, in cases of fundamental disagreement. That's because under our republican system, the majority does not automatically rule, minority opinions must be considered as well, on their merits, not just on their popularity.

All one has to do is tune across the hf band to realize this last statement is false. Even jerks can pass 5 wpm. Maybe what is needed is a morality question on every test to sort them out.

21 If a staion is operating on YOUR net frequency before you were using it should you

a) Ask them nicely if they could move to another frequency and if not move the net.

b) Yell at them and proced to jam them.

I am a so called tech plus. I find this proposal ridiculus and will if
official proposed send letters to the FCC against it.
Unless the written test is done in a way that simply memorisation is

impossible this proposal is useless.
Change the written test to a true test and do NOT publish the anwers
(in fact make publishing the answers a felonie) would be acepable.
I did not upgrate my license yet, not because I can't learn CW but
because for the same reason those guy's want to change the
requirement....

> exploding noises.

I resemble that remark! Being young is a vague indicator anyway, but I will say this. I became interested in HAM radio about 16 years of age. It really is quite a task to practice for the Technician license which is what I want to use the 2-meter band, etc. I've held off until now, and am very seriously reconsidering picking up the book and making myself get these tests down and go nab my license. I'm currently 18 years old to give you an idea of how long ago I am talking about. 8-)

I actually have quite a bit of material, but actually am worried that they may have revisited the tests and I'll need new material. Any ideas on this?

Also, if anyone cares to shed light on just HOW can you come up with your own Vanity Callsign? Do you just slap a few letters on the beginning and end of your region? (Mine being 4) Thanks for all assistance!

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc

I've had some problems putting up my dipole -- the man who pays my rent doesn't take kindly to drill holes or open windows. So here's two ideas I'd like some feedback on, please.

I recently constructed a 40m dipole, to fit onto a two-post center mount. The center mount also has an N connector. I built a feedline from RG-8X to run from the mount to my antenna tuner. I just have the outside wall in the way. So today I thought about running ladder line through the window, and then slam the window shut. I have two ideas for hooking the ladder line up:

1) Run ladder line from the tuner, through the window, into an SO connector, into the PL-259 connector on the coax. (Some adapters may be necessary.) How do I hook up the connector(s) on the ladder line?

2) Run ladder line from the tuner, through the window, directly to the dipole mount. Hook one branch of ladder line onto each thumbscrew mount, where the dipole wire itself connects. How well would this work?

Thanks for your help. Now if I can just move a tree back about three feet.....

Dear All,
I am just finishing the rebuild of an 1154/55 combo. This shuld be on
the air in a couple of weeks and I need some advice. Has anybody
any experience of:

1) Coupling an 1154 to a 50 ohm antenna?.
2) Filters capable of keeping it just about legal from the
harmonic point of view.

I would appreciate the circuits for either of the above. I would rather
build the necessary matching and filtering circuits. I'm a masochist
that way.

I would also like to take the opportunity to repeat my regular plea for bits.
If anybody has any 1154/55 parts, particuarly meters, please let me know.
I can give them a good home.

From Tad Cook, KT7H
Seattle, WA May 10, 1996
To all radio amateurs

SB PROP ARL ARLP019
ARLP019 Propagation de KT7H

Average solar flux was up just a few points last week, and the
average A index remained about the same, moving from 5.7 the
previous week to 6.1.

Solar flux should peak around 80 in the next few days, with the
possibility of geomagnetic upsets centered around May 11 and again
to a greater degree around May 14 and 15. Solar flux should drop
below 70 after May 20 and rise above 70 again after June 1. The
geomagnetic field is expected to be most stable between May 21 and
27.

Best worldwide DX at this low point in the solar cycle is expected
on 30 and 40 meters. Look for 20 meters and even higher bands to
open up, especially on north south paths, when the solar flux is at
80 or higher.

Sunspot Numbers for May 2 through May 8 were 0, 0, 0, 12, 26, 27 and
19, with a mean of 12. 10.7 cm flux was 67.9, 68.3, 69.4, 70.8,
74.6, 74.9 and 76.1, with a mean of 71.7.

>explanation of the term "boatanchors."

I believe he is using the term "outsider" to refer to those people
not interested in radio. If that is the case, most of them will
not be voting.

>I also wonder how you are going to deal with the confusion between a
>radio discussed on rec.boats.electronics (for which an RFD is currently
>active) and a "boatanchor" amateur radio.

There should only be a conflict among those who are actually
using or interested in radio-controlled electronic anchors. I
would say this small group of people would quickly figure out
that rec.boating.electronics was where they belonged.

>Much as I disagree with David Lawrence and his "group advice" operation
>a lot of the time, in this case we're dealing with a very real conflict
>with a newsgroup proposal addressing electronics used on boats. You can
>pretty well count on a whole group of "no" votes from outsiders on the

"tale" was pointed out in an earlier thread to be a mis-spelling
of "tail", the last portion of the name. I do not believe David
Lawrence has made any comment on this yet
(please correct me if needed).

Gerald Schmitt <kc5egg@ix.netcom.com> wrote:
> Spend some time
>studying and you can get a real Advanced call not some artifact from
>Guam that looks like one.
> Jerry KK5YY

Hi Jerry,
A "real Advanced call" would be K#xxx or W#xxx. What you've got is
an "Advanced Minus call" - it indicates you took your multiple choice
test from a some volunteer who provided you with questions that you'd
seen before rather than going to an FCC office to draw some schematics
for the old Advanced exam.

You're a little behind the times Jerry boy. Back in the days when real
Advance Class licensees had K#xxx or W#xxx calls, the Generals out here
in the Pacific were given KH#xx calls. Of course, the 1x3 Advanced
calls ran out, so now you have a call similar in format to Pacific
Area Generals and Techs.

I'll say that again for you: Your 2x2 call is similar to the decades-old
format given to Pacific Area Generals and Techs. Heeheehee.

For future reference: A Tech or a General on the island of:

Baker or Howland gets KH1xx
Guam gets KH2xx
Johnston gets KH3xx
Midway gets KH4xx
Kingman, Palmyra, or Jarvis gets KH5xx
Hawaii gets KH6xx (or NH6xx or WH6xx)
Kure gets KH7xx (which are now available to Hawaii Generals/Techs)
American Samoa gets KH8xx
Wake gets KH9xx
Northern Mariana gets KH0xx

So you see, YoungPup Jerry, these calls are not "artifacts." Due to the
mandatory "H" in the prefix, we get to have a shorter suffix. I told you
this in an email but never learn.

Now, get on HF more often so you'll get familiar with prefixes outside those
of the Lower 48.

73 from the Central Pacific,
Jeff KH2PZ (a 20-year General!)

Better: Cut a piece of timber the same width as your window and then
cut a hole in it just large enough for the ladder line to run through.
This will keep the line away from any metal in the frame.

The problem here is what to do during the summer months - you'll
probably want to open your window (unless your home is air conditioned).
To install the above mentioned board you'd have to remove the screen, so
now all the bugs will get in your room with the window open. You'll have
to fashion a new screen around the board.

>advice, and increase the chance that your group will pass? I'm sure that if
>you insist, tale will allow the group to go to a vote with the boatanchor name,
>and I'm pretty sure it will fail if that happens.

I am the author of the innocent and lighthearted "outsider" post, and I apparently touched a nerve when I used it in my reply (to an article posted in rec.radio.amateur.misc -- I didn't notice it was also going to news.groups). I don't know what advice group-advice has to offer -- have "they" (and I admit I don't know who "they" are, but I'm learning) come out against the name, or did somebody just question it, or what? All I have seen is scant second-hand information.

It seems to me that the real question is exactly what latitude *is* allowed four names deep into a hierarchy? I am a native english speaker and in looking through a random sample of usenet names I found plenty that I didn't understand. I doubt one person reading this message can claim to understand every group name. Isn't that part of the reason that new readers are expected to read FAQs (and there is a FAQ for the entire rec.radio.amateur hierarchy), or at least peruse a new group before blindly posting? We already have the less-than-obvious rec.radio.amateur.homebrew, and we may soon have rec.radio.amateur.dx. Must a name be redundantly clear this deep into a hierarchy, even though it then becomes less accurate in describing the purpose and discussions held in the group?

So, I take it back. In this effort, of which I am a supporter but not an instigator, I now realise that we are the outsiders. I'm sure that it never occurred to most of the supporters for the group that the obvious choice for the group name would be considered by some to be questionable, and our surprise is showing up in some of our postings. I would support another name rather than have the group vote fail, but I think that would be a real shame, and I'm not sure what would have been "saved" should that happen.

73,
Mike, KK6GM

> this discussion, it's the hams.

And please recognize that it wasn't the fellow who is going to propose
the newsgroup who made the outsider comment.

> Please try to realize that all of the Usenet community is affected by this
> issue, not just the prospective users of the group. What's more important to
> you is that everyone can vote, not just hams. If you continue to demonstrate
> that you don't understand the Usenet culture and that you only care about you
> own objective, you'll harvest a bunch of NO votes from people who couldn't ca
> less about ham radio but do care about the Usenet namespace.

There's no reason for Usenet to be at all concerned over this possible
choice of newsgroup name. Rec.radio.amateur.boatanchors or
rec.radio.amateur.equipment.boatanchors are both within the
rec.radio.amateur hierarcy, and shouldn't cause anyone a misapprehension
about what's discussed in the group.

It's also important for the name to fit the needs of those who will be
using the group, and having the name boatanchors somewhere in the name
is important to the potential readers. It describes perfectly what we
want to talk about - boatanchors is a term used all over the world for
this kind of equipment.

> The prospective participants in this newsgroup represent a tiny percentage of
> Usenet. I expect that you can get your 100 vote majority, but only if you
> don't get an above-average number of NO votes. The use of your chosen name
> opens you up for exactly this type of backlash, and there are thousands more
> potential NO voters than YES voters.

True. But choosing the name "boatanchor" somewhere within the name of
the new newsgroup shouldn't merit this kind of reaction. In any case,
the RFD still hasn't been issued, and when it is, these points can be
discussed.

> Is the use of the exact name "boatanchor" so important that you would put at
> risk forming any group at all just to use it? Why not accept the fact that
> group-advice understands the Usenet issue better than you do, take their
> advice, and increase the chance that your group will pass? I'm sure that if
> you insist, tale will allow the group to go to a vote with the boatanchor nam
> and I'm pretty sure it will fail if that happens.
>

Group advice isn't infallible. They may understand Usenet overall
without having any insight at all into a particular subset of users. In
my judgement, having the boatanchors name IS important, although I'd
personally be willing to consider it as a subgroup of
rec.radio.amateur.equipment. It wouldn't be my first choice, though, but
I'm not the one who's proposing the newsgroup.

Well....each to their own, and each to their own opinion. I respectfully disagree with the position that you take. I LOVE boatanchors and they are definitely NOT obsolete. I use mine all the time. I do agree that boatanchors is an affectionate term, but stop your thought there.....Obsolete just doesn't fit here.

Now, as far as the porch and if they called their reflector "doorstops" I would STILL vote that the name for the newsgroup should be "boatanchors". I don't think this idea has anything to do with the reflector....it just so happens that boatanchors is a good name for what we are talking about...So, there you have it....let's hear it: Go Boatanchors! May they live forever!!

756. This Week in Amateur Radio #163 (for air through 5/17/96)

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-11 00:00:00 UTC
From: "Stephan M. Anderman" <sanderman@delphi.com>
Message-ID: <5XPtBKY.sanderman@delphi.com>
Source record: 225756

Here is a summary of news items covered on edition #163 of
"This Week in Amateur Radio", North America's most up-to-the-minute
audio bulletin service, for the week ending 17-May:
-
1. Sheboygan Rocket Launch Called a Qualified Success
2. Winners Announced for the 1996 ARRL Scholarships
3. Shuttle Missions Scheduled, June STS-78 to Include SAREX
4. Headset Manufacturer Gains Fame from N5RAX SAREX Photo
5. Problems with Mir Packet Station Cause a Temporary Shutdown
6. AMSAT France Opens Home Page on the World Wide Web
7. Vote Planned on Internet Usenet Newsgroup for DXers
8. FCC Reorganization Closes Honolulu Office
9. Weekly Propagation Forecast with George Bowen, N2LQS
10. "Amateur Radio Newsline" - Edition #978 from Los Angeles
11. Special Event Station Calendar with George Bowen, N2LQS
12. "The RAIN Dial-up" from Chicago
13. "Gateway 160 Meter Net Report" with Vern Jackson, WA0RCR
-
"This Week in Amateur Radio" is a weekly amateur voice bulletin
service, produced by Community Video Associates, Inc., a New York
State not-for-profit corporation based in Albany, NY. The program
is heard each Saturday at 8:00 PM (EDT) and carried on VHF/UHF
repeaters throughout North America and on 160 meters at 1860 kHz.
Contact your local amateur radio club or repeater operator if
"This Week in Amateur Radio" is not being heard in your area.
-
NOTICE: Due to the dissolution of the "Tech Talk Network", the
service WILL NOT be carried on satellite. Negotiations for the
donation or lease of satellite space continue in earnest. When a
new agreement is reached, "This Week in Amateur Radio" will return
to satellite air. Details will be posted as conditions warrant.
All affiliates are requested to contact the producers for further
information.
-
Production and transmission expenses are underwritten by donations
from repeater operators, amateur radio clubs, and individuals.
Further information is available from George Bowen, N2LQS, at
518/283-3665 (e-mail kxkvi@delphi.com) or Stephan Anderman, WA3RKB,
at 518/664-6809 (e-mail sanderman@delphi.com). You may also reach
them @ WA2UMX.FN32AW.ENY.NY.USA.NA via amateur packet.

G'day all,

Have my Yaesu FT767GX in peices to replace a couple of burnt out 'S' meter globes and thought it a good time to have a look a a mod or two. I am aware of the various mods to allow the transceiver to tx wherever one is rx'ing, but that doesn't particularly interest me, besides being terribibly illegal.

I have read somewhere that the tuning rate of the main tuning knob can be changed from 10 khz per revolution to 5 khz. Can anyone assist please.

Thanks,

Peter Whellum

Yes, thanks to both of you. I think what I'm going to try first is to send
in a 610 renewal notice, together with a copy of the CSCE indicating that
she passed the 5 wpm test, and ask for a renewal of the license as Tech+.
If this doesn't work I'm gonna have to track down the VEC and do it exactly
the way Bart suggested.

Thanks again!

who don't care about 2 meter CB.

>are turned off by code, and resent the fact that YE OLDE FAHRTZ

If I'm a "YE OLDE FAHRTZ", and you're older than I am, what does
that make you?

>continue to require

Nobody is "required" to learn code anymore. The codeless license gives
access to a vast majority of amateur spectrum.

>them to learn an outdated, obsolete method of
>communication

I've always been amused by this comment. All the bitching and moaning
about needing to learn an "outdated, obsolete method" of communication
just so they can use another "outdated, obsolete method" of communication,
SSB. (You were aware that SSB is almost as old as CW operation, right?)

> just because "I had to learn it so you do too."

More like "Its the rules, so either shut up and do it, or go away".

First off you are adding transistors not diodes, they are UN9110 from Icom.
There are 2 three-pad solder positions that are side by side just above
some sort of connector on the 2F board.

Well, They probably enjoy all this free publicity and just laugh about
the rest of the statements.... after all, its because of those
statements by other hams that LARC was founded in the first place.

That worked for me at my previous QTH. Just make sure the window
doesn't have any metal-edged weatherstripping.

>2) Run ladder line from the tuner, through the window, directly to
>the dipole mount. Hook one branch of ladder line onto each
>thumbscrew mount, where the dipole wire itself connects. How well
>would this work?

The SO-239 on the insulator should have only a minimal effect. I
would be more concerned with the impedance that the balun in the tuner
will see. Even if the dipole is resonant, there will be SWR due to
the mismatch between the line and the dipole.

Assuming you are only planning to use this antenna on its resonant
frequency, you might be better off using coax with a current balun at
the center of the antenna.

I don't know much about LARC, but it does sound to me that the club promotes good operating procedures, fosters enthusiasm for our hobby, and promotes our hobby. Why is this bad? Amateur radio needs groups who are enthusiastic about our hobby, and who bring in new hams. If someone doesn't care for the orientation of LARC's members, well, so what? No doubt there are things about many hams that one might dislike.

I say welcome them to the hobby, and stop the negative backbiting. Amateur radio does not need this.

West Coast VHF/UHF Foxhunt Report

Southern California's second international-style direction-finding championship was held Sunday, 5 May as part of the 41st annual West Coast VHF/UHF Conference in La Mirada, near Los Angeles.

In case the term "foxhunt" in connection with Amateur Radio is new to you, rest assured that no animals were sacrificed in this event. Foxhunting, or fox-tailing as it is sometimes called, is an international direction-finding sport, done in dozens of countries around the world, with hundreds of events and a regional or world championship every year. Unlike mobile T-hunts, which involve driving for a few miles and perhaps a short walk at the end, a fox-tailing contest involves five or six camouflaged stationary "fox" transmitters in a woodsy park, each transmitting for one minute in sequence on a two-meter frequency. Contestants attempt to be the first to locate all foxes, mark their competitor cards with the special punch at each fox, and get to the finish line.

Rules for this hunt were adapted from International Amateur Radio Union rules for international championship foxhunts. There were to be six "fox" transmitters. Contestants were started at three-minute intervals to scatter them out on the course and minimize "follow-the-leader" problems.

As in our first international foxhunt (HAMCON/Foxhunt-95 at last September's ARRL Southwestern Division convention), prospective hunters were not told in advance where the hunt would be, to keep them from scouting out the area in advance or interrupting the placing of the T's. At hunt time, they were met at the hotel assembly point by Mike Cramer KC6YHM, who told them to take a drive down the 5 freeway to Hillcrest Park in Fullerton. This 40-acre park is less than a third the size of the HAMCON foxhunt venue, but it has lots of elevation changes and enough varieties of flora to be called a botanical park.

Unfortunately, Fox #6 failed shortly after the start of the hunt. That left the contestants only five to find. World championship hunts have five, while Swedes hunt seven or more.

We were honored to have three representatives from the American Radio Relay League present: Ed Hare KA1CV of the Newington Headquarters Laboratory staff, Southwestern Division Director Fried Heyn WA6WZO, and Vice Director Art Goddard W6XD. When I heard they were attending the VHF/UHF Conference, I offered to provide RDF gear to them so they could go hunting, and they accepted. Not only were they good sports, but they turned out to be good foxhunters, too.

Thirty persons signed up in advance to compete. Twenty-seven showed up at the site and started on the course. Two were disqualified for staying out beyond the two-hour time limit. Two got back in time but found no foxes. Here is how the rest did:

YOUTH DIVISION (Ages 17 and under)
Name Call Team Time T's Place
Mirabella, Tom KD6AAN OCRACES 1:57:00 4 1 $25
Probert, Matthew KE6JRR SBARC 2:03:35 2 2 $10
Curlee, David KE6IPY FRC 1:55:50 1 3 $5

PRIME DIVISION (Ages 18 through 30)
Name Call Team Time T's Place
Garrabrant, Byon KD6BCH OCRACES 0:58:24 5 1 $25
Barrett, Rick KEYDKF SGVRC 1:02:37 5 2 $10
Mendenhall, Matt KE6ALM SGVRC 1:44:54 5 3 $5
Barth, Scot KA6UDZ SGVRC 1:47:00 5 4
Holland, Randy KO6KC OCRACES 1:54:00 5 5
Heather, Bill KB6WKT DARC 2:00:00 4 6
Heather, Elizabeth KC6OFS DARC 2:00:42 3 7

MASTERS DIVISION (Ages 31 through 45)
Name Call Team Time T's Place
Allen, Glenn KE6HPZ DARC 1:34:50 5 1 $25
Printz, Wes KA3DSE DARC 1:53:55 4 2 $10
Hare, Ed KA1CV ARRL 1:54:57 4 3 $5
Reginato, Nerella (None) 1:34:09 1 4
Sobodos, Steve KN6UX OCRACES 1:55:42 1 5

SENIORS DIVISION (Ages 46 and over)
Name Call Team Time T's Place
Crawford, Deryl N6AIN FRC 1:26:00 5 1 $25
Holoubek, Gary WB6GCT FRC 1:50:59 5 2 $10
Heyn, Fried WA6WZO ARRL 1:56:28 4 3 $5
Johnston, Marvin KE6HTS SBARC 1:57:00 4 4
Widman, Darryl KF6DI SBARC 1:57:10 4 5
Goddard, Art W6XD ARRL 1:56:05 2 6
Curlee, Tom WB6UZZ FRC 1:58:00 2 7
Mirabella, Ken KM6YH OCRACES 1:59:00 1 8

To simulate IARU-style regional and national foxhunts and to encourage more participation, we added a team competition to this hunt. Team members were prohibited from helping one another, of course, but the best three scores of the team members were compared with other teams to determine the team winners. Here are the results:

CLUB BEST THREE MEMBERS T's
San Gabriel Valley Radio Club KD6DKF, KE6ALM, KA6UDZ) 15 in 4:34:31
Orange County RACES KD6BCH, KO6KC, KD6AAN 14 in 4:49:24
Downey Amateur Radio Club KE6HPZ, KA3DSE, KB6WKT 13 in 5:28:45
Fullerton Radio Club N6AIN, WB6GCT, WB6UZZ 12 in 5:14:59
ARRL KA1CV, WA6WZO, W6XD 10 in 5:47:30
Santa Barbara Amateur Radio Club KE6HTS, KF6DI, KE6JRR) 10 in 5:57:45

For more information about radio direction finding, read the monthly "Homing In" column in 73 Amateur Radio Today magazine. International-style foxhunting was described in detail in the columns for December 1995, January 1996, and April 1996.

> subscribers.

Before you dismiss these comments because they come from an "outsider", let me assure you that I know the meaning of the term "boatanchor" as you are trying to use it, and have used a lot of that equipment, beginning when I was WN4NUJ in 1963.

Now let's explore "outsider". What you're trying to do is create a Usenet newsgroup. You're not opening a repeater, where 100% of the users are hams. In this case, group-advice is not an outsider. If there are any outsiders in this discussion, it's the hams.

Please try to realize that all of the Usenet community is affected by this issue, not just the prospective users of the group. What's more important to you is that everyone can vote, not just hams. If you continue to demonstrate that you don't understand the Usenet culture and that you only care about your own objective, you'll harvest a bunch of NO votes from people who couldn't care less about ham radio but do care about the Usenet namespace.

The prospective participants in this newsgroup represent a tiny percentage of Usenet. I expect that you can get your 100 vote majority, but only if you don't get an above-average number of NO votes. The use of your chosen name opens you up for exactly this type of backlash, and there are thousands more potential NO voters than YES voters.

Is the use of the exact name "boatanchor" so important that you would put at risk forming any group at all just to use it? Why not accept the fact that group-advice understands the Usenet issue better than you do, take their advice, and increase the chance that your group will pass? I'm sure that if you insist, tale will allow the group to go to a vote with the boatanchor name, and I'm pretty sure it will fail if that happens.

From: horizons@comm.net
Message-ID: <horizons.61.00A6346C@comm.net>
Source record: 225786

We have started a IRC chat area for use of ARES groups nation wide. As another way the stay in contact during a disaster. I thought members and non members of ARES RACES or other Disaster communications might be interested in joining us.

Use your Internet browser to go to the address (URL) below. Download verison mIRC 4.0

http://www.sbcomp.com/mirc/

This program will allow you to enter the IRC chat rooms around the world.

Once you have downloaded the program, you will need to unzip in into a directory named MIRC. This is done by ckicking on file mgr. then of file, then on create directory. Type in MIRC and click OK. Then move the file into the new directory and unzip the program.

Once this is done, go to your program manager window, click on file, then new program group. When the box opens. fill in the blanks and add the icon from the MIRC file.

Use the 16 bit verison instead of the 32 bit. It works much better.

Once you have the program running, dbl click on DALnet:phoenix.net [USA]
You will get another box with a list of rooms. in the empty top box this this:
#ARES/RACES
or
#ARES
All 5 letters plus the # sign this is important to getting in the room.

Source record: 225787

>>I am new to this Amateur Radio field, and would like to have some
>>information on how to get started. Any information is welcome.

What is Ham Radio, and
How do I get started?

A short introduction
by Hans Brakob, K0HB

Here on HamNet we frequently see messages asking for more information about the hobby, and how to get started. This file is a VERY brief attempt to explain the hobby and give some pointers on where to get more information. Almost certainly I won't answer all your questions, so feel free to ask for help on the forum. Hams are famous for their eagerness to help newcomers.

(First I have to explain something you might not have realized. In doing so, I'm going to paraphrase something written by Steve Ford, WB8IMY, in his introduction to a book entitled "The ARRL Operating Manual". Steve, by the way is a regular here on Hamnet. He acts as the ARRL HQ representative.)

In case you didn't know, belief in magic is a necessary requirement for all Amateur Radio operators. Of course, you won't see a question concerning magic or metaphysics on the test you take to obtain your license, but in your heart you will come to believe in that powerful, intangible force.

All of us in the hobby have felt its influence at one time or another. Some night when the band is dead as a doornail you'll be tuning aimlessly, not expecting to hear a single signal because NOTHING could be coming through at that hour. But then, rising out of the noise like a ghost, there will be a faint call from another stalwart explorer thousands of miles distant. You pounce, establish contact and both of you marvel at the fact that the conversation is taking place at all. A few minutes later, however, the signal vanishes as quickly as it came. Your rational mind will shrug it off as a quirk of propagation, but that little tingle in your gut will tell you otherwise.

If you could travel back in time to, say, 1294 AD, you'd probably be burned at the nearest stake for even suggesting that two human beings could communicate with each other over great distances without a physical connection. No

doubt they would accuse you of dabbling in magic -- and they'd be right!

As Amateur Radio operators, we work feats of magic every day. Many of us have become jaded about our powers and we tend to dismiss them as commonplace. We hardly think twice when we use our equipment to sommon the elemental forces of the universe. But every so often we need to pause and remind ourselves of what we are really doing. We need to remember the essence of what drew us to our unusual avocation in the first place: the wonderful magic of wireless communications.

So how can YOU become a magician?

First, you need to prepare to obtain a Magicians License. The Federal Communications Commission calls them Amateur Radio Operator Licenses, and they come in 5 "classes".

There are two "entry class" licenses, namely the Novice and Technician class. These two classes of license are designed to give the newcomer access to a number of frequency bands without a too-strenuous examination.

The Novice class gives the widest range of frequencies, and will be attractive to folks with a desire to talk to "distant" places. The written test is the simplest of all the tests, and the examination also requires you to be able to copy Morse code at 5 words per minute. This license will also give you access to some "local" bands, but not as many as the Technician class.

The Technician class license, as the name implies, is aimed more at folks with a technical bent (you don't have to be an electrical engineer though). The written test is a bit more difficult, but you don't need to know Morse code for this license. The frequency bands for this license give you more "local" communications, although if you wish, you CAN take the Morse test, in which case you will also get access to the "worldwide" bands the same as the Novice class.

The next three classes of license are General, Advanced, and Extra. These three classes have access to portions of all amateur bands, with progressively more difficult exams, and requirements for copying faster Morse code (13, 13, and 20 words per minute respectively).

>These would require discipline!

1. The Calculus might help you with the derivation of the formulas needed
to design your own CW rig.
2. Weightlifting will certainly strenghten your fist so you don't develope
"glass arm" from too much code during a contest.
5. On HF you'll need to know more that just the names of our states; there
are around 170 countries in the world today (someone will correct that number).
6. That takes about as much effort as learing code at 20 wpm. But typing is
surely a valuable skill for high-speed copy on CW.
7. Lots of hogs on 80M so that would be a useful skill.

Hi,

>Why are you posting this crap about stamps? It costs me money
>to download news and I can't pick and choose. Who the Hell asked
>you to do this?

Received several of the above e-mail from a person who didn't like
to give his name or e-mail address, he used an anonymous-remailer !

However I would like to hear if others feel the same about L.O.S.A
and if thats the case I will stop posting it.

I understand that not everyone is using the STAMP but I think many
people enjoy reading what could be done and maybe get som hints or
inspiration for applications of their own or am I wrong ?

SUBJ: IPS DAILY SOLAR AND GEOPHYSICAL REPORT
ISSUED AT 11/2330Z MAY 1996 BY IPS RADIO AND SPACE SERVICES
FROM THE REGIONAL WARNING CENTRE (RWC), SYDNEY.
SUMMARY FOR 11 MAY AND FORECAST FOR 12 MAY - 14 MAY

1A. SOLAR SUMMARY
Activity: Very low

Flares: none.

Observed 10.7 cm flux/Equivalent Sunspot Number : 76/14

GOES satellite data for 10 May
Daily Proton Fluence >1 MeV: 5.9E+05
Daily Proton Fluence >10 MeV: 1.8E+04
Daily Electron Fluence >2 MeV: 1.1E+07 (normal)
X-ray background: A3.6
Fluence (flux accumulation over 24hrs)/ cm2-ster-day.

1B. SOLAR FORECAST
12 May 13 May 14 May
Activity Low Low Low
Fadeouts None expected None expected None expected

Forecast 10.7 cm flux/Equivalent Sunspot Number for 12 May: 79/19

2A. MAGNETIC SUMMARY
Geomagnetic field at Learmonth: Quiet

Estimated Indices : A K Observed A Index 10 May
Learmonth 5 2221 2111
Fredericksburg 6 7
Planetary 6 6

Observed Kp for 10 May: 1311 1222

2B. MAGNETIC FORECAST
Date Ap Conditions
12 May 6 Quiet
13 May 9 Quiet to unsettled
14 May 15 Unsettled to active
COMMENT: Recurrence suggests unsettled to active conditions 14-15
May.

3A. GLOBAL HF PROPAGATION SUMMARY

Latitude Band
Date Low Middle High
11 May Normal Normal Normal
PCA Event : None

3B. GLOBAL HF PROPAGATION FORECAST
Latitude Band
Date Low Middle High
12 May Normal Normal Normal
13 May Normal Normal Normal
14 May Normal Normal Fair

4A. AUSTRALIAN REGION IONOSPHERIC SUMMARY
Date T index
11 May 14

Observed Australian Regional MUFs:
Darwin: Near predicted monthly values with spread F 13-19UT.
Townsville: Near predicted monthly values to 15% enhanced
with spread F 12-15UT.
Sydney: 15-30% enhanced.
Hobart: Near predicted monthly values to 30% enhanced during
local night.

Predicted Monthly T index for May: 10

4B. AUSTRALIAN REGION IONOSPHERIC FORECAST
Date T index MUFs
12 May 15 near predicted monthly values
13 May 10 near predicted monthly values
14 May 5 near predicted monthly values

Nope. You need a license from Phil.

>Is its use restricted to non-commercial use?

Its *free* use is. You can use it commercially if you license it.

As John Gilbert pointed out, you should contact Phil for details.

796. Re: 10 meter calling frequency ??

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-11 00:00:00 UTC
From: larryj@teleport.com
Message-ID: <4n3s3n$ggi@kelly.teleport.com>
Source record: 225796

Back in the 1970's, when all 10-Meter FM activity centered on the International Simplex Frequency (not the "Calling" Frequency), the Japanese hams became active on 10 FM also. They started up an actual "Calling" frequency of 29.300 MHz, which remains to this day. Note that a "Calling" frequency normally means "Make a contact and then QSY to another frequency to actually conduct your QSO". 29.600 is still the main simplex frequency, 29.500 was developed as the "secondary" FM simplex frequency to handle the overflow from 29.600 - this happened in about 1978. Lots of FM simplex activity from Japan on all 10 or 20 KHz channels from 29.01 MHz to 29.30, including some 10M FM packet BBS'es at 1200 baud.

FOr SSB, 29.400 was used heavily as a calling (may or may not QSY after contact was actually established), but I haven't followed the SSB bunch on 10M to know if that's still the case.....

This was the source of much debate a couple years ago on the QRP email list. What if my 20M dipole is on a cliff overlooking the ocean, and someone else's is in a forest (high RF absorption)? Once that 5W leaves the back of the radio it's nearly impossible to demand that other conditions be equal.

From: snpcross@aol.com
Message-ID: <4n5iml$chm@newsbf02.news.aol.com>
Source record: 225648

Wow, good question. The reason I'm replying to the group rather than to the author is: I really don't know for sure. I would *guess* the 900MHz because of less atmospheric absorbtion. As a general rule, concrete is an execellent RF attenuator. I wonder if the rebar spacing would be a factor.

799. Modern log program?

Newsgroup: rec.radio.amateur.misc

I have been using Hyperlog for logging my HF and VHF contacts up till now, and I have been very happy with it. But the world goes on, and we have to admit that good old DOS is slowly vanishing.

Any suggestion for a full blown logging program, written for a more modern platform (Win, Win95, OS/2)?

800. The Single Point of Contact Proposal - ending ATV on UHF?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-12 00:00:00 UTC
From: TOM BLACKWELL <tom.blackwell@why.net>
Message-ID: <31964E6D.35AF@why.net>
Source record: 225650

Thanks to all of you who have sent EMail about the "Single Point of Contact" proposal.

The web page has now been updated at:

http://www.why.net/home/tom.blackwell/

This proposal appears to be a move to get the ARRL to endorse a reduction in the rights and privileges of individual amateurs, granted to us by the FCC. In some areas it would act to end ATV on UHF.

The proposal has also been published in the W5YI Report of May 15, 1996.

Jeff and company,

The jammer in question K5BLB has been licensed for many years.
I can't find computer records that go back far enough to determine
just how long he has been licensed. From his on air comments it
may have been since the Korean War. Locally we have tried to do
something (he lives rather close to me so I get uninterupted
enjoyment) but enforcement lately is non-exsistant. The point Jeff
is this guy passed the code test when it was send and receive and
was admistered by a FCC field office. Code wasn't a lid filter
40 years ago and it isn't now.

Listening from time to time to 3950 I deduce that "Sid the Lid"
as K5BLB is known, no longer can copy code. His personality is such
that no insult goes unanswered and I have heard FUOM sent to him
in CW many times without reply. Sid is disabled and his behavior
may be misdirected rage. Local hams hold him in contempt but can
do little about it even when he operates illegally. Guys like
this are much more destructive to ham radio than some poor soul
who doesn't care much for code. Well as Paul Harvey would say,
"And that's the rest of the story."

803. Outlaw ATV repeaters on UHF?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-12 00:00:00 UTC
From: TOM BLACKWELL <tom.blackwell@why.net>
Message-ID: <3196541E.4310@why.net>
Source record: 225653

Amateur Television has been an accepted mode on the UHF band since I can remember... There is commentary about the band planning for this in the ARRL Rule Book, in the section on the 70 Cm. Band.

With this we have a unique situation, where ATV transmissions use the same frequencies as cable ready TV sets. With this, practically every cable ready TV sold in the United States is also an ATV receiver. (See the Web page of the Houston Amateur Television Society.) This means that a part of this hobby that might be expensive, otherwise, is relatively cheap.

Unfortunately, there are people out there who want to find a way to effectively outlaw this repeater mode on this band. For more information on this situation, and the politics, see the discussion on my Web page at:

Folks interested in radio are not any more morally inclined than the rest
of the population. But the fact that out of the thousands of QSOs that take
place daily on HF only a tiny fraction involve riff-raff must say something
of the class of people who reside on HF. Tom (above) pointed to one single
80M frequency (there are a couple others) and that's not too bad seeing
that there are 500 kilocycles available on 80 for QSOs.

>That the CW subbands are more polite, or that the CW
>ops are better ops ...

Oh, thank you!

>Please respect the Followup-to: line.

Yes, now that I've had my say (heehee) let this go to .policy.

HELLO FELLOW HAMS:and FUTURE HAMS !!!!!!!

HAM BBS dedicated to amateur radio !!!!

There is a DEVOTED AMATEUR RADIO BBS in town ,from your
ARRL/LAX affiliated club coordinator , JOE CIRA , KB6AXK ....
Everything and anything about AMATEUR RADIO will be found here,
IF NOT ? Let me know and we will post it and file it !!!!!!!!

HAM*INFO*LINK*SOURCE BBS at 1-818-584-1952....
24 hrs,8-n-1,anyspeed.......
running 486/66 with 2.1 gig of space !!!
qsl route database,clubs,newsletters,bulletins,shareware,utility
mods,programs,test ques,lists,software and much more....
VEC/VE exam & class list for all So.Cal.
sample exam tests and answers for all class's..
ARRL mirror of all there files !
Using Wildcat v4.11 software..
easy to log in and no FEE's it's FREE !
5,400 FILES IN 117 FILE AREA'S..so far !

latest list of AMATEUR RADIO WEB SITES & PAGES
now 2,268 websites & pages !!!!!!!!!
and GROWING FAST ?!?!!

P.S. also available on the web at:

http://www.padl.ac.at/schule/chemie/bob.htm
look for web-sites by KB6AXK on the page........

FYI:there are roughly ,over 33,000 pages,just pages,
that relate to amateur radio/ham radio on the web ???????
My list is primarlly websites..............

Anyone have any experience with installing a 2 metre rig in a Golf?

I have an '86 model I want to put my ICOM 27-A in, but I want it to be a neat installation that's =relatively= unobtrusive.

Any hints/ideas appreciated.

In my experience, (ft470 vs dj580), the alinco was better at stopping
intermod and got less hot. The newer rigs (530 vs 582) seem to be just
refinements of the old ones so I would buy the Alinco without a second
thought...(sorry yaesu).

I don't agree that just because a tail name might not be understandable
to everyone (especially those -not- interested in the subject) that is
is a "questionable practice" to use that name. I find more
questionable the notion that those not familiar with the subject at
hand (see how carefully I now avoid the "O" word ;) can make informed
judgements about the most appropriate tail name (which would exist at
the end of a perfectly descriptive hierarchical prefix, no less). In
fact, I find a touch of hubris in the notion that somebody, somewhere,
must be defended against a long-standing and perfectly understood name
supported by the community in question.
>

does.

But what does such a compromise achieve? How is Usenet better for
forcing the adoption of a group name that is less meaningful to those
who are interested in the subject matter. I have the sense that this
alleged confusion which may result is just a chimera, in opposition to
the very real and clear desires of the amateur radio community.

I wonder why you're so interested in my personal life, Jerry. Do you
have a crush on me? Unless you can cook Vietnamese food as good as
my girlfriend, forget it!

Now 5-6 including a Masters in pure math? Well, around here, due
to the severe cost of living in Hawaii, indigent grad students have
to take on overload teaching on other campuses to pay food and rent
(and for sailboats, diving gear, surfboards, sunblock), which means
taking fewer classes per semester than "over there". Also, I'm a
bit lazy.

>>I never left Hawaii.

>Then why is there a Guam address on the FCC database I quote:

How else would I have a Guam call other than having a Guam mailing
address? A ham's mail address does not have to be his residential
address.

>forms. I'll sure believe everything you say from now on.

Here you go again, showing that you have a crush on me! I'm sorry Jerry
but we'll never be more than newsgroup friends. Now, I had planned on
spending summer on Guam in order to teach, so I changed my FCC address
to there. But at the last minute I received 3 courses to teach here
and at Chaminade University. No fraud, just a change in plans. Now
get back on track being a heterosexual, Jerry, and put an end to this
personal interest you have in me. BTW, how could that address be fake?
I have my new license right here. It's a mail address, not a residential
address.

>>>Be a little nicer and less judgemental and we won't have to revive
>>>the Jeff Hermann Challenge Cup.

>>Hey, that was fun last year. Let's do it again!

>Gee Jeff I got the distinct impression you didn't like the Jeff Herman
>Challenge Cup after all you had a Tony write to me asking me to lay
>off.

I think Tony offered to be a peacemaker, since the rest of the news-
group was tired of your never ending hostility. Now go find a girl-
friend and get over these love/hate feelings you have towards me.

I ran an Alinco ALD-24T in my '86 Golf for 7 years. Car didn't come with a factory radio (I put *my* choice in) so it didn't come with the silly cassette tape drawers either. Remove the cassette tape drawers and that area is practically perfect for a rig. I cut a block of 2x2 (actually 1.5" by 1.5") with a taper on each end and used that to wedge the radio in place. No screws. Proped up like that would also help if the radio had a bottom mounted speaker. Worst concern would be heat. I don't talk much. Usually use low power. So I didn't worry about it.

Replaced the Golf with a 1993.5 Infiniti G20. Car came without the factory CD player (dealer added option). Bought an Alinco DR600T and remote mounting kit. Wasn't hard at all to put the control head in the dash as if it belonged there. Wouldn't even consider putting the RF deck there as its 6" from the car's ECU and airbag electronics.

Hackers hand out royal radio codes

THE lives of members of the royal family and senior politicians are being put at risk by radio hackers.

A group of radio enthusiasts is distributing lists of sensitive frequencies that would enable terrorists to track the precise movements of VIPs and eavesdrop on secret police operations.

Using hand-held scanners which are readily available from high-street electronics shops, a group of dedicated "listeners" has compiled a 100-page directory of frequencies, including those used by specialist police units such as the royal and diplomatic protection squads and others involved in anti-terrorist and firearm operations.

Special branch frequencies used at Buckingham Palace and Windsor Castle have already been distributed, a Sunday Times investigation has found. Others include frequencies used by nuclear and biological weapon research establishments, RAF bomb storage dumps and Eurotunnel's security network.

Even channels used by police protecting Sir Patrick Mayhew, the Northern Ireland secretary, have been discovered and circulated. In the early hours of yesterday details of an incident involving a suspected intruder at Mayhew's home in Kent were overheard.

Senior police officers were holding an urgent meeting with Mayhew yesterday to explain what had gone wrong. They have also ordered a complete overhaul of security surrounding both the Northern Ireland secretary and Michael Howard, the home secretary, who lives in the same county, as a result of The Sunday Times's findings.

Last week the movements of the Princess Royal around west London were also monitored from transmissions on special channels used by the royal protection squad when members of the royal family are travelling. Scanners also detected the arrival of "Lady Sarah" at Kensington Palace.

The group, which calls itself the Professional Radio Operator Monitoring Association (Proma), plans to publish its lists of frequencies and put them out on the Internet.

Police officers and security experts have expressed concern. "What these people are doing is providing information which could be used by criminals and terrorists," said Bill Hughes, a West Yorkshire assistant chief constable and secretary of the technical and research committee of the Association of Chief Police Officers (Acpo).

Members of the group, however, believe they are highlighting security loopholes which could and should be filled. Secure radio systems have been available for years, they say, but have not been utilised by police and other protection units because of inertia and cost-cutting.

They point to one force which had to use radio hams to handle its communications during an anti-drug operation because its own system had been infiltrated by criminals.

In the incident at Mayhew's home, an officer from Kent police used an "open" uncoded channel to report a suspected intruder, saying that he had heard someone "crashing through the undergrowth". He was instructed to wait until an armed response vehicle and dog handlers arrived.

The officers' subsequent attempts to stalk the intruder were discussed on air and could be overheard by anyone with basic scanning equipment.

Yesterday Inspector Ian Smith of Kent police confirmed details of the incident. He said nobody was found in the search but he was worried that the police frequency was known.

"I am very, very concerned that they are circulating this particular frequency. It is meant to be a very high-security operation," said Smith. He added that police at the scene did have access to a secure network, but they were not using it.

Frequencies have been published in newsletters ï¿½ seen by The Sunday Times ï¿½ which are available to more than 60 members for a subscription of ï¿½30 a year. They include ones for GCHQ security, the Williams' Formula One racing team and Ministry of Defence police.

Hackers tour the country with their scanners, listening to transmissions until they identify who the messages relate to. They claim to have found the individual call-signs for the units protecting members of the royal family, including the Queen, and many senior politicians.

"They make it easy for us," said one leading member of Proma. "They have not changed the call-signs in years. The call-sign for John Major is the same one they used for Mrs Thatcher when she was prime minister."

One newsletter gives a complete breakdown of "Metropolitan police communications".

Each bulletin carries the warning: "To use this information with a scanner contravenes the Wireless and Telegraphy Act 1949." It is legal to own a scanner but using it to eavesdrop is forbidden on channels used by the military or emergency services.

However, officials at the Radio Communications Agency, which operates on behalf of the Department of Trade and Industry, confirmed last week that publishing lists of frequencies did not on its own breach the act.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N6EK, N8AC, W9JOO, AH0W/OH2LVG, DF4RD, DL7VOA, DL9GOA & DX News Letter, F6AJA, G4BUE & DX News Sheet, GM4FDM, HS0/G3NOM, PA3ERL, PA0GAM/YB3AQE and SM0OEK for the following DX information.

5X4F LEAVES UGANDA. Due to increasing security problems in northwest Uganda, Paul, 5X4F, left Uganda April 25th. Paul will spend the next 4 months in the US visiting family and friends. He and his wife Peggy, 5X4G, hope to return to Arua in September. Paul hopes to attend Dayton. He will also be helping his son Curt, KB4EKY, catch up on the QSLing chores. Paul reports making over 12,400 contacts in the 8 months he was active from Uganda. The break down by bands are 650 on 160m, 1650 on 80m, 1400 on 40m, 500 on 30m, 2400 on 20m, 1100 on 17m, 575 on 12m and 1130 on 10m. 600 QSOs on 80 and 160 were made with an amp at 400 watts. The rest were all made with 100 watts on battery power. Paul is hoping to find a solid state amp to add to his solar powered station when he returns in September. (TNX to Paul_Wyse@sil.org)

6Y, JAMAICA. Theo, PA3ERL, will be active as PA3ERL/6Y5 from June 13-29th. His plans for band activity and operations were not received. QSL via PA3ERL.

9H, MALTA. NODXA members and friends from Berlin will once again be active from 9H. Operators and their callsigns will be: Tom/DL2RUM/9H3VP, Ragnar/DL7URH/9H3VJO, Tom/DL7UTM/9H3/VN, Holger/DL7IO/9H3TY, and Birgit, DL7IQ, using 9H3TZ for the YL contacts. 9H3 calls for DL7UEA and DL1YFF are to be issued later.The 7 team operators plan to be active in the CQWW WPX CW Contest on May 26th and 27th, from the Fanal Lighthouse on Gozo. Their equipment will include the following: FT-990 AT; 2XFT-890 AT; IC-735; 2XHL1KGX 500 watt amp; 3 notebook computers (some to be used on Packet and RTTY); 3 ELEMENT TRIBANDER FOR 20, 10 and 15; 2XTITANEX verticals for 80 and 160 meters (each 22 meters high); HF6V vertical R-7; and a 4 element log periodic wire beam for 80 meters. QSL via to

Fritz Bergner, DL7VRO.

9L, SIERRA LEONE. Baldur, DJ6SI, is currently active as 9L/DJ6SI. His length of stay in unknown at this time. He generally operates mainly CW but has been heard on SSB. Activity should be on all bands, especially watch the WARC bands.

9M0, SPRATLY ISLANDS. Jaan, SM0OEK, currently active as 9M2JJ in Malaysia, is thinking about going to Pulau Layang Layang (which is one of the islands in the Spratlys). Planning is in the early stages and Jaan is soliciting help from local hams in Malaysia and anyone that can provide information to get this DXpedition afoot. Jaan can be contacted via InterNet: sm0oek@pc.jaring.my

9M2, PENANG ISLAND (WEST MALAYSIA). Tex, 9M2TO, will be active from IOTA AS-015 for 48 hours during the CQWW WPX CW CONTEST. Activity will be on 80-10 meters. QSL via the bureau to JA0DMV/JARL or direct Tex Izumo, Bukit Dumbar APR 9-4, 97 Jalan Thomas 11700, Gelugor Penang, Malaysia

BRITISH AMATEUR RADIO TELEDATA GROUP (BARTG/GB2ATG) news bulletin would like to remind everyone that the A.N.A.R.T.S. WW RTTY Contest starts 0000z Saturday June 8th until 2400 Sunday June 9, 1996 (Second full weekend in June each year.). Bands to be used are 80, 40, 20 15 and 10 metres. Modes to be used are all digital modes permitted (RTTY, Amtor, FEC, PKT, Pactor). Note; No Satellite operation permitted.

THE "ISLAND HOPPER" DX BULLETIN. Terry, W9JOO, informs OPDX that he and Art, N2AU, has started a new bulletin which is published 26 issues as year (sent first class mail). Terry has provided the following statement: "Like to work islands? We will keep you informed on what is the latest happenings in the world of island hunting; upcoming DXpeditions; how to get that QSL; articles on island operations; results of contests and special coverage of US Islands Program. There is 78 years of ham experience between N2AU and W9JOO. Both are DXers and Contesters. Terry is on the honor roll with 321. Art publishes INSIDE DX and has many sources of info. We will also credit you with info sent to us and use it in ISLAND HOPPER." For a sample copy:
#10 SASE to Terry Long, 1385 Hauptstrasse, Berne, IN 46711-1710

IOTA NEWS... Tom, GM4FDM, reports that he and GM3NIG, GM3UTQ, GM4YMA and GM3COB hope to activate IOTA EU-111 from the Monach Islands sometime in early June. This IOTA group has not been activated since 1988/89, and it should be quite sought after. The callsign as of yet is unknown, but they might use GM5VG/P. QSLs via the bureau or direct with sufficient return postage to GM3UTQ. ADDED NOTE: Look for Tom, GM4FDM, as a low power entry in the CQWW WPX Contest as GM6MD (QSL via GM4FDM)....
Steve Salmon, AA6LF, operating as VK4ALF, hopes to activate the Low Islets, OC-172, starting May 21 or May 22 for about three days. He plans to then go on to OC-187 and activate either Stanley Island or Howick Island using the same call starting about June first. These plans are subject to change due to the weather. QSL to AA6BB.

Derek, F5VRC (ex-GW4VRV) who was active from lot of French islands during the past months will be active from Vierge Island IOTA EU-105 on May 24th to 27th. This island is located in the Bretagne (Finistere North) Region Group.

Didier, F6ELE, and Bertrand, F6HKA will be active from Fort Enet IOTA EU-32 (located in Poitou-Charente Region Group) on May 18th and 19th and Molene Island IOTA EU-65 (located in the Bretagne -Finistere West- Region Group) July 25 to 29th.

Just a reminder that Malcolm, VK6KC and Dave, VK6DBL, will activate a new IOTA this week. Their DXpedition to Lacepede Island, using the callsign VK6ISL, will run from May 16-21st. Suggested frequencies will be: 3798, 7042-7045, 7165, 7185, 7278, 14260 and 21260 kHz. QSL via I1HYW.

KH4, MIDWAY KH4. Bill, NH6D, is once again going out to Midway Island (KH4), leaving Honolulu on the evening of May 16th for at least one week. Bill will be active on all bands, SSB/CW; 80/160 meters at 22:00 local Midway time. If possible, he will stay on the island for CQWW/WPX. Bill also plans to put a lot of emphasis on EU/AF QSO's this time around. QSL via KL7H/6.

OH0 & OI0, ALAND ISLANDS. Hadi, DJ2PJ, and Peter, DL5FF, will be active as OH0JWH and OH0JWL, respectively, for the second time again from Oeverby on the Aland Islands (JP90TF). Their activity will be from June 7-14th. They will be accompanied by Rainer (OH0/DL1ZBO) and Karl (OH0/DL4FAN). Operations will include all HF bands and 50 MHz on CW, RTTY (ANARTS Contest) and SSB. Hadi will sign OI0JWH CW and SSB on 6 meters (50.210 MHz, working split if necessary). QSLs for OH0JWH and OI0JWH go via DJ2PJ, OH0JWL and OI0JWL via DL5FF and the others to their home calls. For scheduled contacts, Hadi can be contacted on Packet radio: DJ2PJ@DB0GV.#HES.DEU.EU or InterNet E-mail: DJ2PJ@t-online.de

UPCOMING DX CONVENTIONS.....
The 1996 Pacific Northwest DX Convention will be from July 19-21st, in Portland, OR. It is held at the Monarch Hotel, 12566 SE 93rd Ave., Clackamas, OR 97015 1-800-492-8700....

The New Orleans International DX Convention is soliciting nominations for the DXer of the year award. The individaul selected will be honored at the fifth annual New Orleans International DX Convention to be held at the Royal Sonesta Hotel on Bourbon Street in the French Quarter of New Orleans on August 30-31st. The award will be a commerative plaque; the honoree need not be present. The recipient last year was Vince Thompson, K5VT. All nominations received will be confidential and will be given equal consideration by the review committee. Write them a short letter describing your candidate and your reasons for the nomination. Address your correspondence to Michael Mayer, W5ZPA. 5836 Marcia Ave., New Orleans, LA 70124 -- FAX 504-524-2129.
VK9, CHRISTMAS ISLAND. Gerben, PA0GAM will be here as VK9GA from May 23-27th. He will be active on 80-10 meters CW. QSL via PA0GIN, Geert Heemstra, Noorderkroonstraat 16, 9742XD Groningen, Netherlands.

XU, KAMPUCHEA (Cambodia). Ray, HS0/G3NOM, reports an operation will take place from Phnom Phen, from May 10-15th. The prime purpose of this visit, however, will be to train local operators, and not stage a "high profile" DXpedition. So, please, don't expect a highly committed, multi-band and multi-mode operation. Operators will be JA1UT/Yoshi, JA1CMS/Abe, JA4FWM/Akio, JH4LPY/Eiji, JR0CGJ/Shimuzu and the callsign to be used is XU1CJF (Cambodia-Japan Friendship). Operations will be mainly on CW/SSB on 7/14 MHz, on the usual DX Frequencies. QSL Manager is Shimuzu San, JR0CGJ (via the callbook address or via bureau). ADDED NOTE: Via the Ohio/Penn Network, XU1CJF was heard May 10th on 14205 kHz at 1600z, 7050 kHz at 2125z and 21298 kHz at 1030z.

XX9, MACAO. The DXNS report that Martin, AA1ON/G4DZC, will visit Macao in the middle of May on his way back from a business trip in Thailand. He will try to be active.

YB3OSE QSLS. Bob, W7TSQ, (QSL Manager for YB3OSE) reports he has received the logs covering April, 1995, through March, 1996, (and April, 1996, is in the mail) from Achmad, YB3OSE. All outstanding cards will be in the mail soon.

YO, ROMANIA. Jean, F6AJA, will be here and active as YO/F6AJA during his free time (This will not be a DXpedition, but he will use YO8FZ's station during his stay.), from May 20 to 25th.

ZF, CAYMAN ISLANDS. Just a reminder! Mike, W5ZPA -- DXAC Rep for the Delta Division -- will be active from Grand Caymen as ZF2PA, May 19-25th. QSL via W5ZPA.

*** NO BULLETIN NEXT WEEK *** Your editor will be in Dayton to attend the HamVention. I hope to see you there..... 73 de Tedd KB8NW
P.S. Please keep sending your DX information. (You never know, I may put one together if I receive enough information before I leave.)

Excerpts and distribution of The OPDX Bulletin are granted as long as KB8NW/OPDX/BARF80 receive credit. To contribute DX info, call BARF-80 BBS online at 216-237-8208 14400/9600/2400/1200/300 and leave a message with the Sysop or send InterNet Mail to one of the two following addresses: kb8nw@barf80.nshore.org -or- aq474@cleveland.freenet.edu
- OR - Send a message via packet to KB8NW @ WA8BXN.OH.USA.NA
- OR - Use the VOICE or FAX answering machine at 216-237-8208 which shares the same phone line as BARF-80 BBS using a data/fax/phone switch. To access: 1) Dial Number. 2) Wait for first ring (the second ring should be a false ring from the fax/data switch box) and then dial four quick ones ("1111"). (NOTE: Some FAX machines that send single "BEEPS" every second will not have to do this step.) 3) The phone will pick up and after the "BEEP" leave your voice message or FAX.

Steve Bonine <spb@ntrs.com> wrote:
>Now let's explore "outsider". What you're trying to do is create a Usenet
>newsgroup. You're not opening a repeater, where 100% of the users are hams.
>In this case, group-advice is not an outsider. If there are any outsiders in
>this discussion, it's the hams.

Hmmmm, the proposed group's prefix is rec.radio.amateur; most of the articles will be written and read by amateurs; most of the buyers and sellers of gear listed on that group will be amateurs. [This is the case with the participants on the current list.] But you say that the *outsiders* in this discussion are the amateurs? Please explain.

>Please try to realize that all of the Usenet community is affected by this
>issue, not just the prospective users of the group. What's more important to
>you is that everyone can vote, not just hams. If you continue to demonstrate
>that you don't understand the Usenet culture and that you only care about your
>own objective, you'll harvest a bunch of NO votes from people who couldn't care
>less about ham radio but do care about the Usenet namespace.

This is a perfect example of why a CFV should *just* be posted in the catagory in which the proposed group exists (in our case rec.radio.amateur). It's false that "...all the Usenet community is affected" by the creation of this group; that's just too strong of a statement and surely can't be proved. Prior to a person voting in regards to the creation of a new group that person should take the time to learn about the catagory in which that group will be placed. If one doesn't wish to take the time to gain some knowledge in that area, then that person should withhold their vote.

Trolling for NO votes from non-hams because our chosen tail name doesn't fit your expectations is just plain immature.

>Is the use of the exact name "boatanchor" so important that you would put at
>risk forming any group at all just to use it?

Yes. "Boatanchor" has been used for decades in all the world's amateur radio journals. That you chose not to read these journals nor study the history of the amateur radio service means you will be at odds with that tail name. Thus the problem does not lie in our camp.

>Why not accept the fact that
>group-advice understands the Usenet issue better than you do, take their
>advice, and increase the chance that your group will pass?

Group-advice should go through my newsreader and explain the hundreds of silly tails they've apparently approved. Group-advice should leave the naming of a tail to the experts of the catagory area in which the group

will appear.

>I'm sure that if
>you insist, tale will allow the group to go to a vote with the boatanchor name,
>and I'm pretty sure it will fail if that happens.

Group-advice and the "tale" people should first explain why they aren't
using the word "tail", prior to telling us tales about tails. =:o

I don't think I've ever seen the word "tail" used in connection with
Usenet newsgroups. Could you provide a definition?

>Group-advice and the "tale" people should first explain why they aren't
>using the word "tail", prior to telling us tales about tails. =:o

Uh... "tale" is a single person, tale@uunet.uu.net, also known as David C
Lawrence, the moderator of news.announce.newgroups.

I know quite a few HAMs, some with General licenses and while they all have urged me to go ahead and try to get Tech plus (with the Morse code) they all have told me that it doesn't matter to them. I told them I might try later, which I might. I tried Morse code back when I first became interested and I started catching onto it. My problem was with READING it. Hehehe. Needless to say, I doubt I'd ever touch a morse switch though. If nothing just to get that PLUS put on the end of Tech sounds nice if nothing else. 8-)

Christopher Dickens
cdickens@pobox.com

If there are other HAMs in the Louisville Kentucky area reading this, feel free to e-mail me and we can discuss local issues regarding HAM radio!

I might propose a rule change that says ... "If you want to operate CW on the HF bands you must first pass a code test to update your license. HOWEVER if you do NOT intend to operate CW then you do NOT need to take or pass a code test."

I believe the original subject is using the incorrect one
(should be "tail" name?) I have seen no posts from David Lawerence
("tale") supporting any particular name. I would appreciate if
someone (perhaps tale himself), could clear this issue up.

I suspect if David Lawerence has for some reason taken a stand
against this particular name it may have problems passing, if he
hasn't, it won't.

Personally, while not myself a radio enthusist, I find the name obvious,
and have used it myself in reference to other types of equipment
(disk drives, etc).

Reply to article <AAUSsCnmfJ@remo1.saratov.su>, root@remo1.saratov.su wrote:

-Please, could anyone prompt an E-mail address of the Callbook
-Editorial Staff.

I'm the admin at http://users.lanminds.com/~anb/hamlinx.html

Although I don't have the e-mail address, one good US callbook server is
located at the URL below:

http://www.ualr.edu/doc/hamualr/callsign.html

You can use telnet to access the callbook at this address:

callsign.cs.buffalo.edu:2000

The e-mail-file-server is the <grafex.sbay.org> site.
Technically, this is not a "ftp" site, it's more of a "mail-back ftp"
site. There are a multitude of ham-related articles and programs for
several different types of systems, including Macs. This is how you use
it: First, send an e-mail to <HAM-server@GRAFex.sbay.org> and in the text
of the message, place:

HELP [enter]
GET /hamradio/INDEX.TXT [enter]
QUIT [enter]

The index is automatically sent; it lists the commands you can use, and
how to get a list of all the files they have and their directories. There
is a hard limit of 3 Megs/day download. They ask that you do it this way
to maintain a manageably-low load on their server.

A whole list of callsign servers is available on the web at places like:

http://www.yahoo.com/Entertainment/Radio/Amateur_Radio/Callsign_Servers/

�� Does anybody know of anywhere at all the UK Ham Callbook is accessible
off the net? Could anybody with an international callbook look up a call
for me?

Thanks!

unmoderated group rec.radio.amateur.dx

Newsgroups line:
rec.radio.amateur.dx Discussion, tips, notices and news for DXers.

Votes must be received by 23:59:59 UTC, 24 May 1996.

This vote is being conducted by a neutral third party. Questions
about the proposed group should be directed to the proponent.

Proponent: Richard Eckman, KO4MR <eckman@norfolk.infi.net>
Mentor: Jonathan Grobe <grobe@worf.netins.net>
Votetaker: Jani Patokallio <jpatokal@alpha.hut.fi>

RATIONALE: rec.radio.amateur.dx

One of the many activities enjoyed by amateur radio operators
("hams") is "DXing", the pursuit of making contact with as many
countries as possible. As used in this sense, a "country" might be
anything from a traditional geopolitical entity to a remote,
uninhabited island or coral shoal to which hams venture for the sole
purpose of "putting it on the air." The term "DX", apparently
derived from the word distance, can be traced to the earliest days
of amateur radio experimentation. Today, the term is universally
understood by amateur radio enthusiasts. A significant number
of the several million licensed amateur radio operators worldwide
characterize themselves as "DXers". Many shortwave listeners (SWLs)
also enjoy DXing amateur radio transmissions. Annual surveys
identify the rarest DX countries (i.e., those with which the fewest
hams have made contact), and each year a number of these are visited
for anywhere from a few days to several weeks by groups of hams.
Often these "DXpeditions" are multinational undertakings conducted
by the very best amateur radio operators in the world.

Existing moderated and unmoderated e-mail reflectors are dedicated
to DX topics, but many hams have indicated that they prefer
discussing DX on Usenet rather than have their mailboxes fill with
reflected mail. DX discussion on Usenet generally occurs in
"rec.radio.amateur.misc". Amateur radio is an extremely multi-
faceted avocation, however, and the wide range of topics discussed
in this newsgroup sometimes makes it difficult for individuals
interested primarily or exclusively in DX to easily identify articles
of interest to them. This problem can be further complicated by the
volume of traffic in this newsgroup and the short expiration periods

on many news servers. It is for these reasons that a new newsgroup devoted exclusively to DXing is being proposed. Since DX news is often of timely value, this new newsgroup is meant to complement, not replace, the mail reflectors, which often get messages to their destinations more quickly than news articles propagating through Usenet.

CHARTER: rec.radio.amateur.dx

The purpose of the "rec.radio.amateur.dx" newsgroup is to provide an unmoderated forum for the discussion of topics of general interest to DXers, including but not limited to:

o announcements of and invitations to join upcoming DXpeditions;

o information about QSL routes;

o tips and techniques regarding good operating practices;

o solicitations for schedules that will enable new DXers to get the last few "new ones" needed to qualify for DXCC;

o periodic postings of data files, such as the DXCC countries list, great circle coordinates used to determine beam headings, etc.;

o administrative policies and practices pertinent to DX operations, such as gaining recognition for a DXpedition by national societies, adding new countries to the DXCC countries list, etc.;

o the general joys and sorrows of participation in or making contact with a DXpedition.

Although the term "DX" is usually used in reference to global communications on the HF bands, operators who use other modes have different applications of this term. This is especially true of VHF and UHF operators, for whom a contact of only 1000 or even 100 miles might well be considered DX depending on the band in which the contact is made. There is currently no newsgroup dedicated to these operators. Although the majority of the traffic on "rec.radio.amateur.dx" is expected to concern HF DXing, proponents of the higher bands are welcome to use "rec.radio.amateur.dx" as a forum in which to discuss their DX activities and, in fact, are encouraged to do so.

Postings that would be considered inappropriate for this newsgroup are those whose topic falls more naturally under the charter of some other newsgroup in the "rec.radio.amateur" hierarchy. For example, discussion of radios used by DXers would be more appropriately posted to the "rec.radio.amateur.equipment" newsgroup. Similarly, general discussion of beam antennas typically used by DXers would be more appropriately posted to the "rec.radio.amateur.antenna" newsgroup.

END CHARTER.

HOW TO VOTE:

Follow these instructions *exactly*! Votes are counted by computer.

You should send E-MAIL (posts to a newsgroup are invalid) to:

voting@hut.fi

Please do not assume that just replying to this message will work.
Check the address before you mail your vote. Your mail message
should contain one and only one of the following vote statements:

I vote YES on rec.radio.amateur.dx
I vote NO on rec.radio.amateur.dx

If your mail software does not indicate your real name (for example,
AOL does not), please also include the following statement on a separate
line and add your name after the colon.

Voter name:

You may also vote ABSTAIN (which does exactly that) or CANCEL (which
removes any earlier votes). ABSTAIN does not affect the final vote count
in any way but is listed, whereas CANCEL is not.

IMPORTANT VOTING PROCEDURE NOTES:

Standard Guidelines for voting apply. One person, one vote. Votes
must be mailed directly from the voter to the votetaker. Anonymous,
forwarded or proxy votes are not valid. Votes mailed by WWW/HTML/CGI
forms are considered to be anonymous votes.

Vote counting is automated. Failure to follow these directions may
mean that your vote does not get counted. If you do not receive an
acknowledgment of your vote within three days contact the votetaker
about the problem. It's your responsibility to make sure your vote
is registered correctly. Duplicate votes are resolved in favor of
the most recent valid vote. Addresses and votes of all voters will
be published in the final voting results post.

The purpose of a Usenet vote is to determine the genuine interest of
persons who would read a proposed newsgroup. Soliciting votes from
disinterested parties defeats this purpose. Please do not distribute
this CFV. If you must, direct people to the official CFV as posted
to news.announce.newgroups. Distributing pre-marked or otherwise
edited copies of this CFV is generally considered to be vote fraud.
When in doubt, ask the votetaker.

Tail as in the tail name of a group. The tail name of the group I'm
reading your query on is misc. We've been discussing the proposed
new group rec.radio.amateur.boatanchors - what better way to describe
the last word than to call it a tail?

>>Group-advice and the "tale" people should first explain why they aren't
>>using the word "tail", prior to telling us tales about tails. =:o

>Uh... "tale" is a single person, tale@uunet.uu.net, also known as David C
>Lawrence, the moderator of news.announce.newgroups.

That's correct. There are actually a group of folks on an email list
that receive articles via tale@uunet.uu.net - these are the folks
who apparently carry a lot of weight in regard to sending the control
messages for the creation of new groups.

: All I have seen is scant second-hand information.

Ok, Michael heres the staight dope from the Guy who made the proposal
and who got the advice from group-advice to not use boatanchors.
The e-mail was from David Wright and he specifically said that
boatanchors was unacceptable, and that he would vote against it and
urge others to do as well.

: It seems to me that the real question is exactly what latitude *is*
: allowed four names deep into a hierarchy? I am a native english

Precisely.
All I have to do is TRY TO THINK of what other name possibly could
a newsgroup devoted to DX be called to realize how we have to stick
to our guns here. Also say we were going to form a newsgroup
devoted to "operating with low power". I bet 999 out of 1000
hams would say QRP. Now, how many out of 1000 non hams would guess the
meaning? Who cares? Who cares if they understand or not? They
will never read or post a message there? WHO CARES? WHO CARES?
What would group advice have us call it? rec.radio.amateur.low-power?
How absurd. NO - I want it to a vote. I want it decided in an open
forum. I do not want it decided in private, behind-the-scenes
e-mail. If we lose, we lose. So what? We'll worry about what to
do later. But I'll tell you this. If we lose it won't be because
we hams voted it down. From all the response I've seen so far
the hams are behind it 95%, the rest are just willing to give in
without a vote - but not me.

RIck KT2Q
Proponent of the rec.radio.amateur.boatanchors newsgroup - and still

From: Paul@dtxnet.demon.co.uk
Hello There,
Thanks for reading this message. I wonder if anyone can help or
explain why the following happens....

I have a Kam Plus TNC and run KaGOLD software. I am very pleased with
both and have no problems so to speak of. However every so often say
after a few weeks I have to re-enter my callsign & some of the details
back in to the programme before I can continue to operate again. These
settings include CWID. BTEXT. PTEXT. NUMNODES. MYNODE. NTEXT. PBFORWRD.
HTEXT. Also the green bargraph on the front panel of the Kamplus is lit
up on one side only when this occures. Normally it is only the centre
LED which lights under normal VHF operation. My friend also has the same
problems as well. We both use Plug in timers to switch on and off our
PSU which poweres the Kam & tranceiver at preset times. Do you think
that this may have something to do with this problem ?
If not I wondered if all KAM & KaGOLD owners have to re-enter these
settings ocassionaly and if so WHY ? Any replies or coments would be
would be welcome.
Many thanks 73 de

>
>KE4IKT@sco-inc.com

I don't have any strong feelings either way about CW. However, it is a requirement of **international law** (not merely FCC regs) that any ham operator with HF privileges passes a code test. Think about how long it will take to change that requirement. International laws such as this invariably take decades to change. From what I've read about the WARC, there is little interest at present in changing this requirement. The emphasis is elsewhere. Consequently, I'm guessing that for better or for worse, the CW requirement, in more or less its present form, will outlive most of us. Doesn't matter what you think. Doesn't matter what *I* think.

It's true that precedents count for a lot in Usenet, and we have to take them into account. Nevertheless, I don't think we should use precedent as an excuse for perpetuating questionable practices. Usenet as a whole should learn from its collective experience (as hashed out in discussions in news.groups and elsewhere), and strive to do things better as time passes. If there are N obscure newsgroups out there already, how does having N+1 of them improve things? It just takes us a step in the opposite direction.

>So, I take it back. In this effort, of which I am a supporter but not
>an instigator, I now realise that we are the outsiders. I'm sure that
>it never occurred to most of the supporters for the group that the
>obvious choice for the group name would be considered by some to be

It's just like in the "real" world... when one group needs the cooperation of other groups in order to achieve its goals, it needs to be able to compromise when necessary. Setting up a newsgroup requires the cooperation of a *lot* more people than setting up a mailing list does.

Greetings Fellow hams and Usenet suscribers:
Excuse me if my text format or other technical skills are strange, but this is a new arena for me.

I just got back into ham radio 4 years ago after a 25 year absence and have gotten a lot of enjoyment buying, repairing, swapping, and aiding others, with what are commonly known as " boatanchors " .

I've just started following this thread, and really don't understand what all the commotion is about, unless it's all politics .

I didn't know about this " Boatanchor List " until now, and would like some info on it, because $12.00 a year seems a pittance, if useful information or contacts are available there.

Secondly, why are people opposed to the use of a term thats been in common use for ages. This seems as bizarre as The Harley " sound " fiasco.

What can I do to help get a " boatanchor newsgroup " started, and How do I find out more about this "maillist" and is there a " trial period "

Thanks,
-
ED K. KB2NSP HATP34A@prodigy.com

Again, the point (since Jeff keeps missing it) is that the argument that
the CW test "keeps the bands from becoming like CB" is patently and
demonstrably false. That the CW subbands are more polite, or that the CW
ops are better ops is another argument altogether.

Please respect the Followup-to: line.

850. Re: Selling out of ham radio

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-12 00:00:00 UTC
From: jjmartin@shore.net
Message-ID: <4n51cs$g9j@shore.shore.net>
Source record: 225730

Drew, Please read your post again [below]...the part about YE OLDE FAHRTZ continuing to require them to learn an outdated, obsolete method of communicaation just because, "I had to learn it so you do too." First of all, the OLDE FAHRTZ don't have anything to do with anyone's having to learn the code.

Secondly, if anyone wants HF privileges--that is what makes him/her HAVE TO learn the code. That is known as CHOICE and they have their own power as far as that goes. There are no hams who are responsible for or who have the power to change the code requirement. The NO-CODE folks have many, many frequencies and bands...AND modes with which they can play. Why not concentrate your efforts on the little used bands...I mean why cry about something you have to work to get? You cry about something you can't have while at the same time something you do have is under the gun by the Feds. You are about to lose some of it. You cry only AFTER it's gone...but then it's too late. Play with what you have now. If you want more...work for it.

The YE OLDE FAHRTZ are your congressmen and senators and FCC officials. If you want it changed so badly, write to them and tell them. Nothing is going to be served by perpetuating this rediculous debate in rec.radio.whatever. NOTHING. So, sit down! Get your pen and paper out and put your words where they'll be heard by the right crowd. Those of us here are already familiar with the topic. I, for one, am tired of the outdated, obsolete CODE/NO-CODE debate. But you keep bringing it back up...again, and again, and again.

By the way, are you related to the Eveready bunny?

I've said it before and I'll say it again...HF is such a very small portion of the amateur radio spectrum. Why is it so dang blasted important to those few who seem to be making the biggest noise? I'll wager to say that the percentage of hams who really give a hoot about the CODE/NOCODE debate is so small that it's a nothing issue to begin with. It just seems big because posting within a newsgroup is such a LOUD means of communication*. If you don't understand that, how many other topics are going through your mind as you read these words? Regardless of how many voices you may be hearing right now these words are at the forefront of your consciousness..hence the term LOUD. [i.e., I have your almost undivided attention while you are reading this sentence.]
See?

Nuf sed by me. 73...

Cecil,

With all due respect, let your father speak for himself please. Some
of us may have phyical handicaps/limitations but we don't wear them on
our sleeves or display them for everyone else to see [intentionally or
otherwise]. I'm sure your father really appreciates you using his
limitation to make your point. Are you trying to get the
"normally-blessed" [whatever that is] to feel sorry for the others?

Let those others speak for themselves, I bet they have more pride than
to let someone who has little or no limitations to speak for them. I
can certainly speak for me. The limitation is in the mind of the
speaker.

If the shoes don't fit you, stay out of them...okay?

Gee Jeff I got the distinct impression you didn't like the Jeff Herman Challenge Cup after all you had a Tony write to me asking me to lay off. Besides you never answered the challenge. I know you are far to busy to read this so I'll understand if you have no answer.

Uhhhh...sorry, but only PART of my antenna was supplied courtesy of
HRO. I purchase my balun and ladder line (separately) at HRO. The
ther materials came from my junk box of parts that I have accumulated
over the last 20 years or so.

Antennas is correct. [I was never sure myself until now :)]
Antennae is plural for the sensory organs of bugs, etc. Antenni does
not appear in any of my dictionaries.

Cheers!

Again, it must be pointed out that the small percentage of HF riff-raff
conduct their bad behavior on SSB and not code. That we even have riff-raff
means anyone can pass the code tests.

CW can be operated on any amateur frequency (97.305a). The authorized
emission bands on HF are divided into an RTTY/data category, and a
phone/image category. Thus, to complain that CW has too much
allocation (you didn't say this, but that was the essence of the post
you responded to) has little meaning, since there are -no- legal
restrictions (only the voluntary bandplan) on where CW may be operated.

You miss the point entirely, Mike. It's not whether or not CW can be
operated on any amateur frequency, but that SSB, etc. can not be
operated in the CW bands. I wasn't complaining, but merely making an
observation. The case being that CW can be operated in the phone
bands, but phone cannot be operated in the CW bands.

First, try http://www.sel.noaa.gov/radio/radio.html or try the
page at http://www.arrl.org for a listserver that sends out propagation
reports. The problem is, propagation is a very fluid environment, subject
to unpredictable conditions. The only predictions that can be made are
circumstances which are unaffected by disturbances have a tendency to
duplicate themselves every (28?) days or so. In order to actually
determine propagaion with any accuracy, you need an HF system that's
designed for this. The Coast Guard also broadcasts propagation reports
daily on HF, on the same freq as wwwv. I'm sorry, but it's been so long
since I've played with HF that my memory on this subject is sketchy ay
best. 73.

Point of interest. Morse Code is still a requirement on larger US
passenger ships, according to the fcc page on commercial licensing. It
might be required on freighters as well. For as long as a professional
licensing requirement remains, there will be amateur code. BTW, an extra
class license will get you signed off on two elements of the commercial
exam. My understanding is, the amateur ticket is easier. So there is as
least one benefit of good code practice. Commercail first class licenses
require at least one full minute of solid copy at 25 wpm. It ain't easy.

On Sun, 12 May 1996 12:52:11 +0100 PAUL WARD (Paul@DTXNET.demon.co.uk)
wrote in rec.radio.amateur.misc:

: I have a Kam Plus TNC and run KaGOLD software. I am very pleased with
: both and have no problems so to speak of. However every so often say
: after a few weeks I have to re-enter my callsign & some of the details
: back in to the programme before I can continue to operate again. These

I use a KAM Plus in different modes, either normal TNC mode or KISS
mode, and I have also found that sometimes memory settings are
lost. So I think the problem is not the software but the KAM firmware.

I called Kantronics about this almost two years ago when I first got
the KAM, and they suggested the lithium backup battery might be
bad. It seemed to be in good shape, but I replaced it anyway -- and
the problem persisted.

I got a hint in a message posted on packet: if the KAM firmware finds
a checksum error in the KAM memory when it starts up it will
reinitialize, according to this writer. The condition can be caused by
turning power off while a packet is being received, apparently while
an incomplete packet is in memory the memory checksum is temporarily
incorrect. The suggested solution is to turn off power to the
receiver first if the channel is busy.

I wish I knew more -- an attempt to write to the person who posted
this information did not succeed. I am not sure if the story I relate
here is complete or has been verified by Kantronics. I'd appreciate
further information.

Anecdotally, it appears I have the problem less frequently when I am
using the local tcp/ip channel, where traffic is relatively light, than
when I use 145.05 where it is very likely the channel will be
active at the moment I power down. This is consistent with the above
explanation.

The J-47 is the classic military morse key, made in great quantity, and widely available as surplus. A whole generation of hams grew up in the late 40s, 50s, and right into the 60s practicing morse on their J-47s. I think they were made under military contract by many different manufacturers. 73...

Ha! I'm only 31 years old. The system will be broke long before I am
able to collect. If you believe that Social Security will still be
solvent when I hit retirement age, I have a beachfront condo in Kansas
that I'd like to sell you!

> That's
>what all those old geezers had to do too. It's their money that they are

>spending, and they worked their asses off their whole lives for it.

No, it's not. It's MY money. The old folks have received much more in
benefits than the relatively small amount that they contributed to the
system. For the younger generation, the reverse is true. Social Security
is a giant pyramid scheme, and those of us who are currently footing the
bills are tired of doing so.

Why is this thread on REC.RADIO.AMATEUR.MISC???

Curtis D. Levin (cdlevin@shadow.net) wrote:
: when you fork over your hard earned pay, it goes under your social
: security number. When you get ready to retire, you'll get a check.

Oh REALLY? On our planet, everyone under the age of 40 or so knows that Social Security is the greatest ponzi scheme ever created -- a HUGE inverted pyramid with the point jamming us right in the rear.

: what all those old geezers had to do too. It's their money that they are
: spending, and they worked their asses off their whole lives for it.

Here on earth, the typical SS recipient gets evey dime plus interest back in just about three years. The remainder of the "money they're spending," comes from US working OUR asses off. You DO know that for MANY of those years these folks put all of $40 or $50 A YEAR into the SS? How much do you put in, A WEEK???

How can the government get out of this mess? Well, we do have to "take care" of the folks that are in the system right now. It's not their fault they trusted the government to give them cradle to grave care.

We must have some sort of means test to SS benefits. There is no reason a millionaire needs SS benefits. Sorry, but we have to wean some people off the public teat slowly.

Of course, people my age and younger are completely screwed, what can be done? I suggest that at some point, Uncle Sam will have to say, "Sorry PAL, nothin' for you." To soften the blow, we should be granted tax amnesty for our IRA and 401K/403B withdrawls.

I'd LOVE to tell the feds to KEEP every dime they've made off me if I could be allowed to STOP making contributions to a fund I believe I'll never see dime one of.

If I'm wrong... tough. But let ME make the choice.

Maybe at one time BA was coined as a bit of humor. But because of its wide usage in all the radio journals for decades it has established itself as standard nomenclature.

Let me give you some advice, Bruce: In the future, prior to commenting on the tail name of a proposed newsgroup, take the time to learn about the area that that group will serve (in this case, the Amateur Radio Service, consisting of around 700,000+ folks licensed by the federal government; one of the reasons we're allowed to operate our own radio stations is to provide emergency communications during widespread disasters - we're not just hobbiests out to screw up your television reception).

Jeffrey, you should apply your own advice in reverse.

There is resistance to "boatanchor" from several fronts.
The one about potential confusion with boating is sufficiently
countered by the placement under the ham heirarchy. However, there
is a completely different objection, that the name is simply not
as clear to an uninformed observer as those interested in Usenet prefer
in new group names.

If a relatively educated stranger can't tell from the group name
what the contents are about, then it's a problem. Boatanchor is
only in use in the amateur radio community in this sense, outsiders
don't understand. And that's the problem.

This is by no means the worst problem a group name can have,
and it's likely that you could garner enough support to pass
it even against the objections of the news.groups crowd.
However, keep in mind that many amateurs who are conversant
in both radio and Usenet are objecting. This should tell you
something about what the problem is and why.

Apparently it is what W5YI is teaching new hams. If you listen to any
of Gordon West's code tape he pronounces it "Morris Code" every time.
A small but important point Steve, how can a person like or hate
something when they don't even know what it is. Perhaps we should
have a rule no bitching for or agin' the code unless you can spell
Morse. CUL

Jeff,

If you think you won your grip on reality is less than I thought. But I
will take one of those beers the next time I have to go to Hawaii.

What is all the homosexual stuff about anyway? I never brought it to
this discussion. Did the "boys" catch you in one of your famous
restrooms and turn you out or something. If you don't have an argument
this is what you have to stoop to or are you simply gender confused?

Oh by the way why would I care about vacant General calls I'm not a
general I guess I was for about 45 minutes but I'm past that now.

Let me give you some advice, Jeff: In the future...^H^H^H^H^H^H...

No. Wait. Let me start again with a different tone.

Your advice to do research on the 700,000+ is good for someone trying
to enter and affect the existing world and culture of amateur radio
enthusiasts. Can you see how that bit of advice can be easily tweaked
and apply to someone trying the enter anad affect the world and culture
of newsgroups? How far would I get in the ham community if I
came in and said "don't give me that KD3JZ-style handle. I want to be
tom.net.my.radio because that's how the 7,000,000+ internet folks
do it."?

That comment notwithstanding, I still think y'all might make a convincing
case for "boatanchors", given how deep in the hierarchy it is and
how commonplace it is in the ham world. Convince people it's not a joke,
that it is a better name than "tube" or "old" or "classic". Show
examples. Negotiate to get what you want.

Or not. It's only usenet.

SUBJ: IPS DAILY SOLAR AND GEOPHYSICAL REPORT
ISSUED AT 13/2330Z MAY 1996 BY IPS RADIO AND SPACE SERVICES
FROM THE REGIONAL WARNING CENTRE (RWC), SYDNEY.
SUMMARY FOR 13 MAY AND FORECAST FOR 14 MAY - 16 MAY

1A. SOLAR SUMMARY
Activity: Very low.

Flares: none.

Observed 10.7 cm flux/Equivalent Sunspot Number : 072/008

GOES satellite data for 12 May
Daily Proton Fluence >1 MeV: 7.4E+05
Daily Proton Fluence >10 MeV: 1.7E+04
Daily Electron Fluence >2 MeV: 4.1E+06 (normal)
X-ray background: A4.9
Fluence (flux accumulation over 24hrs)/ cm2-ster-day.

1B. SOLAR FORECAST
14 May 15 May 16 May
Activity Very low Very low Very low
Fadeouts None expected None expected None expected

Forecast 10.7 cm flux/Equivalent Sunspot Number for 14 May: 072/008

2A. MAGNETIC SUMMARY
Geomagnetic field at Learmonth: Unsettled

Estimated Indices : A K Observed A Index 12 May
Learmonth 12 3232 3323
Fredericksburg 12 5
Planetary 12 6

Observed Kp for 12 May: 2111 2122

2B. MAGNETIC FORECAST
Date Ap Conditions
14 May 15 Unsettled to active
15 May 15 Unsettled to active
16 May 10 Unsettled
COMMENT: Unsettled to active conditions are expected for the
next 2 days due to a small recurrent coronal hole.

3A. GLOBAL HF PROPAGATION SUMMARY

Latitude Band
Date Low Middle High
13 May Normal Normal Normal
PCA Event : None

3B. GLOBAL HF PROPAGATION FORECAST
Latitude Band
Date Low Middle High
14 May Normal Normal Fair
15 May Normal Normal Fair
16 May Normal Normal Normal

4A. AUSTRALIAN REGION IONOSPHERIC SUMMARY
Date T index
13 May 23

Observed Australian Regional MUFs:
Darwin: Near predicted monthly values.
Townsville: Near predicted monthly values to 30% enhanced
during local night.
Sydney: 15-40% enhanced.
Hobart: Near predicted monthly values to 15% enhanced during
local night.

Predicted Monthly T index for May: 10

4B. AUSTRALIAN REGION IONOSPHERIC FORECAST
Date T index MUFs
14 May 5 Near predicted monthly values to slightly depressed
for middle to high latitude circuits.
15 May 5 about 5% below predicted monthly values
16 May 10 near predicted monthly values

If you really believe that Social Security and Medicare provide enough to
let one live an extravagent life style, I will gladly sell you some
swampland in Connecticut. If someone is driving their Cadillac to the
golf course, they are living mostly off the money they wisely saved from
their working years.

>There is a generational war brewing in this country, make no mistake

885. Antennas Look Good When They're Needed

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-13 00:00:00 UTC
From: Peter Coffee AC6EN <72631.113@CompuServe.COM>
Message-ID: <4n8hvm$9ks$1@mhadf.production.compuserve.com>
Source record: 225565

Recently, my ARRL Section Manager asked me if I had any words to offer on the subject of our antennas, and the value they can offer to our neighbors in rescuing lives or property. This is what came to mind. It may be used for any purpose, without further permission, though I'd appreciate copies of any club newsletters or other publications that choose to print these thoughts.

- Peter Coffee, AC6EN
ARRL PIO/Tech Spec.
Los Angeles Section

The More You Need Them, The Better They Look

Your car would have more trunk space if you just got rid of that ugly, bulky spare tire. But drivers keep those things on hand, even drivers who've never had a flat tire in twenty years behind the wheel -- because some things have to be there when they're needed.

That same point of view can change the way that a neighborhood sees a radio ham's antennas. To someone who doesn't relish the miracle of radio, antennas might seem like a blot on a suburb's rustic skyline -- especially now that utility lines and other former ``decorations'' are often underground, and cable television has eliminated rooftop TV antennas from many homes.

But that ham antenna isn't there to be pretty. It's there to provide a gateway that will someday be a neighborhood's only link to the rest of its region, or even to distant parts of the state or the country, when a natural disaster or catastrophic accident cuts off normal telephone service; when even cellular telephones are saturated, or restricted to use by public safety agencies as often happens in serious emergencies.

No, a radio ham's antennas aren't pretty. But neither is the sight of a family with a medical crisis, a fire, or another situation needing immediate assistance at a time when normal communications aren't working. A neighborhood gets the benefit of its ham residents' investments in equipment and preparation, all at no cost whatsoever: like the spare tires in all of our car trunks, any inconvenience from those antennas looks pretty small compared to the value they have when they're needed.

886. RUMOR ABOUT IARU POSITION NOT TRUE

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-13 00:00:00 UTC
From: zut@cais.com
Message-ID: <zut.72.02DFDFD0@cais.com>
Source record: 225566
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc

There is a rumor that was apparently accepted as fact by at least one newsletter publisher that the International Amateur Radio Union (IARU) has adopted a position that supports eliminating the S25 international Morse Code requirement. THIS IS NOT TRUE!!!

In his e-mail message to me on Monday, May 13, 1996, IARU President Richard L. Baldwin, W1RU, stated:

"The IARU has not taken any position with regard to changes that might be made at WRC-99. I formed an ad-hoc committee to study S25 and to eventually come up with a recommendation as to what the IARU position at WRC-99 might be. That committee has circulated a discussion paper, a paper which has gone to IARU member societies, to the IARU regional organizations, and to a few individuals. We are still in the discussion stage, and will be for at least a year, perhaps longer. We have to allow time for input from all three regional organizations. The IARU Administrative Council awaits a recommendation from that committee, the Future of the Amateur Service Committee (FASC) before adopting a policy. What you have heard is precisely as youhave identified it -- a rumor."

Please pardon me if I, in the interest of world peace,
trouble you one more time. I am writing in the hope, however
small, that I might open a dialogue. It is abundantly clear to
me that we are telepathic. It is equally clear that we are
going to fight another world war. If we do, it will not be
because nobody said what needed to be said.
Being telepathic, there must obviously be electromagnetic
emissions of some sort from our brains. In an advanced a society
as ours it would be a simple matter to detect them, be they radio
frequency, microwave, millimeter, submillimeter, or whatever.
Simple to detect, and impossible to avoid for, unless it is our
intent to destroy half of our world in a nuclear war, it is
impossible for us to progress very much beyond this point without
doing so. In fact, we are likely to see continued regression as
long as we continue to avoid doing so.
For stubborn people; some of the highlights of
World War III:
Mother Russia will elect herself a communist government
with influence well into Europe. China will become quite the
industrialized nation and will also become quite agressive.
A sharp rise in fuel prices will cause a major economic collapse
as we will not have developed a substitute for petroleum. The world
will suddenly have 2 billion too-many people in it (including the
billion too-many it already has). Russia will ally with China.
Russia will invade Europe. China will invade Taiwan, S. Korea,
Japan, and will either invade or attack Malaysia. Moslem Pakistan,
with China's help, will be engaged in a nuclear conflict with
Hindu India and will find both of their populations considerably
reduced.
It also appears that the Hebrew race could quite possibly
be annihilated. After being murdered in Europe, the Jews have
concentrated in Israel. One thing that can be said for having a
people in one place is that it makes it easy to kill them all.
It is similar in the United States where Jews, blacks, hispanics,
and gays are concentrated in cities eagerly awaiting Russian and
Chinese warheads. It is unlikely that the United States could
do much to help the Israelis as the entire Arab world falls
upon her. The U.S. will be fending off Russian submarine-
launched missiles in the east and Chinese ICBM's in the west.
It is not likely that she'll stop them all.
In what I feel is, frankly, quite likely an excersise
in futility, I am attempting through some rather open talk to
open a dialogue, a window if you will, and let some fresh air
into an otherwise stagnant atmosphere. At the same time, I

want to put a few things on the level on which they belong.
The Russians used to be into telepathy. What happened?
Give up? I suggest that we turn our antennas from the sky for
a moment and point them at our heads. We may be surprised by
what we find. Then again, maybe we won't.

Sorry, Drew, but I think you missed the point of Socal Security,
Medicare, etc. These are to take care of our elderly AFTER their
productive years. One of these days (if you're lucky), you'll
make it there. Why don't you re-direct your flaming to those who
REALLY deserve it -- those who are spending us dry with entitlements
DURING their productive years: those who choose to collect a monthly
check instead of working; those who abuse the Medicaid system; I'm
sure you can continue the list.

I'm paying social security taxes, etc. so that my parents, my last
surviving grandparent, aunts, uncles, etc. have a check each month,
since the government they paid into for years didn't seem to do too
well in investing it. I'm not too confident that anyone will be
left to pay into it when I'm ready to draw on it in another 30 years
so I'm also putting back a chunk into my own retirement account.
I'd really advise you look seriously into doing the same, since there
will no doubt be a lot of people with attitudes like yours in another
50 years, and they might cut *YOU* off...

I happen to like the L.O.S.A. postings, and I think Basic Stamps (and all the various clones out there now) are a great way to control many smaller/slower projects. I think they are not only usefull, but encourage newcomers to some of these control areas (robotics and the like) to perhaps go further with home grown hardware and software.

But heck...the Stamp itself if VERY usefull in its own right!

> However I would like to hear if others feel the same about L.O.S.A

Like the "Tony the Tiger" commercial....some find it hard to "admit" that they program in Basic and use Basic Stamps....but ask these same people if they could have done some of these jobs in an easier, less expensive, and quicker manner.....and often the answer is NO.

It is a great building block....its no speed demon, so it isn't for every application.....but then again an 32 Processor Sun SPARC server 2000 is FAST....but I don't think I'd automate my model railroad, or build a line following robot out of it either.

-Quentin

Typically more concisely put as
"Jokes should be in newsgroups, not as newsgroups."

Unfortunately, I don't know who first came up with that particular
witticism. Followups out of rec.radio, as I doubt most of them care.

I agree, the term boatanchors means something to those who use, own,
love, want them.

If the group is

rec.radio.amateur.boatanchors
or
rec.radio.boatanchors

who the hell will mistake it for something else??????????????????

if we called it

rec.boat.anchors I doubt that many hams would visit expecting radios.

Thanks for the reply. I really need to know how to get to the 2f board.
It appears difficult (or impossible) to disassemble the unit past the
1st couple of circuit boards.

Australian National Amateur Radio Teleprinter Society,

which includes all digital modes, with the weekly broadcast

on the following frequencies:

3.545 MHz (Plus/minus 5) 0930 UTC COL VK2CTD

7.045 MHz -3 0030 UTC COL VK2CTD

14.070 MHz (amtor/fec) 0030 UTC

14.091 MHz 0030 UTC

146.675 MHz 0030/0930 UTC VK2JPA (PAT)

144.850 MHz (ax25 bbs) VK2JPA AT VK2WI

146.675 MHz (rtty mmbbs/repeater) VK2RTY

INTERNET RADIO-INFO-DIST AT UCSD.EDU

Enquiries to the society should be addressed to

the Secretary A.N.A.R.T.S., PO Box 860, Crows Nest,

N.S.W. 2065, accompanied by s.a.s.e., or to VK2JPA at

VK2WI.

A.N.A.R.T.S. News Bulletin 908 12TH MAY 1996

Cols column. de Col VK2CTD

I took a Siemens 100 teleprinter to the Central Coast Field

Day earlier on this year, I got quite a few comments from

passers by as I wheeled it on my trolley to the ANARTS stand.

Things such as, Where did that come from, Noahs Ark,

or, Crikey, never thought I'd see one of those again. I told

anyone interested that it was being displayed in our history

section.

Something jogged my memory today regarding the old mechanical teleprinters and it took me back to the days I spent in the London Central Telegraph Office, or rather the six month course I did before being let loose among all those telegrams. The passing out speeds were to put it mildly, very high, I expect the same or similar standards applied here too.

The machines used in the Telegraph Office were made by Creed, from memory, don't quote me, they were Creed model 7B's. Instead of the normal page copy plus the five unit code reperforator that the Siemens has, the 7B had a narrow tape that came out of one side of the machine with the message printed on it. The back of the tape had a thin layer of glue. The receiving operator ran the tape over a water wheel and stuck it to the Telegram form cutting it where necessary with a device that he/she wore on the left index finger called a thimble cutter.

At the end of the Telegraph course each student was required to send or transmit 80 (eighty) telegrams in one hour. Now I know that you may think 'ah yes but telegrams are not very long', but you are probably programmed to think in terms of domestic Telegrams. Such as 'arriving home 8pm, love Fred' etc, but commercial Telegrams could be quite long and with the Preamble, address, text and collation, (collation meant repeating all numerals and unusual words), and then signing each one to say you had transmitted it, believe me you had to move yourself to finish the pile of 80 telegrams before the examiner shouted 'time up'. The standard was a maximum of 7 corrected errors and zero uncorrected errors.

But the student was not yet finished. The machine used for

this test had the normal page copy and five unit code reperforator. The examiner took this tape and kept it with your name and date written on it till the next day when you were required to take the test a second time. After the test was finished the examiner first checked the page copy for any mistakes and then compared the two five unit code tapes. If there was an extra letter or figure shift, carriage return, in fact any extra non printing characters, these were counted as an uncorrected error. If one was detected, you failed. That of course was the transmit or typing test, each student had to have a receive test. The standard was to gum 43 telegrams in half an hour. That is you had to run the tape over the water wheel and stick the tape to the form 43 times in half an hour. Each telegram had a word count which had to tally correctly and the student had to carry out the collation, checking each numeral and unusual words. There were always 3 errors that you had to detect and fill in a small form requesting a repeat.

It was amazing just how fast a speed you could attain after a few years in the job, up to 80 telegrams each half hour was no problem to some of the operators. Unfortunately Telegrams are no longer with us, the authorities in both the U.K. and Australia decided some years ago now that just about everyone has at least one phone in their house making Telegrams redundant. Most of the circuits were landlines rather than RTTY, but the technology was the same except that a telephone line was connected to the Teleprinters instead of a Radio. I wonder if some crafty inventor might one day come up with an idea that makes the Telephone redundant, I wonder.

See you all next week, 73s for now de col vk2ctd.

VOLTA RTTY WW CONTEST

11-12 MAY 1996

CONTEST PERIOD: FROM 1200Z SATURDAY TO 12OOZ SUNDAY (24 HOURS, NO REST PERIODS REQUIRED).

MULTIPLIERS: DXCC COUNTRY LIST PLUS EACH CALL AREA IN VK, VE, AND USA. DO NOT COUNT VK, VE, OR USA AS SEPARATE COUNTRY. (USA STATIONS WITH CALLSIGN FROM ONE DISTRICT BUT ARE NOW LIVING IN A DIFFERENT DISTRICT SHOULD GIVE PROPER IDENTIFICATION, SUCH AS: K6WZ/O.) THE SAME MULTIPLIER COUNTS AGAIN ON A NEW BAND. AN ADDITIONAL MULTIPLIER IS GIVEN FOR EACH INTERCONTINENTAL COUNTRY WPRKED ON AT LEAST FOUR BANDS. CONTACTS BETWEEN STATIONS WITHIN THE SAME COUNTRY WILL NOT BE VALID , SUCH AS : A W2 STATION CAN WORK W1, W3, W4, ETC. BUT NOT W2. CONTACTS MADE OUTSIDE ONES OWN CONTINENT ON 80 OR 10M ARE WORTH DOUBLE QSO POINTS. A CONTACT WITH A STATION THAT WOULD COUNT AS A MULTIPLIER WILL ONLY BE VALID IF THAT STATION APPEARS IN AT LEAST 4 OTHER LOGS, OR A CONTEST LOG IS RECEIVED FROM THAT STATION.

FINAL SCORE EQUALS TOTAL QSO POINTS X TOTAL MULTS (BAND MULTS PLUS EACH INTERNATIONAL COUTRY WORKED ON 4 BANDS) X TOTAL NUMBER OF QSOS. USE EXCHANGE POINTS TABLE TO DETERMINE POINTS FOR EACH QSO.

AWARDS: A SPECIAL TROPHY WILL BE AWARDED TO THE TOP STATIONS IN EACH CLASS. IN ADDITION, A CERTIFICATE WITH SPECIAL STICKER TO ALL ENTRANTS.

LOGS: USE SEPARATE LOGSHEETS FOR EACH BAND. LOGS MUST SHOW: BAND, DATE AND TIME (UTC), CALLSIGN AND MESSAGE SENT AND RECEIVED., POINTS AND NEW MULTIPLIER PREFIX. SUMMARY SHEET MUST SHOW FULL SCORING, AND LIST OF MULTIPLIERS WORKED.

LOGS MUST BE RECEIVED BY JULY 30, TO QUALIFY. SEND LOGS TO:

FRANCESCO DI MICHELE, I2DMI

P.O. BOX 55

22063 CANTU

ITALY

HAPPY CONTESTING

WEEKLY SOLAR AND GEOPHYSICAL REPORT

(03 MAY - 09 MAY)

ISSUED ON 10 MAY 1996

SUMMARY

Date 03 04 05 06 07 08 09

A 8 10 9 6 6 8 (8 ESTIMATED)

T 2 2 5 6 6 8 15

SOLAR ACTIVITY WAS VERY LOW 3RD AND 4TH MAY, AND LOW FOR THE

REMAINDER OF THE WEEK.

THE GEOMAGNETIC FIELD AT LEARMONTH W.A. WAS QUIET TO UNSETTLED

FROM 3RD TO 7TH MAY, BECOMING QUIET 8TH AND 9TH.

MAXIMUM USABLE FREQUENCIES AT SYDNEY WERE NEAR PREDICTED

MONTHLY VALUES ON 3RD, AND 8TH TO 9TH MAY; MOSTLY ENHANCED 15

TO 30 PER CENT DURING THE REMAINDER OF THE PERIOD.

FORECAST (10 MAY - 16 MAY)

SOLAR: VERY LOW TO LOW.

GEOMAGNETIC: MAINLY QUIET TO UNSETTLED, UNSETTLED TO ACTIVE

CONDITIONS POSSIBLE 14 TO 15 MAY.

FREQUENCIES: NEAR PREDICTED MONTHLY VALUES.

COURTESY OF IPS RADIO AND SPACE SERVICES

ARLD022 DX NEWS

THIS WEEK'S BULLETIN WAS MADE POSSIBLE WITH INFO PROVIDED BY

CHRIS, G4BUE, TEDD, KB8NW, THE OPDX BULLETIN AND CONTEST

CORRAL FROM QST. THANKS TO ALL.

CENTRAL AFRICA, TL. ERIC, F5SEC, WILL BE ACTIVE AS TL8ED UNTIL THE END OF MAY. CHECK BETWEEN 1530 AND 1700Z ON 20 METER SSB. HE SOMETIMES OPERATES AS LATE AS 1930Z. QSL VIA F5SEC.

CAYMAN ISLANDS, ZF. MIKE, W5ZPA, WILL SIGN ZF2PA MAY 19 TO 25. HE WILL BE ON CW, RTTY AND SSB. QSL VIA W5ZPA.

KERMADEC ISLANDS, ZL8. ZL8RI SHOULD BE ON THE AIR FROM MAY 4 TO 14. CHRIS, ZL2DX, ONE OF THE OPERATORS, HAS SUGGESTED THE FOLLOWING FREQUENCIES. FOR CW TRY 5 OR 20 KHZ UP FROM THE BOTTOM OF THE BANDS. RTTY WILL BE ON 7040, 14080 AND 21080 KHZ.

MONACO, 3A. IK1QBT, IK1HLG AND IK1CJO WILL SIGN 3A/HOME CALLS MAY 11, 12 AND 13 ON ALL BANDS WITH CW, RTTY AND SSB. QSL VIA HOME CALLS.

TUNISIA, 3V. YT1AD WILL OPERATE FROM CLUB STATION 3V8BB MAY 23 TO 30. QSL VIA HOME CALL.

CROATIA, 9A. PREFIX HUNTERS NOTE THAT 9A0CW WILL BE IN THE CQWW WPX CW CONTEST. QSL VIA 9A2AJ.

WESTERN MALAYSIA, 9M2. BETWEEN 1200 AND 1700Z LISTEN FOR 9M2JJ ON 40 METER CW, WHILE 9M2IY AND 9M2/G4JVG FREQUENT 20 METER SSB. ALL ARE ON THE AIR ALMOST DAILY.

EASTERN MALAYSIA, 9M8. CHANG, 9M8FC, OPERATES 20 AND 30 METER CW BETWEEN 1330 AND 1830Z. QSL VIA 1995 CBA.

MINAMI TORISHIMA, JD1. JG8NQI/JD1 IS ON THE AIR FROM MARCUS ISLAND. TRY 30 METERS BETWEEN 1000Z AND 1330Z, OR 20 METER SSB OR CW AROUND 0745Z. QSL VIA JA8CJY. JD1YBJ WAS ON 21177 KHZ AROUND 0550Z OVER THE WEEKEND.

MARION ISLAND, ZS8. CHRIS, ZS6RI, IS ENROUTE TO MARION ISLAND WHERE HE WILL BE UNTIL JUNE OR JULY 1997. HE PLANS TO BE ACTIVE ON CW, RTTY AND SSB AS ZS8IR.

THE OHIO/PENN DX PACKETCLUSTER

DX BULLETIN NO. 252 - EXCERPTS

THANKS TO THE NORTHERN OHIO AMATEUR RADIO SOCIETY, NORTHERN OHIO DX ASSOCIATION, OHIO/PENN PACKETCLUSTER NETWORK, WA2FIJ, KQ4QM, WA4JQS, AA5AU, W5ZPA, DF4RD, DL7VOA, DL9GOA & DX NEWS LETTER, F6AJA, G4BUE & DX NEWS SHEET, I1JQJ, IK1DPA, JR0GFM, ZL2DX AND ZS1AFZ FOR THE FOLLOWING DX INFORMATION.

3V, TUNISIA

HRANE, YT1AD, WILL BE ACTIVATING THE CLUB STATION 3V8BB FROM MAY 23-30TH. BAND ACTIVITY AND OPERATIONS ARE UNKNOWN AT THIS TIME. QSL TO HIS HOMECALL.

9A0, CROATIA (ATTENTION PREFIX HUNTERS!)

THE DXNS REPORT 9A0CW WILL BE ACTIVE IN THE CQWW WPX CW CONTEST. THIS WILL BE THE FIRST TIME THAT THE 9A0 PREFIX IS TO BE USED). QSL VIA 9A2AJ.

9M2, WEST MALAYSIA

PRESENTLY THERE ARE PLENTY OF 9M2 STATIONS ACTIVE DAILY BETWEEN 1200 AND 1700Z ON 20 AND 40 METERS. 9M2JJ CAN BE FOUND ON 40 METERS CW, WHILE 9M2IY AND 9M2/G4JVG CAN BE FOUND ON 20 METERS SSB SOMEWHERE ON THE BAND.

9M8, EAST MALAYSIA

CHANG, 9M8FC, CAN BE FOUND OPERATING CW ON 20/30 METERS BETWEEN 1330 AND 1830Z. QSL VIA CBA (1995).

FO, CLIPPERTON ISLAND DXPEDITION 1997

JAY, WA2FIJ, HAS REPORTED HE IS INTERESTED IN RETURNING TO CLIPPERTON (PROJECTED DATE IS AROUND MARCH OF 1997). IT HAS BEEN 5 YEARS SINCE THE ACTIVATION OF CLIPPERTON. JAY IS TRYING TO KEEP COSTS DOWN BY LOOKING FOR HAMS OR FRIENDS OF HAMS WITH BOATS CAPABLE OF MAKING THE TRIP. THE LAST TRIP WAS ON AN 88 FT. POWER VESSEL AND WAS COMFORTABLE, BUT EXPENSIVE. IF A FEW 45/55 FT. SAILBOATS COULD BE FOUND, A FLOTILLA COULD BE

ESTABLISHED WHICH WOULD RESULT IN (1) CAPABILITY TO CARRY

ENOUGH GEAR AND PERSONNEL AND (2) IMPROVED SAFETY.

IF YOU KNOW OF ANY HAMS OR FRIENDS THAT MAY HAVE ACCESS TO A

BOAT THAT CAN MAKE THE TRIP AND WOULD BE INTERESTED IN

PARTICIPATING IN SUCH AN ADVENTURE, PLEASE DROP JAY A LINE VIA

INTERNET: PCB4UIX.NETCOM.COM

F6EXQ AND SOME OTHERS WILL BE ACTIVE AS F6KSA/P FROM CORDOUAN

ISLAND (IOTA EU-159) LOCATED IN THE AQUITAINE REGION GROUP,

FROM JUNE 28TH TO JULY 5TH.

COMING EVENTS

MAY 11TH-12TH VOLTA RTTY DX

JUNE 8TH-9TH ANARTS WW DIGITAL

Why not post results in this format. Some of us do not have web sites or access but read these posts religiously. It would help spread the message whatever it is. Just curious.

Can't do that it would annoy my wife.

That certainly was not the way he put it and no one else had a word to say. I don't have any feelings toward you either way just toward your hateful postings to people who don't like code. By the way nice partial quote you forgot the part about you never rising to the Challenge.

You do bring out the nasty in me and I don't really like it so I think I'll give it a rest. You may delude yourself that you have won if you like with my compliments. By the way want to have a little wager my Amateur Extra before you finish the PhD. Didn't think so.

My apologies to the rest of the group for the bandwidth

The CW bands are the lower portion of 10 12 15 17 20 40 and 80 meters along with all of 30 meters by band plan. They further are the first 100 kHz of 6 and 2 meters by regulation. In the HF bands we are constrained by "Good Amateur Practice" to not operate SSB/Data in the portions of the bands reserved for CW. No such constraint is placed on the CW operator who may operate that mode where ever his license priviledges allow him to operate. There might have been a question about this on the Advanced test I don't remember. Thought you would know this stuff.

The CW bands are the frequencies that you can only use CW in.
3675-3725khz, 7100-7150khz, and 21,100-21,200khz are such bands.

The following HF frequency "bands" are allocated for exclusive use by CW and RTTY/Data. I have shown the Amateur Extra class allocations as they are the largest.

80 Meters - 3,500 to 3,750 Mhz
40 Meters - 7,000 to 7,150 Mhz
30 Meters - 10,100 to 10,150 Mhz
20 Meters - 14,000 to 14,150 Mhz
17 Meters - 18,068 to 18,110 Mhz
15 Meters - 21,000 to 21,200 Mhz
12 Meters - 24,890 to 24,930 Mhz
10 Meters - 28,000 to 28,300 Mhz

Note again that these are not the only frequencies that can be used for CW/RTTY/Data, but they are the frequencies where no other mode can be used.

Depends on your license class. Generals and above can operate
RTTY/data on those frequencies as well.

Somebody said:

>>
Okay; so the guy gives up a technician license,
pays a $500 fine and cooperates with authorities. That means he'll be
back on CB as long as it takes to get to Radio Shack!
>>

Not so. Part of his "agreement" with FCC was that he
"shall refrain for the remainder of his life from engaging
in any transmissions in the Citizens Band Radio Service."

Further, the FCC has put the following "teeth" in the order,
just in case Foret violates the agreement.

"12. Foret agrees that any violation of the Order or of this
Settlement Agreement shall constitute a separate violation of
a Commission order, entitling the Commission to exercise any
rights and remedies available for enforcement of a Commission
order."

"17. Foret acknowledges, understands, and unconditionally
accepts that any transmission by him, however brief, in the
Amateur Radio Service or Citzens Band Radio Service..(snip)
may subject him to severe adminsitrative sanctions (including
...<snip>... the imposition of substantial monetary forfeitures)
and/or criminal prosecution by the United States Department of
Justice."

In other words he's been warned "don't screw up!".

Jerry, the address is not a fake. I checked it out. I am in Guam.
It's a real address. The above statement carves the fact in stone
that you don't much about licensing requirements. W5YI has a
VE group in Tokyo, composed of Japanese hams. Other Japanese hams
take the test in Tokyo. Most Guam call signs are issued as
souvenirs - to people that have never been here and never will
be. The FCC could care less who you are or where you are when
you apply for a license.

I missed the Challange Cup last year, Jeff. Let's do it again
to keep things from getting too boring. Don't want Burt to
fall asleep.

Hey Spew, my dad drives a new Cad - he gets a new one every two years.
He also has three homes: Palm Springs, Studio City, and Maui. And he
takes neither SS nor Medicare. Know why? He quit school at 15 and worked
18-hour days for half a century in a business he and his brothers built with
their hands and their sweat. Now he's enjoying the money he earned.
Their type of work ethic is what made this country prosper after WWII.

If you're an example of your generation's work ethic ("Gimme HF but don't
make me learn the code!") then God help this country's future.

I gave a presentation at the New England DXCC dinner last October, the topic of which was how the Internet applies to DXing. At the time, I had collected E-mail addresses from amateurs in about 80 DXCC countries.

Today, that list of E-mail addresses has surpassed 120 countries, so one could conclude that is is possible to work DXCC via the Internet. Remember, these are hams who have Internet accounts in those countries. I am aware that more countries are reachable via the Internet, however, there must be a ham at the other end!

You can visit the list on the World Wide Web:

http://www.tiac.net/users/ad1c/internet-dxcc.html

A shameful Gerald Schmitt, finally conceding that he's lost, wrote:
>Poor Jeffrey Herman, continuing to brush off false accusations, wrote:
>>Mean Gerald Schmitt continuing his love/hate feelings, wrote:

>>>At least I told the truth
>>>on my 610 form about my address that't more than some people can say.

>>Drop me a note at my Guam *mailing* address - it will get to me. But
>>make sure it's not a love note - I detest gay advances.

>You have your mail sent to Guam!!

Guam is my FCC mailing address.

>And why the homophobic remark this issue never came up, you have a
>problem or something?

Your continuing interest in my personal affairs leads me to believe
you're attracted to me. Go get your head examined, okay? I have a girl-
friend - I'm not one of your kind.

>>>Living in Hawaii with a phoney Guam call a study in ethics.

>>Phoney? My residential address is in Hawaii. My FCC mailing address
>>is in Guam.

Gee, I *knew* I told you that already!

>You live in Hawaii and your mailing address is in Guam!! Give it a rest

No no no. My FCC mailing address is in Guam. Other correspondence comes
to my PO Box in Honolulu.

>it is an insult to this newsgroup that you expect anyone to buy this
>crap.

Uh oh - now you're talking about feces. You don't really let other guys
do that to you, do you?

>Give it a rest Jeff my call is advanced and yours is not

Ah, now you're getting the idea! One more time so you don't forget:
Pacific Area calls for Techs and Generals are KH#xx.

>You tried to run a con a few people
>thought you had upgraded you got found out and you're pissed. Tough

Hey, I'm having fun - I'm not pissed at all. Techs and Generals out
here get a KH#xx call. Why does that bother you? And the online

callbook gives one's license class. The whole world knew I was a General before and they still know.

I bet that if I had continued with my plans to teach in Guam this summer, you still would have found fault with my callsign in August upon my return. It's got to be this love/hate thing you have for me.

>Your attitude brings out way too much nastyness in me so I think I will
>give it a rest besides showing you to be a fool is much to easy.

Oh come on Jerry, don't quit now - this is great fun... Shoot, guess I have to go back to the code and BA debate now. Phooey.

>Jerry

Hey, how come you left out your callsign this time? Anyway, 73 Jerry - hope I didn't break your heart by rejecting your advances.

Jeff KH2PZ (Hey Jerry, as soon as Vanity opens for Generals I'll submit my list of vacant KH6xx *General* calls to the FCC - do you want to start this all over again then?)

930. West Valley Amateur Radio Association Meeting, Wed 5/15/96

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-13 00:00:00 UTC
From: ikluft@thunder.sbay.org
Message-ID: <DrBn92.AF@thunder.sbay.org>
Source record: 225621
Cross-posted to: sbay.hams,sbay.general,ba.general,rec.radio.amateur.misc

West Valley Amateur Radio Association
Meeting Announcement

Time/Date: 7:30PM, Wednesday, May 15, 1996
Location: Cambrian School District Offices, 4115 Jacksol Dr, San Jose
Topic: Microwave Experimentation
Speakers: several - see below

The next meeting of the West Valley Amateur Radio Association (WVARA) will be Wednesday, May 15, 1996 at 7:30PM at the Cambrian School District Offices (4115 Jacksol Dr) in South San Jose, near Los Gatos and the interchange of Highways 17 and 85. (More directions below.)

The subject of the May WVARA meeting will be Microwave Experimentation. The following speakers are scheduled:
* Bob Warmke W6CYX will tell us about his 2.4 GHz repeater. There are only two known 2.4 GHz repeaters in North America and both are in the Bay Area.
* Bill Rausch AA6PA will talk about Satelites and Microwaves.
* Rod Roderique WA0QII will tell us about 5.7 GHz.
* Russ Bentson K6KLY will give a 10 GHz demonstration.

Thanks to WVARA members Mike Polkinghorn KD6PUD and Mike Sunseri AB6CW, there will be surplus microwave dishes given away as door prizes.

In, addition, we haven't confirmed this but there may be a visit from the World Radiosport Team Championship committee, looking for host stations for the competition which will be held in the Bay Area in July. DX teams from around the world will compete using comparable HF stations hosted by Hams around the Bay Area. (They'll bring their own radios but the antennas need to meet the competition guidelines.) Last we heard, more host sites were needed. There will be more information at the meeting.

Visitors and guests are always welcome to attend WVARA meetings. We hope you'll consider joining.

Additional information about the WVARA and the meeting are available during the WVARA's weekly Nets, Tuesday nights at 8:30PM on the W6PIY VHF repeaters (frequencies listed below.) Visitors are welcome to check in with their name, callsign and city during the guest check-in portion of the Net, to let us know they're listening and to share any messages with the other participants of the net. Visitors with questions should add, "with a question", when they initially check in. Net control will come back to all the requests in order after check-ins are done.

Directions to the Meeting Location

Note: these directions apply to the May meeting. In June through August, we'll meet at a different location (the Children's Discovery Museum auditorium) when the school district offices are closed for the Summer. We'll return to this location for the September through November meetings.

FROM HIGHWAY 85: exit at Bascom Ave. Take Bascom northbound. Turn right at the first light, Woodard Rd. Then turn right at the second stop sign, Jacksol Dr. The Cambrian School District Offices will be on the right in 1-1/2 blocks. The Board Room is in the back.

FROM HIGHWAY 17: exit at Camden Ave. Take Camden eastbound. Turn right at the second light, Bascom Ave. Then turn left at the first light, Woodard Rd. Then turn right at the second stop sign, Jacksol Dr. The Cambrian School District Offices will be on the right in 1-1/2 blocks. The Board Room is in the back.

Talk-in will be available before the meeting on any of the association's W6PIY repeaters. (See below for frequencies.)

WVARA Calendar

Weekly Events of the Association and Special Interest Groups (SIGs)
WVARA Net - Tuesday at 8:30PM on the W6PIY VHF repeaters
Contact president@wvara.org (Ian KO6YQ)
DX SIG Net - Mondays at 9PM on the W6PIY VHF repeaters
Contact dx-sig@wvara.org (Mike KD6PUD)
VHF/UHF SIG Net - Tuesday at 7PM on the W6PIY VHF repeaters
Contact vhf-sig@wvara.org (Chris KE6WJV)
Packet SIG Chat - Thursdays at 8PM, connect to N6ST on 146.595
Contact packet-sig@wvara.org (Dan KE6RRU)

In progress: April 29 - June 5, WVARA 1996 New Ham classes
Location: Monta Vista High School, Cupertino
Contact: education@wvara.org (Mike KE6MRE)

May 15: WVARA meeting, subject: Microwave Experimentation
Location: Cambrian School District Offices, South San Jose

June 8: WVARA Great America Day - celebrate with the graduates of the 1996 WVARA New Ham class!
Location: Paramount's Great America, Santa Clara

June 19: WVARA meeting, subject: Field Day (including video on contesting)
Location: Children's Discovery Museum auditorium, Downtown San Jose

June 22-23: Field Day
Location: WVARA's W6PIY Field Day site in the Santa Cruz Mountains
URL: http://www.kluft.com/~ikluft/ham/wvara-fd.html
Contact: field-day@wvara.org (Stephen KE6GDA)
Volunteers slots still open to operate HF CW & phone, VHF/UHF/microwave and satellite. Visitors welcome.

July 17: WVARA meeting, subject: Packet APRS
Location: Children's Discovery Museum auditorium, Downtown San Jose
Speaker: John Crane KD6JUH

July 20: WVARA Summer Picnic and 40th Anniversary Special Event Station
Location: TBA

August 21: WVARA meeting, subject: TBA
Location: Children's Discovery Museum auditorium, Downtown San Jose

September 14: WVARA hosts the Foothill College Electronics Flea Market
Contact: flea-market@wvara.org (Glen KE6NBO)

September 18: WVARA meeting, subject: What's New on the Internet
Location: Cambrian School District Offices, South San Jose
Speaker: Ian Kluft KO6YQ

October 16: WVARA meeting, subject: Annual "ARRL Night"
Location: Cambrian School District Offices, South San Jose
Speakers: Rod Stafford KB6ZV, ARRL President
Brad Wyatt K6WR, ARRL Pacific Division Director
Jim Maxwell W6CF, ARRL Pacific Division Vice Director

November 20: WVARA meeting, subject: Restoring Antique Radios
Location: Cambrian School District Offices, South San Jose
Speaker: Mike Sunseri AB6CW
WVARA 1997 elections will also be held at the meeting

About the WVARA

The West Valley Amateur Radio Association is a non-profit, educational and scientific association. It was established to promote interest and furnish instruction in Amateur Radio. Celebrating its 40th anniversary this year, the association welcomes anyone of all ages, licensed or interested in Amateur Radio, to join.

The WVARA has four repeaters, though it's more than just a repeater club. The W6PIY VHF repeaters are linked between 147.39+ PL156.7 and 223.96- PL156.7. The W6PIY UHF repeater is on the test pair 441.875+ PL88.5. (There are other repeaters at different PLs on the same test pair.) The W6PIY 1.2GHz (microwave) repeater is on 1286.2- PL100. All of the W6PIY repeaters are located on Good Samaritan Hospital in South San Jose and have coverage across the South Bay Area.

The WVARA meets at 7:30PM on the 3rd Wednesday of each month except December, when the association holds a holiday party instead. The meetings are held at the Cambrian School District Offices Board Room in South San Jose except in the Summer months (June, July, and August) when it is held at the Childrens Discovery Museum's auditorium in Downtown San Jose.

An informal gathering for food usually occurs before each meeting at 5:45PM. The location of the get-together is announced on the weekly Net and talk-in is available on the W6PIY repeaters.

Lots of guys argue along the line, that CW is outdated in the age of the computer. However, international conventions require that HF operating privileges include the capability of understanding one digital mode of transmission. CW is such a digital mode (else computers wont understand it)... I wonder, if those who vouch for abolishing CW for HF privileges will really be capable to copy 300 baud RTTY or 1200 ASCII ... I dont mind, if those who want to skip CW get it skipped and get some RTTY oder ASCII signals fed to their headphones. And if your fingers are really trained, you even might master keying ASCII in a sensible way.

Lets replace CW by straight keyed ASCII :)

Its tiresome to have to reprove you for your epithets; probably you're incorrigible. Ah well, hope springs eternal.. One hopes kill files are growing all over the net, but in case they aren't...

Your arguments aren't really reasonable, but ought to be refuted publicly since you make them in a public forum. It is doubtful that your numerical assertion is correct, but even if it were, it is irrelevant. Jews suffer disproportionately from Tay-Sachs disease and Blacks from strokes - so we might expect you to attempt to justify discrimination against them on that basis as well?

>Peter Lansing AA8KT

To the contrary, I can understand the ARRL's reluctance to publish this survey because not only was the methodology undertaken to conduct the survey flawed, but the author is technologically ignorant.

There was no indication that the author took the effort to ensure that the questionaires were distributed on a random sample basis and to the complete population of amateurs. I suspect that the call for the questionnaire was announced in one of the newsgroups and only those who would respond would do so. Such passive sampling technique is unacceptable, particularly by means of using the Internet, because the target opinions would not be drawn from all amateurs, only those who were interested in providing answers and also had access to the newsgroup in question. This methodology alone invalidates the survey.

Another concern is the small size of 54 respondents. 54 respondents out of a population of 600,000 amateurs in the United States is much too small in order to derive any sort of information of value. A sample size of 54 out of 600,000 probably would result in confidence levels of approximately one to five per cent reliability indicator of population opinion. In other words, on a scale of one to ten, the chances that this survey would be a true reflection of the opinion of amateurs would be in the order of .1 to .5, statistically insignificant. The fact the the sample was not random would further decrease this confidence level.

In order to have any sort of validity, the random sample size should be at least in the order of 1500 to 2000 randomly-selected respondents.

Finally, the author's conclusions with respect to Morse code and other digital modes shows that the author is still unaware of the theoretical and practical advantages of many of the newer modes of digital communications over the Morse code. He is still labouring under that notion that "morse code gets through when all others don't..." I believe that Coffman has demonstrated a number of times in these newsgroups that mathematically this is no longer true. In addition, those of us who use these modes would tend to agree that Morse code is no longer the most robust mode of communciations. Therefore, it would be interesting to know the author's references that would uphold his view. Otherwise, it is only unsubstantiated opinion.

In summation, this survey is flawed because it lacks randomness which alone invalidates the conclusions. In addition, the sampling from the amateur population is too small in order to determine the opinions of the amateur licence population. Finally, the author is technologically ignorant.

It is annoying the such pseudo-surveys are propagated via the newsgroups because there are those who would take such statistics as gospel. They are not.

73 and live better digitally

They happen to be darn amusing. An old (1983 I think) catalog I have
lists a 5mb hard drive for something like $4999.95 - compare to a 2GB
drive available for ~$300.00. The times sure change...

That's why I used the quotes. You are right of course. I should have
referred to them as sub-bands.

I don't know what it takes to convince you, Mike. If you still think you can legally operate SSB at 3600 Mhz then more power to you. Part 97.305, which you like to quote, does NOT allow SSB operation on any amateur frequency. The fact that CW can be operated on any authorized frequency, and SSB cannot, simple logic tells you that there is a portion of the HF spectrum reserved for CW and other non-phone and image transmissions.

Time for another subject.

That's so lame it's pathetic. Suppose we take grandma out and shoot her.
Is there a certain age when this would be appropriate ? Aside from that,
when you fork over your hard earned pay, it goes under your social
security number. When you get ready to retire, you'll get a check. That's
what all those old geezers had to do too. It's their money that they are
spending, and they worked their asses off their whole lives for it. OTOH,
alot of refugees come to this country and qualify for assistance without
ever being a contributing member of society. If, you want to shoot them,
email me instead, and we'll talk.

Juvenile sniggering aside, there's another point to consider.

It seems that attacks against gays turn up here with some regularity. Some people object to the attacks with equal regularity. However, it seems that the objections to off topic posts appear only after someone confronts the gay bashers - not in response to the offensive posts themselves.

I'd rather see _no_ off charter posts. The occasional slightly off charter post doesn't seem to be worth a response; however persistent attacks seemingly motivated by hate demand a response lest silence be taken for acceptance or agreement. It seems to me that for a response to slander to be effective it must be made in the same forum and same volume as the posts that elicit the response; the same standard of appropriateness should apply to everyone equally.

So, hopefully, those who find this thread an annoyance will make judicious use of kill files and so spare themselves the unpleasantness.

Not to say that some members of that organization, or some Xtians, don't engage in egregiously intolerant behavior, but I doubt that the Christian Coalition as an organization (or Xtians generally) practices cross burning, lynching, or the other odious tactics of intimidation of the KKK.

Some gays actually do some of the things attributed to them here by the bashers. Their stereotyping of all gays on that basis is unacceptable. Likewise stereotyping Xtians. Stereotyping is no more acceptable on one side of the argument than it is on the other. Seems to me this thread could do with a little more decorum.

There are times when it's good to choose precision and neutrality over wit for a very simple reason. There are _thousands_ of newsgroups, and more prepared all the time, covering a growing subset of every conceivable topic. :-) The newsgroup hierarchy is intended to be descriptive. It's an index.

Compare it with the library card catalog. How often does the library use witty, punny, or otherwise entertaining subject lines rather than straightforward descriptions? Same principle.

There's an old (and too-often neglected) alt.config comment that "Jokes should be in the newsgroup, not the name of the newsgroup". Well, it's true for the Big 8. As nearly as I can tell, "boatanchor" is a bit of humor. As such, it's not really appropriate for a newsgroup name.

Guess I will follow up to everyone here.

Depending on where you lived, landline and cellular phone calls could not be placed for one to two hours after the earthquake occurred. As I noted accurately in the online story, this occurred because of system overload. The story is very straightforward, points out that only minor (or moderate if you lived near the epicenter) damage occurred and does not overly dramatize the situation.

If you are suffering a medical emergency during a phone outage, you don't care if the phone is out because of overload or breakage - bottom line is you can't call for help. I, in fact, suffered a medical emergency earlier in the day that the earthquake occurred and was very much aware of the importance of having an operating communications link. Incidently, the next day, a heart attack occurred two blocks from my house (which sadly, ultimately proved fatal)? Who are you going to call when an emergency striks and your phone doesn't work?

The point here is that when the phones are out, the lifeline that people expect to use is not available. If you DO NOT have an emergency, then use of the phone does not matter to you. If you have an emergency, then it matters a big deal. Other disaster situations where phone service has gone out have shown that residents will attempt to drive to the nearest source of aid - typically a local fire station or police subdivision. Unfortunately, they didn't have communications either during this phone overload outage situation.

The local ARES/RACES plan is currently being modified to provide backup communications support at the site of ocal government agencies (e.g. fire stations) during telephone outages. Even though there was no "major emergency" and no one died - the point remains - a hell of lot of people could not have

called for assistance if they had needed to. That is the kind of communications outage for which ARES/RACES should be providing solutions.

This quake is yet another reminder to have the proper plans in effect *before* someone gets injured or dies. The story seems useful to others who are also designing emergency prepardness plans.

Incidently, since a few readers don't get it: Ham Radio Online is a hobby - it is free to you, self-funded, no advertising. Its an online ham resource. Some people build repeaters for other's to use - we decided to build an online ham radio resource instead.

I heard that the LAMBDA club offers a special "FUDGEPACKER INTERNATIONAL"
award to it's members.

To be elligible for this prestigious award, a LAMBDA member has to "work"
hams in at least 50 foreign countries, using antennas which exhibit a
high "front-to-back" ratio. Preferred mode of operation is "PACKITT"
Successful completion earns the LAMBDA member an official "FUDGEPACKER
INTERNATIONAL" award to display proudly in his ham shack as well as a
free AIDS test at the nearest neighborhood clinic.

That's because they're in the way, taking up space and spending us dry with their entitlements from Social Security, Medicare, etc. Down here in Florida, the "greedy old geezers" are everywhere. It makes me sick to watch them drive their new Cadillacs from their new homes to the golf courses every day while I fork over 15.3% of my hard-earned pay in order to provide for their Social Security and Medicare.

There is a generational war brewing in this country, make no mistake about it!

But Dick, there -are- no CW bands! There are only voluntary places where CW operators hang out. If you want more room for SSB than that room will necessarily come out of the allocations of the RTTY/data crowd.

Following "Good Amateur Practice" we don't operate SSB/Data in the CW portion of the bands. I am sure if we did it would cause an awfull fuss. However the CW ops are free to go anywhere they please and that is still "Good Amateur Practice". My original post just pointed out the irony of such an efficient mode have such huge allocations of the bands and then also being free to wander elsewhere. Based on use and bandwidth required room should be taken from CW/RTTY for SSB/Data.

As the only mode with its own competency exam and such a disproportionate amount of the spectrum reserved along with access to the rest on a whim CW is truly a mode on welfare. I think we ought to level the playing field a bit.

Hold it....
Just wait one minute!
K#xxx and W#xxx call signs were also assigned to Technicians, Generals, and Extra class licensees. NO NEW ADVANCED CLASS LICENSES WERE ISSUED from 1954 through to the advent of "incentive licensing" in the late 1960's, when a new Advanced class license was initiated by FCC. During that time, the ONLY Advanced class licensees were those who had received their licenses prior to 1954. Holders of pre-'54 Advanced licenses were allowed to renew as Advanced class licensees (all licenses were for a 5 year term). Conditional class licensees (remember them?!?) also were assigned call signs from the aforementioned call sign blocks.

Borrow a GOOD thruline wattmeter, and set your radio to 445.0, then
trim a 2m antenna for min VSWR. You will then have an antenna
that works as a 1/4 wave on 2m or a 3/4 on 440.

976. Tucker Electronics Radio Repair?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-14 00:00:00 UTC
From: Saad Mahaini <5606939@MCImail.com>
Message-ID: <4najdf$sc3@news.internetmci.com>
Source record: 225448

Last month, there was a thread on this news group about the radio repair shop at Tucker Electronics. All posting indicated dissatisfaction with Tucker's work quality, service response, and technicians lack of expertise. Tucker had my radio when I read these postings, so it was too late to reverse my terrible mistake of letting them service my radio. Well, I became another victim, and I paid the price.

I am extremely disappointed with Tucker Electronics radio repair services. The radio is currently at International Radio being serviced and aligned by the experts.

In case you are wondering about my bad experience with Tucker Electronics, I included my recent email to them in this posting. I am doing this as a curtesy advise to all of my fellow hams.

Bottom line, do not even consider Tucker Electronics for your radio repair. Just send it to the experts somewhere else.

Regards, Saad KB6VIR/5

TO: Manager - Tucker Electronics(EMS)
EMS: INTERNET
MBX: hams@tucker.com
Subject: Radio Repair Department - Customer Dissatisfaction
Message-Id: 94960501222449/0005606939PL1EM

Dear sir,

This is to inform you of my great dissatisfaction with your radio repair services. The following is a summary of my problem:

Few weeks ago, my kenwood TS930SAT quit transmitting. I inspected the radio myself and determined that the problem was in the finals (PA) board. I replaced one power driver transistor and couple resistors, that were burnt. The board still did not work, so I decided to take it to the local Kenwood authorized repair shop (the experts) at Tucker electronics.

I called your technician about one week, after I delivered the radio to your service department. I was informed that your service department can not repair the radio, and I was asked to pick it up. Along with the radio, your technician give me a small plastic bag with various components (transistors, resistors, screws, spacers, etc.), that he

removed from my radio. Worst of all, I had to pay Tucker Electronics $43+ for all of these great services.

In plain English; "Tucker Electronics refused to fix my radio after they removed a bunch of components from the board, put them in a plastic bag, put the radio back together, asked me to pick it up, and then charged me $43".

Your technician indicated that the board had severe burns and damages. I inspected the board afterwards, and only found a very minor black spot (smoke stained area) on the top side of the board. This spot is right below a removed resistor next to one of the driver transistors. Similarly, he reported the presence of white corrosion on the module, which is in fact just heat sink white silicon not corrosion. Also, I noticed that the board was slightly damaged during your technician's attempt to repair it. A PCB eyelet (feedthru) was broken off, which appeared to be a result of high soldering heat applied to it.

Bottom line, I was extremely disappointed with the service that I received from your repair shop. I am now convinced that your technicians are not professionals nor experts in the radio repair field.

Regards, Saad Mahaini KB6VIR/5

Bravo, Pat. You are the first to point out that in the amateur electronics context, boatanchors is _one_ word, not two!

There are many instances of combining words to make new ones with a meaning only distantly related to the roots. The resulting words are perfectly valid within their own context. Context is critical, and in the case of the proposed BA (note we don't write it B. A.) usegroup, the prefixes rec.radio or rec.radio.amateur precisely establish the context.

There have been suggestions that "boatanchors" is confusing to a non-english speaking 'netter. I suspect it is only confusing to those persons, regardless of native language, who don't also speak "amateur radio".

This is where the government really pulls the wool over the public's eyes.
True, the rate is 7.65% on the employee's earnings...BUT there is also
a levy of 7.65%, known as the employer's "contribution" on the same wages.
The effective rate of taxation is 15.3% since the employer would be
afford to pay his employee an additional 7.65% if it were not for the
taxes levied against the payroll.

>One big argument is that CW is an outdated mode.

What does "outdated" mean, aside from the fact that it ascribes the characteristic of being a mature technology that has been superceded for some purpose(s) by newer methods? This has no relevance to the usefulness of Morse in the Amateur Radio service. To define Morse as "obsolete" (as opposed to "outdated") would require that some newer technology be available that would surpass *all* the advantages of Morse. As yet, such technology does not exist.

Lots of people out there want to operate HF without learning code. It reminds me of someone who tries to get a University degree, without ever going to school. Learning CW really isn't that hard, it just takes time and patience. One big argument is that CW is an outdated mode. Perhaps, but so is HF in a way. If you don't want to learn CW, you can still talk around the world via satellite, or on packet.

|> not to load the article.

With some newsreaders/ISPs you just say which groups you are interested in
and all the news is automatically downloaded. With others you won't know
the size of an article until you look at it.

While I don't agree with the original complainer, I can see his point
about large articles. When a periodic posting gets large enough it ought
to be tucked away at some ftp and/or web site and just a reference to it
posted.

I am more disturbed about some of the followups, though. Besides rude
(name calling) and uninformed ("All newsreaders must be like mine") ones
like the above there was another person (whose sig IDed him as an
"Internet instructor" nonetheless) who said

> This is the nternet. It isn't your responsibility to be concerned
> because some people have access that costs them more money
> for more news. Post as you see fit.

Wow. Sure, post anything you want! Don't give a d*mn that you are
costing others money and grief! Use 100 line sigs! Add one line to
1000 line quotes from other messages! Spam to all the newsgroups
at once! Make Money Fast!! Sigh.

I'll be rock climbing in Yosemite Valley next week and was hoping someone could give me information on a 2m repeater, if any, that covers that area. If you would tell me the frequency, PL and whether it has an open phone-patch, I'd appreciate it.

Also, if you know the National Park frequencies/repeater splits, I'd appreciate that too.

Thanks,

John

SUBJ: IPS DAILY SOLAR AND GEOPHYSICAL REPORT
ISSUED AT 14/2330Z MAY 1996 BY IPS RADIO AND SPACE SERVICES
FROM THE REGIONAL WARNING CENTRE (RWC), SYDNEY.
SUMMARY FOR 14 MAY AND FORECAST FOR 15 MAY - 17 MAY

1A. SOLAR SUMMARY
Activity: Very low

Flares: none.

Observed 10.7 cm flux/Equivalent Sunspot Number : 71/6

GOES satellite data for 13 May
Daily Proton Fluence >1 MeV: 7.4E+05
Daily Proton Fluence >10 MeV: 1.6E+04
Daily Electron Fluence >2 MeV: 1.3E+06 (normal)
X-ray background: A2.3
Fluence (flux accumulation over 24hrs)/ cm2-ster-day.

1B. SOLAR FORECAST
15 May 16 May 17 May
Activity Very low Very low Very low
Fadeouts None expected None expected None expected

Forecast 10.7 cm flux/Equivalent Sunspot Number for 15 May: 70/5

2A. MAGNETIC SUMMARY
Geomagnetic field at Learmonth: Unsettled to active

Estimated Indices : A K Observed A Index 13 May
Learmonth 11 3222 2243
Fredericksburg 10 14
Planetary 12 14

Observed Kp for 13 May: 4343 2333

2B. MAGNETIC FORECAST
Date Ap Conditions
15 May 15 Unsettled to active
16 May 10 Unsettled
17 May 8 Unsettled
COMMENT: Unsettled to active conditions are expected for the
next day due to a small recurrent coronal hole.

3A. GLOBAL HF PROPAGATION SUMMARY

Latitude Band
Date Low Middle High
14 May Normal Normal Normal
PCA Event : None

3B. GLOBAL HF PROPAGATION FORECAST
Latitude Band
Date Low Middle High
15 May Normal Normal Fair
16 May Normal Normal Normal
17 May Normal Normal Normal

4A. AUSTRALIAN REGION IONOSPHERIC SUMMARY
Date T index
14 May 18

Observed Australian Regional MUFs:
Darwin: Near predicted monthly values.
Townsville: Near predicted monthly values.
Sydney: Near predicted monthly values until 8UT then 30-40%
enhanced.
Hobart: Near predicted monthly values.

Predicted Monthly T index for May: 10

4B. AUSTRALIAN REGION IONOSPHERIC FORECAST
Date T index MUFs
15 May 5 Near predicted monthly values to slightly depressed
for high latitude circuits.
16 May 10 near predicted monthly values
17 May 10 near predicted monthly values

|Richard Nacamuli (headwave@access.digex.net) wrote:
|: The Russians used to be into telepathy. What happened?
|: Give up? I suggest that we turn our antennas from the sky for
|: a moment and point them at our heads. We may be surprised by
|: what we find. Then again, maybe we won't.

DO NOT KEY your transmitter with the antenna pointed at your head.
Thought I'd point that out.

The russians were also into LSD, too. The thing the russians did was to
not read your mind, but read a part of their own. The information they
predicted was presupplanted in their subjects, and thet found they could
force the subjects to know what they were thinking. It was a total
disaster. You cannot read someone elses mind. Period. Any and all of the
latest techniques used have other means of propagating the information,
again, previously supplanted. So now you know. What you think you see in
the future might be someone else's vision of what he percieves he would
like to see happen, and this communal intellect is due to extraneous
circumstances, like media, and TV. Do not be tricked into believing that
anything, the future included, is etched in stone. Stone is a valiant
attempt to ensure stability in an otherwise unforeseeable circumstance.

Even the prophesies of biblical connotations include the standard
disclaimer. One must work to ensure that these things are true. It's not
only impossible to believe that they would have our fate predestinined,
but that such a large assembly of humanity would work at it with such
blind prejudice. Should we choose the route you have suggested, or accept
what you are saying as fact, will we then be guilty of the perpetration of
the incident ? Even in the book, it does say, "Young Men shall see
visions.", however true or untrue they may be for the circumstance. If you
haven't seen anything but this, then I don't think for a second that you
are totally convinced yourself that this is an absolute. Dissenting
opinions are always welcome.

|Richard, I just got back from a trip to Florida, where we held a
|frequency counter up to Drew's head for over an hour. Nothing,
|Nada, Zip.....

I should dare to suggest, "Perhaps something in a spread spectrum ?".

>??? 80 is *full* of people like that. Venture on to the voice bands
>sometime and get an earful. Code is not, and has never been, a lid filter.

Full? That's rather strong. Tonight, why don't you tally up the number
of frequencies the riff-raff are occupying. But again, you won't hear
any of that stuff in the CW portion of the band.

I am not one of the "Code is a lid filter" folks, for I truly believe
that anyone with normal faculties can learn it. My hypothesis has always
been that those who use the code tend to be better and more polite ops.
In 20 years operating CW on HF I've never encountered the bums you folks
complain about on SSB.

>>>That the CW subbands are more polite, or that the CW
>>>ops are better ops ...

999. HamComm Bailout?

Newsgroup: rec.radio.amateur.misc
Date: 1996-05-14 00:00:00 UTC
From: Matt Thomas <mthomas@why.net>
Message-ID: <31993DCF.3394@why.net>
Source record: 225471

I recently was told that Cushcraft, AEA, Kantronics, as possibly others either have or are seriously considering bailing out of next month's HamComm in Arlington (TX). I did notice in the HamComm mailer this year, several empty booths in the "new dealer" area. Is this the result of the HamComm's outrageous booth rates or downturn in overall ham radio sales, or both?

The $14 admission price this year has finally exceeded my tolerance threshhold (so what that it includes parking). The dealers don't really offer much discount (why should they, they could stay at home and probably make more money answering their 1-800 numbers on Sat.), and used gear prices are inflated to no doubt cover the seller's high table and admission costs.

Small hamfests are still the best! Hurry up Gainsville, Wichita Falls, Belton.....

>Again, it must be pointed out that the small percentage of HF riff-raff
>conduct their bad behavior on SSB and not code. That we even have riff-raff
>means anyone can pass the code tests.

No, it proves that riff-raff can pass the code tests. Morse Code is one type of skill; being able to troubleshoot an electronic device is another thing entirely, and being able to behave oneself in public is likewise unrelated to the other two. It's entirely possible to excel at any two of the above while being utterly useless with regard to the third.

"insurance", I didn't mean something to totally care for every detail.
SS was intended to be supplemental income for those over 65. The
criteria for eligibility is that you've reached retirement age.

:: you want someone to tell your survivors
:: that your life insurance won't pay, just because the insurance company
:: thinks they don't need it? Sure, let's apply a "means test" to your
:: family's benifits. While we're at it, why not for salaries, too?
:That's also one of the problems the SSA caused is turning the program
:into life insurance instead of old-age supplimental income.

:I said I'd walk away from it if the government would let me. And as far
:as salaries go, if my employer were to give me a means test, I could
:walk away from the job and find something else. We don't have that
:option with SS.
Again, my point is that it's a supplement that's been paid for; just
because someone _plans_ for having more than the supplement they shouldn't
have to forfeit it.

::: Of course, people my age and younger are completely screwed, what can be
::: done? I suggest that at some point, Uncle Sam will have to say, "Sorry
::: PAL, nothin' for you." To soften the blow, we should be granted
::: tax amnesty for our IRA and 401K/403B withdrawls.
::Just how old are you (I'm trying to figure out if I'm completely screwed
::or not)? It may very well be true that there'll be nothing left for me
::when I turn 65 (70, 75?), or that I'll have to rely on my own savings
::to retire. So what?
:I'm 38. "SO WHAT???!!!" So how about you mail some money to ME if you
:don't care if you ever see it again?
Oh, darn! I guess I'm screwed! I'm 36. It's not that I like to waste
money; I guess I just see the government/economics thing a little
differently. Every generation has its own set of problems passed down
from the previous generation -- we've inherited this problem. I'd
much prefer to see congress acknowledge their stupidity in having SS
managed by politicians instead of insurance actuaries, figure out how
much money SHOULD BE in the fund, develop a plan to replenish the fund
from the treasury, turn the whole thing over to a private-sector insurance
company to INVEST, and chalk is up as an expensive mistake. I doubt
that will happen.

:This is an interesting discussion. I don't see it as any arguement
:either. I'm one of the cynics that thinks SS is money down the drain
:(to me).
Agreed; there's no argument here. I also don't see where *I* will
likely ever get anything back from money paid into SS either; but I
don't see it as money down the drain - it has to come from _somewhere_.
Which gets back to the original point -- We shouldn't see the grey hair
in ham radio as a problem: I think we can agree that the financial
burden we bear to support their Social Security checks is due to
mismanagement by our government. We don't need to be starting
an inter-generational war as suggested by Drew. Hostility toward our
older hams is totally inappropriate for our hobby; we're here to
promote advancement of the state-of-the-art, friendship, and all
that good stuff.
I apologize for the length that this message has reached...
I'll shut up now and get off the soapbox.

FOR IMMEDIATE RELEASE

On May 15th, 1996 the Web site http://familyville.com will be opened to the
general public.

Designed to visually replicate an actual city, Familyville offers resources,

yellow and white pages and well-organized links to many sites on the World
Wide Web.

More than just another search engine, Familyville offers a wholesome place where
the entire family is welcomed in a setting which reflects the family values of
many Americans. Pornography is not allowed nor linked in the Familyville
domain.

Drop your kids off at familyville and you don't have to worry about them.

Run for Mayor - or City Council. Have a building named after your company, or a
street. If you are a fireman you can link your homepage at the Fire Hall. A
Nurse - link at the Hospital.

Register to be listed in the National Directory or Yellow or white pages.

For more information contact

>modern platform (Win, Win95, OS/2)?
>
>73 de Raymond, LA7EHA

Hello Raymond..

I�m using a new program that is running under windows.. It�s called
EASYLOG and it it verry good both for HF and for VHF for example can it
handle gridsquares verry good you can see directly wich squares you
worked on 6m,2m,70cm,23cm and count them for them self. One other big and
verry good thing is that the company who sells the product converts your
old log into this new one for FREE !!! .. if you want to try a demo
version you could get it from my homepage:

http://www.angelfire.com/free/SM7VHS.html

It can also handle DXcluster at the same time as you are logging.. TRY IT

best regards de SM7VHS /Martin

Ditto for me...LOSA should be posted here..that way more
readers will be able to work with embedded controllers. Just reading
what others are doing is helping others get started. The stamp has
paved the way for things to come..New paradigms are always
resisted by those who are established in the old ways of doing things.
Oh yes...I've done my share of assy, eprom burning and it was the
main thing that kept a lot of otherwise able technicians/hobbiests
and researchers out of the field..Not anymore.

Hi gang:

I saw this article in the latest(?) edition of the Colorado Connection newsletter, who received it from the Longmont ARC Newsletter called "The Splatter". The Colorado Connection has taken the liberty to alter the original, a sure way to score more LID points. Don't forget it's meant in the spirit of fun. We need to lighten up!!

(I couldn't have said it better myself)

"HOW TO SOUND LIKE A _LID_
By Rusty Bumpers, N0LID

Lately, on two meter FM, I've noticed a tendency of more and more people making a concerted effort to sound like a LID (i.e. Poor Operator). Since this appears to be the new style in the amateur community, I thought I would present this handy guide to radio nerddome. The following is what I call "How To Sound Like a LID in one easy lesson". If you follow these simple suggestions, you're sure to become a LID in no time at all.

1): Use as many Q signals as possible. Yes, I know they were invented solely for CW and are totally inappropriate for two meter FM, but they're fun and entertaining. They keep people guessing as to what you really meant. i.e. "I'm going to QSY to the kitchen". Can you really change frequency in the kitchen?? QSL used to mean "I am acknowledging receipt". Now it appears to mean "yes" or "OK". I guess I missed it when the ARRL changed the meaning. I especially like hearing somebody say "I'll be at my QTH in twenty minutes". I've been wondering that say this are having an out-of-body experience and it's going to take them twenty minutes to get back.

2): Never laugh when you can say "hi, hi". No one will ever know you aren't a long-time CW ragchewer if you don't tell them. They'll think you've been on since the days of Marconi.

3): Always say "N0LID for I.D. (Insert your own call). Anything that creates redundancy is always strongly encouraged. I thought that saying one's callsign was already for I.D. but what do I know? That's why we have the Department of Redundancy Department. Please note that you can follow your call with "for identification purposes" instead of "for I.D.". While talking longer to say, it's worth far more LID points.

4): Utilize an alternative vocabulary. Use words like "destinated" and "negatory". It's okay to make up your own words here. "Yeah Bill, I pheelbart zaphonix occasionally myself".

5). When you attempt to make contact with one of your pals and they don't answer, always say "Nothing heard, this is N0LID clear". (Insert your

own call) Those listening won't have heard anything either. At least they'll know their hearing is okay.

6): The better the copy on two meter FM, the more you should phonetically spell your name, especially if it's a short and/or common one, i.e. "My name is Al - Alpha Lima" or "Jack - Juliette Alpha Charlie Kilo". If at all p possible, make up unintelligible phonetics. "My name is Bob - Billibong Oregano Bumperpool".

7): Whenever possible, use the wrong terminology. It keeps people guessing. Use "modulation" when you mean "deviation" and vice-versa. And even if the two-meter FM amplifier you're using is a Class C type amp, and thus not biased for linear amplification, be sure to call it your "linear". Heck, refer to all FM style amplifiers as "linears". You'll be king of the "wrong terminology" hill.

8): If someone asks for a break, always finish your turn, taking as long as possible before turning it over. Whenever possible, pass it around a few times first. This will discourage the breaker and, if it's an emergency, will encourage him to switch to another repeater and not bother you. You'll be racking up those LID points like crazy, on your way to being king of the LIDs.

9): Always give the calls of yourself and everyone who is (or has been) in the group, whether they are still there or not. While this has been unneccessary for years, it's still a wonderful memory test.

10) Always ask involved questions of the person who is trying to sign out. Never let him get by with a yes or no answer. Make it a question that will take a long time to answer. If you can't think of a good question, just make sure turn over a round table conversation to one of the ex-participants. You'll have LID points galore and impress your friends when you acknowledge somebody who checked out of the conversation. This will confuse everyone enough that the repeater will stay silent for awhile.

11) If you want to break into a conversation, just say part of your callsign. Do it real quickly, especially if you think the people already using the repeater aren't paying attention. Just jump in and say "LID" (Insert your own suffix). The FCC doesn't really care if we use our callsigns, they only issue them so we could have those cool amateur plates on our cars. When you break into a conversation this way, somebody's bound to ask for your entire call. This ties up more repeater time and you score more LID points.

12) The less you know about a subject, the more you should speculate about it on the air. The amount of time spent on your speculations should be inversely proportional to your knowledge.

13) If someone on the repeater is causing interference, you should talk about that person at great length, making sure to comment on at least four out of six of the following: (a) His mental state; (b) His family; (c) His intelligence or lack of same; (d) His sexual preference; (e) His relation-ship to small animals; (f) His other methods of self entertainment. Make

sure you threaten him if he says something vulgar. This way you're sure he'll stop immediately.

14) If you hear two amateurs start a conversation on a repeater with an auto-patch, wait until they're 20 seconds into their contact, then break in to use the patch. Make sure that it's only a simple routine phone call. It's also very important that you run any autopatch for the full three minutes. This way, once the two amateurs you interrupted re-establish contact, they won't remember what they were talking about.

15) You hear someone on the repeater giving directions to a visiting amateur. Even if the directions are good, make sure you break in with your own "alternate route but better way to get there" version. This is the most effective if several other LID trainees join in, each with a different route. By the time the amateur wanting directions unscrambles all the street names whizzing around in his head, he should have mobiled out of range of the repeater. This keeps you from having to stick around and help the guy get back out of town later.

16) Use the repeater for an hour or two at a time, preventing others from using it. Better yet, do it on a daily basis. If you can't use it for that long regularly, make sure you talk about the same things you've talked about for the last two months. You never know, somebody might not already know that your Aunt Millie had her gall bladder removed. Your quest is to make people so sick of hearing your voice every time they turn on the radio, they'll move to another frequency. This way you'll lighten the load on the repeater, leaving even more time for you to talk on it.

17) When you sign, be sure you say "seventy-threes". Originally, the term "73" was intended to mean "best regards". The english language is deteriorating anyway, so why not tell somebody "best regardses". Sounds wonderful to me. This is similar to "SWR's". I enjoy people discuss the SWR's of their antenna systems. "Well Billy Bob, the SWR's of my antenna is 1.6 to 1". My antenna only has one standing wave ratio. Sometimes it isn't very good, but it's the only one I've got. Did you ever wonder where these guys keep their other SWR's they never tell you about?? I have.

Just using a few of these easy steps should put you well on your way to LID-hood I hope these helpful hints will save you some time in your quest to sound like the perfect LID.

73's de N0LID (For identification purposes only)

P.S.: "Rusty Stumpers" is a pen name. He maintains anonymity so he can sit peacefully at club meetings and avoid the wrath (and breath) of the uniformed.

==========

With that, *I'm* going to put on my LID-hood hat by saying "Best Regardses for you my friends"!! :-)

73's for now my friends!!

>a packet BBS machine or something.
>
>I use dirty words off the air as much as anyone else does, but not
>ON THE AIR. Guess I don't like to see radio equipment to be abused.

Welcome to the eras of budget-problems in enforcement! The FCC's attitude about this machine is that it provides a cess-pool, where all the effluent of Amateur Radio can congregate. It also provides an easy targeting situation should they actually decide to go after all the law-breakers, since they seldom stray from .435 and would be quite easy to DF down.

Now, in defense of the few individuals on .435 who DO set a good example, who do ID properly, who DON'T jam, who refuse to talk to the ELEPHANT/bargain with the ELEMENT..etc. You people are wasting your time, but it's YOUR'S to waste,

enjoy!

...when .435 is down, the drek, bootleggers, jammers and other scum all migrate to the various OTHER 2m machines; causing havoc EVERYWHERE! Think of it as a 'sacrificial-anode'...to prevent the spread of such nonsense..a small price to pay..and easy enough to cure, should the funds come available to the FCC to do so.

73!

Subject: ARES/Emergency Response Exposition - London, Ontario

I would like to take this opportunity to invite members of this list to visit the Web Homepage for a very unique Community Emergency Preparedness Project that I coordinate.

http://hamster.business.uwo.ca/~dcolvin/partners/part96.html

To be held May 10 and 11 in London, Ontario, Canada we would welcome all list members to visit. We are about two hours east of Detroit or west of Toronto. There's already been interest from the Internet community outside of our area to come visit.

Here's some details:

WHAT IS PARTNERS IN RESPONSE?

Amateur Radio, Police, Fire, Ambulance, Search & Rescue, Industry and Transit are all Partners in Response when a major emergency strikes a Community.

This emergency preparedness display provides the Community a chance to see the equipment and talk to the people that protects their Community. Partners in Response is also a great opportunity for paid and volunteer emergency response organizations to get to know each other in an information sharing environment. Originally organized as an Amateur Radio Club meeting at the London Transit garages, this exposition has grown to be a full community-based event. This year's location Westmount Shopping Centre, provides improved public accessibility and a much higher profile.

NATIONAL EMERGENCY PREPAREDNESS WEEK

May 6th to 12th is Emergency Preparedness Week in Canada. In declaring this special week, the federal government joins with several provinces

this year in an effort to increase public awareness of the need for individuals, families, municipalities, businesses and community organizations to prepare for emergencies of all kinds.

Every year Canadian communities are hit by large-scale emergencies and local disasters -- floods, forest fires, toxic spills, blizzards, tornadoes, and industrial accidents -- to name only a few of the natural and human-caused events that can threaten lives, property, the environment and the local economy. Local volunteers, teams of professional first responders, regional, provincial and federal organizations all have a role.

OBJECTIVES

There are four main goals for the 1996 event:

-Demonstrate to area residents the level of preparedness in the Region
-Facilitate the networking of responders and the documentation of resources
-Provide a demonstration of Amateur Radio to the public safety agencies and other interested officials
-Introduce the capabilities of agencies that respond to emergencies to the Amateur Radio community

ACTIVITIES

There will be upwards of seventy displays spread over the parking area across from Saunders Secondary School as well as throughout the Mall. We plan on having a wide range of things happening over the two days. There will be demonstrations including a US Coast Guard HH65 Dolphin rescue helicopter, and a National Helicopter Bell 222 medivac landing, police dogs, police explosives robots, repelling demonstrations, hazardous materials response demonstrations, vehicle accident extrications, and simulated downed aircraft tracking. Inside there will be videos, handouts, videos, and slides. And, you'll see Amateur Radio in action with capabilities such as television, data, and long range an Amateur Radio HF Special Event Station....

Rec.radio.amateur.equipment, however, might be a much lower volume,
higher signal to noise, and more appropriate group for this.

Subject: FCC Annouces Vanity Gate 1 Opening Date - May 31, 1996

>This is great news. I was afraid the FCC would give in to pressure and
>delete this portion.

>If one wants dad's Extra Class callsign, then first study study study to
>become an extra.

>Jeff KH2PZ

Well sort of. If dad kept his old class C callsign, then anybody
(except a novice) can get the callsign. It's not the type of license
that matters, but the CLASS of callsign.

Subject: Help with Kenwood TR-7625 Radio.

Hello all. I need some help with a Kenwood Radio that I purchased at a ham fest this weekend. What I need to know is how to set the tones in the radio. It has the tone board installed but the radio came without a manual. What I need to know is how to set the tones up on this radio. Any help will be appriciated.

Jim Kehler <pacrimgolf@saba.kuentos.guam.net> wrote:
>Jerry B. Altzman (jbaltz@news.cs.columbia.edu) wrote:
>: ??? Wake up? I'm sorry, how many gay people do you know? (I know quite a
>: few.) They want to get together, maybe, to discuss ham radio without being
>: told that they're a bunch of fudge-packers.
>I don't know many, I hope..... Glad you know a bunch. Keep them at
>your house, OK ?

Oh. So then, you're speaking from zero knowledge. I see now. Basically, you're farting all over the place.

>I don't know what they talk about Jerry Boy, the only group of Jewish

So why are your panties all in a wad about it?

>Good to hear your are magnaminious Jerry Boy, makes me feel better.

I wouldn't want to have ruined your whole weekend.

>From what you have been saying, I was starting to wonder if you were
>one of those fudge packers too......

Like, I give a rat's behind what you think I am.

> *Normal* people don't have to
>form groups for sexual purposes, because sex is something that only
>requires a male and a female.

Sez you.

>Ever heard about any *heterosexual* bath houses in San Francisco ?

Yes. So what?

>: Well, then, you're both stupid. No law against two people being equally
>: stupid on a particular matter.
>Stupid is as stupid does, Jerry Boy..... can't remember where I heard
>that.

It was a movie about a retarded person overcoming his mental deficiency.
You could learn a lot from that.

>: Fine. But what if I want to have anal sex?
>*Go* for it. Do it at *your* house, with whomever or whatever you
>please. Just don't do it in front of Rob's wife and kids at an
>ARRL meeting. Do your dog, do your vacuum cleaner, do whatever
>makes you feel good. Just keep it our of our face.......

So what? Rob's wife and kids don't have to go to LARC meetings in the first
place. Moreover, what makes you think that all that goes on at LARC
meetings is sex? You seem preoccupied with it.

>: They're not bringing fudge-packing to *your* radio clubs, they're forming
>: their *own*. They're doing exactly what you want! So what is the hubbub?
>There you go again, Jerry Boy. Did you *read* what started this
>discussion ? Nobody cared about the fact that the 'boys' started their
>own radio club, the discussion started over the fact that the saviors
>of our hobby, the guys we *all* look up to, the ones whom we never
>thought would let us down, those bowtied wonders who are otherwise
>unemployable, the A.R.R.L in NewingClown, Conn. admitted
>the 'boys' into *our* club. Try this next time (seems I told you this

They gave them "affiliated" status. So what? Each (or almost every)
member of LARC individually joined ARRL, so what's the big deal? Does
that mean that the ARRL approves of their lifestyle? No. It means that
the LARC met the requirements for being an ARRL affiliated club, just
like the Ocean Parkway ARC might (if I bothered to form it). You don't
have to attend the LARC meetings if you don't want to, and they don't
have to attend the Stupid People's ARC meetings, either. Guess what? Said
LARC members passed the FCC exams to become licensed amateurs, and many of
them even hold driver's licenses. Some of them may even enjoy fishing, and
join fishing clubs? So what?

By the way, the "our" in "our hobby" includes those gay amateurs as well.
If you feel that the ARRL has let you down, you can always vote with your
feet and drop your membership.

>1. Read.
>2. Think.
>3. Type.

Indeed. I would strongly suggest you start.

>: Fine, and you do the same. Never mention your sexual desires, leer at women
>: (or men, if that's you're thing), or do any of the such. After all, the sex
>: thing doesn't belong in your radio club!
>Jerry, did your daddy work at a cinder block company ? I'm starting to think
>so cuz your head is hard as a brick. This discussion is *not* about sex.
>Sex is normal. If a boy does it with a girl. I don't need to mention my
>sexual desires at a radio club meeting, Jerry Boy, my wife takes care of
>all of those in the privacy of our own home, thank you very much.......

Like I don't care if your wife or your wife's dog takes care of your sexual problems. Why are you throwing it in my face? How can you be so dense about it? You're complaining about LARC throwing their sex acts in your face, and here you are throwing yours into mine.

A moronic hypocrite. Well, it is to be expected.

>Again you have verified the fact that you are totally unaware of why this
>discussion even started. Let me refresh your feeble memory, in the hopes

Actually, I've been following it from the beginning. I'm responding to specific points in your (ahem!) argument to show how inane they are.

>that this may lower your blood pressure a bit. The gentleman who wrote
>the *original* post concerning LAMBA was upset about the fact that the
>ARRL had made them an affiliated club, i.e., the ARRL by admitting them
>as an affiliate was condoning their activities when in the past the
>ARRL had refused their advertisements in QSTreet ragazine, probably

Right, and ARRL shouldn't have done that. LARC money is as green as yours, right?

>because of their perverse sexual activities. Read that 3 or 4 times,

Get this through your head (if you can). LARC isn't about sexual activities. It is about similar people getting together to talk about (and work on) radios. NOT about sexual perversions, or about Purity of Essense, or whatever.

>think about it for five or ten minutes, and then explain to us where it
>says 'Homosexuals shouldn't be allowed to have their own ham club'.

So if they are allowed to have their own ham club, why can't it get ARRL affiliation? The club meets the criteria.

>Neither is ham radio. But who needs it anyway ? As long as we have
>guys like you that will take an opposite point on any subject, we can
>all have a *new* hobby - arguing on the information stupid highway.
>That would solve this discussion also, because if you are in fact,
>a fudge packer, I would *much* rather talk to you via email that at
>a ham club meeting anyway.....

Like I said, I could give a rat's behind whether you think I'm gay or not. I don't take an oppositive point on the subject for kicks and giggles, but because I can't let moronic comments go unanswered. Besides, what makes you think that, were I gay, and we met by chance, I'd try to "convert" you? I'm not into necrophilia in any case, and it's pretty clear that your brain died long ago.

Ever heard about any *heterosexual* bath houses in San Francisco ?

There were many bath houses in SF that didn't have any requirements as
to gender or sexual orientation. You're as ignorant of this as you
are about many other things.

It appears that the choice of the "boatanchors" name represents a certain amount of childish mischief, deliberately intended to compete with an existing mail list and create a certain amount of confusion. There already is a Boatanchors list covering exactly this same subject. This proposal was put forward by people who admit that they were unhappy that this mailling list began charging a subscription fee.

If this were a commercial business, then trade mark privileges would apply and the proposed newsgroup would have to find another name.

As a matter of common courtesy, this proposed group should choose another name. There are a lot of obvious alternate candidates from the colorful (such as "doorstops") to the descriptive(such as "tubes").

The campaign for the "boatanchors" name only looks like sour grapes.

From: "Bart Jahnke, KB9NM ARRL/VEC" <vec@arrl.org>
Subject: US License Examination Opportunities Scheduled 5/6/96 through 9/9/96

You can Email the ARRL/VEC (or this page's content administrator) at "vec@arrl.org".

****

Have you recently passed your test? Find out your new call sign and/or license privileges using the following World Wide Web URL (or by using the phone number shown below):

http://www.ualr.edu/doc/hamualr/callsign.html

At ten (10 days) after the test session call 860-594-0300.

****

AMATEUR RADIO EXAMINATION OPPORTUNITIES

****

Want to find out what if your new FCC license has been granted?
Has it been 10 days since you took you examination?

If so, Call ARRL at 1-860-594-0300 (8 am to 5 pm weekdays, eastern time) to find out. We suggest that you not call the FCC (should you choose to call the FCC at 1-800-322-1117 during business hours, be aware that their number is normally busy).

Your hardcopy (printed) license would follow shortly after the license grant is indicated in the FCC Amateur Service data base.

If your test was coordinated through the ARRL/VEC, license turnaround time will be approximately 7-15 days. This includes 1-5 days for the VE team to complete their processing (the team has up to 10 days before they must mail the results), 3-5 days between the VE team and the VEC; 2 business days at the VEC (in some cases only 1 day); and 1-3 business days at the FCC. Allow 5 business days from the date that the VE team estimates the test session results will reach the VEC.

****

NEED AN FCC FORM 610?

The ARRL/VEC can supply you with your needed Forms 610, whether they be for the Reciprocal Permit for Alien Amateur Licensee, Form 610-A; Club/Military-Recreation/RACES station, Form 610-B;

or Form 610 for Amateur Operator/Primary Station License. FCC Form 610-R is a computer generated renewal form that will be sent from the FCC (beginning September 1995) to licensees whose license is to expire within 90 days. Form 610-V is the special application for persons seeking a Vanity call sign (see below).

Several FCC forms, including Form 610, are available through the FCC's fax-on-demand service by calling 202-418-0177 (request form "000610" for Form 610, form "006108" for Form 610V).

You can obtain FCC Form 610V along with FCC form 1070V and FCC vanity call sign information fact sheet PR 5000, number 206v) by writing ARRL, 225 Main Street, Newington, CT 06111. You must include an SASE.

Form 610V also is available from the FCC via the internet at

http://www.fcc.gov/Forms/Form610V

or

ftp://ftp.fcc.gov/pub/Forms/Form610V/

The FCC Forms Distribution Center will accept FCC forms requests by calling 800-418-3676.

****

STILL NEED TO PREPARE FOR YOUR EXAM?

If you would like information on how to become licensed; or how to locate Amateur Radio clubs, instructors, licensing classes and/or Novice examiners in your area; please contact the ARRL Educational Activities Department (EAD) at 860-594-0301. The EAD can also provide information on recommended study materials. Electronic mail may be forwarded to the ARRL EAD via USENET at "ead@arrl.org" or via MCI Mail to MCI ID: 215-5052.

****

THINGS TO BRING TO EXAMINATIONS

Bring a photo ID along with a second form of identification (else bring two non-photo forms of ID); bring your original FCC license and a photocopy of your license (if you are currently licensed); bring the original and a copy of any Certificate(s) of Successful Completion of Examination (CSCEs); if necessary, bring a scientific calculator (that does not have the ability to store formulas); bring a pen and two pencils; and be sure to bring payment for the test fee if charged by the VEC.

****

EXAMINATION CREDIT IS AVAILABLE AS FOLLOWS

By presenting an original, current FCC-license, the following exam credit will be conveyed to the applicant by the VE Team:

Novice - Elements 1A and 2
Technician (dated after 2/14/91) - Elements 2 and 3A
(*)Technician (dated before 3/21/87) - Elements 1A, 2, 3A and 3B
Technician Plus - Elements 1A, 2 and 3A
General - Elements 1B, 2, 3A and 3B
Advanced - Elements 1B, 2, 3A, 3B and 4A
Extra - All elements

Footnote:

(*) For grandfather Element 3B credit, only an original license or a copy which was issued on or before 3/21/87 is acceptable by VEs. VECs may be able to allow such credit based upon an original CSCE issued on before that date which shows Element 3 credit for passing the (then) 50 question Technician/General written test. If such documentation has been destroyed, the FCC will itself issue the necessary verification. To obtain such verification, acceptable by all VE Teams and VECs, write to FCC and request a "Letter of Verification of Technician License Held Prior To March 21, 1987". Mail (or fax 717-337-1541) your request to: FCC, 1270 Fairfield Rd, Gettysburg PA 17325-7245. If you include reference to a fax number in your reply, the FCC will fax your verification letter to you. Normal turnaround at FCC is 3-5 business days after receipt.

By presenting an original Certificate of Successful Completion of Examination (CSCE), the following credit is conveyed:

* For Technician licensees: A CSCE showing Element 1A, 1B or 1C credit qualifies the holder for Technician Plus HF privileges. The CSCE may have been issued more than 365 days earlier.

* For others: A CSCE issued up to 365 days earlier conveys credit for the element(s) shown as passed. A Physician's Certification on a Form 610 is acceptable by a VE Team for 365 days after the Physician's signature date. Once accepted by the VE Team, assuming the applicant qualifies for a General or Advanced license, a CSCE is issued showing Element 1C (or "Physician's Cert. and Release: 1C") credit is valid for 365 days toward an Extra class license.

****

The following test session information is provided by the ARRL/VEC for the upcoming eight to twelve week period. For further information, please contact the test session CONTACT PERSON at the telephone number provided. If necessary, you may contact the ARRL/VEC at 860-594-0300 for additional information. Electronic mail may be forwarded to the ARRL/VEC via USENET at "vec@arrl.org" or via MCI Mail to MCI ID: 653-2312 or 215-5052.

Although the test session information presented here does
not indicate whether walk-ins are accepted or not, most test
sessions do allow walk-ins. We encourage you, however, to
always contact the CONTACT PERSON at the telephone number
provided so that the VE Team is aware that you be attending
the test session.

EXAM LISTINGS - DEFINITION OF FIELDS
